

To Whom It May Concern,

I would like to share my educational experience at ITT in Newburgh, Indiana. I attended the (b)(6) I graduated at the top of my class and was inducted to the National Honors Society. Before attending ITT I was a high school drop-out, but received my (b)(6) and went to IVY Tech for one year. During my time at IVY Tech I began research into various nursing programs in the local area. I found ITT was exactly what I was looking for in a program, small class sizes, great location, knowledgeable instructors, and a variety of resources available.

ITT has made me the (b)(6) I am today. My classroom experience allowed me to learn the basics of my (b)(6) and shaped my critical thinking skills. The instructors I had truly cared for their students and myself, these instructors went above and beyond their job description to provide an opportunity for all students to succeed, in and out of the classroom. The clinical education opportunities provided were rich with hands on skills, real life problem solving, and provided the essential education I have relied on as an (b)(6)

I feel that the most important part of my education was not the classroom work or even my clinicals, but the guidance and encouragement I received from the instructors, campus director, staff, and the LRC staff. (b)(6) (b)(6) and many more, taught me to be confident, how to study, and most of all how to be a (b)(6) Without the staff at ITT, I would not be the success I am today.

May 3, 2016

Since graduation I passed my boards and accepted a position at (b)(6) (b)(6) as a (b)(6) I am currently continuing my education through (b)(6) to attain my (b)(6) in (b)(6) my graduation date is set for (b)(6). My goal is to complete my education and to give back to ITT as an instructor and continue my role as a (b)(6) ITT did more than give me an education, the people at ITT gave me a future.

Thank you for allowing me to share my experience with ITT. I appreciate your time and hope this letter allows others to see how wonderful the campus and staff are at ITT Newburgh, Indiana.

5/3/2016

Dear to whom it may concern,

When I first was concerned about continuing education after almost 20 years away from school, I was definitely frightened. I knew that the world was passing me by and I had to do something for myself, as well as be an example for (b)(6). As a (b)(6), I know firsthand how tough the workforce can be and something had to be done not only for my children but for myself. After reviewing several technical colleges which seemed to be more my speed with two jobs and (b)(6) something about ITT touched me. As small as this institution is, it gave me comfort to know that there would be more individual attention and that I wouldn't get lost in the crowd. Upon talking with recruiters and meeting some of the old alumni with success stories, I was sold. Nervously attending my associate's courses, I was very impressed with attention to detail that instructors had noticed that not all students here were kids fresh out of high school. These were people my age and older looking to better themselves in an environment that met requirements that we could all still hold our jobs, provide for our families, and still receive a quality education. After two years of critical thinking and adapting my life to bettering myself in a field of electronics technology, I feel that the knowledge, friends, and experience gained would carry me further in life than I ever thought possible.

ITT has so much to offer when it comes to help with homework and many resources, such as computer labs, virtual libraries (for research), and I will never forget the instructors and staff for their tireless efforts to meet with us before or after school to ensure that we understood what we were

learning. When I graduated with an associate's degree with highest honors, I wanted more, the hunger for knowledge and direction in life was exhilarating. During my term in the associates, career services aided in my search for the ideal career for me within my area. With so many options in hand, it gave the opportunity to be the picky one and not settle for what's left. ITT had set me up with (b)(6) which has utilized my skills, and even evolved my education to surpass what I thought I was capable of. I am now a (b)(6) which requires assembling, tuning, and creating new RF filters for TV, FM, and cellular communications globally. I am also (b)(6) in my department in as little as two years. Knowing that I still wanted more from myself educationally, and in constant contact with ITT to have available a bachelors program in electronics technology, in which I am currently enrolled, the sky's the limit. I am truly blessed to take the leap for self-betterment, and not to only look for a job but to find a career that may last a lifetime.

I am forever indebted to ITT and the staff for not discouraging my path on a better future not only for me but for so many others that have that same desire. I greatly appreciate the chance to voice my heart for this life changing educational experience, which hands down exceeded my greatest expectations and continues to do so.

Deepest regards,

(b)(6)

Stanley Hatfield (b)(6)

To Whom It May Concern:

The purpose of this letter is to discuss my educational experience at ITT.

I am a graduate of the (b)(6) at ITT in Newburgh, Indiana. I was part of the second class in this new program. If you ask any (b)(6) they will tell you that (b)(6) is full of stress and lots of tears. They will also probably tell you that faculty can make this difficult journey better or worse. A lot of (b)(6) will share that nursing instructors seem to feel that it is their job to make it harder. What I found at ITT with our instructors, was that they wanted each of us to succeed. They made themselves available to us no matter what our questions or problems may have been. They shared our tears and our achievements each step of the way. Our classes were always filled with learning and opportunities to grow as future (b)(6) and colleagues.

Since graduation in 2011, I have completed my BSN and MSN. I am a (b)(6) at (b)(6) (b)(6) I plan to further my education and continue to reach higher, as I was shown was possible through wonderful role models at this school.

Thank you for allowing me the opportunity to share my positive experience at ITT.

(b)(6)

Melissa Maxwell, RN, MSN

Wednesday May 4, 2016

To Whom It May Concern,

I am writing to share with you my personal educational experience at ITT Technical Institute in Newburgh, IN. I am a (b)(6) graduate of the (b)(6)

(b)(6)

I am currently employed with (b)(6) and hold a full-time position as a

(b)(6)

I have been

employed concurrently with this company and at this facility for approximately 3.5 years.

Upon graduation I transitioned into my role as a

(b)(6)

as a

(b)(6)

I strongly feel that the education I obtained from ITT Technical Institute readied me for my current career as a (b)(6). There are many aspects of my schooling that personally aided me throughout my time at ITT Tech. If not for the educated staff, individualized instruction and mentoring I received, hands-on clinical and classroom experience and the challenging curriculum, I do not believe that I would have been so well prepared for my current career. The staff and (b)(6) instructors at ITT Tech were outstanding. Everyone whom I had the pleasure of learning from went above and beyond to ensure that I was provided with the best education attainable. Whether I required further explanation on a lesson, assistance acquiring materials for a research paper, or additional guidance in the clinical setting, all of my instructors were knowledgeable, accommodating and amiable.

It is a compilation of the quality education I received, the support of my classmates and instructors, along with my hard work and dedication to achieve my personal goal of becoming a (b)(6) to which I owe my current success to.

I greatly appreciate the opportunity to share my personal educational experience with you. Thank you for your time.

Respectfully

(b)(6)

Lorraine L. Mayes

Jerry L. Smith

(b)(6)

To Whom It May Concern:

My name is (b)(6) and the purpose of this letter is to talk about my educational experience at ITT. My experience at ITT has been for the most part very positive. As with any school and student relationship, there have been some minor problems with class scheduling. The staff at ITT has been very helpful when assisting me with those types of problems. When I have come to them with my scheduling conflicts, they have treated my problem as if it was their own and worked to solve it quickly. The open door policy from the top down really holds true at my school.

When I started my college career four years ago at ITT, I was (b)(6) and working full time as a (b)(6). During this time I was also trying to get my own tree service company started. I was concerned that my age and time constraints would be a problem. Those concerns were quickly mitigated during my new student orientation. During the orientation I was welcomed to the school in a way that made me feel like my education was important to them. One of the main benefits of attending ITT is that the number of students in each class is relatively low. The small class size allows for more hands-on communication between the students and the instructors. The instructors I have had while attending ITT have been exceptional and the instructions I have received from them has given me the confidence to succeed in my field of study. The educational resources provided by the school like the labs and the LRC have been incredible. The LRC (learning resource center) at ITT is staffed with quality knowledgeable people that have played a large role in my success at this school.

Thank you for allowing me the chance to talk with you about my experiences at ITT. Now that I am nearing graduation, I am positive I have made the right choice attending ITT Tech.

Sincerely,

Jerry L. Smith

(b)(6)

ITT Technical Institute, Newburgh Indiana campus

May 2, 2016

To Whom It May Concern:

I am writing this letter to share my experience at ITT Technical Institute. I am a student at the ITT Tech campus in Dayton, Ohio.

Since I have been here, I have learned a lot from my instructors about my field of study which is (b)(6), and also about life in general. Our group theory class just completed a Build a Bear project that provided bears for children who are patients at Dayton Children's Hospital. This project taught me the value of giving back to the community and to be thankful that (b)(6)

I will be graduating on (b)(6). The education I have received from ITT Technical Institute has prepared me for the position of (b)(6) that I start on May 9th. This job will not only provide the opportunity to apply the education I have learned while attending ITT Technical Institute but also to help provide for my family.

I appreciate everything that the staff and faculty have done during my time at ITT Tech. I have received support to help me achieve my goal of being a college graduate and get a good job in my field of study.

Sincerely,

(b)(6)

Christopher Ryan

(b)(6)

May 3, 2016

To whom it may concern,

My name is (b)(6) and I will be graduating from ITT Technical Institute in (b)(6). I will be graduating from the Dayton campus with a degree in (b)(6). I am now working at (b)(6) in their B&O or build and overhaul department.

My time at ITT Tech has been a hard one, but I would not change a thing about it. The long nights at class and then the homework. The days of class for me were waking up at 04:00 to get ready for work, and not getting to bed until around 01:00 the next morning to do it all over again. On three days out of the week I did not see (b)(6). But again I would not change a thing because I now have a great job thanks to our wonderful person in the career services department. Melinda took the time to help me find not one but two jobs. The second being more representative of my degree.

These last two years have been long but yet rewarding I have been a part of a few clubs at ITT Tech. I am the President of NTHS, was the Vice President of the ITE club and have also helped out with repairing radios for Goodwill Easter Seals for one of their programs to help out the blind and hard of seeing client's. I have grown a lot from my time here at ITT tech. I went from having a not so desirable job to one that I really enjoy, and from not really liking where I was in my life to having time to spend with my family and not having to worry about how I'm going to pay my next bill.

Thank you ITT Tech.

Respectfully yours,

(b)(6)

Kenneth Brown

May 2, 2016

To whom it may concern,

My name is (b)(6) and I am a graduate of ITT Technical Institute. I graduated from the Dayton Campus in (b)(6) with a degree in (b)(6). I am now a (b)(6) for (b)(6).

ITT Technical Institute was a wonderful experience and I am forever grateful for the things that I have taken from this time in my life. Not only was the staff knowledgeable and helpful in the classroom, they also take an additional interest in who individuals are on a personal level, which is an everlasting impression.

Three days following graduation (b)(6), I was able to continue working full time as well as attending school full time to accomplish my goals and make a better life for my son and me. Eight weeks after (b)(6) I was scheduled for my first interview in the professional world as a graduate with the help of the career services department. Not even a week later, I was offered the position. I would not be where I am today if it was not for the education and resources ITT Tech provided.

When I was given the opportunity to express my gratitude, I accepted without hesitation. For the first time in my life, I not only enjoy my job, but feel as if it is absolutely perfect for me and look forward to what I can do for my company. The education that I obtained was appropriate and accurate for my job field and I love to incorporate it into my everyday life.

Thank you ITT Tech!

Respectfully yours,

(b)(6)

Wesseier, Kaitlyn

(b)(6)

May 2, 2016

To Whom It May Concern:

I am writing this letter to share my experience at ITT Technical Institute. I am a student at the ITT Tech campus in Dayton, Ohio.

I have learned a lot from my instructors about my field of study which is (b)(6)

(b)(6) I am currently working in my field as a (b)(6)

with (b)(6) that I started on March 28, 2016. This is my second job in my field, the first being a job through a temporary agency that gave me the student professional experience and helped me get my current job.

While here at ITT Technical Institute, I was able to meet new people and acquire new skills that benefit me in my job. I also learned communication skills that are necessary in a professional environment. I appreciate everything the faculty and staff at ITT Tech Dayton have done to ensure my success both in education and life. I don't graduate until (b)(6) and have been able to secure a job that will help me exceed my goals in life.

Sincerely,

(b)(6)

Thomas Manoussakis

To Whom it may concern,

In reference to ITT Technical Institute of Dayton Ohio, located at 3325 Stop 8 Rd, Dayton, OH 45414 educational accreditation, I would like to express my opinion as to why they should be considered to continue to have this certification.

My name is (b)(6) I attended (b)(6) and am now employed at (b)(6) as a (b)(6) (b)(6) I am so proud to have this title and to be employed by this company. None of this could have been possible for me to achieve without ITT and all the staff members that I encountered along the way.

When I entered ITT in the Spring quarter of 2015, I had been working in the food industry and desperately needed to turn a new leaf for myself and family, (b)(6) its hard on minimum wage. Before I started ITT, I possessed no real professional traits except knowing how to carry myself and dress for the occasion. ITT changed all of this for me. In the classes that are required for everyone to take, I learned how to be a professional and communicate at a professional level. The knowledge that I took home was vast, complete and on a fast track but, the instructors where prepared for our questions, problems and obstacles. Teaching in a fast track environment the instructors balanced the students that caught on and the ones that needed more help, well.

In my fifth quarter career services arranged an interview with (b)(6) To get me ready for this interview I had classes that taught the basic skills of an interview and what employers look for. Nothing helped more than the Career Services staff, mainly Ms. Melinda Jefferies. Before my interview we sat down and did a mock interview, made sure I was ready for the occasion, and she even gave me tips that I had never heard of. The best example is to research the company, try to know more about them then they may know about themselves. She always seemed to make herself be available if anyone had questions about an upcoming interview. We also did mock interviews in another one of our classes.

ITT education and everything they offered was absolutely a pleasant experience and they readied me for every aspect of my career change from education to the interview. I would recommend this school to anyone thinking about changing their life.

This school would not be able to continue to change lives like mine if they cannot continue to carry this accreditation. Please feel free to contact me with any questions about my experience with ITT and their faculty.

Sincerely,

(b)(6)

Lauren Maloon

(b)(6)

The thing I like most about ITT-TECH is the hands on training, the labs really help you get a perspective of how too visually, and mentally complete what you have learned. The instructors are more than willing to help in any situation. They are very helpful and courteous in class and out. The training we receive here will help with our career choice. The materials needed to do your labs and research papers are at your disposal. Instructors are even willing to come in on their off time to help students if needed.

(b)(6)

5-3-16

What I like about ITT is that you don't only learn by listening but by doing. I like that they are hand on training. The staffing at ITT are very nice and friendly. They are always greeting you with a smile. I like that classes are not too full so that way the teacher can help you if you need. ITT provides a safe and quiet lab space for you to work in. ITT is a good school to attend they have a good staff and is a very safe place. What I also like is that ITT offers you enough time to get your work done and still have a life outside of the class room. I always feel welcome and stress free when walking through ITTs doors.

(b)(6)

5-3-2016

What I like about ITT is that the Teachers are really nice. I like that they will go above and beyond to help you to make sure that you understand what you are doing. I like that they reach out to you to let you know if you are falling behind or let you know what they think you need to work on. I like that most classes are two week modules so it helps you to have a life, work, and still make sure you have time to do your work for class.

I like that ITT is available for you when it is needed. The labs are quit and is a good place for you to do work and study at. Also as studying (b)(6) I like that the labs with the equipment is available for use whenever you need.

I feel that ITT is a good school to attend because not only are the facility and staffing nice but the students are also very nice. ITT to me just puts off a happy and friendly vibe that I like. I like that I can come to class and not be judged on what I do or don't know.

(b)(6)

5/3/16

Derrick Martin
5-3-16

Dear Mr. Kent Walker,

I must say that being at this school has given me an opportunity for a future and not just a "job", a career, which will be beneficial for my family in the years to come. ITT-Tech has shown me that I can learn something new, useful, and can be a successful career. This is my reason for attending ITT-Tech. The teachers that I have had for the most part were very knowledgeable about the topic that they taught, the hands on training in the labs are useful tools for you to take with you after graduation, the software available to us, and the books that we are given are some great tools.

(b)(6)

May 4, 2016

To whom it may concern,

ITT/Breckenridge school of (b)(6) has truly been a blessing to me. I had pondered in the past about furthering my education from a (b)(6) for many years. The biggest obstacle for me is that (b)(6) and needing to maintain my full time employment status for insurance purposes. This school offered the flexibility I needed to further my education.

Not only was the class flexibility found at this institution but a wonderful nursing faculty that has invested themselves in their students. As with any higher education facility there are always hurdles, struggles and growing pains, but overall I am extremely grateful and pleased with the education I have received thus far.

Thank you for your time.

Christine A. Harber N.S.

(b)(6)

To whom it may concern,

I am a (b)(6) student in my senior quarter and I just want to say that I have had an overall positive experience in this program.

I believe this campus has a very valuable group of staff beginning with the admissions team. Brandy has always been very courteous and helpful to me as well as Linda Lynn.

The librarian Tammy is very helpful and knowledgeable.

The nursing instructors are all amazing, smart and very dedicated to teaching us everything we need to succeed and pass our boards. I am so glad I was a part of Gretchen's class and clinical experience. I learned so much from her not only as an instructor, as a (b)(6) but also as a human being, she is amazing. I also want to acknowledge Marie, she is a very thorough and very knowledgeable (b)(6) instructor. This school has a lot of key people to keep the program afloat.

Thank you,

(b)(6)

Bernarda P.

May 3, 2016

To whom it may concern:

Hello. I'm Sarah Coffield, a student at ITT Tech (Fort Wayne Campus), (b)(6)
What I really enjoy about our school is the student focused teaching that stems from the compassionate instructors we have. One particular instructor, Gretchen Jenkins, is very passionate about seeing each nursing student succeed in that they provide the utmost care to future patients and are accountable for going above and beyond the expectations of nursing. Also, each person that makes up the campus body (staff), is very helpful in helping each student understand and reach their potential. The smaller classes are better for student involvement and understanding. We truly have very good instructors that are shaping our future, and that is what counts!

Sincerely,

Sarah Coffield,

(b)(6)

Student

To whom it may concern,

As a nursing student at ITT-Tech Fort Wayne I am pleased with my education. The instructors care about their students above and beyond passing and failing. I have had instructors tutor me when needed, and celebrated my victories throughout. It is nice to not just be a number in terms of my learning. All of the (b)(6) instructors know my name regardless if I have had them as a teacher. The program is a difficult program as all (b)(6) schools, but this being said, it is a structured (b)(6) program. In the clinical setting, (b)(6) professional are pleased to see our clinical group come though. It is not uncommon to overhear (b)(6) on the floor talk about our school in high regards. I am a fulltime (b)(6) and student. ITT makes school "do-able."

Thank you for your time

(b)(6)

Anna Johnston (b)(6)

To Whom It May Concern,

Hello, my name is Shondeen Miller. I am currently a student at ITT Technical Institute. I am in my Bachelor's degree for (b)(6) at the Murray Campus in Utah. I am employed at (b)(6) (b)(6) ITT Technical Institute has helped me change my life and way of living through starting my Associates in (b)(6) (b)(6) I then graduated with my Associates Degree in (b)(6). They helped me find a job shortly after graduating. I had and still have very knowledgeable instructors teaching me the course materials and was very impressed with how much I picked up from them. Before my associates degree I was not making the money I wanted to be making, knowing that I could be making more. I (b)(6) towards the ending of my degree, and knew if I kept up my work I would graduate and find a good job I could (b)(6) with. I stuck with it and graduated on time. It has made me more comfortable knowing that am able to (b)(6) (b)(6) because of my degree I got here at ITT. With my associates degree I had a very good experience with the instructors that taught here and the staff. Now with my newest instructors I am still very pleased with the way they teach and how informative they are by including real life experiences with what they discuss. They always kept me up to date with my F.A.S.F.A and other activities around the school. I was always able to get a copy of my books for the upcoming quarter, and if they didn't have it in stock at the time, they would order more so that when classes did start, I was prepared with the right materials. The instructors were easy to work with and very understanding. They are committed to what they teach and how they taught it. I would have to say my main classes that pertained to the degree were very fun and exciting, the instructors made it even better, the other classes were helpful in preparing us for the next set of

classes to come. They knew what they were talking about and were very in-depth with what the students should know before taking a test. The computers were pretty good at allowing us to use the different applications and internet to get our homework done. When I had questions about anything a majority of the instructors could give me an answer, and this made it even easier to want to talk to any and all instructors. I really am very happy I got my degree here at ITT, they are willing to work with me or anyone else looking to get a degree, in spite of my lack of funds, which is why I used F.A.S.F.A, and still graduated. I will be graduating with my Bachelor's Degree next.

Thank you, ITT Technical Institute.

(b)(6)

Shondeen Miller

To whom it may concern,

My name is Connie Blake and I am a current student. I attend school on the Murray campus and am currently employed by (b)(6)

I enjoy going to ITT Tech because it's very hands on in labs as well as bright instructors. I have learned a lot in the field where I had no previous knowledge. Career Services was very helpful in finding a job. IT Support has been very helpful in fixing my laptop and finding textbooks. The academic support has been very useful during the first year of school explaining and simplifying some of the classes. Library Support has been helpful in finding key things for reports.

Attending classes every week has expanded the horizons and created better opportunities for me and my family's life. The family will hopefully be glad to have me out of school, spending more time making a living, and afford more things.

Thanks for the great opportunity, I will be back for the bachelor's degree,

(b)(6)

Connie Blake

May 3, 2016

To whom it may concern:

I write you this letter giving you incite in going to ITT-Tech for your education. First things first, ITT-Tech is like no other school out there. I have tried other schools before getting my degree from ITT-Tech in (b)(6) from the Murray Utah campus. The one thing that I loved about the instructors is that they do have an 8-5 job in the field that they are teaching. There was not a class period that didn't go by that the instructor talked about what they did that day and how this class is going to help us out. To this day I still keep in touch with some of my instructors and ask them questions. When I graduated in (b)(6) I had a job in the field with one of the bigger (b)(6) in the state. Come to find out that most of the (b)(6) come from the Murray campus. With my current job I am able to manage our drafting firm work load and our standards. At (b)(6) (b)(6) we also look at ITT-Tech first for any (b)(6) before we go anywhere else. We have been happy with the people that have come out of ITT-Tech.

If there is anything that you get out of ITT-Tech it will be one of the biggest network of people that are more than willing to help you succeed in your professional carrier. I can go to the Murray campus anytime and talk to carrier service or even my recruiter even though it's been 5 years since I went to school. I have made great friends for Amy Jepson, recruiter, to the Director of the campus. All of them always ask how they can help students. I have been asked to be on their Advisor committee that meets twice a year, to discuss how they can better prepare students for their carriers.

I hope this has helped you in understanding how ITT-Tech in Murray has helped me out in my life and carrier.

Sincerely

(b)(6)

Shadd Johnson

(b)(6)

Hi, my name is Siniholani S. Talanoa and I am a successful alumni from ITT-Technical Institute. In (b)(6), I received my (b)(6) and it has been a ride of my life since then!

Right after graduation, I started as an (b)(6) and starting at that position I was able to double my salary. The (b)(6) at the time was blooming and going strong. The demand for (b)(6) were on the rise! If I didn't take on the challenge in gaining an education through ITT-tech, I honestly wouldn't have been as prepared to take on the high demands and challenges the oil field had to offer at the time. I was able to negotiate my time and salary due to the degree I had. Just being able to have a degree in my current field, I now had a voice. As I walked around my team members I was able to receive a greater respect just because of the position I held and the tremendous sacrifices that I went through achieving my degree, pays off at the end! My whole life I was treated as the muscle of the group. I was told to lift here, lift there and take on challenges that were physically demanding that I could feel the wear and tear as I would return home. After great sacrifices for 4 years attending ITT-Technical Institute, I am able to stand above the tough physical labor and take on higher and greater challenges using my brain muscles. Executing and exercising the knowledge obtained during those long nights in lab and trying to figure out solutions during late hours. No matter how painful, it actually strengthens your brain and prepares you mentally to make complicated decisions and solve complex problems when your body is physically drained.

As the (b)(6) was taking a dive, so were the hours and soon, the company (b)(6) shutdown on a Thursday, I called an individual that I had the privilege to meet with previously about another job and we arranged a meeting on the Monday coming up. I moved my family back to the valley that Friday, had that meeting on Monday and was hired the next day as a (b)(6). In all honesty, I wouldn't have been capable of pulling that off with just a high school diploma. I currently work for (b)(6). I overlook the production team and lead group and team meetings every week. I manage their inventory and find solutions to minimize costs and fixing machines on their first visit by assisting techs with troubleshooting skills and different ways to approach problems and symptoms. All of these were knowledge and skills that I always had, but ITT-Technical Institute opened multiple doors to where I was able to channel them and focus on my weaknesses and strengthen them which gave me strong confidence that I am able to strengthen further weaknesses down my career path.

I would like to thank ITT-Technical Institutes staff and instructors for taking the time and energy to help assist me become the man I am today. I am a better and more confident person, employee, father and husband due to the teachings of all those there! I highly recommend ITT-Technical Institute to anyone that are willing to become a better, stronger and reliable person everywhere that you may reside! Knowledge is truly Power!

(b)(6)

To Whom it May Concern,

I am currently attending classes at the Murray, Utah campus. While I have been attending class as your school, I have developed a great number of new skills that I currently use in my work position and have begun a career into (b)(6) and it is no small part to the teachers, the class curriculum, and the great support and help of the career center.

I know for a fact that my choosing your school to educate me over the local Universities was the best decision I could have made for both myself and for my wife and two sons. With the education I received at your school went way beyond the typical associates' degree level classes then anything I could have had at this level at any other school. And, I am confident that I would not be working in my field of study if it had not been for ITT-Tech's help. The teachers there are fantastic and informed, and I was able to see first-hand the difference between being taught by someone who is just an educator, or by someone who is actually working in the field that they are teaching.

Truly, your school is unique and super effective in your techniques and methodology, and I applaud you for educating students the right way!

Sincerely,

(b)(6)

May 2, 2016

To Whom It May Concern:

I am Mathew Foster, a student at ITT Technical Institute in Murray, Utah. I am currently in the process of working on completing my Associates Degree in (b)(6). I have enjoyed being able to associate with many wonderful instructors that take the time educate me on the concepts that are taught. They have taken the time on several occasions to tutor me one-on-one to help me understand the material.

At the beginning of my studies, I went and talked with the career center to help me find a job in my field of study at ITT. They requested some information from me and went to work looking for entry level positions in my desired field. My field is not easy one to get into, but with the dedicated of the career center, I was able to be success in finding a job as a (b)(6) before I have even graduated with my degree.

I do highly recommend ITT Technical Institute Murray Campus because of the dedicated of the staff helping student find success with learning the material to help them find a job in the field of study. The only way that a student does not succeed, is when they do not put forth the effort to learn.

Sincerely,

(b)(6)

Mathew Foster

Melony Peacock

Breckenridge School of Nursing

ITT-Tech

May 4, 2016

I started the (b)(6) program at ITT-Tech in September, 2014. I like the program because it is a small environment and I like the interaction I have with the instructors. The instructors want us to succeed so I am not intimidated to ask for help. The instructors are available for any help we may need and they encourage us to seek out help. Early in the program we were introduced to care plans and that was helpful because it prepared me for the work we were going to do once clinical started in the fourth quarter. The instructors have encouraged us to start preparing for the (b)(6) from the very beginning. I like the access we have to virtual library and the availability of the librarians any time I have questions and need help with a research project. The experience I have had in the nursing program is overall good. I am looking forward to graduating and becoming a registered nurse as I have always dreamed. The nursing program is helping me to achieve my goal.

(b)(6)

I'm a student currently enrolled in the (b)(6) program at ITT Technical Institute in Earth City, MO. My experience here at this facility as a student is AMAZING. Every one of my instructors both (b)(6) and general education have prepared me to where I will be successful in the field of my studies. I have been offered a job with the facility that was of my choosing and I'm proud to say that I owe a lot of that to the very staff at ITT Technical Institute in Earth City, MO who helped groom me to be the confident (b)(6) that I know I will be. We are asked in our surveys if we would recommend this school and program to others and my answer is always yes. The entire staff works well together and in a timely and professional manner.

Sincerely

(b)(6)

May 2, 2016

To whom it may concern,

I am writing in regards to my educational experiences while attending ITT Technical College in Earth City, MO. I feel that the overall experience was a success. I came in with very little education, having barely graduated from High school and through great guidance I became a great student. I received one-on-one guidance on various occasions throughout my years at ITT, and was very grateful for the instructors that took that extra step and making sure that I was able to succeed. I became a better speaker and more confident business person and have landed a career at (b)(6) as a (b)(6) which has brought me great success over the past year. School was a struggle at times, but can honestly say that the long road was worth the wait. I have gained so many important life skills that are enabling me to succeed within the company, if I had not attended college, I do not believe I would be where I am today.

Respectfully,

(b)(6)

Patrick Edwards

5/2/16

To Whom It May Concern:

My name is Steven Clark, and I am a Bachelor's student at Earth City, Missouri. I am working on my (b)(6) degree. I wanted to express my personal experience here at this collage.

I would say my experience has been positive and negative. For me, the positives has been my instructors, advisors and my chair head. Most of my negatives has been from outside of the school. You see, here I have learn and grown as a student. I originally had no back ground in electronics and found myself interested. I pushed and worked here and have succeeded more than I thought possible at the beginning, being the top student in my class. I have a full time life of a (b)(6) a full time job as a (b)(6) and being a student. Only ITT would allow me this schedule. For me personally I went to SIUE and did enjoyed my time there however here, the smaller classes and hands on makes a huge difference for me.

The negative is from the outside. I have herd and dealt with other people calling ITT isn't a real school and not a real degree. That assumption infuriates me, I know the time I put in here. The late nights and burning the candle at both ends. The experiences I have had here, and the good friends I have made. It insults me when people think that way about this place. The place that helped me find my first real job in the field of electronics, or the first step in this exciting new career.

When I started, I set a goal for myself that I would come here and do so well that my story would be worth an ITT commercial that I saw on TV before. That I will make the most of every moment here and build a life with the education here as one of my cornerstones. I can never express the feeling of pride I have of my time here. Looking back at who I was before I started years ago now and the person I am today.

I am thankful for this opportunity to talk about my time here in this short letter, and hope that someone else can find the same experience I did.

Sincerely,

(b)(6)

Steven Clark

Antione Larry
May 2, 2016

To whom it may concern,

My name is **Antione Larry** and I attend ITT Technical Institute in Earth City, MO. I received my associate degree in (b)(6) and 3 weeks from receiving my Bachelor Degree in (b)(6). ITT has provided me with a foundation of professionalism and technology that has uplifted my efforts in finding a career that I love and see myself growing with. Attending this campus has giving me tools and the mind set to enter the workforce with confidence that I can climb the corporate ladder. Before ITT Tech, I had minimal technology knowledge. After ITT Tech, I have built several personal computers, trouble shot computer problems and now I'm working on a web page for my start up business.

Instructors at ITT have giving me an opportunity to shine. Mrs. Anderson has taught me that I have the power to make changes in my life and the world. Mr. Moss is a living example of how choices that I make daily dictate my future outcomes. Dr. Pashaie passion for engineering had me looking forward to coming to the campus and participating in the many labs that were provided. ITT curriculum was very relevant to my career and personal life. My journey with ITT, which was planned during my (b)(6) (b)(6), has been over fulfilled. The road taken wasn't easy, nothing worth it is, but at the end of this journey I feel like a brand new, educated, and proud almost graduate of ITT Technical Institute.

(b)(6)

2 May 2016

To whom it may concern:

My name is Keith Schmidt. I am in the Bachelor's (b)(6) at ITT Technical Institute at Earth City, Missouri. I completed my associate program in (b)(6) which allowed me to achieve employment at (b)(6)

In my current job I have utilized many of the skills and technical knowledge I learned at ITT. I switched to my current position at (b)(6) where I am employed as a (b)(6). I am currently looking forward to completion of my Bachelor's degree as it will better position me for a promotion, including a pay raise.

I thoroughly appreciated the Electrical Machines and Power Generation course as it directly pertained to my everyday activities and helped me to better understand what the engineers speak about on a daily basis. I also enjoyed the fiber optics class, even though I don't foresee using that in the near future.

I am proud to be a graduate of ITT. I think the ability to attend school while employed full time, the small class sizes, and the help from my instructors are instrumental to my success here.

Thank You for this opportunity to voice my opinion about ITT Tech.

Sincerely,

(b)(6)

Keith A. Schmidt

Scott Woodall

(b)(6)

5/3/2016

To Whom It May Concern:

I am a Bachelor's student at ITT Technical Institute School of (b)(6) (b)(6) at the Wilmington, MA campus. I graduated with my Associate's Degree on (b)(6). I have been working in the field since August 10th, 2015. The company I work for is (b)(6) and I am a (b)(6).

While at ITT, I learned a lot of new and exciting things. The instructors were all very knowledgeable, and would answer any questions I may have had. The time I spent during my Associate's helped prepare me for my current position. I find myself using the skills from ITT on a daily basis. The majority of the students who graduated in my school of study also decided to continue with their studies at ITT and pursue the Bachelor's Degree.

I graduated as Valedictorian of my class. In my commencement speech I stated:

"I'd like to leave you with this statement. I may be speaking up here because of my grades, but I did not work any harder than anyone else here tonight! Every graduate in this room gave it all they could to get to this point. The late nights, the early days, were tough. The work was difficult. The weather wasn't always our friend, but hey, it's New England. Balancing school, our careers, and our personal lives, is a feat worthy of praise because we are here, right now, getting a degree that proves that our hard work wasn't wasted. So applaud. Applaud your friends, your sons, daughters, brothers, sisters, husbands, wives. Let them know that you are proud to see them graduate, because that, in itself, is far greater to me than hearing one person give "thank you"s. I just realized I never introduced myself. Hello. My name is Scott Michael Woodall, and I am proud to have graduated from ITT Technical Institute. I don't just try for myself, I try for others, and I do my best to make sure that everyone gets the credit they deserve. Thank you for listening. "

I feel that the quality of the education I received from ITT was beyond my expectations. I would highly recommend any person wanting to further their careers in the technical field to attend ITT. Please feel free to contact me with any further questions regarding my experience at ITT.

Sincerely,

(b)(6)

Scott Woodall

(b)(6)

Cory Hasselmann

(b)(6)

To whom it may concern:

I have earned my Associate's Degree in (b)(6) through ITT Technical Institute, Wilmington, MA, and am currently enrolled in their Bachelors program for (b)(6)

I have recently secured a position at (b)(6). The reason I had that opportunity was because of the Career Services Department at ITT Technical Institute, who came across the opening and submitted my resume on my behalf. They have been beyond helpful in assisting my job search in my field of study. This is not the first position they have found for me or other students who attend ITT Technical Institute. I know of many individuals who would not have jobs in the Information Technology field without the assistance of the Career Services Department at ITT Technical Institute. That is just one of the great resources they have available. Their representatives are more than helpful as they go well beyond their call when assisting me. I have had two representatives at the Wilmington campus. The first one, when I first started, was named Akim. He was a great help in assisting me with transiting from the campus I attended in Arizona, ensuring all my credits transferred and my classes lined up so there was no issues in starting right back where I had left off. Akim moved on to a new position I was introduced to Eric, who became my representative as I moved on to the Bachelors program. He made sure all my classes were setup and again there were no hiccups in transitioning to the new program. They have been the most professional representatives I spoke to, out of all the colleges I spoke with. When I was searching where I wanted to attend the representatives at ITT Tech shined well above all others I spoke to and, most important, made me feel like a person, not just a number on their board. These are some of the people who have assisted me not including the Financial Aid Representatives, such as Mark and Jennifer, and also the Registrar, Owen, who had made my time here at ITT Technical Institute a wonderful experience when it came to the administrative side of things.

The lessons we are taught have helped with acquiring jobs and is not necessarily the administrative side. There has been a few teachers, who for me, have been beyond helpful in teaching me the necessary skills that will help me with the new position at (b)(6). From information technology side the two teachers that shined for me were Joe Souza and Mark Prestia. Mark and Joe taught me all the IT skills I will need to shine in my new position and move up the ladder. They taught everything from installing an operating system to creating full directories with numerous sites. However, it takes more than just reading a PowerPoint says to have a real experience with the Teacher and that is where the Teachers at ITT Tech makes the difference. The instructors work in the IT field themselves on a daily basis or did at least at one point for many years. Mike Prestia works for the (b)(6) managing their network systems and he relays a lot he learns from daily work with the current systems into his studies. So, when we cover a subject he then relates it to something he did recently in the field so that we are made aware of how it pertains to the systems currently in use. Joe Souza was also helpful whenever an issue arose that we were working on. Joe would troubleshoot the problem until you could get it working which made it much more personal than sitting in a room with a hundred other students. As for the General Education classes we attended, the Teacher that has been most influential would have to be Barbara Maddox, who taught me a lot in composition 2 and portfolio. When I was in Portfolio this is when I felt I received the most assistance since (b)(6) I have

always had a tough time with interviews and dealing with people but Barbara helped me tremendously with this issue. In Portfolio Barbara taught us how to go to interviews and setup a portfolio to show our work. This has been a huge weight off my shoulders when it comes to going to interviews and helping interviewees and customers in the field. The skills I have acquired in these classes, from these amazing Teachers, has been insurmountable in helping me acquire a position in the field and being able to handle interviews.

ITT Technical Institute Wilmington MA has been a tremendous asset in helping me transition from jobs in retail into a career in the Information Technology field. Also, I am currently in the process of completing my Bachelor's Degree in (b)(6). I would like to move into the Security side of the field which will open many more doors for me. I am proud that I attended ITT Technical Institute and look forward to graduating from here. Finally, I am looking forward to pursuing a new degree in higher learning.

Cory Hasselmann

(b)(6)

May 2, 2016

To Whom It May Concern:

My name is (b)(6) I am currently enrolled in the Bachelors of Science for (b)(6) program at ITT Technical Institute (Boston North), located in Wilmington, MA. It with great pleasure that I write to you to express how ITT-Tech has been the reason for my success at not only gaining my employment with (b)(6) where I am currently the (b)(6) but also maintaining and excelling at it.

When I first approached ITT-Tech during the fall of 2012 I was looking to change carrier paths, which with four children and nothing but a High School Equivalence Diploma, was a very daunting and nerve-racking thought to say the least. From the very beginning the staff at ITT-Tech greeted me with kindness and provided me with very detailed information about the study programs available at ITT-Tech. This provided me with a great amount of hope for my future. I enrolled immediately and after two hard years of studies, I completed the Associates program and had already been assisted in finding my first real position of employment in the industry as a Technical Team Lead with a prominent company providing remote desktop support for a vast range of clientele.

It was because of this that I continued on with my studies at ITT-Tech, knowing that I could reach higher goals, allowing me to have a career doing what I enjoy, as well as the ability to feed my family and feel accomplished. Since starting the Bachelors program at ITT-Tech, I amassed enough knowledge and confidence to move up in my career to obtain my current employment with (b)(6). Furthermore, it has provided me with the skills required to continue to excel in my profession. So much so that earlier this year TSB assigned me to its Cybersecurity Committee which is responsible for the formal creation and upkeep of the cybersecurity program for the bank. As Cybersecurity is a growing concern amongst all organizations, especially the banking industry, this is a great responsibility and a great opportunity for me. I could never have imagined being given this opportunity if it was not for everything I was taught at ITT-Tech.

In closing, not only has the curriculum at ITT-Tech been one to provide me with the knowledge I require to move forward and upward in my career but the instructors have shown me that ITT-Tech truly cares about those who are enrolled there. In my years at ITT-Tech I have grown to respect the instructors and have a deep admiration for them as well. I know that if I were ever to reach out to them, they would be happy to help me in any way they could. I truly feel that most of the instructors and staff, if not all of them, have a desire for all of us to learn and succeed, more than anything else.

Sincerely,

(b)(6)

Michael Rodriguez

To whom it may concern

I am a graduate (b)(6) from ITT Technical Institute in Wilmington, MA. I have been employed since I graduated by (b)(6) as a (b)(6)

I had a great experience as a student attending the Wilmington campus. My fellow students and instructors were helpful and knowledgeable. My time at ITT Technical Institute will stay in my memory as a positive and nourishing experience.

My capstone project consisted on a self-watering potting system which has the potential of commercialization.

The faculty made the curriculum exciting and interesting and encouraged me to expand further my education. I would be happy to be contacted as a reference by any person having further questions.

Sincerely

(b)(6)

Chris Stanton

(b)(6)

May 2, 2016

To Whom It May Concern,

I am writing to you to discuss my experience at ITT Technical Institute in Wilmington, Massachusetts.

As a student of ITT Tech I am happy to inform that the quality of education I am receiving is very acceptable for transfer into the modern work place. Thanks to the integrity of the administration, faculty and academic support systems, I am better prepared to take on the challenges set before me as a quality control inspector.

Using the academia provided by ITT for engineering graphics, I am able to understand and participate in the manufacturing industry. In my current position as (b)(6) and previous position as a (b)(6), I continually and use GD&T features and functions to create and inspect machined parts. As for the faculty, their support and encouragement has both improved and pushed me to achieve beyond goals I thought imaginable.

As a proud student, I believe the skills, knowledge and support gained during my time here will demonstrate the integrity and quality of ITT Tech's staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Jeffrey C. Zaher

5/2/2016

To Whom It May Concern,

For the last 2 years I have been attending the Wilmington campus, for the crafting and design Associate Degree program.

For the time that I have been here all of the classes have been very informative. All of the instructors have been very helpful. The quality of the education that I have received has been very helpful with getting me a good job in the field.

For I am in my final semester and working on my final projects and looking forward to the day that I can call myself a college graduate. I will miss all of the instructor and the friends that I have made at itt. With that being said, it goes to show how much itt has made a big impact on my professional career.

I would like to personally thank itt tech for the last two years.

Warm regards,
Robert Bundzinski

5/03/2016

To whom it may concern,

My name is Murat Victor Sabani, I am a graduate of ITT, at the Green Bay Wisconsin campus (019). While attending classes I got a job at (b)(6). Then after I graduated I was promoted to (b)(6).

While at ITT Tech, I was able to use the latest technology available in the field. I could not begin to say how much the staff helped me. From the instructors to the front door greeter, they made me feel like I was important. Whenever I needed help, with anything, the staff there were more than willing to help. The program of Information Systems and Cybersecurity, helped me get the promotion at work. The courses were full of knowledge, as well as the instructors. The instructors in every class, from the general education to the core classes, were so knowledgeable in their discipline. I feel like every penny spent on the education at ITT was worth it.

After graduating I enrolled in a program to obtain my Doctor of (b)(6) at Walden University, the only reason I was admitted with a bachelor's degree was due to my previous education. If it weren't for ITT I would not have had the knowledge or experience to do it. In short, my time at ITT was great, from learning to making new friends.

Sincerely,

(b)(6)

Murat Victor Sabani

To whom it may concern,

I am writing this letter to inform other people about my experience's at ITT Technical Institute.

Currently I am in my third quarter in the (b)(6) (b)(6) program.

My experience began when I meet with Wendy Holmes my career representative. Wendy explained what ITT Tech had to offer me to meet my career goals. I next was put in contact with my financial representative Jarrod. He laid out in easy to understand detail the costs of ITT Tech education and the scholarships available. After meeting with Jarrod, Wendy had me meet with Mr.Lipari the Chair of Electronics, he laid out what was expected from me and what ITT Tech offered to help me reach my goals.

In conclusion I believe the information given to me by the ITT Tech staff was helpful and accurate. I knew the curriculum would be tough. I have not been disappointed. I am grateful that the program is so intensive, so that when I finish, I am confident I will be prepared to enter and excel in the working world.

Sincerely

Employer: (b)(6)

Job Title: (b)(6)

To whom it may concern:

I attended ITT Technical Institute in Troy, Michigan since June of 2013. My experience at ITT Tech was very positive due to all of the friendly staff and instructors. Everyone was willing to assist me with anything that I needed from assistance in the classroom, LRC, Tech-lab, to just being friendly and asking about my day. I graduated with my Associates Degree in (b)(6)

(b)(6) In the entire time that I have attended ITT Tech, in Troy, Michigan, all of the staff and instructors in finding my classrooms, LRC, and the offices in the front (including finance, teachers area, the chairs, Dean, Director, and the registrar). My time at ITT Tech in Troy, Michigan, has been great and I have and will continue to recommend my friends and family to attend ITT Tech if they are looking to advance their education.

I was able to start the Student Veterans of America chapter at ITT Tech Troy, MI with the assistance of the staff and the Associate Dean of General Studies. They care about veterans and they work with veterans in order to ensure that they are able to have their classes paid for through the Veterans Administration. The finance department does this so that the veterans do not have to stress on finances and can focus on their classes. Also for an entire week around Veterans Day in November, the school and the SVA now, work together to set up a veteran's week. This shows the veterans that the school does care about veterans, if they attend the school or not. In closing, I would recommend ITT Tech, Troy, Michigan, to anyone looking to advance their education.

ACICS Letter Campaign

Student: Horowitz, Elisha (b)(6)

Campus: 020, Troy MI

Employment Status: Not employed

Ever since I was young, electronics have always been either something I enjoyed researching and discovering new things about or the only thing I would take on and fix when a computer wasn't working or the controller at home. I decided to come to ITT Tech because I've always had a passion for electronic and I know I always will and a technological school sounded like the best chance to find a career I could enjoy for the rest of my life.

When I first came to ITT I didn't know what major I would want to follow, there were so many choices and I couldn't choice it on my own. My student representative helped me narrow down my choices for a major I could study at ITT tech. she was extremely helpful with everything that I needed to enroll myself in this year's classes and still to this day even though I no longer need to see her for any help she still will give me a phone call ever couple of months to make sure everything is going well and I appreciate her honor to her students.

When I started school everyone was extremely welcoming and helpful and they still all are to this day. If there is every anything that you noticed about the school that could be approved you always have the opportunity to be heard by the higher ups in the school, by allowing the students to give opinions and suggestions every quarter about what could be improved.

In a school administration, I've never met such amazing and helpful people but, I do believe here at ITT tech they have the best staff. At ITT tech, nothing is sugar coated the teachers will tell you if you will struggle in a class or not but even when they tell you that you will need to put in extra time they also put in extra time to help you comprehend and digest everything in your labs, discussions, and exercises. In the engineering

program, there is a hands-on certification test that you can have the opportunity to take to help you advance as quick as possible in your career. This includes a lot of time out of class to acquire but the teachers never deny you the opportunity to partake in the hands on even if you can't come to the school on Saturdays, there will always be a teacher available to help you and test you before your classes start while you're in school. All it takes is a little time, help, patience and encouragement to go all the way with your degree at ITT tech and I will never have to say, "I wish I never enrolled at ITT Tech," because I cannot imagine not being where I am today without them.

- Elisha Horowitz

Job Title: (b)(6)

May 1, 2016

To Whom It May Concern:

I am writing to let you know how very pleased I am with my experience and education that I am receiving at ITT Technical Institute in Troy, Michigan.

When I started to attend ITT Technical Institute, I was working at least fifty hours a week. As many people are aware, working and attending school can be challenging. However, the flexibility with night classes that ITT Technical Institute has had to offer, allowed me to continue working while attending school. Not only has the flexibility been extremely helpful in my circumstance, but also the classroom setting. Being a student, I am grateful that I have not had to purchase a physical textbook that I have had to carry from class to class. The availability of the electronic textbooks has been very convenient. It is always available to me whether in the classroom or at home. Also, having small class sizes allows my professor to know me by name and not just a student number. The small class size gives me the opportunity to work with all of my colleagues allowing me to enhance my skills of communication, leadership and teamwork.

ITT Technical Institute has been very helpful, especially the career service center. As a student, I wanted to try and start my career path as early as possible. The career service center has given me this opportunity by assisting me in finding employment. Without the help of the career center, I would not have my current position at

(b)(6)

I am now pleased to say that I am doing what I enjoy, and I can utilize the education that I receive from school at work.

ITT Technical Institute has changed my life in a positive way. I was encouraged to obtain a degree, but it would not have been possible if I did not have the flexibility or the small classroom environment. I have become academically motivated, where once I obtain my associates in (b)(6), then I will further my education with my bachelors in (b)(6). ITT Technical Institute took a chance on me, and this is an experience I will always be thankful for.

Job Title:

(b)(6)

I have been a student at ITT for a couple years now. I completed my associate's degree in the (b)(6) program and now I am continuing my education in the bachelors program. My experience here has been a great one and has done a lot to help me grow and become the young adult I am today.

The teaching staff is one of my favorites amongst the couple other colleges I have been to. I am able to know my teachers one on one. They always ask how I am doing and show interest in how my life is going outside of school. I know all of them by name and to me, I can tell they are all working hard to get us the best education they can get us.

I learned about ITT from my father, he mentioned what they have to offer and that going here would not be a waste of my time. That's where I met one of the best recruiters I have ever met. He is a great guy and again, always checks up on me and asks how I am doing, how my family is doing.

ITT has almost become a home away from home. Sometimes I'll show up to classes extra early to get some extra things done. The students that are there are equally interested in what we have to learn. I have made some good friends here at ITT and this will hopefully lead to lifelong relationships.

Overall ITT has been one of the better choices in my life and I know with the hands on training and experiences I am obtaining, this will help me to find a home in the career path I have chosen. Again this has a lot to do with the faculty and teachers that ITT has. I thank all my teachers that I have had there at the Troy location for I would not be where I am today without them.

(b)(6)

To whom it may concern:

I am writing to express my appreciation of (b)(6) / ITT Tech. I am nearing the end of my second quarter and so far am very pleased with the program. The instructors here are wonderful and always willing to help with areas of struggle. I previously attended a larger school and took classes part-time but didn't get anywhere. After deciding to take a semester off, two years passed by before I knew it and I was still in the same place. I finally decided that I need to get serious and started looking into different programs around the central Ohio area. I was referred to come check out Breckinridge by a coworker who attends school here as well. After touring the facility and going over all the details I was happily accepted into the (b)(6) program the same day!

I am beyond pleased with the program since I've started. The location is convenient and the small class sizes are great! As a busy adult working full time and having a family Breckinridge has been a breath of fresh air and I am very confident that I will finish my program as scheduled and begin my (b)(6) career with all the tools I need to succeed!

Justine Harvey

(b)(6)

May 3, 2016

To whom it may concern,

ITT-Tech Hilliard is the right match for me. I looked at just about every associate degree (b)(6) program in Central Ohio and felt that ITT-Tech had the best to offer. The facility is up to date and clean. The nursing labs have supplies and equipment that rival most schools with (b)(6) programs. The instructors are very knowledgeable about the text and real world applications. They are always approachable and offer plenty of chances for tutoring and additional help. I love that the class sizes are small which help with learning and also accountability. Being in my second quarter I do feel that ITT-Tech was the best choice for me to complete my (b)(6) degree.

(b)(6)

Roxanne Sutton

May 3, 2016

To Whom It May Concern,

Ever since I started my journey at ITT Technical Institute I have noticed changes in myself and in the way people treat me. I was of course nervous about starting a new chapter in my life, however now that I have I am very grateful for it. Taking courses through ITT has helped me keep my goals in sight of becoming a (b)(6) and the instructors are fantastic. They are always there to help and eager to teach, which is more appreciated than they realize. Attending ITT has increased my self-confidence and I cannot wait until my graduation day when I can look back and say, I made it. I can only hope that when I continue my education towards a Bachelor's degree, I will be blessed enough to have a school as attentive and caring as this one with wonderful instructors to match.

(b)(6)

To Whom it may Concern,

My experience here at ITT Technical Institute has been great all the instructor's I have had or still have are very helpful and will even help you when you're taking an online course and you're not sure on how to answer or if you just don't understand what's going on. They will help you one on one. Also, the staff in the building is very helpful, recommending students to come back for their bachelor's.

The quality that I have received my education was good even though family emergencies come up or you have to drop a quarter like I did. I was welcome to come back by the (b)(6) with my GPA being high and all my grades were passing.

Coming here has impacted my life by making better life choices for myself and (b)(6) By getting my associates and on my way getting my bachelor's degree will set a better job for me in the long run.

Thanks,

Heather Brown

To whom it may concern,

Throughout my time at ITT Technical Institute, the experience has been amazing. The ability to grow in my field of study, and the ability to network with professionals in my line of study, as well as making friends I know I will have for a lifetime could not be any better. The instructor like Mr. Tom Davison, Professor Nagi Matta, as well as our Dean, Mr. Alex Chestnut, have always been there to make sure we are getting the most out of our time on campus, and the online classes. The classes I have taken here at the Hilliard campus have opened my life to a whole new world of possibilities. Without the education I have earned here at ITT Tech, I personally would not be able to compete in the Business world. Nor would I be able to gain the life experiences the instructors here share. Thanks to the education I have gained From ITT Tech., I know I will be able to provide a much better way of life for my family.

Sincerely,

(b)(6)

Dennis A. Bega

David J Lowry

(b)(6)

To whom it may concern,

I first enrolled at ITT in (b)(6). I had a great career prior to enrolling at ITT, but I was not satisfied. I decided to further my education and ITT had the precise school of study that I was looking for. I excelled at this institution. I graduated from ITT in Hilliard Ohio in 2012 with the degree of Associate of (b)(6). I finished my program with highest honors and was inducted into the National Technical Honor Society. I also received the honor of being the student speaker at the commencement ceremony.

I was able to secure a job interview within a week of graduation and started my new career two weeks later. I still work at the same engineering firm and have been able to grow in my position. As of September of 2015, I decided to enroll at ITT to further my education and pursue a Bachelor's Degree in (b)(6).

I have been able to excel thus far in the program with the support of the instructors and staff at ITT. I continue to strive for the Dean's list every quarter by maintaining highest honors and perfect attendance. I look forward to building on the career that I have with this new degree. Since my enrollment, I have been given more opportunities in my current role and I anticipate more growth within the company.

Much of my success thus far has been a direct result of the education I received from ITT. I am eternally grateful for all the opportunities I have had and look forward to more in the future.

Sincerely,

(b)(6)

David J Lowry

Hilliard, OH.

To whom it may Concern

ITT Technical institute has had a positive impact on my studies as a student. There are some areas that need improvement but overall I am more than satisfied with the opportunity ITT Technical Institute has given me. The things I am most proud of ITT is their financial aid department, learning center library, and faculty members have all been outstanding in my opinion. I would also like to inform you that the tutors have been very helpful and very useful. As a senior student I can proudly announce to you that the senior capstone projects are very similar to what you would experience in the real world. In other words ITT Tech prepares all its students what to expect in the real world by providing valuable experience. I would definitely recommend ITT Technical Institute to any future student.

Sincerely Yours

(b)(6)

Lake Mary, FL 32746

Dear Sirs:

When I signed up for ITT Technical Institute the process was smooth. I received a free laptop which was a great benefit to help me with my homework. This location is home to my home which makes it easy to get to my classes. At the time it was also close to my job, I am at a different job now. I am able to further my education at this school. I like small classroom size and labs. In conclusion, I would recommended my friends to sign up to go to ITT Technical Institute.

Sincerely,

Jamari Penn

To whom it may concern,

My experience at ITT has been for the most part pleasant and without incident. The staff is very knowledgeable and very professional. The campus is always clean and comfortable. The entrance process was smooth and the staff was always willing help. This is the first time I have used e books and it took some getting accustomed to but it's ok so far. Hopefully in time I will master it. The librarian has been very helpful and the availability computers have been excellent.

Sincerely

Stephen Benjamin

To Whom It May Concern:

My name is Michael Nowlin and I would like to take this opportunity to describe my experience here at the Lake Mary Campus for ITT Technical Institute.

In the summer of 2015 I made a choice to attend a campus of ITT instead of online course as it gives myself a better learning environment by working with the instructors along with other students. Yvette Rodgers, a representative of ITT, worked with me in selecting a degree that would both suit my skillset and would enjoy which was the (b)(6) degree. I am currently approaching the end of my third quarter and am proud of my standing 4.0 GPA which is something that I cannot take all the credit for. The instructors at ITT have helped me reach beyond what I knew was possible and it has been both challenging and exciting. The opportunities here have been proven to be endless as long as the effort is applied.

Going into my second quarter I have had the honor of becoming an employee of (b)(6). I have also had the opportunity of being a guest speaker at the New Student Orientation in March, 2016. I am looking forward to what the future holds for me after graduation; however, my hope is that I may inspire other students with what is possible during my time here at the Lake Mary Campus of ITT Technical Institute.

Sincerely,
(b)(6)

Michael Nowlin

ITT Technical Institute:

In my experience every aspect of being at ITT Technical Institute has been positive, from the initial interview to class experience has been good, all of the professors are willing to help out at any time with any issue, and every aspect of learning has been positive whenever I have an issue regardless of the class one of the professors will answer it or find the answer and explain it in a manner that I understand. Classrooms are well organized and well maintained, there are enough computer systems in the computer labs that I have rarely had the need to use my own computer at school for me the decision to go to ITT has been a good one it fits my schedule nicely and when my schedule changes the school has been very accommodating. The students in my classes are very easy to work with and we get along well with each other in and out of school. As a class we get along well and work together to solve most issues as a group, it seems easier to be wrong as a group than as an individual and with the professors help this is a rare occurrence because of this I feel that the learning experience is greatly improved between the classroom and school.

Willie Robertson

(b)(6)

To Whom it may concern

Some time at the end of November, I was enquiring via internet about attending college in the technical field. I woke up the next morning to play golf and received a phone call from a very nice lady named Ana Coker on the golf course. She was very persuasive to get me off the golf course and in to see her. I was so excited; I chose to start class within two weeks of meeting Mrs. Coker. When I started class there was scheduling and a professor conflict that was rectified painlessly and without issue. The professors are very understanding about us being busy adults. The positive recognition received for attendance and highest honors is a great addition from the leadership of this institute. I am still very new in my journey to achieve my first degree and with the help from ITT I should reach my goals.

Sincerely

Willie Robertson

When planning or changing a future, a person must find the proper situation to which they can grow and learn. For me, ITT was the best option and looked like it would be the institute that I could learn from and be successful. From working with the recruiter to getting into a class room, the staff has worked to give me the chance to accomplish that goal. While some professors are more involved than others, all seem to at least try to help students be successful. I still have a year left on my Associates Degree, but I have already worked with career services and found work related to the technical world. My journey is not yet complete, but so far it has been a rough road of re-learning skills I have not used in a while, as well as, new skills that I have taken from each aspect of my time in ITT Technical Institute.

Thank you,
William Kelly

(b)(6)

5/02/2016

To Whom It May Concern,

I am writing to you to discuss my experience in attending the ITT Technical Institute in Lake Mary Florida.

As a student of ITT Technical Institute, I am proud of the quality of the education I am receiving. Thanks to the integrity of the admiration, faculty and academic support system at ITT Tech, I am better prepared to take on the challenges of the Drafting and Design field as a productive and career-oriented Student.

ITT Tech has provided me the necessary skills and motivation need in order to find and filter jobs that best suite my skillset. The program is geared for individuals that are motivated and want to find the right solutions for the task at hand. The faculty has been very helpful throughout my education here on campus and whenever I have a question I am always guided in the proper direction.

Through their career service, I have been granted many opportunities to gain working experience. I have completed 2 job interviews and one landed me a freelance position working on furniture brochure with (b)(6). As a proud Student of ITT Technical Institute, I believe the knowledge and skills that I am gaining during my education helps demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

(b)(6)

May 4, 2016

To whom it may concern:

My name is Rocco J. Combine RN and I am a member of the first graduating class from the (b)(6) (b)(6) at ITT Technical Institute, Youngstown campus. The educational experience that I had at my campus was phenomenal. As a member of the first class to graduate and the first to take the (b)(6) Licensing exam I felt very well prepared and passed on the first try in 75 questions three weeks after official graduation. Not only was I well prepared clinically but they helped me with the necessary tools that enabled me to interview and be hired at a (b)(6) one week after passing my (b)(6) and was then employed as a (b)(6) who floated between seven different (b)(6) within my hospital system. Not long after I began working for (b)(6) as a (b)(6) (b)(6) Within less than 9 months of being in that position I was promoted based on my performance and experience to (b)(6) for the (b)(6) (b)(6) and now oversee education for all of the (b)(6) and a myriad of other medical professionals for the (b)(6)

It is my belief that the experiences I was afforded at my campus helped prepare clinically to walk into an (b)(6) setting right out of (b)(6) school, to then walk into management level positions and I now impart and utilize that same experience that the instructors and the former (b)(6) (b)(6) helped to foster in me to be as successful as I have been since graduating in (b)(6)

Please consider well the reaccreditation of this school and look at the successes that I have had as graduate of their program at the Youngstown campus. All of the staff there were and continue to be amazing people and they promote excellence.

Thank you for your time.

Best,

(b)(6)

Rocco J. Combine (b)(6)

To Whom It May Concern:

I am writing to discuss my experience in attending the Youngstown, OH ITT Technical Institute.

As a graduate of ITT Technical Institute, not once but twice, I'm very proud of the education I received. I received my Associate Degree in Multi-Media and then went back for my Bachelor Degree in IT. Thanks to the integrity of the entire staff, I was prepared to take on the Field Operations Engineer position at

(b)(6)

ITT Tech provided me with a combination of lab and theory courses which gave me the skill sets that I needed to become a leader in the IT field. Career Services maintained in constant touch with me throughout my education to help me with the career path I wanted to go down. They helped me in gaining experience while I finished my degree and assisted after graduation to help me move up in the IT world. Without the help from the staff at ITT Tech I wouldn't be where I am today. I always recommend ITT Tech to my friends.

As a proud graduate of ITT Technical Institute, I believe the skills and education I have received have been valuable in attaining my career goals. Without ITT Technical Institute I would not be where I am today. I am thankful for this every day.

Sincerely,

(b)(6)

Frank Varner

Michael R. Miller Jr.

(b)(6)

May 3rd, 2016

To Whom It May Concern:

I graduated from the ITT Technical Institute's Youngstown OH campus in 2015. I finished the Associate's Degree of (b)(6) and would like to comment on my positive experience. The coursework was tailored for success, the instructors were thorough, and the career counselors assisted me in obtaining my career goals.

I entered the program with no prior knowledge of drafting and design, and was unsure as to what discipline I wanted to focus on. The (b)(6) provided me with several courses in each area: architectural, civil, and mechanical. I feel the coursework was scaled appropriately that increased in both difficulty and competency requirements. These courses sparked my desire to pursue architectural design.

The instructors were actively working within the field, and applied real world scenarios in their coursework. They went above and beyond to assist in learning the given coursework, and took time to discuss advanced topics. It was through this experience that I gained the confidence and skills necessary to become a successful draftsman.

The career counselors played a significant role in helping me obtain my goals of becoming a career draftsman by providing instruction in resume building, job searching, and interview strategies. Specifically, it was the career counselors who assisted me in obtaining an internship with (b)(6) during the summer of 2014. That internship transitioned into a full time position where I am now a (b)(6).

My experience at the ITT Technical Institute's Youngstown OH campus has been life changing. I am proud to be a graduate, and would recommend this school to prospective students. Thank you for your time.

Sincerely,

(b)(6)

Michael R. Miller Jr.

Lovell Walls

(b)(6)

To whom it may concern:

I am a graduate of ITT- Technical Institute of the Youngstown, Ohio branch. I started at ITT at the age of  I lost my job and went back to school.

How special my experience was at the school. I knew very little about computers and networking when I started school, but by the time I graduated with my first degree, I actually knew how to work and network computers. I tell people all the time, if you put the time into your schooling, and listen to what the instructors are teaching you can learn anything. The Instructors are great, and very knowledgeable and are willing to help any student.

If I can go back to school late in life, and succeed, then anyone can if they put their heart into it.

Thank you,

(b)(6)

Benjamin Rush – ITT May 4th, 2016

Just under (b)(6) I started attending ITT at the Youngstown Ohio campus from right out of high school. I had been doing some coding on my own for the previous three years, two of which were in addition to a course at my high school which really supplemented my experience. Since I came into ITT with a decently sized knowledge base for programming I knew there was going to be at least a little bit of overlap, but there was not too much of it. After the first Introduction to Programming class, we started right into HTML, CSS, and VB to get a foothold on software development in general, advancing into Javascript, Java, and C# not too long after. The technology used was fairly up to date with current marketplace trends so I was able to use ITT as a basis for what I would expand into on my free time. For example, when using Javascript and JQuery for web design I pushed it even further by using mobile phone sensory data in order to create an interactive game with the canvas element.

Almost the entire faculty, and especially most of the teachers, have been absolutely amazing. They have been willing to go above the curriculum when they acknowledge that is what I would like to do, and help work alongside you in order to figure out solutions for your code. I would have liked it if there was a more competitive nature between the students in order to give them the drive and motivation needed to accompany me in going beyond the curriculum, but with any education it is very heavily based on how much effort the student puts in. I am headed to graduate next month (June 2016) with perfect attendance and a 4.0 because I have wanted to squeeze as much use out of this experience as possible. I am proud to be graduating with a job in my field that career services has found for me. I work at (b)(6) as a (b)(6) and it has been going fantastically so far. I hope to continue on with my education, training, and career for as long as I can learn.

(b)(6)

Natalie Westfall

(b)(6)

To Whom It May Concern,

I am writing this letter in regards to my positive experience at ITT Technical Institute located at 1030 Meridian Road, Youngstown, Ohio 44509. I am in my (b)(6) and I am honored to be able to attend a school that truly has their students' best interest at heart. There is always a "Good Morning" or "How are you today?" as you enter the building. The faculty will do whatever is within their power to help any student with their academic needs as well as being there just to listen and offer encouragement when the pressures of life are hard to handle. I have enjoyed coming to class every day and am excited to continue my education in the field I have loved since I was a child. I work as a private hire home health aide now and after graduation am looking into becoming a hospice nurse. The classes offered here, though at times are difficult, are beneficial as they are taught in a fashion for which we can grasp and comprehend the lessons which will be a necessity in our daily work environment. I would recommend this school to anyone who is thinking about a career in nursing. Thank you for taking the time to read this letter and have a wonderful day.

Warm regards,

(b)(6)

Natalie Westfall,

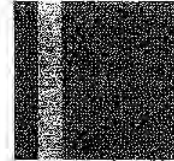

(b)(6)

Student at ITT Technical Institute

Junior Moreno

(b)(6)

May 3, 2016

To whom it may concern,

I attended the Houston North campus of IIT Technical Institute beginning in 2010 and graduated in 2012. I had a very positive experience and the skills that I learned at IIT Technical Institute have allowed me to find success in the IT industry with numerous companies within a relatively short period of time.

While at IIT Technical Institute, I acquired the following knowledge, skills, and experience of some of the biggest names and technologies in the IT industry such as Windows Server 2008 R2 management, Active Directory, Cisco routing and switching, Linux administration, and desktop operating systems. All of these skills have been crucial to my success upon graduation. I have, at one point or another, used all of these skills within the various positions I have held within the IT field.

Before attending IIT Technical Institute, I worked one meaningless job after another and never enjoyed any of the menial tasks I was assigned. The decision to return to school to pursue a career was the best decision of my life. That decision led to the invaluable education and experience I received at IIT Technical Institute. Indeed, had it not been for the skills that I learned, I would not have my current position as a (b)(6)

If you would like to discuss this in greater detail, please feel free to reach out to me via email or phone.

Warm regards,

(b)(6)

Junior Moreno

5/2/16

To Whom It May Concern:

I am writing this letter to describe my experience at the ITT campus in Seattle, WA.

I am a current student in my final quarter of my Associates program for (b)(6)

(b)(6) My overall experience here has been very good. I have had some excellent instructors that continue to help me out or answer questions as I am going through this program. I commend Mr. Olsen, Ms. Wethered, Mr. Evans, and Mr. Turylo. They are all exceptional instructors and I have always been able to go back to them at any time for assistance with classes even if they are not my current instructors. I feel that I have learned a great deal during my time here.

I have had a good experience with all of the staff here, such as Career Services, the LRC, Financial Aid, Recruiters, and the Registrar.

I am very pleased to be graduating in July with the knowledge I have gained and look forward to continuing on with my (b)(6) degree.

Thank you for your time.

(b)(6)

Judy Evans

May 2, 2016

To whom it may concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Seattle, WA.

As a student going into my Bachelor's in (b)(6) I would say that I am Proud in the quality of the education that I have received and will be receiving. Thanks to integrity of the administration, faculty and academic support systems at ITT Tech, I am better Prepared to take on the challenges of being an Employee at (b)(6)

This school has helped me with understanding how Electrons work and also with how they communicate with each other. And without the attention from my teachers, career counselors and scholarship support, I would not be with (b)(6) Today.

As a Proud Student and graduate of ITT Technical Institute, I believe the knowledge and skills that I have and will learn will help demonstrate the quality of the staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Kelly Dechert

(b)(6)

To Whom It May Concern:

May 3, 2016

I started my career at ITT Technical Institute with very little college experience and only a high school diploma. It was because of the class sizes that I was able to succeed where I have failed in the past in college. It was also because of the hands-on experience that I was able to achieve my goal of graduating with my Associate of (b)(6) I was working as a (b)(6) but am currently looking for a more stable and permanent career in the Information Technology industry.

The staff at ITT Technical Institute works hard to make sure that all the students attending ITT Technical Institute, who want to succeed, do succeed. They do this by offering help, when needed, this includes remedial help with every subject that is offered at ITT Technical Institute. The instructors in the classroom coach you through every lab and give you advice on how to research and solve problems.

I firmly believe that the principles that are taught at ITT Technical Institute have prepared me for a career in the Information Technology industry. The staff cares about your success, because when you succeed, they also succeed. This is what draws people to ITT Technical Institute, the drive to succeed, the students know that upon graduation their future is bright. I believe what ITT Technical Institute does is a pathway to success, so I have enrolled in the Bachelor of (b)(6) program.

Yours Truly,

(b)(6)

Todd William Rose

(b)(6)

Victoria Norwood

(b)(6)

May 4, 2016

To Whom to May Concern:

My name is Victoria Norwood. I am both a student and a grad of ITT Technical Institute. I have received my associate's in (b)(6) through ITT Tech, and I have just started my bachelor's in (b)(6). For both my associate's and bachelor's degree, I have and will continue to receive my education at the Seattle campus.

Through the wonderful effort of my career adviser at ITT Tech and my go get them attitude, I was able to obtain a job within (b)(6). I work for their IT department in their one to one program. This is a program where students receive a laptop at the start of the school year. Each school has at least one if not two tech experts, that will help teachers and students with any technology related issue. ITT Tech, my fearless attitude and my love of technology has set me on the career path of my dreams.

I have loved my time here at ITT Tech. From the teachers that are helpful and very friendly, to the Dean that has an open door policy for her students. The day I signed up with ITT Tech I had fun. I met a teacher that would soon be my teacher, and one of my favorite teachers. He talked to me about my dreams of creating video games, as well as helped me get over my fear of going back to school. I am dyslexic and school has always been a scary place for me. With ITT Tech, I found that I had no need to be scared. With free tutoring and teachers willing to help you when you need it, school became fun.

Class sizes were small, but it also gave way for more interaction between student and teacher. Each of my teachers knew their students by heart. They knew how the students worked together, and how to interact with them. I loved how teachers came down to your level. How they will work with you to make learning fun, and not something that felt like a chore. I could say without a doubt that I have had some wonderful teachers during my time here.

My favorite class was capstone. This is the final class before graduation. This is where you take everything you have learned and put it to use. Let your creative juices flow! This is your time to shine. You can work together with other students or you can work alone. This choice was yours to make. Most students start long before the class comes about to figure out and think up what they would like to do for their final project. Hey I did. I created a game. When the end of this class came around you were able to show off your hard work. It's the best feeling in the world.

If you ask me do I recommend ITT Tech to other students? I would yes. It has been a memory and continues to be a memory I will hold dear for the rest of my life. I gained so much by going to ITT Tech. I do not regret the decision I made when I signed my enrollment papers. I believe you would not regret it either.

Sincerely,

(b)(6)

Victoria Norwood

To Whom It May Concern

May 2nd, 2016

I began my cyber educational journey into the realm of (b)(6) at ITT Technical College located in Seattle, Washington in the year 2012. I graduated in the year (b)(6). During my quest for higher education I worked full-time for (b)(6). My job position was as a (b)(6) main distribution warehouse.

ITT is one of those schools that inspires and encourages students to use their knowledge responsibly for positive and productive means within our society. There are classes which are required to earn an Applied Science degree, these classes are of a social science nature and also of administrative nature. The class curriculum is designed to teach students to be leaders in their fields. The reason I say this is because my position as a (b)(6) changed to (b)(6).

I designed a new inventory tracking data base the result of this action was a promotion to (b)(6) that job ended in 2014 after I had a motorcycle accident. During my time as an (b)(6) I developed a system that located thousands of dollars of (b)(6) products that were assumed lost or stolen. My next employment was in 2014 working for (b)(6) performing duties which required employees to work without supervision and travel to specific US Banks within the state of Washington and to other states to work on sight removing and installing new physical data equipment which included configuring the new equipment to the current operating systems as required.

I currently work as a (b)(6) I am working on acquiring my license, and have found work that I can do performing cyber investigations. Most recently, I have been

granted the opportunity to put together a cyber drone workshop for my fellow students and am very excited to be working as a volunteer within the halls of ITT. My reasoning for the workshop is to give other student who are working on earning their Associates degrees the opportunity to gain more hands on experience before they graduate.

The reason I enrolled at ITT Tech., was because I believed that this is a school of higher education that feeds the minds of those who have a desire to be on the cutting edge of technology. I had a desire to help defend against cyber criminals who move undetected through cyberspace. My intention was to only earn an Associates' degree and with that advance my financial status with a career.

Why I'm now enrolled at ITT, working on earning my Bachelors of (b)(6)
Degree is because everything that I was looking for in this school has been delivered by the teachers, professors and other staff that work within the walls of ITT. This school has helped me grow into a leader in my chosen field, and inspires me constantly to be a better person. Almost everything I have learned over the years spent at ITT has come into play in life beyond book learning and theory. The practical applications of what I have learned moves to want more from a school that has more than proven its educational worth in my life.

Sincerely

(b)(6)

James L. McInaden

To whom it may concern:

I am a current student at ITT Technical Institute in Eden Prairie, MN. I am in the (b)(6) program and set to graduate with my associates the beginning of (b)(6). It is hard to believe that two years has gone by already. My experience here at ITT has been an interesting two years learning my program. The teachers have all been wonderful and knowledgeable with the course they teach. I am currently looking to further my education and obtain my bachelor's degree in (b)(6) as well. I look forward to continuing my education with the staff here at ITT Technical Institute.

Sincerely,

(b)(6)

Joe Bartsch

5/3/16

To whom it may concern;

I started my degree in (b)(6) and I am very pleased at what I have taken in thus far. I have been able to utilize many different programs that works solely with electrical design and implementation, along with tracking currents and their calculations. I have learned to program PLCs', read wiring diagrams, read and create ladder logic diagrams, create power points, and so much more. The instructors and faculty has been very patient with me, as well as helpful to get me through my classes, and succeed as a student.

Thank you for your time.

(b)(6)

5/03/2016

Daniel Weides

5/03/2016

My experience at the Eden Prairie campus of ITT Technical Institute has been a very pleasant one. Since the beginning, almost one and half years ago, I have learned a great deal in the field of electronics. Upon entering my studies I expected to get a lot of hands on time in the labs and very much look forward to this, ITT delivered. The instructors that work in the field and teach here are knowledgeable and enjoy conveying their experience with the students. I feel that this school is well preparing me for the workforce and it was a good choice to enroll at this campus.

To Whom It May Concern,

Back in August of 2014 I contacted ITT-Tech about pursuing my education. Very shortly after, I was contacted by a gentleman who has been an active part in my continuing involvement of that education, his name is Don Baker. Don and I met shortly after that. Don was instrumental in my choosing to go to ITT-Tech. We got along right away and I felt quite comfortable with him.

The information I receive in school I would consider relevant to my future that I wish to pursue. I am an older student (b)(6) and unlike some of my fellow class mates, I have thoroughly enjoyed each and every one of my instructors. It is enjoyable for me to come to class. I would like to talk a little bit more about my instructors. I have always felt like the instructors in the NSA (Network System Administration) actually cared and enjoyed teaching. They have all been fair. The only thing I ever felt that would hold someone back from attaining the grades they wanted would be by their own volition.

I currently go to ITT-Tech in Eden Prairie, MN. I live almost 70 miles away from school, and even though I do get tired some days of the drive, I would not choose to attend any other school. This is due to the fact of not only the faculty but the administration of the school also. Everyone here actually cares and is nice. They do everything to help you succeed.

I am currently in my (b)(6) degree and am looking forward to continuing my education here in the bachelors program of ITT-Tech.

Thank you,

Christian Gleason – Student at ITT Technical Institute – Eden Prairie, Minnesota

5/4/16

To whom it may concern:

My experience with the recruitment process and the recruiter was a very positive experience, all of my questions and concerns were answered quickly and professionally. I chose in I.T.T. tech in Eden Prairie because I felt that there courses were very straight forward and very relevant to my career goals, the instructors were very knowledgeable and patient, as I had not been in school for almost 17 years and in my late forties they were great to work with. I am currently employed at (b)(6) and have been an employee there for 18 years and my job Title is

5/4/16

To whom it my concern:

I guess my experience here at ITT started with a conversation with my fiancé. I was working as a security manager and yet I was extremely un happy. I have always had a passion for IT and home networking, so we talked about me going back to school. I had always seen the commercials for ITT and I knew that a degree from ITT should defiantly give me the tools to build on my current skills. The Eden Prairie campus was an easy choice because I am living in Eagan. When I came I actually was very skeptical but I liked that this school could use my previous school and degree in Audio could be used towards my new degrees. Don Bakker was my recruiter before he took his new job as director of Career services, and was able to show me that with the amount of credits that could transfer and how close the Electrical engineering degree and the networking systems administration would create much more potential for a career in networking.

I am currently working towards my (b)(6) associate degree. I am planning on graduating in (b)(6) and then I plan on re enrolling in the (b)(6) associate degree because I will only have 10 classes to take and then I will finish both degrees. I plan on getting certificates for Cisco and Microsoft through The Center for Professional Development.

I am currently working for (b)(6) but I have talked with my managers and the current plan is to get me into IT for them in the future. And I am excited because if it is not with them it will be with someone else who can use my skills that I have learned from ITT.

Sincerely,
(b)(6)

5/5/16

To whom it may concern,

Overall my experience at ITT-Technical Institute in Eden Prairie has been good. It is nice that all of the classes here are night classes that allow me to have a full-time job and go to school at the same time, although it can be a handful at times. What I have noticed is that most of my classes are geared toward certifications, and preparing students for the work place, which is a great thing. All of my instructors have been very helpful and very willing to help with any questions or problems that I have.

Nick Dahl

(b)(6)

5/5/16

Ryan Neely

5/2/2016

Dear ITT Students and Faculty,

I personally want to thank ITT Tech for helping me realize my potential and giving me the necessary tools I needed to make it in this technology driven world. ITT gave me the training and hands on experience I needed to acquire an entry level position in the IT industry.

I am so grateful for the time and effort of all of my instructors and the Career Services Department put in to turning me into the tech I am today. My journey is probably like any of you that are now enrolled in ITT. (b)(6)

(b)(6)

(b)(6)

I bounced around a lot just trying to find my niche. I never could quite find and get comfortable in a job. Quite frankly without an education, whether it be Technical or College it is very tough to succeed in the corporate world these days.

I saw a commercial on TV for ITT Tech in 2010 (just like many of you) so I went online to see what they offered. After doing my research I realized that in this technology age I would be a fool not to pursue a career in the Technology Industry. I made an appointment with a representative to check things out and found the perfect major for me. (b)(6)

(b)(6) What made me choose ITT wasn't just about what they offered it was more about what they showed me about themselves. They showed me that they really cared about what I wanted and they would do anything they could to help me succeed. They didn't push and lie to me about the school just to get me in. They showed me the door and gave me the confidence to walk through it.

If you want to succeed like I did then you will have to go to your classes every day that you have them. There is something that I live by and will help you in life. If you're early you're on time. If you're on time you're late, and if you're late you're fired. The same goes for school and work. Punctuality shows your employers and your instructors that you have respect for them and

yourself, and that you want to be there. During my time at ITT it wasn't always easy, I had to work through (b)(6). No matter what I faced I kept thinking of my end game and where I could be if I worked (b)(6).

One of the best things that will help any new student whether you are a working adult or fresh out of high school get through school is the study hall before class and the fact that you can stay after class to do your homework. I took advantage of that every day. Since I worked my butt off every day and stayed after class for homework and help and was always one of the first students in the building. I studied every night, I ended up graduating second in my class and made Distinguished Honors every semester and became a member of the National Technical Honor Society.

I took full advantage of the Career Services. The people of CS work extremely hard to get the leads you need to succeed. Because I worked so hard to do well in school, I was offered a position while I was still in school as a Tier 1 Help desk support. Doing well in school is great and all but you have to work to retain that knowledge to succeed in the future. If you think you can do well, get a career and then just put yourself on auto pilot you are sadly mistaken. This industry is forever changing, if you want to succeed you have to adapt and change with it. I did everything my employer has ever asked me to do and I aggressively asked to learn new things and after 2 years I was promoted and I accepted a position as a (b)(6) for one of our customers in Texas. I was able to be this successful because ITT pointed me in the right direction.

Thank you for helping me change my life!

(b)(6)

(b)(6)

ITT Technical Institute
311 Veterans Highway, Suite 100E
Levittown, PA 19056

May 3, 2016

To whom this may concern:

I am an ITT Tech graduate of the (b)(6) program. I graduated from ITT Technical Institute, Levittown PA in (b)(6) with an overall GPA of 3.85. My experience at ITT Technical Institute prepared me for the real world. ITT Tech offers real world experiences such as labs and workshops that helped prepare me for the reality of IT. As an ITT Tech graduate, I feel adequately prepared for the IT environment and my professional career. I gained experience with the latest technologies and operating systems that are currently in production today. Due to all of the hands on learning that I gained from ITT Tech, I was seen as a serious candidate by organizations and businesses to be hired as a full-time employee.

ITT Tech offers excellent academics that are current with the latest technologies, and they help students professionally as well. Resume writing, portfolio building, and mock interviews are just some of the key elements that ITT Tech offers to help prepare students for their careers. I use my portfolio to this day and add to it to build up my resume with all of my latest accomplishments and skills. When you graduate from ITT Tech, the school never leaves you. To this day, my former teachers, academic advisors, and financial aid representatives still keep in contact with me. They are always available for any help and guidance that I need. ITT Tech helped me gain confidence in myself and my career goals which helped me move on to the next level of college. I would recommend ITT Tech to anyone who wants to learn real life experiences by doing hands on training and academics.

Sincerely,

(b)(6)

The letter of my overall experience at ITT Tech.

5/2/16

To whom it may concern,

I am currently a student at ITT-Tech in Levittown, Pa. I will be graduating in (b)(6) of (b)(6) with my Associates in the (b)(6). I am currently working at (b)(6) in (b)(6). Career services has been working diligently to start me in a position in my field. The individuals that work in the career service center are excellent. They keep me informed of where they send my resume. If I have any questions they are always there to answer them. I have had such an excellent experience at ITT-Tech. I love the fact that I was taught all my courses by individuals who have worked or still works in the field. All of the teachers are absolutely terrific and very helpful. They are always checking up on you to make sure that you are doing well, even if you do not have them as a teacher that semester. The general education teachers are excellent as well. They are well experienced and knowledgeable in the courses that they teach. They are always offering to help. For example, if I write a paper that needs to be looked over the composition instructor would proof read it and give me feedback at any time. The people in the office are always helpful. I love the fact that there is a computer technician always available to help with any kind of computer malfunctions. The open door policy is a great policy. The computer library is awesome. I love the fact that I am able to go to the school at any time to do my work and that there will be someone in the library to help me. I thought that going back to school after 14 years was going to be extremely hard but everyone that works there has been extremely helpful and encouraging that now when I graduate I will be graduating with a 4.0. I never would have thought that I would have enjoyed school as much as I have in the past two years. I will never forget my experience at ITT-Tech and will always be thankful for everything that they have done for me. It saddens me to see the criminal justice program come to

an end. It is an excellent program taught by smart and excellent teachers that have extensive knowledge in the field. Words cannot even express how amazing this school is and how it has made me a better person and more knowledgeable in the field that I am going into.

Thankyou,

(b)(6)

Vicky Burke

(b)(6)

A large rectangular yellow box with a black border, used to redact contact information.

My name is Tania Cuevas I attend ITT-Technical Institutes (b)(6) My experience was amazing journey. I was taught by the most experience people in my field of study Information Technology. A career service was able to place me in a life changing opportunity (b)(6) to graduation with (b)(6) Where I worked for 2 years and then decide to pursue other opportunities. I am currently employed as (b)(6)

Since the first time I step foot in the institute I knew my life would change. From my experience with Representative Lisa Barnabei who took her time to explain why it would benefit me to choose ITT-Tech. And in the classroom experience where teachers taught me hands on what I would encounter out in the field. Every day I was challenge and taught to understand the inner working of the field Information Technology. They provide real world scenarios to troubleshoot hardware and software issues. I was also taught how to configure networks from beginning to end. In order to become the professional I am consider to be today.

I am strong believer in this Institute that I encourage my own family to attend. I am very proud to say (b)(6) will also graduate from ITT-Technical Institute in June 2016. I am always recommending ITT-Technical Institutes be to a person to change careers or an employer to hire.

Sincerely

(b)(6)

Tania Cuevas

(b)(6)

To whom it may concern,

I was asked to write a short letter about my experience here at ITT, to that end I'd like to start with the faculty here. The vast majority of the staff here are wonderful, going above and beyond when it comes to meeting student needs. Many of the instructors are very good at noticing when a student needs additional help and nudging them towards it, whether it's in the form of increased classroom participation or tutoring outside of class. Which many of the staff also provide immediately after class as well as at posted tutoring times. I feel that I have learned a great deal since I started here about 20 months ago and not just on subjects directly related to my CEET program. I've been given a toolbox of skills and strategies to help organize myself and my work, I feel more capable and better readied to work in a professional environment because of classes like Strategies, and Composition.

In field classes have been a fun, I've had a lot of hands on training most of which I think will be relevant and applicable to many of the potential career fields I will be looking to get into, as I work with Career Services. The facilities have never been a problem, and class size has never caused issues such as having to wait to use equipment to run a lab/experiment. I definitely take notice that materials and resources are kept up to date as needed assuring that what we are learning is relevant post-graduation.

Overall I'd rate my time here at ITT as a 9 out of 10 leaving room for improvement as all things should, but surly a positive life experience.

Sincerely,

(b)(6)

Sean Casey

May 4, 2016
ITT-Tech Louisiana

To who it may concern, my time at ITT- Technical institute has been one with a great urge to find more knowledge. The knowledge to be able to go into the real world of my field and have the confidence I need to be able to clinch a job spot. Also, the instructors do a phenomenal job of teaching us the material for the day and giving us a helping hand when it comes to lab time. They also do a good job always giving us the information we may need to get into contact with them if we should be absent for class.

In addition to that, our instructors and the rest of the ITT-TECH staff have done a great job in letting us know the policy for missing multiple days of class. As well as the consequences that may occur if you miss more than the allotted days.

05/04/2016

Sincerely,

(b)(6)

ITT-Tech Levittown

ITT-Tech has provided me with a well-rounded education that has given me the opportunity through, the materials covered, the instructors, and the Career Center, to help secure an Internship with the (b)(6)

(b)(6) Materials covered in the first three quarters have given me an opportunity, very early in my Information Technology career to succeed. The staff at the school has been very helpful in providing whatever resources are needed to see that we not only succeed but to also thrive in our new career path. Every time I have needed something from the staff, they were more than willing to help out and to make sure that the item was seen through to the end. The instructors have been very knowledgeable in their respective fields and have pushed us to higher standard. The instructors have a genuine interest in seeing us through not only school, but also into job placement. This has been a positive experience for me thus far and will only get better going forward.

Sincerely,

(b)(6)

ITT is helping me achieve my goals for myself. I love to learn new things and acquire new skills. ITT is helping me meet all of this. The instructors here are quite helpful with any questions that I might have class work related or not. That's the thing that I like the most about ITT. There is so many people here to help me achieve the goal that I have set for myself. ITT is also creating job opportunities to help me grow not just job skills but to grow as a person also.

Zackery Fairbanks

(b)(6)

To whom it may concern:

In my year at ITT- Tech I have had a great experience. The instructors have been awesome. When they see me having trouble they offer to help me and come in on their days off to help me. Sarah in the LRC is wonderful she is so knowledgeable. Mr. Carter is always helpful if I don't understand he takes the time to explain it. Mr. Renno is awesome as well I struggled in his class but he always made time to talk to me and help me with whatever I needed. Amy Wailis the career source person has been great she has helped with my resume and is helping me find a job in my field.

There are many other instructors that have helped me along the way. The instructors know what they're talking about they are very knowledgeable in their prospective fields.

Thank you

Susan Wike (b)(6)

(b)(6)

05/03/2015

Jeremy Raines

The way that ITT-Tech has help me. To be better at my character, knowing the different kinds ways to act around people. Know how to reach other people, just knowing the roles that people play all of the time.

Having more education to have a success job, and working with other people without stopping them and having to ask the boss what do they mean? Even with ITT-Tech, some people may have more education then you do but asking questions does not hurt anyone. The more education the better.

The more education that I have the more jobs that I may get. That is another reason why It helped me.

To me either way, having small class rooms, having less chances on meeting people. Having bigger classes, in the long runs you have chances on meeting more people. Either way you meet people, working in the work force, it seems like that they you can't meet anyone, even thought that is not my reason on being there.

I think that It is a success to my future.

(b)(6)

To whom it may concern,

In my time at ITT-Tech, I have had the pleasure of learning from some very extraordinary people. One of these Instructors is Krystal Girton. She has always been very upbeat and positive about her class and what she is teaching. I look forward to her class, where we are learning to work in a group environment. I believe it is very important for the instructor to make the subject interesting and to keep the students involved and Mrs. Girton does a very good job. I am never bored or lost and this is due to her ability to engage us in the curriculum.

I believe that all instructors should be able to teach the given subject with confidence and a thorough knowledge of the subject matter and Mrs. Girton definitely does this.

Thank you,

(b)(6)

Linda Smith

My time going to ITT Technical Institute in Kansas city, Kansas was both fun and a good experience. All the instructors and staff was very helpful and with any questions or problems I had. Going to ITT has gave me the knowledge to improve my skills and has give me the opportunity it advance though IT career. Prior to going to ITT I had basic computer skills landing me in basic tech. After Starting ITT I start climbing to the ranks to where I am now as the (b)(6).

Stephen Mogensen

(b)(6)

May 3, 2016

To Whom It May Concern:

My name is Jerad Riggin and I attended ITT Technical Institute, in Kansas City, Missouri. I received a Bachelor's of Science Degree in the program of (b)(6) This degree has changed my life,

Sometimes we forget to thank the people that have helped change our lives. I want to thank the administration, faculty and for the academic support I received during my attendance. I knew that everyone had my best interest at heart.

I design and support IT infrastructure for a major enterprise, (b)(6) My salary is (b)(6)

This has afforded me the life I dreamt of. I have traveled to Mexico several times, and to Korea. I live in the fashion that is very rewarding. If I want to go to Denver, Colorado, or to Los Angeles, California to a concert I have the resources to fly and stay at nice accommodations. I have a trip planned for later this year to Ireland. I am living the American dream.

I have made what I consider a life- long friend that also attended ITT Tech. I was taught a strong foundation on which I could continue learning in my job and be productive. This experience as I said earlier was life changing!

Thank you ITT Technical Institute for all that you did for me.

(b)(6)

Jerad Riggin

May 2, 2016

To whom it may concern;

I am writing to you to discuss my experience here at ITT Technical Institute in Austin, Texas.

As a current student of the Austin Location and a former graduate of ITT Technical Institute, I am pleased with education I am receiving. I have enjoyed the interaction that the staff has given me as I have sought to increase my vocational abilities.

From the moment I entered this institution, I have been helped to resolve all my concerns regarding coming back to gain more education. I was able to work with the recruiters, finance, and administrative staff to help me pursue a career in drafting. After the instructors had taught me core skills and tools of the trade, the career services helped me find an employer who is able to work with my hectic schedule.

Also my time here has allowed me to study under people who work in my same field. Their guidance in my education has aided me in be able hone my skills in drafting and design. They have also informed me of the culture, mannerisms, and expected skills that allowed me to break into the drafting field. But most important to me, they give me access to skills, knowledge, and resources that have allowed me to be creative and productive in my passions and hobbies.

I believe that ITT Technical Institute in Austin has helped me succeed in my educational, vocational, and personal goals thanks to their wonderful staff. Both my family and I will benefit from my time here at ITT Technical Institute in Austin. I would recommend this school to anyone truly has a passion for learning.

If you have questions or would like to contact me, please feel to contact me.

John Kennard

(b)(6)

Why I like ITT Tech

By

Justin Yaklin

I started in the (b)(6) Degree program now I am in my (b)(6) of the (b)(6) Bachelor's Degree program at ITT Tech Austin. I have really enjoyed the time I have spent going to school because I have always been interested in learning more about the inner workings of computers and networks and also how to make sure that they safe to use and protected from harm. The education that I have received assists me in my job every day and I have created a fantastic network of people that I can rely on in my future endeavors.

I have a deep appreciation for the instructors at ITT Austin because they all work in the field and have firsthand knowledge of what they are teaching. They are able to answer questions ranging from simple and basic to very in-depth and are willing to take the time to explain themselves in a way that is both practical and knowledgeable. I very much like that the class sizes are smaller than most college classes this way there is more personal interaction with the instructors. I respect the fact that the instructors, office folks, and the Dean and her staff are always here when they say they will be here. They are here until 11pm every day and weekends while most of these people also work 40+ hours a week at their other jobs. It says a lot about these individuals to be willing to put forth so much of their time to ensure that all students receive the best education and have the best possible school facilities. I will always look fondly upon my time and education at ITT Tech Austin because of this.

Thank you,

(b)(6)

Justin Yaklin

2 May 2016

To whom it may concern:

ITT Tech is a school that offers a real world education in topics that will enable the student to be an asset to any employer. This is achieved by ITT-Tech employing good instructors that are knowledgeable about real world situations and what is expected by employers. They can easily teach these kinds of values because they have all been employed by very successful companies, this allows their education to go beyond academia and into real world applications. I feel that this realistic approach is better than most Universities, who have a tendency to teach things that are only relevant in the classroom.

The classroom sizes are appropriate and are conducive to learning. The small class sizes allow for one on one time with the instructor and that makes it very easy to make sure the student has a good understanding of the material. It makes it possible for individual students to ask questions during the lecture to gain a clear understanding of what is being taught. I greatly appreciate the small size of the classes.

This school allows students to learn lessons in a hands on fashion. The classes have labs that allow the student to not only read and take notes about the subject but to also do the material and this allows the student to gain a much better understanding. This is also done with the way assignments are done, when the instructors go over the questions, and apply the material to things that are actually found in the work place. ITT-Tech offers a great education that allows students to be greatly employable when they are finished.

(b)(6)

To whom this may concern,

ITT-Tech

ITT- Tech is a wonderful school full with teachers ready to show you what to do when it comes down to your degrees. Along with wonderful students that some time down the road become your colleagues, and show you how to work as team from the start of school. Compared to some of the class I've been too in University's, where the class is a hundred plus. Almost no time with the teacher one-on-one, classes that only last an hour long, and almost too little time with teams. ITT class last five hours long, and class are at 42 people max sense I've been coming to school. Teacher always welcome questions through class, and with no rush. The labs are setup to help show what you would be working in the field. Something I find wonderful about ITT is the online bookshelf. Because, one thing is that books come out of your pocket taking all your bills. They also have a career servicers helps you find a job in your field and help you with your resume, and got your foot in the door.

(b)(6)

05-02-2016

Dear whom this may concern,

I'm a current student enrolled at the Austin Texas ITT campus studying Electrical Engineering. As of today I am halfway through my third quarter here and I can proudly express my satisfaction with the curriculum and environment that the school provides. ITT has held the practical education that coincides with the theoretical studies almost seamlessly. This being the reason why I decided to enroll and attend this school. A task seeming complicated at first glance, made easy by the staff in the recruitment and financial aid department. Walking into my first quarter, my work experience in the industry was limited to retail mobile phone repair. The career services team, who tirelessly worked to aid me in achieving my goal of leaving the retail setting and today I am currently working as a (b)(6)

(b)(6)

Best Regards,

Jake Pattinson

(b)(6)

My name is Ashleigh Hall. I am currently in the Associate Electrical Engineering Technology program at the Austin Campus. My experience here has been amazing. I feel like this school is my second home (I usually spend more time than I do at my house). The Dean, Dr. Bradley, from day one has made me feel welcomed and wanted. I know if I ever need something all I have to do is ask her. The Electronics Chair, Mr. Johnston, always says "Hello" and asks me how I am doing. When he substitutes, the way he teaches helps me out a lot.

My DCAC and now current Integrated Circuits teacher, Ms. Rosales, is kind and patient. She knows what she is teaches is not easy to pick up and she explains it until everyone understands. She is always willing to come early and help us when we need it. My Physics and current Digital Fundamentals, Mr. Sharp, makes each class fun and interesting, which keeps me awake and focus later in the night at around 10:00 pm. He is always here and willing to go over concepts and homework.

My representative, Ms. Carol, checks up on me once or twice a month to see if I need anything and how classes are going. She really cares how I am feeling and how my life is going. My financial advisor, Mr. Tony, helped me feel out my FAFSA and made it all make sense. When I did it on my own, I was so scared I would mess up that I did not complete it and then I came here and they made easier on me and my father who had to apply for a loan. Ms. Arcely helps me accommodate my schedule so I am able to go to my classes. I know my schedule is not always the easiest to meet and I know I start to worry and bug her but she never let me see it.

Everyone is so nice and willing to accommodate so I can reach all of the equipment and get to all of the tables since I am in a wheelchair. I feel I can talk to everyone here about anything that is happening in my life and I know would care.

Sincerely,

(b)(6)

Ashleigh Hall

To whom it may concern

ITT Tech is a great place to learn technological theory. There is a systematic step by step approach to learning here. They don't baby you, will get out of it what you put it. The classes incrementally get harder so they kind of build you up. After two years I feel very confident about my skill set and my future.

(b)(6)

Aaron Moran

NSA

This letter explains all of the good things that you experience at ITT-Technical Institute.

ITT-Technical Institute's staff and the instructors are very friendly and easy to talk to. This includes the Representatives which are usually the first ones you talk to when joining. Then Finance will assist you with your financial needs i.e. loans, grants, financial aid, etc. The Registrar is there to create your schedule and do their best to make sure it fits your personal life's schedule. Career Services is also available for you, they will sit down with you and assist you with your resume and try to find out what kind of career you are looking for. Career Services will help you find the right career that fits your needs.

The instructors are there for you if you were to find yourself stuck in a situation you could easily talk to them and they would be more than willing to take the time to assist you and point you in the right direction. If you have a personal issue with an instructor, the Dean is always available, even if not in person you can always email the Dean and she will respond back to your issue and figure out everything she can to correct the issue. The instructors are the same way if you have an issue in the classroom you can email the instructor and they will do what they can to correct the issue.

All of this I have had the honor and privilege of dealing with while attending ITT-Technical Institute. I would and have recommended this school to some of my other

Christopher Ploe

Network Systems Administration

peers and they have found themselves in the same situations. I think very highly of this school and the staff and the Instructors.

Thank you

(b)(6)

Kerry M. Sleeter

ITT Technical Institute, San Bernardino, CA

May 2, 2016

To Whom It May Concern,

I've been enrolled at ITT Technical Institute since the (b)(6) In that time I have earned my Associates Degree in (b)(6) my Bachelors of Science in (b)(6) and am currently completing the coursework for my Bachelors of Science in (b)(6)

Over the past four years I have grown in so many ways thanks to the education that I have received here at the San Bernardino campus. I've learned skills that will and have helped me in the real world. I've grown both personally and professionally, and gained a belief in myself that I didn't have before.

Earning my Associates Degree in Drafting and Design enabled me to get the job that I have today.

The classes I've taken here have prepared me for the day to day tasks that are associated with Project Management. Beyond that, the classes have taught me how to deal with all different types of people and personalities, and become a better leader.

One of the most important things I've gained by attending ITT Technical Institute are the friendships and relationships with the people that I've worked hand in hand with for the past four years. From the students to the teachers to my financial aid advisor. Without them and the different things they've taught me, the experience would be incomplete.

I'm grateful for the time I've had here at ITT Technical Institute, San Bernardino. Though sometimes exhausting and frustrating as school can be, it's been something I've looked forward to at the end of my day since I started coming here.

Warm regards,

(b)(6)

Kerry M. Sleeter

To whom it might concern:

Hi My Name is Francisco Olivas and I'm currently attending to ITT-tech San Bernardino Campus. I enrolled at school on (b)(6) and have keep going with my education non-stop since. I have graduated with an Associate in (b)(6) and follow for the (b)(6) (b)(6) Bachelor Degree.

ITT-Tech have given me the opportunity of increasing my level of education and knowledge about things that I have only a notion on the pass. I currently work for a (b)(6) (b)(6) I started on that company has a (b)(6), and quickly move up and become a (b)(6) (b)(6) my-self and was able to work solo. The owners give the opportunity of improve my-self and learn more and more. When I signed up at ITT-Tech they saw that I wanted to be more than just a service technician, and this lead to a promotion to a (b)(6)

Thanks to all the amassing and capable instructor that were able to teach and lead me to the correct path I was able to share some of that knowledge with coworkers and better my-self and help other do it.

The San Bernardino Campus is the closet campus that I had, and when I originally visit the facility distance was my main concern, but all the effort has been paying off. The campus has accessibility to several computer labs and LRC were can connect to internet for research some physical books. All instructor are well prepared and are willing to help any time you need.

After almost 4 years of continuous school and education feel like I'm part of the staff of the institution, I know most of the instructors and they know me as well. I will definitely encourage anyone to visit and check all the options that they can offer.

Thanks

Francisco Olivas

To whom it may concern:

Juan Rodriguez

Associate (b)(6)

Enrolled Bachelor Science (b)(6) Expected Graduation

Date (b)(6)

Employer (b)(6)

This letter is to inform people why I chose ITT Technical Institute. The year prior to me enrolling to ITT Tech I was a Commercial Truck driver I spent over 300 hundred days on the road and felt like I needed a change. (b)(6)

(b)(6) For me personally it was something I wanted to accomplish for my mother since she wants me to go to college after high school.

In February 2014 I came to ITT Technical Institute in San Bernardino I spoke with Michael Johnson the representative at ITT he made me feel welcome and said all the classes were taught on campus and it was three classes per semester. I tried another college before hand and they had me going to different locations and I felt lost I haven't been to school since the age of 18 so I was quickly discouraged. I felt comfortable here so I chose to enroll and in March of 2014 I started my Associated Degree for Network System Administration. The reason I chose this program is because I had a love for computers since I was introduced to them in the third grade and wanted to learn more. The teachers here at the school take time with me and other students so the students understand the curriculum. There are many instructors here and the one teacher here I praise the most is Mr. Danforth while I worked on my associates degree he took time during the class to help us with our labs and even after class he was always approachable and took time to help me.

I am not a spokesperson for this school, I tell students who enroll are currently enrolled to use the surveys as a guide to get things to change here at the school or if you have an issue with instructor. I do understand that I am an adult taking endeavor into getting my education I need to make sure I have the support of my family first before continuing my education. I understand college is not free and I am the one responsible for paying my education. One time Mr. Brown the chair for Business came in and told us if there any issues that may arise during our time working on our education to let him now and he will do what he can so that we don't drop out. That to me shows so much integrity and compassion to the students. We're not looked as numbers where people who want to expand our horizons and he wants to help and get us there. I have nothing but positive remarks to say I feel great knowing that I graduated with my associates and soon I will complete my Bachelors and I have to thank the staff and instructors.

Sincerely,

(b)(6)

Leonel Maldonado

5/2/16

(b)(6)

Discussion:

The reason ITT Technical Institute was the right choice is for the reason that they help you through everything from financial aid, classes, and looking for a job. The classes were all chill and the teachers are always there and always answer any problem you may have and they go step by step with you guiding you through the whole lecture or the problem you have. They also know what they are doing for the reason they work in their field, so they could offer an insight on what you can expect working in the field. During my time here in ITT Technical Institute I found they encourage you to help your fellow class mates and also work as a team which I found weird at first for the reason that I didn't socialize with anyone.

Sincerely,

(b)(6)

Leonel Maldonado

May 2, 2016

To Whom It May Concern,

My name is Stephanie Tagaloa and I am a current student of ITT Technical Institute. I will be obtaining my associates in (b)(6) I will also continue my education in the (b)(6) with ITT Tech. to obtain my bachelors in (b)(6)

Like some of you, I was doubtful of ITT Tech. whether or not that I would gain the education and skills needed for my future career. Whether or not that this institute was true to their word and that I was wasting my money. I started out in a community college and gained nothing; I felt that I was wasting my time, money, and effort in the classes that cared nothing of me. Which is why I thought the same would happen when I would become a student of this institute, but I was wrong.

ITT is concerned for you, your education, and your future. They (staff and all) want to make sure that everything and anything can help to further your education and skills. Everyone is helpful and provides great service when they know that they do not have to, but instead they want to.

Professors' lectures are as important as the assignments due to the fast pace quarter system.

Professors here will work with you if there are issues with the students outside of class. No professor at a community college or university would do the same unless you are teacher's pet.

This is not high school anymore, we as students and grown adults are trying to move our way up in the world, and ITT Technical Institute understands that.

I, as a student of ITT, have yet to be doubtful since the beginning of my first quarter here. ITT has not let me down, nor the current students and the alumni down. So please reconsider what it is that you are about to do to hundreds of other students who are trying to do something with

May 2, 2016

To whom it may concern,

ITT has taught me some very valuable lessons that I am confident I will use in my career. I have professors who teach part time and work in the field that the students are trying to get into. Those professors are very experienced in the field that they are in and they try their very best to give advice to succeed in the future. I am confident that I have learned more valuable lessons in from these professors than any online course could have ever given me. The material itself is also very fast paced as one would expect from an accelerated program. Even though it is very fast, ITT is not trying to push students out; if you want to do well you have to give it your very best effort. These fast paced, rigorous courses, have helped me in prioritizing my work load and personal life altogether. I am proud to have my name on the wall for Highest Honors because I worked very hard on getting those grades.

Sincerely,

(b)(6)

Jacob Cornelius

To whom it may concern:

My name is Jennifer O'Donnell I am a current student who will graduate (b)(6) with my Associates Degree in (b)(6) I have been attending I.T.T San Bernardino, CA about two years. With my experience attending I.T.T has been pleasant. Instructors are very well educated and know what they are teaching the students. The information is very helpful not only in the classroom, but also outside of the class room. I also work as a full time (b)(6) for a non-profit company titled (b)(6) (b)(6) The information taught at I.T.T. allows me to utilize it on a daily basis in my current field. I am signed up to attend I.T.T for another two years to advance my education with my Bachelor's Degree in (b)(6)

Sincerely,

Ms. Jennifer O'Donnell

(b)(6)

May 2, 2016

To whom it may concern,

My name is Adelina Luna I am a current student here at ITT Technical Institute in the San Bernardino Campus. I have been a student here at ITT Tech since (b)(6) This school has been beneficial to me since I have learned new techniques in the clerical field and helped me so much. This school teaches us technical skills as well as business skill that are needed at in the business field. I been here as a first time student in college I have learned and accomplished with honors and highest honors. I made this possible with the help I obtain from professors, staff and classmates. The other thing that I like from this school is that they offer student scholarship when you have good grades.

The schooling here at ITT Tech has convenient hours that are just right for me, and besides it is close to home. Why it is convenient because I am a (b)(6) and my schedule is a bit overwhelm but I am glad that hours are great. I am also employed at (b)(6) and my position there right now is a (b)(6) This job is also helping me to have current clerical experience and helps me enhance what I am learning here at ITT Tech. I also would like to continue here at ITT Tech to receive my Bachelor's Degree since I will be already graduating for my Associates Degree in (b)(6). Overall I like attending to this ITT Tech College and will like to continue attending here for my Bachelor's Degree.

Sincerely,

(b)(6)

Adelina Luna

To whom it may concern:

My name is Manuel Medina and I have been a student at ITT since (b)(6) I enrolled one month before getting out from my (b)(6) I have to say this choice of attending school has been one of the best choices I have done in my life. It was a time in my life where I was upset and sad because not everything turned out to be the way we have planned. So, I enrolled in ITT and I felt very welcomed. The instructors are awesome and they help you, there is no way they leave you alone, and if they don't know the answer they will find it for you.

I graduate in (b)(6) with my associate's degree in (b)(6) and I already enrolled for the bachelors program. There was no need for me to look for another institution, I am comfortable here and I know this journey will be successful. With the help of my instructors, I will obtain my Bachelor's Degree in the near future.

Very Respectfully

(b)(6)

Manuel Medina

5/3/2016

Roxann Englert (b)(6)
Student of ITT-Technical Institute

(b)(6)

To whom it may concern;

My name is, Roxann Englert, I am a full time student at Portland, Oregon ITT-Technical Institute. I started in (b)(6) and will be graduating this (b)(6) I chose ITT-Tech because the Electronical Engineering program was exactly what I was looking for. They also offer evening/night classes which allow me to work full time. In addition to that, they gave me a scholarship and helped me with getting financial aid.

ITT-Tech has been the best decision I've ever made. The professors and staff at this school want nothing more than to see us succeed and they go out of their way to help you. Kenneth David was one of my first professors, teaching us Strategies for the Technical Professional. He gave us so many tools towards our success. I had no clue how to do a PowerPoint and now I receive compliments on my presentations, along with my APA papers. The excitement and energy he has, made me more excited to learn and succeed. Still today, he helps me and keeps me excited about my success. Every professor I have had has always been there to help and ~~egger~~ towards my success.

Those equally important towards my schooling success are Mary Packard, Chair School of Electron Tech, she has gone out of way to re-coordinate my classes, due to my health reasons, to keep me in school and able to graduated. Including her stepping up to teach me a course one on one, which there's not enough words for how grateful I am towards her. Mary also gives me such fun projects to do. Another is, Bryan Hunt, the Associate Dean, he has been a great professor, as well as, always being there for me, for help, input, and just to talk to. Mrs. Lcc Anna Knox, the Dean, is another who has helped me. She knows who I am and keeps at to me to stay on the "The Dean's List" each term. I am also grateful to her for helping with Mary Packard in coordinating my class and keeping in school so I can graduate.

My life has and will change so much since I've gone to ITT-Tech. I have learned so much with all the hands-on teaching, all my wonderful professors, along with other student who help me along the way. The career staff also is getting my resume out to employers to aid in my new career life. All my success had been due to this school's professors and staff to which I will forever be thankful and grateful to.

Sincerely,

(b)(6)

Roxann Englert (b)(6)

Student of ITT-Technical Institute

Student of ITT-Technical Institute

To whom it may concern,

As a former student of ITT-Tech I would like to express my gratitude. This institute has allowed for me to gain a steady progression, professionally in the Information Technology field. Through the structured environment at ITT and the skills taught at ITT Tech I have been able to achieve great success as a professional. The professionalism demonstrated by this organization semester after semester never went un-noticed and has helped me achieve possibilities I never thought would be possible, coming from a construction and drilling background. I look forward to passing the invaluable skills I learned on to others as well as continued success throughout my life and career.

Thank you,

Michael Elmore

(b)(6)

I would like to express much thanks to the following teachers that made the biggest impact on my professional development:

- Randy Klug
- Jim Wallace
- Henry (Tony) Wolf

To whom it may concern,

My name is Logan Doerfler and I would like to provide you with a synopsis of my experience at ITT Technical (033 Portland, OR) thus far.

Allow me to start from the beginning. (b)(6)

(b)(6)

(b)(6)

I grew increasingly anxious knowing that I needed to continue my education to meet my goals, but had made no tangible obligations or efforts towards them. That was when I saw a simple ad for ITT Technical while browsing Google Chrome. Curious I looked into this school and was quickly impressed, so I filled out a contact request. Not even 15 minutes later I received a friendly phone call from Mr. Debusman. Mr. Debusman invited me to come to the school for an interview so I scheduled the interview and a few days passed.

I arrived at ITT technical for my appointment and I remember noting how incredibly clean campus was. For weeks, I had been touring campuses but none had been as tidy or up kept as this; as a man with military values I truly appreciate the discipline they keep in maintaining cleanliness. Anyway. When I arrived Mr. Debusman quickly saw me and we began our interview. The way he approached our conversation sparked additional interest in ITT. He cared about my goals and ambitions and showed me how ITT Technical could set me on a path to success if I was willing to attend and apply myself. He was the first of many staff members I interacted with at ITT Technical and I have to say he was a major asset in my recruiting process.

Fast forward a few months into my second term (Winter term) I had built a relationship with the student VA liaison rep. A positive and frank individual, he helped me deal with the VA and get my issues sorted out. With his help I was able to get the courage to deal with the VA & get my issues started taken care of. His position is blessed off by the staff here at ITT and is greatly appreciated by myself and other veterans as well. I am currently in training to take over his position after his inevitable graduation this summer. I aspire to be as much an asset to others as he was for me.

Continuing on to staff. The faculty here are not only the most professional group of individuals I have dealt with as a whole, but have also been quite flexible, understanding, patient and candid with me. These things together have enabled me to achieve an accumulative GPA of 4.0 thus far. That fact should not be taken lightly, however, because the curriculum here at ITT Technical is nothing to scoff at. I am a student in the NSA program and it has been a challenge, but with my reliable study partner, dedicated staff and exceptionally formulated materials the learning process has been swift.

I sincerely wish the reader(s) an outstanding day and hope this provides some insight.

Respectfully, Logan Doerfler

Signed: (b)(6) May 02, 2016

To whom it my concern,

My name is Brandon Hogan and I am writing this letter to speak about my experiences at ITT Technical Institute. My wife and I decided that at (b)(6) we wanted to go back to school to help further our career and after looking in to the schools around us we picked ITT Technical Institute. There was a couple of reasons for this choice. First was the hands on portion, we both felt that would be more valuable to us then just reading from a book and as it turned out the hands on portion had added benefits. One benefit was the one on one time with our instructor's during the labs and also the relationships that we made with our instructors, which I will never forget. People like Ken Iuchini who would always make himself available if I or anybody else needed him. He taught in the electronics program but what we found was that his desire to help and push us to succeed was not limited to that department. Our math instructor Annic Bregmen who would come in early before her day job to tutor me then go to work only to come back and teach my class later that night. I truly believe that without these people and others I wouldn't have not done as well as I did.

The second reason we made the choice in a school that we did was the job placement aspect. Having people that worked there ready to help with the entire job getting process seemed like a plus but again we found other benefits. The biggest benefit I have found was the opportunities to network with professional in my career path. Between these two aspects I have obtained a career (b)(6) and my wife now works in (b)(6) I truly believe that if it was not for this school, and the outstanding staff that work there I would not be where I am today.

(b)(6)

Brandon Sean Hogan

My name is Brian LeStaht and I am a student here at ITT-Tech Portland Oregon. I started my journey here in (b)(6) I recently came (b)(6) and spent a year going to PCC. In that year time I learned nothing and felt that I wasted a year of my tuition. I then saw a commercial on T.V talking about ITT-TECH. So I did a little research on the school and talked to a few of my friends who went there and they told me about how well the instructors are and that they care about the veterans that attend the school. So I met with the recruiter and after a brief tour of the campus and a sit down I decided that this was a good school.

Well here I am less than two months away from graduation and have enjoyed my time here at ITT-TECH. One of the thigs that the school has allowed me to do is be the Veteran representative for this school. To me any school that wants to take care of its vets is a school that I am more than proud to be a part of. In fact, once I graduate I tend to return to the school to continue my education in the hopes to not only get a higher degree from the school but to ensure that all future vets such as myself understand how much this school takes care of it vets.

(b)(6)

Brian LeStaht

1/5/2/2016

Dear Sir/Ma'am,

My name is

(b)(6)

(b)(6), and I would like to share my ITT story.

In

(b)(6)

was a

(b)(6)

(b)(6)

(b)(6)

After finding no success with work, I came in for a tour of ITT one day and was immediately signed up for their (b)(6) in their Electrical Engineering program. They helped sign me up with the G.I. Bill, then gave me resources for liability & housing.

Even though I was

(b)(6)

~~causing~~ causing me to fall behind a little in

my classes, they took the time to help
tutor me & catch me up on my
missed work!

I have never had an educational
experience like the one I have had here.
They really do care. I am now in stable
housing and in my (b)(6) I am
very grateful to the teacher & staff at the
Portland campus & would recommend this
institute to anyone looking to pursue their
academic dreams.

yours in
service,

May 2, 2016

To Whom It May Concern,

Becoming a student again was a big decision that I did not come to lightly. I weighed the pros and cons on whether to attempt a program that was completely out of my natural comfort level. The constant tug and pull of the, should I or shouldn't I were put at ease the moment I came into the campus to speak to someone about the school. The person I spoke with was Erik Petersen in recruiting. He was very friendly and had an easy nature about him which allowed me the confidence to ask questions about the school and the program. With each question I asked the more I felt that ITT would be the right fit for me. During this time he gave us a walk through in order to give us a better feel of the campus building.

During the initial walk through I came face to face with one of the instructors who would later become one of my greatest mentors on the campus, Mr. Michael Wheaton. At first meeting I immediately showed him examples of my abilities with sketching out floorplans, which in hindsight was the entire reason I even thought of drafting as a career move. Like a nervous kid on the first day of school I flipped through my journal showing him all my different hand-drawn designs and 3D views of different room placements. He was very gracious to me, being that it was a busy school day and spent time talking about my drawings and the program itself.

I knew from that moment on that I wanted to be a drafting student. Starting the first quarter I came to the realization that drafting no longer was solely done through the drawing aspect of conceptualization. It had transformed like all technology into leaning towards computer programs and computer technology. The most that I have experienced with the subject is basic

social media outlets, like blogging or photo editing programs. So the concept of designing a drawing within a program with key strokes was completely foreign and might I add a bit intimidating.

Thankfully the philosophy behind ITT allows for this newbie attitude and uneasiness. Many of the students attending the campus are students returning from a hiatus from higher education or first time students looking to create a career for themselves. I fall in the first category. After two years of being completely disgusted with the early child education sector and needing the big change I came to ITT.

The real reason ITT works for me is simply because everyone cares. Plain and simple. The students that you start the program with become family at least that is the experience that it has been for me. We help support each other and listen to each other in the moments that we need it the most. We network to help tutor each other in the areas that may need a bit more guidance. Unlike the other higher education institutions who are a bit soulless and entirely cut-throat, where you are nothing more than a number, ITT does a complete 360 degrees.

At ITT everyone cares. From the Instructors, to the Support Staff, everyone has an eagerness to help any which way they can. You are not thrown out to the wolves to sink or swim, if you have the aptitude and attitude of persevering against any obstacle all the Instructors at ITT will work with you.

I know this first hand simply with one moment in time. In my most weakest and soul crushing moment rather than worry about the general semantics that having to take a three week break to attend to the all of a sudden death of my father. Lee Anne the Dean told me not to worry to go and I can take care of everything when I got back or through emails. Having to not

carry that stress into an already highly stressed situation was one of the greatest kindness that anyone could have given me. I am eternally grateful to both her, Brian Hunt, and Mary Packard for working with me to keep me enrolled and getting all the paperwork and emails needed so I didn't fail that quarter.

The care and kindness continued the moment I got back and to this day with the forethought of allowing me to take the next quarter off in order to have time to grieve and asking me as to how I am doing at the beginning of each quarter since. Even allowing me to breakdown in her office a time or two. I can safely say that I would not have had this attention at any other higher education institution.

I have gained a vast amount of knowledge and experience through my education at ITT. I have learned programs that were previously unknown to my vocabulary. Each new computer program added to my arsenal of drafting capabilities has not only expanded my mind's internal information, it has also made me more viable in the current market. No information is wasted information. No class is a pointless or "fluff" class, unlike the filler classes that I took when I was first attending college. That is one of the biggest selling points is that I would not be wasting my time with taking classes that I would not need.

Honestly, I cannot say enough positive things about ITT. Well to be frank, the people behind Portland's ITT campus. From the staff to my fellow students who have made this process of returning to school a completely positive experience I can't thank them enough.

Sincerely,

(b)(6)

Name: Bobbie Casteel

Title: (b)(6)

Organization/aff (b)(6)

Mailing address: (b)(6)

Email address (b)(6)

Telephone nu (b)(6)

To Whom It May Concern:

I am Bobbie Casteel, (b)(6) and student at Carmel IN/Portland OR ITT-Technical Institutes (ITT-Tech). I completed the (b)(6) Degree (half online and half at Portland) and the (b)(6) Degree (at the Portland campus). During my time at ITT Tech. While at ITT-Tech I was able to able to apply the knowledge and skills I learned to challenge myself inside and outside of the classroom.

I completed NSA program while working as a (b)(6) and a (b)(6) (b)(6). They were for a large ship repair company and the biggest Athletic apparel company in the Pacific Northwest. During my time in the shipyard, I was responsible for 8 locations and over 4000 users and when I was working for they athletic apparel company I managed security systems worldwide.

In the NSA program the Networking classes, Linux classes, and all the server classes helped me maintain both of the Environments I was responsible for managing. All the NSA core classes were able to help me understand how to navigate, build and maintain an Enterprise environment better due to the knowledge of ITT-Tech's instructors. I was continuously able to improve my skills at an alarming rate. Every class I was able to take something I learned and applied it to my current job functions.

Once I left the ship repair company, I was able to work for the largest athletic apparel company in the NW and apply the Linux knowledge I obtained from the NSA and ISC courses to the role of (b)(6). I was able to manage the Vulnerability networking devices and all of our endpoint security devices across the globe. Since most devices use a Linux based platforms, I was able to apply my Linux I, Linux II, and Linux Security skill obtained in class to how I needed to manage the devices. Since most Security tools are a standard Linux base platform, these skills were crucial to completing my job.

When I had an issue at work, I was able to replicate the problem in class for my instructor. My instructor was able to help me understand the issue at hand and help me break down what I needed to do to fix it. The instructors are a critical part of ITT-Tech success in helping me grow. Their knowledge is something I couldn't find when I was looking to go to a community college.

With all the skills I obtained from my previous employment and ITT-TECH I now am currently and (b)(6) and an (b)(6) (b)(6). As a (b)(6), I am responsible for writing policies and procedures for clients and our private companies. I also conduct Risk Assessments, Incident Response plans, and Vulnerability assessments for our clients. I was able to utilize the Transfer of learning from ITT-Tech into my career.

The whole Bachelors program is relevant to what I am doing at this current moment in time and could go on for days how each course ties into my everyday job and life. I appreciate ITT-Tech for providing me with the amount of knowledge I obtained.

Being an (b)(6) has become a passion of mine. I love to teach students and give them the skills they need to grow. I can understand what they need in class due to I was in the same seat as they were at one point in time. Being able to give back what I have learned is important to me, and if ITT-Tech loses its accreditation, I am not able to continue giving back to the students I enjoy teaching.

I am currently studying for my (b)(6) (b)(6) and I have noticed that ITT-Tech's curriculum has laid the foundation for me to understand all the topics within the certification book. The farther I get in my career and the more I teach, the more and more I appreciate the curriculum provided to the students.

When going back to school (b)(6) you have many unanswered questions: How would you balance work and school? How would you do the homework? How would you keep (b)(6) while at school? And the big question a school that will allow you to fit in the job market as quickly as possible. After good thinking trying to answer all these questions, I discovered that ITT-Tech particularly ITT-Tech Kennesaw, GA was the answer: ITT Tech Kennesaw not only offers a high standard education but also it is a perfect fit for a working parent.

The education level and all the means put at our rich at ITT-Tech could only lead us to one thing: Success. When I started the school of Drafting and Design Technology, I was exposed in my first quarter to the most advanced and the best classes in the field. This fast start, which demonstrate the excellent time management culture at ITT-Tech, enable me to add quickly skills the job market in my field is looking for. This allowed me to work in my field while going to school.

Above everything, what I like the most about ITT-Tech is the customized care depending on each student. Every time you show up with a concern, there is always an accommodation. At ITT-Tech the concept or culture that you should not have a difficulty while going to school is prevalent. You are assisted in every situation from asking a tutoring to career services. Talking about Career services, ITT-Tech Kennesaw has the best. I would highly recommend ITT-Tech.

Best Regards,

Achille Amoussou.

(b)(6)

5.2.16

To Whom It May Concern:

I am honored to have been requested to write a letter of recommendation on behalf of ITT Technical Institute in Kennesaw, GA.

I began my journey with ITT Tech during the (b)(6) to pursue a degree in (b)(6)

(b)(6) Even though I had taken CAD Drafting in high school and was very proficient with the drafting software, my instructors always found a way to challenge me and help me build my skills. During my tenure with ITT Tech, I was very impressed with the many different software programs we were able to learn and the hands on experience with each. My instructors were very knowledgeable about their specific areas of study and would take extra time to personally connect with their students and make sure we felt completely comfortable with a program or concept before moving on. I could tell my instructors genuinely cared about my future and career.

At prior universities I did not have the opportunity to have a truly functional hands on learning experience. I feel this is *extremely* beneficial in a field such as CAD Drafting and Design. Other universities offer a more "conceptual" learning experience with limited access to industry software. The heavy program based teaching method at ITT Tech is very beneficial when transitioning into a workplace.

Approximately (b)(6) prior to my graduation, I was offered an (b)(6) I was able to seamlessly pick up my tasks in both 2D and 3D parts drafting without issue. I am currently employed at (b)(6) I have recently moved into this role after being the (b)(6) I quickly progressed as an (b)(6) because I was able to efficiently read plans and specifications and had well rounded drafting skills and a knowledgeable working understanding of the construction industry.

Sincerely,

(b)(6)

Alicia Jones - (b)(6)

(b)(6)

(b)(6)

May 2, 2016

To Whom It May Concern,

My name is Xavier Ferguson and I am currently a full-time student attending ITT Technical Institution in Kennesaw, GA. From the moment I arrived on campus in (b)(6), I immediately noticed a high level of professionalism. After exploring a bevy of options, I knew that I had found a home. I was introduced to every staff member in the building and received a complete tour of the entire facility. I have been a student at ITT since the (b)(6) and I can personally attest that this educational institution truly cares for its students.

The staff here at ITT-Tech in Kennesaw, GA is committed to excellence. I love the hands on approach that is taken involving each and every individual. Because it is more of a hands on environment, it allows the instructors the flexibility to apply real world business scenarios to their teaching curriculum. Every instructor/professor will go above and beyond to assist his or her students. All of this is made possible because of the leadership at the top levels, to include the Director and the Dean. They will do whatever is necessary to accommodate their students and facilitate the learning process.

Last but certainly not least, there is the Career Services Department. This program is the reason why I am currently employed. The amount of time and dedication to duty is truly amazing. They made sure that I had a professional resume built that proved to be instrumental in my success entering today's competitive business sector. The Kennesaw branch is lucky to have such an experience person running its Career Services Dpt. I will forever be indebted to this wonderful institution of higher learning.

Xavier Ferguson |

May 2, 2016

Here at ITT Technical Institute, we are a family, a team, a brotherhood, and a unity. As a student attending ITT Tech, I have felt the generous aura of my peers and my professors. When my college journey began, the staff and the fellow students of my class all came together so that everybody could see success. ITT Tech contains a structural learning environment and the staff here is hands on as far as being behind each student's college career and accomplishing things that barriers are supposed to barricade in education. My experience here has been enlightening and I recommend this learning facility to anybody who wants to take their next steps into the fields that ITT Tech has to offer.

ITT Tech has been a fundamental part of my routine. I was able to focus and understand the material being presented to me. The professors really strive to make sure you fully comprehend the information. They are all creative in their own way on how to relay the message of that subject.

I can say that ITT Tech was the correct choice to make and I know it will help me further my future substantially. The school maintains its positive stature and never fails to show progression throughout.

Yours truly,

(b)(6)

Kirby Carriman

May 2, 2016

To whom it may concern,

I would like recommend all those who are thinking of attending ITT Technical Institute, and who are on the fence, still undecided. This is Jeassy Thomas, and I owe my life to this institution. There can be negative speculations, and opinions about this school, but that is also true for any institution ever established from politics and religion to sports and art, but in my personal opinion, and personal experience, I have to say, that the staff here at ITT Tech, do not treat you like a number, like another statistic, like cattle. Throughout my time here, I have seen a deep and genuine care and understanding that the staff displays. Characteristics forged, through the crucible of Life, unique, sympathetic and empathetic to you, and your flaws. They are compelled by an un-natural sense of selflessness and pure and unadulterated love to help you succeed. Everyone, from the Dean, to the Financial aid staff, they will go out of there way, bend over backwards, to make sure that your experience here at ITT Tech, is more than just School, they make you feel like home, a home away from home. I have shed tears here, I have laughed here, made new friends here, I feel like I made a family here.

In this letter I would like to extend my deepest and sincerest appreciation, to Mr. Stewart, Jim Stewart. I cannot find words that can express to you, the caliber and moral Integrity of this God fearing man. All I can say is that, he is the one you want in your corner to get through this fight, he knows what to say when you are discouraged, and he has words of affirmation and praise. Pep talking you all the way, totally submerged in your education, pushing you if need be, but ever so kind and gentle. There were days where I felt like giving up, and if it were not for him, I would have thrown in the towel.

I can go on and on, relating to you all the fond memories I have made here, but all I can say, about me and ITT Tech and the fruition of the combined efforts of all the staff and all students...I was going nowhere before ITT Tech, and now I have found a sense of direction, a purpose in life. I have found my way, the ITT Technical way.

Sincerely yours

(b)(6)

Jeassy Thomas (b)(6)

It is hard to overstate the help that ITT TECH has made to my professional career. I attend ITT TECH Kennesaw the school of Drafting and Design Department .I had the delight of meeting cultivated and enthusiastic teachers. The school services staff is motivated by a strong sense of team and success, which inform through a nuanced and sophisticated understanding in you field of study and trends in the professional world. I can say with confidence that ITT TECH is one of the most caring and driven institution I've ever seen.

I believes passionately in ITT TECH. Through my own personal experience, I recommend ITT TECH.

Sincerely,

Kadi. Amoussou

May 2, 2016

To Whom It May Concern,

I am a graduate of ITT Technical Institute Kennesaw Ga. I am currently the (b)(6)
Georgia based start-up that is currently six years established and has been ranked one of the fastest
growing companies in the Atlanta area. I am also the (b)(6)

(b)(6)

My experiences with ITT have been very rewarding and gratifying in terms of life enrichment. I started
my undergrad during the housing market crash. During this time job prospects were slim, mostly
comprised of hard labor type positions. This was not ideal for what I wanted in life so I decided that I
would go back to school for something I was passionate about.

My undergrad in (b)(6) and (b)(6) was a
rejuvenating experience as it helped to revive my excitement for technology. My instructors also had a
real passion for technology which was very meaningful to my own educational experience. I was often
found at the school until they turned the lights out and closed the doors. Those two years were a life
changing experience that I will not soon forget.

One of my favorite thoughts on the past is that of sharing insightful conversations with the instructors
regarding infield topics. I have since continued my education and am now working on my Masters at

(b)(6)

Justin Lanning

(b)(6)

May 2, 2016

To Whom It May Concern,

As a current bachelor student and associate graduate of ITT Technical Institute in Wyoming, Michigan, I'm grateful for the admissions representatives and career services staff.

With their support, I was able to get a full time position at Spectrum Health as a client technology technician where I use the skills I learned from the network systems administration program.

The positive experience I've had at ITT Tech and its encouraging staff members are the reason why I decided to continue pursuing my bachelor's degree in information systems and cybersecurity.

Thank you,

(b)(6)

Matthew Francis

May 3, 2016

To Whom It May Concern,

My name is Kevin Lounsbury. I completed my Associate's degree in (b)(6) here at ITT Technical Institute, Wyoming, Michigan in (b)(6). I am now working on my Bachelor's degree in (b)(6), and will graduate (b)(6).

My experience with ITT Tech has been a tremendously positive one. By applying myself to my studies, and attending every class session, I have managed to maintain a grade point average of 3.93. Although working full-time while earning my degrees has been a challenge, my efforts have been well-rewarded. I had never imagined I would return to college at (b)(6). I assumed I'd be working dead-end jobs for the rest of my life. But attaining my degrees here at ITT Tech has proven otherwise.

I have enjoyed my classes because of the caring and dedicated attitude of my instructors. Because of the smaller class sizes, students at ITT Tech receive more personal attention, and there is more time for getting our questions answered. Compared to the impersonal atmosphere of the traditional college classroom, ITT Tech offers a much more tailored learning environment. Although the curriculum is accelerated, the opportunity to gain an excellent education is unmistakable.

I'm looking forward to walking across that stage again next June. I am proud to be an ITT Tech student.

Thank you,

(b)(6)

Kevin J. Lounsbury

Kailey Stevens
ITT Technical Institute

(b)(6)

To whom it may Concern,

I was in (b)(6) and I have had several (b)(6) continuing on since then. I decided after facing (b)(6) to make my second chance at life count no matter how hard it was going to be. Because of the commercial on TV it inspired me to call the Wyoming location where we set up an interview. My recruiter was extremely helpful. He showed me that mentors were also available to help me, knowing I would need more help than others to get through college. As I was still going through (b)(6) I chose to enter the NSA field. I have been going to the ITT Tech in Wyoming since (b)(6)

The support of the instructors, staff, and administrative personnel have been simply outstanding. Struggling with my health, learning new things can be challenging and they have all worked with me and getting me help to understand everything. The books and materials we have for each course, I believe go hand in hand with each other. I have been a part time student up until (b)(6) where I switched to a full time student.

With me going through so many (b)(6) and still facing (b)(6) I honestly wasn't sure if I could make it through college. I have been very fortunate with the instructors I have had here they have all been more than willing to explain things so I understand them, and answering any and all questions whether it's in class or an email for homework. I would recommend this school to anyone. I have 3 quarters to go to finish my associate's degree and I plan on coming back for my Bachelor's degree at this Wyoming location. I am now a mentor giving back to those who need help as I did. I am making my dream come true and the staff at this school has helped in every way making that possible.

Sincerely,

(b)(6)

Kailey Stevens

ITT TECHNICAL INSTITUTE

PERMITS CONTAINING NO. 17-39519

5/3/2016

Ashlee M. Hook

Network Systems Administration Student

Associates Degree Program

To Whom It May Concern,

I am proud to be an ITT Technical Institute student. From the moment I decided to pick up the phone, like the commercial said, to this very day, my experience here has been more than I could ever imagine.

As a non-traditional student I never thought collage would be an option for me. Really, never thinking I could succeed in school. Having always been in Special Education, due to a (b)(6) my entire K-12 education was a struggle. Entering collage was a terrifying thought, but I had to try. So, I called the Wyoming Michigan campus and was connected (by a real person) to a representative named, Arthur Treadwell.

Arthur made me feel at ease about making my decision and not once did I ever feel pressured. My journey began in December 2014 and I will be graduating this Fall. Has it be easy? No, nothing worth having is. It has been hard work and I have worked hard. The course materials and tools that we have available to us have been amazing. That, along with the help of my instructors, Ms. Gort our dean, the amazing staff, and Mr. Hormel our Director, I AM DOING IT. Not only am I doing it but I'm doing so as an (b)(6) a Mentor with Highest Honors and a member of the National Honor Society.

With Great Gratitude,

(b)(6)

Ashlee M. Hook
Network Systems Administration Student
ITT Technical Institute

May 4, 2016

To Whom it May Concern:

I Graduated from ITT Technical Institute in Rancho Cordova, California at the end of (b)(6)

While attending ITT Technical Institute I received a lot of support from all staff members and teachers. Let me tell you a little about my background, I dropped out of high school at the age of (b)(6). I got involved in (b)(6) at a very young age. By the grace of god on one of my clean living times at (b)(6) I got my GED and guessed most the questions. I spent a lot of time (b)(6). So to say the least by the time I was (b)(6) which was the age I went into ITT Tech, I had lost most knowledge that I learned in grade school besides basic arithmetic. I was very honest when coming into school, telling them about my (b)(6) and past life. I chose ITT Tech as a new beginning. Every teacher I had worked with me, after school or on their lunch breaks, Helping me understand what I was learning. By the time I graduated I went from an ignorant person to highest honors Gold rope. Within 3 months after graduation ITT Tech's career services had already gotten me the interview of a lifetime, I have been with the same company ever since. I work for (b)(6) and maintain medical equipment for 45 different hospitals in northern California. Without ITT Tech and their teachers who are compassionate about teaching and actually care if their students are learning I would be in a totally different place in my life, and it probably would be for the worse.

My experience with ITT Tech is overall outstanding, I could not have picked a better school to do my studies. I have always been fascinated in electronics, but never understood how it all worked, a few teachers come to mind on spending the extra amount of time to help me understand, Ray Mesa, Raiford Hann, Dave Mosekawitz and Harry Canfield. All through my previous schooling as a child and part of high school I was told I would never make anything of myself, and I believed that until these diligent individuals. They truly changed my life and made me believe in myself. Today I feel good about my life and have accomplished goals that may have never been, from this school I have made goals that I never knew I even wanted.

In closing I would like to add the skills and knowledge that I have obtained from ITT Tech is irreplaceable, I make more money than the recruiters estimated on my initial appointment in (b)(6). My program CEET puts me in a category that does not limit me to one particular field but will help me excel in different types of positions and placements, I thank ITT for that.

Thank you for your time any questions or concerns please feel free to contact me at:

(b)(6)

Or

(b)(6)

Sincerely,

John M Raona II

(b)(6)

3 May 2016

To Whom It May Concern:

I am a recent graduate of ITT Technical Institute in Rancho Cordova, California.

I have received 3 Degrees threw ITT Technical Institute. The quality of the education that I received was top notch, this is the reason I went back a second time then for a third time. The quality of the education has prepared me to be a (b)(6)

(b)(6)

While as attending ITT I had many challenges to overcome. The Friday before my very first class on Monday, I had (b)(6). Six weeks later I had to have another one due to (b)(6). I came out of that quarter with highest honors. Then (b)(6). Five months after that I had (b)(6). A month after that I (b)(6). Without the support of the staff and class mates I probably would have not finished, but I did, and came through almost every quarter with honors.

I have recommended the school to many of my friends and colleagues.

I feel the knowledge and skill that I obtained at ITT-Tech Rancho Cordova reflect on the quality of the faculty and Degree programs.

Sincerely,

(b)(6)

Russell Allen

To whom it may Concern:

I am currently an ITT-Technical College student in Rancho Cordova California. I have been attending ITT- Tech for the last (b)(6)

I choose ITT-Technical College for two reasons the ease of attending class at night, and the quality of class's on IT Administration. I have had nothing but quality Instructors who bring real world experience to the class room. Which is helpful to those of us looking for a second career. The Instructors take you step by step on the ins and outs of IT administration. They also are willing to spend the extra time ensuring that you understand the curriculum.

Since attending ITT-Tech I have had help with resume writing, and of course how too effectively put out your resume on social media to attract jobs. I am fully prepared after graduation to confidently step in any IT role. Which will aid in me attaining a quality job. Quality job means better benefits and salary. I would highly recommend ITT-Tech to my friends in which I have, and to anyone who has the drive to accomplish a career that ITT-Tech would afford you.

I feel that the knowledge that I have obtain thru ITT-Tech has opened doors for me. I have meet a lot of good people. The Instructors are very professional and care about what they are teaching the students. So they are preparing you for success.

May 4, 2016

To Whom It May Concern:

I am a current student of ITT Technical Institute in Rancho Cordova, California.

I graduated with my Associates Degree in (b)(6) and now I'm continuing to get my Bachelor's Degree. I'm not currently working but I'm actively looking. By going to ITT it has broadened my computer knowledge, I love being on a computer, so It's nice to know how they work.

When I signed up to go to school here, (b)(6) came with me and made her want to come here also. So she got (b)(6) and signed up for the next quarter. And she's in her last quarter for her associate's and going on to get her bachelor's.

In closing, I'm very happy and pleased with my experience here at ITT- Technical Institute and I'm glad that I decided to go back to school.

Lorraine Jewett

(b)(6)

May 4, 2016

To Whom It May Concern:

I am in my first quarter here at ITT Technical Institute in Rancho Cordova, California

I am learning computers for the first time in my life. I am learning a great deal of computer knowledge. More than I could imagine. I'm enjoying my classes.

The reason I chose ITT Tech is because of all the classes and services they provide, for example, hands-on experience and being able to get help finding a job. I keep telling my friends and family that I'm enjoying my time here at ITT Tech. I have recommended ITT Tech to a friend of mine who is currently out of work.

I am very proud to be a student here and I'm very confident I will be able to find a new career because of the education I will receive.

Thank You,

Scott Martel

(b)(6)

5/4/2016

To whom it may Concern:

I am a current student of ITT technical institute Rancho Cordova

The education here is good teachers are helpful you do need to do some studying on your own time.

Teachers are flexible with the student's schedules as far as homework goes.

The new hit club is helpful in getting some extra education and hands on experience.

Sincerely,

(b)(6)

Robbie Cunha

5/4/2016

To Whom it may Concern:

I am a current student at ITT Tech Institution in the Networking Systems Administration program.

So far in my career as a student I am greatly enjoying the centralized learning strategy. I really appreciate the professor's approach to teaching the subject matter. I feel like I am able to be myself and learn my own way. Foundation Strategies is a great stepping stone to teach you more about how you learn and to test and show you where you can improve in your learning style. My other class Intro to Technology studies the basics of technology and a little bit of the history of computers.

I am really excited to complete get through this program and start my job in the IT field. ITT Tech has given me a path forward to eventually pursue a career in Cyber Security. They offer a great deal of help finding hands on jobs and internships around the area. I tell my family and friends that I am so grateful to be in this type of school where I can learn exactly what I want and how I want all while working a regular job. I can't say enough about the staff support ready to answer any questions you might have.

Sincerely,

James Stark

Marcy Smith

5/4/2016

I am a currant student at ITT Technical Institute in Rancho Cordova, California.

I have been attending ITT for a year, and am working incessantly towards a degree in NSA.

I have achieved honors more than once as well as highest honors. I am a dedicated student, and I have 39 credits with a GPA 3.75. I have taken introduction to networking, intro to programming, database concepts, client- server networking 1 and 2 with 4.5 credits in all of those classes. I have recently just finished a new firewall installation, and am continuously achieving certs and Spe.

(b)(6)

ITT Technical Institute

(b)(6)

To Whom This May Concern,

ITT Technical Institute has been an integral part of my life as it has allowed me to be successful in my current career as a (b)(6)

(b)(6) The four years that I was a student at ITT Tech, the instructors taught with such knowledge that I was able to use in a real life scenario. Some would ask me how my Associates in (b)(6) and Bachelors in (b)(6) (b)(6) apply to my current role in HR. Each degree that I have earned, I have been able to use that knowledge in my career. In HR, I work with not only the IT part, Human Resources Information Systems, but I also work with Records and Compliance. A lot of legal knowledge goes into this role and have been able to apply what I was taught and there are many projects that I have been involved in that require me to outline the project from beginning to end.

Not only does ITT have quality instructors teaching, but they also have quality staff working the day to day operations to ensure that this school is being ran at its highest quality. The staff and instructors have been caring and honest. They understand that not only are students, but we also having other priorities outside of school. The staff works with each student to ensure that the quality of the program is not compromised and that they are receiving all of the necessary information.

In closing, ITT has allowed me to grow not only professionally, but personally. They have taught me what a professional environment looks like and what to do and not do when something is not ethically correct.

Sincerely,

(b)(6)

Beatrice C. Cortez

(b)(6)

May 3, 2016

ITT Technical Institute
National City, California

I was at a time in my life when I had to ask myself what I wanted to do with the career path I was on. I was at the top level of my current position, (b)(6) and given the economy knew layoffs were in the works. It was time to further my education and try something new. I chose to attend ITT's software development program. From the moment I walked in I felt welcomed and almost like family. The representative I had was great, Ken walked me through all the programs and process so I knew what was the best fit for me. I was fortunate and qualified for a scholarship and financing; Megan made the process so easy to understand and walked me through everything I needed to do. About one year into the program I realized computer programming was really not for me. I switched over to the business management program which was just as smooth as the day I first started. Everyone was very helpful and understanding and explained exactly how the process works and what credits would transfer over. I've been very pleased with this whole experience and it has encouraged me to grow in many areas of my life.

Thank you,

(b)(6)

Cynthia Homer

May 2, 2016

To whom it may concern:

My name is Robert Vinson. I've been a student twice at two different ITT Techs. My Associate of Science degree in (b)(6) I obtained at the Henderson Nevada campus in (b)(6) my Bachelor of Science degree in (b)(6) at the National City campus.

My experience at the National City campus was very positive. My instructors were both knowledgeable and professional, friendly and caring. Three in particular, Brian Becker, Will Dieck and Christie Joiner, were especially good. They kept their classes fun while at the same time having a great atmosphere to learn the material.

I would recommend ITT Tech to anyone looking for a career-focused college with an emphasis toward personal achievement and excellence.

Sincerely,

(b)(6)

Robert K. Vinson

(b)(6)

May 3, 2016

Jennifer Haynes

Associate of (b)(6)

Bachelor of

To whom it may concern:

I received my Associates Degree in (b)(6) from ITT Tech in (b)(6) and went straight into the Bachelor's afterwards, and graduated in (b)(6). I had my concerns when I first started because of all the mixed reviews and lots of negative ones as well but I knew I needed to take a chance and find out for myself if this school was for me. I learned a lot from the teachers here, who all came from the field in which they were teaching. The teachers do care about the students who put forth effort in their education. The experience and knowledge I gained from my instructors was paramount. I learned a lot, graduated with high honors, and wouldn't change that experience. I did not get a job in the specific field I was looking into from this degree, but my education here did lead me into a well-paying job at (b)(6). So, I am very appreciative of the education I received at this school.

Sincerely,

(b)(6)

Jennifer Haynes

Hello, my name is Akemi Bonner. I am currently an ITT Technical Institute graduate and attending student. I have completed both my associates and bachelor's degree here at ITT. Right now, I am currently enrolled in the Masters of Business program hoping to gain my master's with ITT as well. ITT has opened up a lot of doors and have given my life direction and discipline. With the help of the ITT staff and instructors, I have been able to successfully develop myself as a professional. Before coming to ITT I had attended a few local community colleges and never really felt like I was accomplishing any of my goals. I never knew what exactly I wanted to do or what career I wanted to have until attending ITT. From the first day, I was met with knowledgeable professionals who were more than willing to assist me on my journey to a successful career. When classes were tough, I took advantage of the tutoring that was provided on campus and that played pivotal role in my success in some classes. After finishing my first degree in (b)(6) I entered the information technology field, and worked on a few odd jobs that required the knowledge that I had gained at ITT.

Upon, finishing my bachelor's degree in (b)(6), I was offered a job to work for (b)(6). This offer provided financial security and stability for me and my family. I enjoy my job very much and I look forward to going to it every day. I think that is something that all professionals desire to obtain from their occupation and I am happy to have found that. ITT has been the catalyst for my growth and has provided the leverage for my growth that has in many ways positively affected my life since coming to school. Because of ITT, I am sure of the type of career I want to obtain and I know exactly what steps I need to make to get there. Without ITT, I would have never been able to reach so many heights and accomplish so many of my goals. I do thank the whole ITT Technical Institute administration for providing me with such an amazing outlook on my life and career. It is true, that with ITT all things are possible.

Sincerely,

Akemi Bonner

May 3, 2016

To whomever it may concern:

ITT Technical Institute has had a profound effect on not only the quality of my life, but that of my entire family. When I was younger, my elder brother went to ITT Tech in Virginia, and upon graduating was able to join the (b)(6) program and go on to a successful and rewarding career. Due to his positive experience at ITT, I also chose to attend ITT and have so far received an Associate's Degree in (b)(6) (b)(6). I am continuing my education with ITT Tech, currently working towards a Bachelor's Degree in (b)(6) with a focus on (b)(6). I have found the teachers extremely knowledgeable on their subjects, and also helpful and friendly. I have worked with the Federal Work Study Program here at ITT getting hands-on real world experience in addition to the academic education I am receiving.

This education has been both mentally challenging and emotionally rewarding. Based solely on the education I have received so far, I have had numerous job offers and foresee a rewarding career ahead of myself once I graduate. I am even considering continuing my education here at ITT Tech and working towards both Program Management and Software Development Degrees. If I had not chosen to attend ITT Technical Institute, I would most likely still be working dead end menial jobs with little or no hope for improvement. ITT has given me hope for my future and a sense of belonging.

(b)(6)

John Mathews

I am the most successful I've ever been in my life, and I owe my accomplishments to ITT Technical Institute. Working as a Federal Work Study in the Career Services department prepared me for the job I have now, in the (b)(6). I am able to be a top performer in my company, and the quality of the courses prepared me for that. I am also thankful for the staff and instructors for their integrity and motivation. I have had the best instructors and managers here at ITT Technical Institute, whom I still look to for guidance towards my future and professional development.

Mary Trefero 05/03/2016

(b)(6)

With ITT-Tech I am able to lay a foundation for my career path because of the quality instructors who have in field experience, the integrity of the staff who understand how important education is and the knowledge and insight I have learned here which made a difference in my life. I am currently a full time student in the Bachelors program and working full time in my field thanks to the help of Career Services. These steps forward will give me the moment I need to make longer strides as I run my race to accomplish my goals with my career and my life.

Lester Laynes 05/03/2016

(b)(6)

May 4, 2016

Shortly after I turned (b)(6) I had my (b)(6) so I decided it was time for me to finally do the things I had wanted. I left behind a job I had for over 6 years to move to Florida. I always wanted to get my degree and I had tried several times but never was able to finish.

I looked at ITT Tech in Tampa within weeks of arriving in Florida and I enrolled right away. I found ITT much easier to have to enroll in and continue because they make your schedule for you. Other schools make you pick out your classes and you are left to juggle what classes you will be able to attend and still hold a job. At ITT the classes always start at the same times every semester. Going to class 3 nights a week or on a Saturday morning is something I was able to do and still make ends meet.

The classes at ITT are small enough to be able to get the help you need to learn the material and being able to get a degree in 21 months was a goal that was obtainable.

I am 3 weeks away from completing my degree in (b)(6) and I have a 3.92 GPA. Career services at ITT has also assisted me with finding my new career. I have now been employed as an (b)(6) for the (b)(6) I love what I do and I look forward to going to work every day. ITT has given me the skills I need and I am proud of what I do.

Sincerely,

(b)(6)

Deborah Livesey

My ITT Tech Story
Roberto Guerrero
5/2/2016

(b)(6)

A large rectangular area of the page is redacted, indicated by a solid yellow fill and a thin purple border. The redaction code "(b)(6)" is printed in the top-left corner of this area.

Famous filmmaker James Cameron is quoted to of had said, "If you set your goals ridiculously high and it's a failure, you will fail above everyone else's success." It's this type of overachievement mentality that has helped me achieve success in my life. I have always strived to hold myself to a higher standard. This was something that was founded in my High school Athletics and refined in (b)(6) I quickly learned that "competition begins when everybody else has given up and you are in competition with yourself."

After 8 years of (b)(6) and traveling to many countries in between I was ready to continue what I started with my education. After my (b)(6) I enrolled into ITT Techs' Computer Network Systems Associates Program. Shortly beyond a year of enrolling I had to make the tough decision to continue my education or pursue my professional career ahead of schedule. (b)(6) (b)(6) it was my responsibility to be there for them as a (b)(6) I was able to get my foot in the door in corporate America as a (b)(6) I was able to rise up the ranks as a (b)(6) (b)(6) and currently as a (b)(6) for one of the most prestigious international companies in the United States, (b)(6) Once my (b)(6) and I had found stability with work and family, I re-enrolled to ITT Tech to finish what I had started. Even though I had found the best career I could have ever of hoped for, I knew that I had bigger plans and those involved staying relevant and technically savvy in my industry of choice. ITT Tech gave me the schedule

flexibility of attending evening classes which opened up opportunities to also become a Pony League Baseball Coach, which has strengthened the (b)(6)

(b)(6) Recently I graduated from the (b)(6) Associates Program with highest honors and am enrolled in the (b)(6)

(b)(6) Bachelors Program at ITT Tech. Working in my industry since (b)(6) and filling billets in every area of IT Infrastructure I can validate that the programs are relevant to real world concepts and methodologies. ITT Tech can be the best experience for anybody wanting to further their careers. Coming to class is just one part of it, I found that being enthusiastic and engaging in classes allowed me to really take control of my education.

My goals don't stop at the Bachelors program. That is just a milestone in a lifelong commitment that I have made to myself to never cease the learning process. Hopefully I can be an inspiration to my family and friends. Remember, actions speak louder than words.

May 2, 2016

To Whom It May Concern:

I started attending the Networking Systems Administration program in Pensacola only to (b)(6) and move further south. I was happy to realize that I could continue my degree at the Saint Petersburg campus that unfortunately closed its doors. But, I was still close enough to attend ITT Tampa campus where I complete my Networking Systems Administration program in (b)(6)

Overall, I have a very good experience at ITT Tech, most instructors are very engaging and brings to the class real world knowledge that holds the attention of the class, and all instructors seemed to love what they do. One of the best aspects is all work has clear objectives so you always know what is due when even if you miss a class. And ALL instructors are always available if you have questions through email or phone call.

As an ITT graduate I was able to get a job as an (b)(6) at one of the local employers where my skills that I learned open the door to a more successful career and has many avenues for progression. I believe the knowledge and skills that I learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs. As an ITT graduate I'm proud of the quality of the education I received. Thanks to the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of what the IT field has to offer.

For example, in the (b)(6) I have been working as a contractor I was able to get promoted and have the opportunity to be hired on as a full time employee. This is what I was attending ITT for, they provided the necessary skills I needed to excel in this ever growing field. Without the attention from my teachers, career counselors, this would not have been possible. I recommended the school to (b)(6) while I was finishing my program, so he enrolled in the Networking Systems Administration program and just graduated (b)(6) out of the Montgomery Alabama campus.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Peter Woledge

(b)(6)

Jorge Rivera

ITT Tech Tampa Florida

(b)(6)

Associates Degree

To whom it may concern:

The purpose of this letter is to talk about my success at ITT Tech Tampa. First I like to thank the staff if ITT, from admin, finance, front office and Teachers. I work full time and have a (b)(6) I express my gratitude to ITT for working around my schedule to accommodate for all my needs. I am also (b)(6) I thank ITT for helping take care of all financial and admin issues with the VA department. My experience at ITT has been a good time, always a challenge but never the less exciting.

I currently work for (b)(6) which is a civil engineering firm. Including Land survey, Civil design, and Environmental services. I use ITT techs skills learned to be a professional and outstanding employee, working with CAD Civil 3D and many other software's learned in the drafting and design degree. I have been out of school for more than ten years and it was quite a refreshing training and preparation to the world of business.

Thank you for your time,

Jorge Rivera

(b)(6)

May 5, 2016

To Whom It May Concern,

My name is Wilferson Simbert and I graduated from the Associates of Science in (b)(6) program at the Tampa Florida campus in (b)(6). Currently, I am pursuing my Bachelors of Science in (b)(6) (b)(6)

Currently, I am employed as a (b)(6) in Tampa, Florida. In this position I work on the shuttles and monorails for the Tampa International Airport.

I would say that the PLC class I took prepared me for this position as it focused on programming logical controllers. One of my favorite instructors said something to me that I will never forget. He said, "You're the technician, figure it out". He was basically giving me the power to do it and I felt more confident that day. I am very motivated to further my education beyond my Bachelors as well.

Thank you.

(b)(6)

Wilferson Simbert

May 5, 2016

Leighann Winchester

(b)(6)

To Whom it May Concern;

I graduated from ITT Technical Institute in (b)(6) with my Associates of Science Degree in (b)(6). I have since gone on to pursue my Bachelors Degree in (b)(6).

Currently I work at (b)(6). Looking back at the classes I took in my Associates degree program, I appreciate the courses I took and how the teachers and staff have encouraged me to do the best that I can.

I've been able to keep my GPA up and was awarded the Opportunity Scholarship which has made school much more affordable for me. I liked the flexibility that the evening classes at the school provided. This allowed me to work a full time job and also continue my education, while still having time for my family.

My instructors were essential to my education. Mr. Fleeting always made my classes entertaining and engaging. His teaching style allowed me to develop my IT skills. I enjoyed the foundation he provided. I also enjoyed Mr. Overton's Client Server Networking II and Intro to Linux classes. He brought in so much knowledge from the field and allowed us to work on real world scenarios. The instructors were friendly and relatable; most importantly they made learning fun. The hands on environment helped me use what I learned in everyday life and allowed me to take what I learned in the class room and use in my career.

I look forward to the opportunities ITT Tech will provide me in the future.

Sincerely,

(b)(6)

Leighann Winchester

Student #: (b)(6)

To whom it may concern,

I am an ITT Tech alumni from the San Dimas campus. I attended this school from (b)(6)

(b)(6) During my time here, I was able to learn much from teachers such as Mr. Will Yang (Chair, School of IT), Mr. Tran Long, Mr. Edward Robinson & Mr. Manuel Green (All instructors within the ISC & NSA programs). These instructors stand out, because they are great teachers who ensure they take time with all students in class.

Sincerely,

Adam Wolfe

(b)(6)

May 3, 2016

To whom it may concern

FROM: Perrin Hamilton, Alumni; San Dimas Campus

I was accepted to attend ITT Technical Institute, in the (b)(6). The first thing that caught my attention, was the Administrator's and how they welcomed me into the ITT Technical Institute family from my very first day on campus (b)(6) until the completion of both my Associates, and Bachelors of Science Degree Program's. Today, I am very knowledgeable in the field of Information Technology, as a direct result of Mr. Rick Hoke, Director and Mr. Jan Memmott, Dean of Academic Affairs and the ITT Technical Institute facility and staff.

Most recently, as a result of my education and the assistance of the Career Services Department I have accepted a full time career opportunity with (b)(6)

(b)(6) In closing, the start of a solid career only begins with a solid educational foundation, that institution is ITT Technical Institute, San Dimas CA.

SINCERELY

(b)(6)

May 3, 2016

To Whom It May Concern:

I'd really like to share my story about why I decided to attend ITT, San Dimas. I have been out of school for quite a few years, but always said one day I will get me degree. It was in (b)(6) I had my (b)(6) (b)(6) not doing anything with his life, I decided to give him three options; otherwise, he was going to need to consider making other arrangement with his living quarters

(b)(6) decided school, so we made an appointment to visit and see what ITT-San Dimas had to offer, well as I started looking at what the school had to offer for (b)(6) I was like this is for me. I was really amazed and excited. A week went by and the orientation remained stuck in my head. I decided to make another appointment before I knew it I was attending ITT-San Dimas.

First day of school, was an awesome feeling; the staff were so friendly, we took our student ID pictures and the Dean came in to the class room to talk about what education can do for you, we also had refreshments. It was one those days that I will never forget.

In (b)(6) I will graduate with my (b)(6) degree and so THANKFUL to the instructors, administrators, career services, financial aid representatives and the Dean and Chair of ITT-San Dimas that supported my efforts in making my dream come true – GRADUATE! The instructors make sure that your understanding the program class syllabus, if not, they will sit with you, until you do. What more can you ask for? Who needs stress? I will be returning to ITT-San Dimas for my Bachelors Associate, because I feel that I am NOT just a student but family.

I seriously recommend ITT-San Dimas to everyone, young and old that seriously wants to improve themselves in education. We work as a team in class, the instructors promote this, and it's a great feeling!

We also get recognized as good students, which we have popcorn days, hot dog days, and more, we are a family!

Sincerely,

(b)(6)

Student, Carmen Camacho

(b)(6)

MAY 2 2016

TO WHOM IT MAY CONCERN:

I am writing to discuss my experience while attending ITT Technical Institute in San Dimas, CA. As a Graduate of (b)(6), I am proud of the quality of education I have received. The staff at ITT has more than met my needs as a student, working with me instead of against me on many projects, and having patience to explain things when I got stuck or didn't fully understand the course material.

I'm currently working in my field of study of ISC for (b)(6) as a (b)(6) with plans to move up into (b)(6) in the near future. I would not have the position that I have today if it weren't for the unfailing support of the career service center here on campus. My career service representative, Dianna Diossi, has been not only a representative, but also a mentor and guide while undergoing my studies here at ITT. She not only helped me find a suitable career for me, but she did not give up on me, and was/is always there to give me advice and guidance regarding my profession outside of school, as well as help make my resume stand out against all the others.

When I first came to ITT, I had many questions and doubts about where I wanted to be or what I wanted to do with my life. The ITT recruiters were kind and patient with me, outlying all the different paths I could take, and answered all of my questions regardless of how many I railed them with. I owe them, first, for helping me choose my field of study and helping me lay the path to my eventual success at ITT.

Throughout my 3.5 years of schooling, I've had many different instructors, some more than others, but I can honestly say that all of them are more than qualified to teach the curriculum. They are always willing to help out their students, and have an open door policy that

most other Institutions don't have. I honestly feel, now, after I've graduated, that I can walk into my old instructors office and they will be willing to help me if I have any issues, as well as advise me on real-world issues I may come across in my professional endeavors.

The curriculum has been very educational and I can honestly say, the things I've learned in my classes, I'm applying to in my real job. Because of my hands on experience with Microsoft Server and active directory, I'm able to quickly identify it in my job and it provides me a small edge over people that have never seen AD before. The labs utilizing the Virtual Machine were exceptionally helpful in coming across issues related to Exchange Server and Active Directory that provided me with a unique glance into the software. The fact that I can use that knowledge I learned in the lab and apply it to my job is something that I could only have attained at ITT Technical Institute.

I can honestly say, that if asked where I learned the technical skills that I did, I can tell them that I learned at ITT Technical Institute, and enrolling in this school has been one of the best choices I've ever made for myself.

Signed:

(b)(6)

Erik Bekke

MAY 2 2016

Hello, to whom it may concern

I am writing about the letter of support to you, my experience in Career Service has been great every single one of you have been outstanding helping me get my job I have today. One thing I really like is you don't forget who I am most people meet you and forget especially at a school were you seeing a bunch of students each year. Of course I like to come in and say hi every once in a while but that's because I enjoy being around there it probably my favorite place to go once I get on campus cause you guys care about us. I am currently a graduate from the San Dimas campus; I am employed at (b)(6)

(b)(6) My positive experiences are the people I met that will be long lasting friends and the teachers and of course career services if it wasn't for you I wouldn't have a job. I would just like to say thank you to you Dianna and to Martha as well thank you for everything you have done and for helping me through my journey at ITT Tech.

From: Phillip Delacruz

Monday, May 02, 2016

To whom it may concern,

My name is Jeremy Agrusa, A current student at ITT-Tech in San Dimas California. I graduated with an Associate Degree in (b)(6) and am continuing my education in Cyber Security. I am currently an employee with the (b)(6) as a (b)(6)

During my time at ITT-Tech I have gained knowledge in multiple areas of my profession that assist me during my daily activities at work and in my personal life. Using the information from my classes Problem Solving Theory and Advanced Strategies for the Technical Professional. I have created my own knowledge base of troubleshooting techniques to assist me while working out unsolved problems at work. I utilize my lessons from Client Server Networking 1&2 to assist in the management and organization of domain devices and user accounts across the district. After taking my class in database I created databases to track and support multiple schools and over 50,000 student device. I learned to maintain a cisco network which allows me to communicate with our Networking Department and assist in remote troubleshooting.

The Career Services department in ITT-Tech San Dimas has been an invaluable resource for me during my time at this school. Dianna DiOssi was there for me and assisted me multiple times while I was applying for my current position. I feel my application for was more relevant to the position after she looked it over and helped with editing small errors that I had missed. She is in consistent communication with my employment and I, checking my progress. I have also had a positive experience with the Schools Registrar who worked around my schedule. I value the experience and knowledge provided me through teaching staff such as Mr. Robinson, Mr. Tran-long, Mr. Yang, both M. Gonzalez and Mr. Ramirez. They made many of my classes enjoyable as well as educational and am grateful to have taken their classes.

Through this school I have developed a large network of contacts and support that I will value, utilize and reciprocate.

Thank you for your Time,

(b)(6)

Jeremy Agrusa

May 2, 2016

To Whom It May Concern:

I am writing you this in regards to my experience at ITT-Technical Institute on the San Dimas location. I am a current student that will be graduating with my AS in (b)(6) and will be continuing my education obtain my BS in (b)(6). I am currently employed as a (b)(6).

On my first day of school I walked into the Career Services office to formally to introduce myself, I met Dianna DiOssi and let her know she will be seeing me a lot through my time here at school. Since then she has helped me improve my resume, improve my interview skills, and help me build my confidence when in the process of looking for a job.

I enjoyed all my time at school from the administration to the faculty. My personal favorite teacher in Mr. Tran whose knowledge and care for teaching Information Systems appears endless.

He along with everyone in the building made sure I got whatever resources I needed to complete my class and graduate with a 4.0 GPA. That is something I have never had and am truly proud of, I can only thank my wife, my daughter, and especially IT-Tech for my success

Sincerely,

(b)(6)

Kimberly DeLawyer

(b)(6)

May 2, 2016

To Whom It May Concern,

I am writing to discuss my experiences while attending ITT- Technical Institute, San Dimas Campus. I am a current full- time student at ITT- Technical Institute in San Dimas, CA. I am studying in the Bachelor's program in (b)(6).

I am proud of the education I am receiving while attending for the BA- (b)(6) (b)(6) program.

The first experience, was while finishing up my Associate's Degree I was unsure if I should continue with the Bachelor's Degree. My representative, Saj, took the time out of his schedule to answer important questions about the program and any other questions that I had about the school. It was because of this discussion with him that I continued with my education. I have never thought why am I still attending or why this campus?

The second experience, was in the Career Services office. With all the worrying over if I am going to find a position in the field I'm studying or if my resume looks okay. If there was a question I had or if I needed changes to my resume they answered my inquiries without making me feel out of place.

The third experience I have is the teachers are always available by phone, text messaging or emails when I the student have a question or need tutoring. The teachers and their knowledge of the field are helpful when in classes about subjects I have never heard of. It is always a plus when the teachers break down an assignment to language I can fully understand.

With these positive experiences I will always recommend this campus.

Sincerely,

(b)(6)

Kimberly DeLawyer

(b)(6)

May 3, 2016

To Whom It May Concern:

I have worked for (b)(6) now for (b)(6) and believe that ITT Tech played a large part in preparing me for the challenges that I have faced. From troubleshooting circuits to repairing circuit board level components, ITT gave me the skills and knowledge to not only be prepared for my job, but also to excel in my career. I am very happy with the education I have received, and am currently receiving. I hope in the future I am able to give back all that I have received.

(b)(6)

Robert Rodela
Class of (b)(6)

May 3, 2016

To Whom It May Concern:

Since I started going back to school at ITT Technical Institute I have felt that I can relate more to my co-workers about electronics. I am an (b)(6) so the classes I take are very relevant. There are some technicians that I looked up to so I knew I can impress them with a Bachelor's Degree in (b)(6). It's always a pleasure to come to class every day and the instructors are always helpful. I know that when I have a question about the subject that I will get more than I asked. I am looking forward to finishing my degree here and I know that I will always stay in touch with this school.

(b)(6)

Nicholas Cardno
Class of (b)(6)

May 3, 2016

To Whom It May Concern:

Since my enrollment at ITT Technical Institute, I have been better at processing many things better than before. My instructors call and check up on me. The material that I'm learning I couldn't understand in my previous learning experience at Tri-C. We always communicate and the staff is very nice and always ask where you are, and if you need assistance. I was scared to enroll but after 2 quarters, I'm on my way to the Dean's list. I am happy and proud to be a member of this learning community.

Patrick Smith
Class of (b)(6)

(b)(6)

May 3, 2016

To Whom It May Concern:

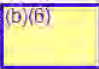

I have been attending ITT for the past 3 years where I have already received my Associates Degree in my field. I am one quarter away from getting my Bachelors, which hopefully I will be graduating with a 3.97 GPA. While attending ITT, I have been fortunate to have some of the best instructors along the way to help teach and challenge me. I think for the most part, all the instructors do a good job presenting and teaching the information so that we can understand.

(b)(6)

Ricky Smith

Class of (b)(6)

May 3, 2016

To Whom It May Concern:

The first thing I was impressed with was the admission process. Fricda helped me completely with the admissions process. I had been to three other schools and did not get that support. Since I've been here, staff have continually made themselves available and answered all of my questions. Faculty have been supportive and have allowed me to learn more deeply by being present and willing to help. ITT-Tech is my Harvard and I am going to make this work with the staff and faculty. I always recommend ITT-Tech to others who are interested in the nursing program and those that who are smart enough to take my advice, will be completely satisfied.

(b)(6)

Jesse Dismon

Class of (b)(6)

May 3, 2016

To whom it may concern:

I'm contacting you to let you know that as a current student majoring in the Associate of (b)(6)
(b)(6) I am pleased with my curriculum, for it is allowing me to learn new technical skills that will assist me with getting a job in my field.

Career Services has assisted me with a short-term assignment as a (b)(6) position with (b)(6) which has given me hands on experience working in my field of study. Currently, they are assisting me with finding another position prior to my graduation.

Our instructors are very helpful and work with me, so that I can complete my assignments. I feel the curriculum will assist me with being successful to start my Engineering career.

Sincerely,

(b)(6)

Troy Artis

May 2, 2016

To whom it may concern:

As a graduate of ITT Technical Institute with my Associate of (b)(6) I feel the courses I took prepared me for my first job as a (b)(6). I feel my Program Chair, Mr. Fassih prepared me with the skills I needed, such as circuit reading, measuring, reading resistors, PLC Technology, and generators and motors. On (b)(6) I will start my first job in my field of study, and I have also returned to ITT Technical Institute, Warrensville Heights to obtain my Bachelor's Degree in (b)(6) which will only strengthen my skills and make me more marketable in the community.

Sincerely,

Jerold Hall

(b)(6)

May 3, 2016

To whom it may concern:

As a (b)(6) Graduate, I obtained a position working with (b)(6) which gave me my first experience in the Drafting field of study. I feel the curriculum prepared me for my first job in drafting. Also, the instructors taught me practical viewpoints of application to design and development in various industries, such as architectural and mechanical.

Career Services provided the drafters with additional workshops which was critical to making the drafting students more marketable within our community. Career Services has continued to work with me, in order to obtain a second position in drafting.

Sincerely, 

(b)(6)

Darryl Darby

May 2, 2016

As a graduate with an Associate's Degree in (b)(6) I feel the courses taught prepared me for my current job as a (b)(6)

The classes and instructors through the curriculum prepared me to be able to work in my field of study. Instructors assisted me with my courses as needed in order to be successful in my school work, and were easy to approach for anything I needed.

I would recommend any student to attend ITT Technical Institute as their college of choice.

Sincerely,

(b)(6)

Jermaine Ross

Education and Experiences as a Student

Michael Fulkersin

(b)(6)

ITT TECHNICAL INSTITUTE

As graduation nears and my continued experience in the work force expands, I see that the opportunities are endless and the skills, knowledge, and one on one training that I have received over the last 4 years has allowed me so many different opportunities.

My name is Michael Fulkersin, I have been attending ITT Technical Institute for the past 4 years.

I started my education journey after I left (b)(6) with no idea what I wanted to study, and what I wanted to set my goals to. Prior to starting school, I spoke with many different friends, co-workers, recruiters (From ITT Tech) and made the determination to begin school with ITT Technical Institute in Arlington Texas, still with no field of study in mind. I was approached by a Recruiter (Mary Hibbets) over the phone and she asked me to come in so we could sit down and talk about career goals, and what all my interest are. After a full day of speaking with Mary I then talked with spouse about all the possible avenue's I can take and we quickly decided that getting my education will be very important in the workforce, but also being a role model for my children, and friends.

From the time I walked in the doors at ITT Tech I was welcomed by all staff, "How can I help you, let me take you to your class, do you need anything else, etc." One very important department that has supported me throughout my journey whether it be career searches, resume tips for success, mock interviews is "Career Service." I have seen a few career services personal come and go, however I have taken the time to introduce myself to each one of them and explain to them my goals, achievements, and they have bent over backwards for me. I have to say the least that without career services and their support I would not be where I'm at today. Thank you to Mrs. Belinda (Director of Career services) and Ms. Laronda for the continuous support and pushing me to be the best.

Secondly there are so many other departments that I would like to mention, however I would be writing for days. Finance thank you for staying 2 steps ahead of me making sure that all the money was taken care of in a timely matter. Recruitment, you all are the best without you all we would be empty!!!!

In conclusion I would like to mention that I have seen ITT Tech go through many changes, but currently I personally believe that ITT Tech in Arlington Texas has one of the best Leadership teams (Gregg Falcon Director of School, and Dr. Joe Dean of Studies). As long as we continue to show improvement, and giving the students present and future all the preparation we can I believe that each student graduating from ITT Tech will be successful in any decisions that they make.

Sincerely,

Michael Fulkersief

(b)(6)

5/4/2016

5/2/2016

To whom this may concern,

I am currently a student at the ITT Technical Institute located in Arlington, Texas. I am very thankful, that I was able to attend this astonishing school. I first attended ITT Tech Technical Institute in (b)(6) (b)(6) was my major, which I graduated from in (b)(6). I am now continuing my education with ITT Technical Institute for my Bachelors in (b)(6) (b)(6) soon to graduate in (b)(6)

Attending ITT Technical Institute was an amazing experience for me. I received the knowledge that was a necessity for my major, became better acquainted with the staff and teachers, and also was able to be a part of great clubs. Whenever I needed help or have a question the staff and teachers could always help me.

I greatly appreciate the Financial Aid and team for helping me enroll and help me throughout the years on keeping me up to date with my Financial Aid information.

My entire time at ITT Technical Institute was amazing. I would highly recommend this school to any one I meet.

Sincerely,

(b)(6)

Marguerite Grant

To whom it may concern:

5/3/16

My name is Michael Hill. I have been a student here at ITT-Tech since (b)(6). My first few weeks was so fast paced, but the faculty here at ITT-Tech helped me get through those times. I am really glad that I chose this facility because from day one the staff here has taken the time to make me feel like I matter the most. Whenever I had a problem they took the time to help me, and help me to solve my problems. They have always given me good wholesome advice and followed up to make sure that I was on the right track. The instructors are so knowledgeable about what they are teaching. Most of all they seem to know when to stop and make sure all the students are on the same page. I look forward to Cumming to class so I am here every day. I am glad I am doing my training at ITT-tech.

To Whom It May Concern:

I am very grateful to ITT Technical Institution at Arlington, Texas, because it has given me all the necessary support for studying this career of electrical engineering and communication. Through ITT Tech, I got a good job in which I'm using everything I'm learning and I'm training more professionally.

I'm very content at ITT Tech because they have qualified instructor for this school. The Instructors are professionally prepared to teach materials professionals. I like that we have all the equipment necessary for laboratories both in electronics and computer labs and this helps me in all my preparation and also helps to develop my career.

I am happy with the financial support offered to me and being able to finish my career without any concern.

Sincerely,

(b)(6)

Reyes Tello

To Whom It May Concern:

I am a current student at ITT Technical Institute in Arlington, Texas. I am studying (b)(6) and will graduate (b)(6) with an associate's degree. I am very satisfied with the program curriculum at ITT Tech. I am learning a lot in all my electronic classes and I am having hands-on experience which is very important to me.

The instructors at ITT Tech are very academically sound and very helpful. I like the way they explain each class and the methods they use in order for the students to understand. The instructors are very open and help you understand the aspects you need help on. Also I like the way the staff at ITT Tech is very helpful and are always there to support you. I know that at ITT Tech I will achieve my academic goals and it will help me grow personally too.

Sincerely,

(b)(6)

Erika Lafiteau

To whom it may concern:

I highly recommend attending ITT-Technical Institute located in Arlington, Texas. The Instructors and the entire staff are very friendly and helpful. The facility is clean and comfortable to say the least. The instructors I have had in my previous classes helped me tremendously in pursuing and graduating to obtain my Associates in (b)(6)

(b)(6)

Degree in

(b)(6)

I never thought how fast the two years went. Until I started attending ITT-Tech. Being somewhat older than most of my peers. I had a lot of fun conversing and working with my classmates. Who knows, you will never know, until you try it. You just might like it. It seems you can never stop learning. So why not learn at ITT-tech, and grow.

If you want to stop wasting your time and be productive. Come to ITT-Tech. Because, you have to learn things anyway. Come to ITT-Tech. And better yourself. You might just thank yourself, besides what so bad about being a better person. To make the world a better place.

(b)(6)

Sincerely,

Daniel Lopez

To Whom It May Concern:

I am currently a student at ITT Technical Institute, Houston West campus. I am enrolled in the AAS NSA program of study and I am very proud of myself and the fact that I have learned so much about Information Technology. I believe in the quality of the educational programs, and the hands on experience available, which is the reason I will enroll for the BA ISC program. The faculty and staff have been so helpful and dedicated to helping me learn.

My experiences with ITT Tech has been wonderful. There have been learning challenges along the way, but with the support from my instructors, I made it through each time.

I am grateful for the Administration, Dean, Department chairs, my instructors and the career services team for their passion to help individuals as myself. I appreciate all their hard work and dedication through my journey.

I am a proud student and believe that what I have learned so far has only been possible by the quality of the staff and the academic programs at ITT Tech.

Thank you for the opportunity to share my experience.

Sincerely,

(b)(6)

Fareedah Bey-Freeman

May 2, 2016

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute, Houston West campus.

I am currently a student of ITT Tech, enrolled in the DDT program. I have learned so much about drafting and the use of drafting software. I enjoy the hands on experience using my skills and knowledge on the projects assigned to me. With that, it's exciting to actually see my designs on paper and I look forward to seeing my own work come to life on actual buildings.

I enjoy coming to class to learn more, and working on my lab projects. My instructors are good and teach in a way that makes sense. What's really neat is that my instructors actually work in the drafting field. They share their knowledge and bring in their experiences into the classroom, which makes learning much easier, interesting and fun.

I believe the staff and instructors show that they care about the students and truly want all of us to learn.

Sincerely,

(b)(6)

William Wamungu

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Houston, Texas, West campus.

As a student of ITT Technical Institute, enrolled in the Drafting program, I can say I am very pleased with my experience. My representative was very thorough with information that was given which helped me make a good decision. The education I am receiving motivates me to learn more and now I have the desire to enroll in the PMC program. I love the fact that my instructors are very knowledgeable and also have real life experience. I am learning from their experience which helps build a stronger foundation. I feel comfortable asking questions and know that I am getting valuable information. I am very motivated to learn so much and hope to become as successful as they if not more. I am currently tutoring and have so much pleasure helping others like my instructors are helping me.

I am thankful for the rest of the ITT family for all the education, help, support and smiling faces. It's only because of their love and passion for what they do makes me love coming to school every day to experience the positive, learning environment.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Edward Barber

May 2, 2016

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute, Houston West campus.

As a graduate of ITT Tech, I earned my Associate Degree in (b)(6) I have had an amazing opportunity to have been accepted in to such a high caliber school. After I graduated from high school, I was lost and did not know what to do next. One day I turned on the television and there was commercial advertising ITT Tech.

The moment I walked into the building, I was welcomed into an atmosphere that was very inviting. Such a friendly staff and instructors provided me with the means to become who I am today. I appreciate all that I have learned and most especially the lab projects that allowed me to apply what I have learned through hands on experience.

I came back to pursue my Bachelors in the same field. I have learned so much and I am grateful for everyone that I have met on this campus.

I believe the knowledge and experience that I have obtained has helped me better prepared to start a career in my field in the near future.

Thank you for the opportunity to describe my experience in obtaining a quality education at ITT Technical Institute.

Sincerely,

Clemente Martinez

(b)(6)

05/01/2016

To Whom It May Concern:

I am writing to you to discuss my experience having been a ITT Technical Institute Bachelor of (b)(6) graduate in (b)(6) from Boise, ID Campus.

As a graduate of ITT Technical Institute, I'm proud of the quality education I received while in attendance. Thanks to the integrity of the administration, faculty and academic support systems at ITT Tech., and the excellent learning paradigm, it best prepared me for the professional and life challenges I was to encounter in the "real world" as a parent, spouse, and (b)(6) and contemporarily as a (b)(6) (b)(6)

I am glad I attended ITT Technical Institute from (b)(6) because its flexible quarterly schedule permitted me to maintain full time employment, a family and still managed to have some free time, which I would have been unable to accomplish had I attended a traditional university; some life arena would have suffered.

Thank you for your time and consideration regarding this letter. I appreciate the opportunity to briefly share the benefits of my attendance of ITT Technical Institute in Boise, ID.

Sincerely,

(b)(6)
Brandon Shores, (b)(6)

ITT Tech. Institute Student

May 2, 2016

Dear Accreditation Reviewer

I am currently attending ITT Technical Institute under the Network Administrator Associate Degree program.

Furthermore, I am currently using my (b)(6) to afford this wonderful institution. Plus, I am a (b)(6)

(b)(6) I already have completed a Bachelor of Science degree in (b)(6) and a Master of Arts degree in (b)(6). I jumped out of an online doctorate level program at (b)(6)

(b)(6), so that I could change my field of study to Information Technology (IT).

Thus far, I am impressed with the high degree of technical expertise at this college with regard to Information Technology. My favorite instructors so far are Allen Schwenke (NT-1110), Micahel K. Robertson (NT-1210), Juan R. Bravo-Valdez (NT-1230), and Mark S. Borkowski (EN-1420). These five instructors would rival some of my Ph.D. professors from (b)(6). In my personal opinion, the IT program here at ITT is the best I have ever seen – and I have worked in the IT field for the bulk of my (b)(6), so having experienced the IT field first-hand, I know the difference. The strength of ITT Tech. is how it blends education with hands-on experience, making it unique in the world of education.

I know it seems backwards that I would go back for an associate's degree after having more than 30 plus years of education, but I am convinced that I would be much more employable with even an associate's degree from ITT Tech. than a Ph.D. from (b)(6). You would have to experience it to understand.

After my associates is complete, I plan on finishing a Bachelor of Science degree in Information Technology and Cyber-Security from ITT Tech. as well.

Thank you for your time and consideration.

Sincerely,

(b)(6)
Samuel Priggemeier

May 3, 2016

To Whom It May Concern:

I am writing this letter to talk about my experience in attending ITT Technical Institute in Boise, ID.

I recently graduated from ITT Tech this last March with a Bachelor degree in (b)(6)
(b)(6) I am very happy with the education that I received from ITT Tech. I feel that because of the support I got from the administration, faculty and careers service I would not be where I am at with my job at (b)(6)

The faculty at ITT Tech out shined my expectations. By having teachers that currently work in the field, real helps to bring in different perspectives when learning about different subjects. It was nice to be about to come to any of them with a real world problem and get the help need that you might not get from other schools. With the knowledge that they brought to the table and the experience they have it helped me to see how everything works in a real job setting.

Also the careers services program they have is a great resource. They reached out to me to help me create a better resume and also let me know of any job opens in my field. They helped me find my current job that I have been happy at for the last 2 years.

I am very proud of the education that I received from ITT Technical Institute. They not only gave me the knowledge, and skills need to work in the IT field they also gave me the hands on training that I need as well. I am grateful to everyone at the school from the staff to the faculty for helping my complete my goal of getting a great education.

Thank you for the opportunity to let you know about my experiences at ITT Technical Institute.

Russell Nielsen

(b)(6)

1/May/2016

To Whom it May Concern

I am writing to explain about my time as a student at the Boise ITT campus with the Information Security Systems Course. During my two years as a student I was instructed by several different instructors that had a vast experience in the field I was studying. This allowed me to learn from people with a good working knowledge of Computer Security.

Fuli Chavez was one of these instructors and also the Program Chair. His experience in field and also with the processes of the campus allowed to work with me and and fellow students to make lectures interesting and applicable. His labs were also able to be more applicable to the lecture we had each evening and he was able to help us overcome problems that we encountered. His experience working as a program chair allowed him to better help us with campus related questions. Even our "General Ed" classes (such as Composition) were able to be composed in such a way that they were able to be applicable to the field we were studying.

The classes I attended at the Boise ITT campus have allowed to be hired onto the (b)(6) (b)(6) My classes taught me how to successfully secure computers and maintain them so that (b)(6) users are able to accomplish their mission. I also was taught how to compose and write instructions that allow my co-workers and (b)(6) personnel solve issues without having to call the support system and wait on hold, thus saving the (b)(6) in support expenses and downtime.

My time at the Boise ITT campus also taught me the important skill of being able to work in a team environment. Many of the lab projects were far to large for I person to accomplish. By working as a team with my fellow students we were able to break a large lab into smaller projects in order to get it fully accomplished. I felt that my time at the Boise ITT campus was well spent.

Prior to graduation the campus placement office made sure to alert me to positions that were taking applications in the area that applied to my job search. I was hired by (b)(6) prior to my graduation so I did not get to work with the placement team. However, the mock interviews and help writing a good professional resume was a huge help in getting hired. Should something ever happen in my employment they are still willing to help even long after graduation. This is a very worry reducing offer that I'm happy to have and hope to not have to use.

Thank you for reading this letter.

I appreciate you allowing me to share my story

(b)(6)

Michael Johnson

(b)(6)

To Whom It May Concern:

My name is Hannah Meyers and I am currently a student in my last quarter of the nursing program of Breckinridge School of Nursing. I am writing this letter to support the request that the accrediting bodies fully accredit this school's nursing program on the basis that this institution provides a full and broad educational experience for its nursing students.

I personally feel that I have been provided with excellent and truly inspirational educational opportunities in my time as a student at Breckinridge School of Nursing. The classes are small and close-knit, allowing the students to become well-acquainted with each other and work as a team toward our educational goals. The classes required in the program prepared us fully for the challenges of learning about the human body and its pathological processes. The campus also provides a fully-equipped simulation lab that the students can come to at any time to practice skills and be supervised by the excellent staff so they can guide the learning and practice of nursing students.

Speaking of staff, I would like to commend the nursing staff at Breckinridge for being completely devoted to the educational advancement of the students here. Never have I been more impressed in any educational setting than I have in my time here at Breckinridge. Every single instructor offers themselves fully to the students—offering to meet to go over concepts, practice in the skills lab, go over any issues we may have. I feel that I have been guided to be the best nurse I can be through the tireless effort and mentorship from the nursing instructors here at Breckinridge.

In that, they also have provided us with incomparably wonderful clinical experiences. In my time at Breckinridge, we have completed over 600 hours of hands-on, clinical training with real nurses and patients in real patient care settings where we have been oriented well to the real world of nursing. The clinical sites were always safe, and we were under the guidance of some of the best nurses I have ever observed. Our clinical instructors were always readily available for any guidance or feedback that we could have possibly needed.

In summation, the educational experience and hands-on training we have received here has no equal. When I began nursing school, I felt like I had no clue about the medical world. Now I feel like I could take on the world, thanks to the tireless effort of the incredible nursing instructors and the rigorous requirements of the educational program.

Sincerely,

Hannah Meyers

To whom it may concern,

My name is Jack Lavoie and I will be graduating from the Breckinridge School of Nursing at ITT Technical Institute in (b)(6). I am writing this letter to share my experience with this program. Initially, when looking at other nursing programs, I was amazed with the amount of actual hands on clinical hours. In the Breckinridge program I have received over 600 hours of hands on clinical hours, on top of all the additional skills labs and simulations. Just this fact alone sets this program head and shoulders above other programs in the valley, including the BSU program. Another bonus of this program that instantly puts me ahead of the game upon graduation is that I have obtained certification in Advanced Cardiac Life Support. This certification puts me on top of the stack of applicants when searching for work as a new grad.

Another aspect that was important to me was being more personal with my instructors because of the smaller class size. Every instructor I have had during this nursing program has been top notch. The amount of experience and knowledge that they all bring to the table is unparalleled to any other program that I have researched locally. I feel I have received an excellent education during this program and I am confident that I have received the knowledge and skills that will make me an excellent RN.

Thank you for your time in this matter.

Sincerely,

Jack Lavoie

(b)(6)

May 2, 2016

To whom it may concern,

My name is Andrew Rice and I am currently attending the Boise branch of ITT; I am studying for my bachelor's degree in (b)(6) I have had previous experience in the electronics field of study during my time (b)(6) One of the issues that I ran into during my time was that while I could fix a broken radio by replacing a board and was even able to identify down to the component what the issue was with the board. They never taught us why said components were bad. For example if I had a sine wave coming out of a board and was supposed to have a square wave I knew to follow the signal back to a capacitor and could say that capacitor x was bad. ITT has taught me the ins and outs of the electronics why it was a capacitor that was bad and not a resistor, why it went bad and how to fix it so that it will not go bad again.

During my time at ITT I have had the help and support of a wide variety of teacher from Mr. Elliot who taught math to Al Foy who specialized in electronics but could help in anything that you may need help with. Never once have I been told that I a teacher could not help me but rather if they did not know the answer they would go with me to find someone who could explain the answer. An example of this was with my instructor John Bernamonti I was having some trouble in getting a Linux based device to work with some electronics that I was working on. He did not know the system so rather than guessing or telling me to go look it up he went with me to find an instructor who knew Linux and who could help me program the system how it needed to be programmed.

I have not regretted once my decision to go to ITT they have run an accelerated program that has allowed me to get my bachelor's degree in a short period of time and use my (b)(6) to achieve this. Other schools I would only have been able to get my Associates degree in the time that I have gotten my bachelors. The other reason that I like ITT so much is there help with employments. There has not been a week that I have not received an email or call from the career counselor telling me about job opportunity that he has found or something that would work to get me more experience in my field of study.

In closing I would like to thank you for your time and for reading this letter. I hope that this letter illustrates just how helpful and great ITT is.

Very Respectfully

Andrew Rice

(b)(6)

05/02/2016

To whom it may concern,

I, Kenneth J Kramer, am a student at ITT-Tech in Orange California studying for a Bachelor's Degree in (b)(6). When I first started here my recruitment adviser helped me to understand the basics of what I would be doing and helped me to choose the degree path I am currently on. Finance has helped me and my parents (as I was only 17 when I started my associates degree) work out the best payment plan we can work with and get all the financial aid I can qualify for, as well as remind me when I need to reapply for my loans and grants. I have had nothing but positive experiences with the campus dean, associate dean, the head of my department chair, and of course many of my teachers here at ITT-Tech Orange. Every teacher here, as well as the associate dean, is willing to put in the extra hours to make sure their students pass and understand the subject material. The career services department here has helped me to write a well structured resume, know how to act during an interview, and to find a job in my field of study that has hours flexible enough to work around my school schedule. I am currently working as a (b)(6) testing and repairing AC power generators. The education I acquired at ITT-Tech helped prepare me for testing and wiring the equipment I work with, helped me to pass the entrance test on the components I am now working on, and feel confident during the interview. Without the help from the departments, teachers, and the chair, I would not be working where I am today.

Sincerely,

(b)(6)

May 3, 2016

Shaun A. Johnson

(b)(6)

To Whom it may concern,

I wish to provide my opinion about the quality of education I received here at ITT Tech. (b)(6) (b)(6) and started my education in (b)(6). I was pleased with my education. I found it to be of great worth. I must cover some aspects that I wish to highlight in this evolution. I have been an instructor in (b)(6) so I have spent some time observing techniques of instruction and I know a little about lesson plans and learning objectives. One of the biggest things I have noticed throughout my time here is the willingness of the staff to help and provide assistance to all students. I wish to start with the Learning Resource Center and the Librarian staff first. I have always been able to rely on our Librarian to come to my assistance when I had a question pertaining to our on line E-Library. I have been able to approach the staff and was given assistance with all of my research questions. I recommend that students use the Library more often. I was pleased with the initial quarter of my education. Part of the curriculum is designed to approach those students with poor learning skills and lack of technological background to get caught up with society as it is now. Problem solving skills were probably one of the best classes during that first quarter. I would also point out that the introduction to computer technology and programs is a great help for those students who have never really used a computer for research.

I actually started my core classes of electronics in my second quarter. I found the staff quite knowledgeable and professional. I attended all of my classes and had an interest in all subjects taught. I truly found my electronics classes interesting and fascinating. So much so that I continued with my education and graduated in (b)(6) with my Bachelors of Science Degree in (b)(6) (b)(6). Over my time here, I developed a fascination with Robotics. I also found some classes to be of special note. Programmable Logic Controllers, Microprocessors, Imbedded Systems, and the accumulation of all this into a final Capstone class. I came to rely on the Electronics Chair for guidance in all things pertaining to my education. I have also relied heavily on the Associate Dean of General Studies. I may be a little odd in this, but I understood the importance of all of my classes to include non-core classes. I thought my Ethics class was especially enlightening along with my Classes in Economics, Micro and macro. I developed a firmer understanding in all of my Math classes- Algebra, Trig, Physics and finally Calculus. I use the skills I gained in my circuit analysis classes to this day at my current employment. I am currently an (b)(6). I can say that my education was probably the biggest aspect of my being hired in this position. I would recommend ITT Tech to others. It has been very worthwhile.

Respectfully, /

(b)(6)

3/2/2016

Hello, my name is Jason J Smith. I am proud to say I am currently a full time student at TTT Technical Institute in Orange County, California. Campus 047. I am currently fully dedicated to my education although unemployed. Before I enrolled at TTT Tech I had worked in (b)(6) for about 10 years. During the past decade I discovered Information Technology is my passion. I left my line of work in order to fully dedicate myself to my education and then start a career. I am now eagerly working towards my (b)(6) Degree and plan on graduating in (b)(6)

My experience at TTT Tech has been stellar. The instructors are excellent, they are helpful and well versed in the subjects they teach. The general studies I have taken over my time at TTT Tech have helped me greatly in working towards my degree. I have taken College Mathematics I, Composition I, and Fundamental Strategies. As a result of these courses, I have improved markedly in both my quality and speed of writing. I now understand math more so than most people I know and can solve complex equations. I found Fundamental Strategies especially helpful. When I returned to school I realized I hadn't been in an academic environment for over 11 years. Fundamental Strategies provided the edge I needed in order to return to school as a successful student. I look forward to more general studies because they help me in more ways than I realize at first thought. Upon looking back on these courses, I can see a remarkable improvement in myself. I know my family and friends notice a positive change in me as well. In my opinion, General Studies is truly how one becomes better educated.

Thank you for your time,

Jason James Smith

May 4, 2016

To whom it may concern

My name is Shawn St. Andre, I'm enrolled at ITT-Technical Institute in Orange Campus California Pursuing my Degree in (b)(6) I'm loving the experience of going back to school and getting my degree. I am loving all the teachers and also the students are very helpful! I'm getting a lot of help when I need it from the instructors. Looking forward to what next semester has to offer and also what the future holds!

Sincerely,

(b)(6)

Shawn St. Andre

5/4/2016

To whom it may concern,

My name is Michael Batterman. I am a student at ITT Technical Institute Orange campus. Currently I am attending my 3rd year and finishing up my Bachelors program for Computer Network Security. It is an honor to be writing this letter in regards to ITT's Outstanding educational programs. I decided to attend ITT over other schools based off research I made at the time which really showed me that ITT stood out among all technical schools. It has been a decision I am so happy I made.

My background is in signal and communications. (b)(6)
(b)(6) I worked in most major positions within that (b)(6)
(b)(6). I thought that I was fairly well rounded in my computer knowledge, however after just the first few weeks at ITT I realized there was so much more to learn. The instructors here at ITT are fantastic and well trained in their profession. I would like to thank all of them for the time they have given as well as the education I can take away from this school. I know that my time here at ITT will serve me well in getting into a new career (b)(6). ITT is looked at with high regards and the students coming out of this school and going into the work environment are doing so with a premier head start.

During my time at ITT I have had the opportunity to work or interact with every dept on campus. From the front office staff through financial aid the career services all the way to the deans office. Although I would be hard pressed to single out any individual dept for commendation as they are all equally good. I would like to say thank you to the career services staff as a whole and Michelle and Kathy individually. Both of these woman exemplify what it means to be a professional. Their work ethic and attention to detail stand out in a school known for their professional curriculum. Both Kathy and Michelle should be commended for their tireless dedication to providing all students with the best possible service they can provide. They have helped me tremendously in finding employment as well as follow ups to make sure that there are no issues left unresolved. Thank you.

It has been a pleasure to be a student at ITT technical Institute. I will miss coming here once I graduate and I will be singing its praises everywhere I go in my bright future.

Thank you,
Michael Batterman

RE: Instrument Technicians

ITT Technical Institute
ITT Educational services Inc
13000 North Meridian Street, Carmel, IN 46032

To Whom It May Concern:

Dear Sir or Madam,

I am currently attending ITT-Tech in the City of Orange, California and have been a fulltime student while working a fulltime job. The knowledge I gained by committing to this endeavor has paid off in short term. The technical expertise of staff and commitment to teach students the operations of real life experiences has helped me with my trouble shooting ability in multiple applications and electrical design. I currently hold a position as an (b)(6). The work I do for the city requires high technical ability and I can honestly say I'm gaining that experience by attending ITT-Tech.

I've had the opportunity to work hands-on in the following fields: electrical, radio communication, networking and PLC programming. I have used the skills that I learned at ITT-Tech, to improve the system around the City of Santa Ana. This process can vary from the design of new operations, protocols networking systems and the Improvement of communications for PLC's with the SCADA system. Recently I have been promoted to oversee contractors and contracts on new facility upgrades, and rehab of jobs.

The skills I have obtain after attending ITT-Tech for my associates and bachelors degree in (b)(6) from (b)(6) has given me the ability to grow in my current job and I am grateful that I have learned as much as I have, and for having such a great group of teachers guiding me every step of the way. Thank you ITT- Tech

Sincerely,

(b)(6)

Juan Carlos Ramirez

(b)(6)

May 4, 2016

To Whom It May Concern:

I have been a student at ITT-Technical Institute since (b)(6). The courses and curriculum that I have studied here have been very beneficial in my career and day to day work. The teachers are extremely knowledgeable in their given fields and are extremely willing to mentor a student through the challenges and pits fall they may face in the educational path.

Because of all this and with ample help and guidance from the Career Services department I was able to get a job, but not just a job in my field a career with a great company which to me is a huge step in the right direction (for my life goals). I sincerely believe the money I have spent on fees and tuition have been worth every penny.

Sincerely,

(b)(6)

Michael S. McGourty

5/4/2016

To who it may concern,

My name is Kerry Dean Stigall, an Alumni of ITT Tech. I currently am attending ITT Tech working toward my Bachelor's Degree in (b)(6). I Recently Graduated the Associates Program in (b)(6). My Associates Degree and experience here at ITT Tech., has helped me enter into and excel in my field of study. The career services department here at ITT Tech has helped me find my current career position, of which I have climbed to Senior status. After achieving this position the company needed me to begin training fellow drafters to take on my previous roll, again the career services department was extremely helpful in the acquiring of an Alumni from ITT Tech. The candidate we chose for the position was promoted quickly and was offered a position with another company where she continues to grow.

The Bachelors program feels much more intense than the Associates, but the challenge only encourages us as students to try harder. Financial Aid Department has been tenacious and efficient in helping the students get the proper paperwork processed. In the department of Academics each teacher is unique and individual in their approach to teaching some are very traditional and form them you can typically know what is expected from you, as for the trendier teachers they make learning fun and less of a chore. I know that if I ever have an issue that needs to be addressed I can approach almost any of the staff and they will do their best to help me resolve the issue or at least guide me to the person that should be able to help. It is with great Honor and Pride that I can say I am an Alumni of ITT Tech.

Sincerely

(b)(6)

Kerry D. Stigall

David Ingersol

(b)(6)

To Whom It May Concern,

Graduated:

(b)(6)

Graduate Associates

(b)(6)

Enrolled:

(b)(6)

Graduate Candidate

(b)(6)

During my time attending ITT-Technical Institute in Orange, California, while completing my ASNSA program I had a chance to interact with every department such as Administrative Staff, Account Representatives or Recruitment, Financial Aid, Career Services, and all the instructors regardless if I had a course they taught.

During my class time I was always involved in the class and many times would help other students that needed assistance. I enjoyed all the instructors I have had classes with as they all try to make sure every student succeeds to the best of their ability. After Graduation I decided to take a break and I have to say I miss school, I look forward to starting my Bachelor Program in June of this year.

I have heard comments in the media about graduates not working in their field of study after graduating and currently I am employed at (b)(6) a job obtained through ITT-Tech Career Services Department so I am putting my education to work. So as far as personal experience, I have to say the media is wrong. Thank you.

Sincerely,

David Ingersol

(b)(6)

To Whom It May Concern,

I was recently asked, "How did ITT change your life?" I quickly thought to myself, "In nearly every way possible!" I enrolled at the ITT Cordova campus in (b)(6) as a part time student. I chose Drafting & Design as my Field of Study. I'd always been interested in construction and architecture, so I figured this would be a great start. (As I sit in my office typing this letter I realize my thought were exactly right!) At the time of my enrollment I was employed at a (b)(6). I had to drive 3 nights a week from Cordova to Jackson to attend class. No matter the circumstances, I was determined to get my degree. Yet, I didn't want to get a degree by just "going through the motions." I consider myself intelligent felt confident I could be at the top of my class. I was very fortunate to have professors that realized my potential and guided me along the right path. As a result, I obtained Academic Honors and Highest Academic Honors every quarter. In March of 2014, all the hard work, confidence, and faith paid off in a way I wasn't expecting at all. A representative for a local construction company contacted the Chair of the Drafting & Design Department in need of an (b)(6). I was blessed to be recommended for this position! I had a brief meeting with the company representative, and was then scheduled for an interview with the owner of the company. The interview went great, I left feeling confident, and two weeks later I started my new career as an (b)(6). Since I have taken on more demanding roles in my company as an (b)(6) I've also been able to earn more certifications and qualifications pertaining to construction! As for my lifestyle, well I no longer have to live paycheck to paycheck and have the stability that is needed for my family! On top of this, I now provide independent drafting services for two clients! The great thing is this is only the beginning! So, how did ITT change my life? I can honestly say, in the best way possible!

Sincerely,

(b)(6)

Sanitini Foulks

Tredarious Starks

(b)(6)

May 2, 2016

Dear to whom it may concern:

I Tredarious Starks have been an ITT student here for approximately 3 years. I also graduated with my associate's degree in (b)(6). The wonderful teachers and staff helped me through each difficult experience. Everyone played their part to encourage me to achieve my goals. My life, expectations, and goals has been pushed towards the stars for limitless.

I would like to give a positive credit toward the career services department. When I needed a job I knew I could count on the career services department. I believe that without career services I wouldn't be able to experience the important requirements to actually qualify for job hires. The staff prepared me for interviews with companies I would have seemed nervous, but ITT has help my confidence with everything I do. Thank you ITT.

Sincerely,

Tredarious Starks

(b)(6)

Scott Tompkins

(b)(6)

2 May 2016

Dear to whom it may concern:

I Scott Tompkins have been a student at ITT for just under 2 years and have graduated with an associates degree as valedictorian in the (b)(6) program. This school had reinforced my training (b)(6). The staff have helped me on many different levels from school topics, as well as on a personal level. Many teachers have made a big impact on me and they deserve much more than I can show. I have made many friends as well as contacts during my tenure with ITT. Now that I have obtained the associates degree I am now working towards my bachelors degree. I enjoy helping others learn the electronics field and once I have obtained my bachelors degree I will entertain the idea of coming back to ITT to teach.

Sincerely

(b)(6)

Scott Tompkins

Michael Nelson

(b)(6)

May 2, 2016

Dear to whom it may concern:

I Michael Nelson have been a student here at ITT for nearly 3 years, graduated with my associates as valedictorian and was top of the line as a student; but I couldn't have done it with the help of all the great teachers and staff here at the school. Each one of them helped to change my life for the better, coming to this school was quite one of the best choices I have ever made. My life is going directions that I never thought possible 5 years ago and I owe it all to not just myself, but the schools (all staff in general) abilities to provide, teach, and understand their students minds and needs.

I would also like to thank the careers services department for always helping to find a job when I needed one, if not for them then I wouldn't have my car or even be able to make it to school from a 45 min drive. They have done their job well and even now I have a great job because of their help. All in all this school and its staff has great potential and deserve the utmost respect for their capabilities and their willingness to help push their students further, make them believe in themselves, and most important of all get to know them so they can provide the best education they can give. Thank you ITT

Sincerely

(b)(6)

Michael Nelson

ITT-TECH has improved my self- knowledge giving me self- assurance to see a bigger picture of learning styles and skills. It has improved my writing skills, computer skills, and how I intake the information that is providing to me. Making me feel good about coming to school every day not be afraid of going back to school again. Just opening up mind my making me think a little bit more, I like in a school digging deep in my brain to force me to challenge myself like never before. Providing me with real life information about my field of study not sugar coating what's waiting for me once I graduate. The classroom structure is inviting and not intimidating making class fun and welcoming. ITT TECH has such great instructors with lots of wisdom and knowledge that has so much to show us so to me that's giving me everything I need to improve my learning so I'll be ready for the world and a career upon completion of my courses. Thank you ITT TECH for all that you do.

(b)(6)

To whom this may concern,

I am so excited to be a student at ITT Tech. I've learned so much already and I only been here for a short amount of time. Every last one of my instructors are amazing. They all just want to help me be successful. ITT Tech. has opened my eyes up to so much more possibilities than I've ever thought about. I'm an Electrical Engineering major and I've been to 3 other colleges, but I feel as though so far this one is the best one suited for me. This is the school I'm actually going to stick with and finish.

All of my instructors and my one representative are good people and role models. They all have degrees and are morally good educated people. My classmates are also funny, smart, and just as excited about school as I am. This school experience is really changing my life. I'm learning to be more responsible. We have a lot of papers and deadlines to meet all leading up to one big project at the end of the quarter. I'm learning how to plan. Planning is something I need to do in life period and not just in school so we're talking life lessons. I'm learning how to budget better. All three of my classes teach me not only about school, but about life itself.

Mr. Kimbrel, Mr. Graves, and Mr. McBride are my instructors at ITT Tech. and all three of them I can thank for making my experience here a great one so far. They all three are very smart, informative, patient, and willing to work with me concerning my education. ITT Tech. is making me believe in myself again, I am on a good path to greatness. All three of my instructors constantly inform me of what I need to do and how to do it, so all I have to do is apply what I've learned and are learning and I'm good to go.

(b)(6)

CHANGES THAT ITT-TECH HAS MADE IN MY LIFE

(b)(6)

DENESSHEYA LEWIS

MAY 2, 2016

NT110

To whom this may concern,

Before enrolling in ITT-Tech, I didn't realize my weaknesses in skills and abilities. After enrolling and actually engaging in discussion and assignments in class I began to understand ways to strengthen my skills and abilities so that I can create a more successful pathway for myself. This has absolutely changed my life for the better. I'm always finding ways to correct myself. My friends and family are complementing me on my actions every other day. I'm also more aware of different techniques and sources that I can use to help me better myself and others. I'm now aware that I am pretty bad at time management, but I've been making steps every day to get better at it.

I am continuing to gain knowledge in the field on technology. I feel like that is amazing, being that I started off not knowing anything about technology. I enjoy learning new things about this field of study every day since, this world is gradually becoming a technology based world.

Being in ITT-Tech has given me a since of confidence about myself. I am proud to tell anyone that this is the school I attend. I find myself telling people to join this institution all the time because I feel welcomed every day that I enter into the doors. They make you feel right at home. I absolutely adore my sponsor. If it were not for him I wouldn't be here. He challenged me to take a chance and I am so proud of myself for doing it. ITT has made it so easy for me and I am very thankful for that. Thank you ITT-Tech !!!

(b)(6)

I started back to school in the (b)(6) at the ITT campus in Cordova, TN. I had spent years (b)(6) (b)(6) it was my opportunity to get my education. I had explored my options for schooling in the area and none stood out to me the way ITT did. The way it felt walking around the campus was inviting. I had always struggled in school when I was younger, but this time I had something to prove to myself. I pushed myself and studied hard, the instructors were always helpful, and classmates worked together to get assignments done. I was an Honors student and I was showing my children that wonderful things could be achieved with perseverance and dedication. I wanted to achieve my goals and I went after them.

I made connections with instructors and students that helped me to land an IT internship, which eventually led to the start of my career in IT. My time at ITT helped build my confidence and belief in myself as I worked on my education and skills. Thanks to my time at ITT – along with support from my family – I have begun a journey in a career that I enjoy. I would not be where I am or doing what I do without my experiences at ITT!

(b)(6)

Nadine L. Scusselle

(b)(6)

How ITT Changed my Life

My name is Sophea Hong, (b)(6) I have a full time job, a part time job, I'm also a full time student, and most importantly received the highest honors awards since I started at ITT in Dec. 08, 2014. My current GPA is 3.90. I am very proud of all my accomplishments. I struggled a lot in the past. I was stuck in a dead end job for eight years and then after a lot of deep thinking, praying, and some soul searching, I finally admitted myself to ITT Technical Institute.

My inspiration to attend college comes from one of my church family and a friend. She is legally blind from childhood. She is so strong, both physically and mentally. She goes to school everyday, is a fast learner, she picked up braille reading quickly and amazes everyone in Sunday school. I told myself if she can do it, then I can do it. I was so afraid of the unknown. I was afraid of failure but I wanted my children to be proud of me! So I enrolled at ITT Technical Institute and never left yet!

How ITT Technical Institute changed my life is that it teaches me to never give up, I am more determined to push myself, I learned to managed my daily life and not to procrastinate. I never thought that I would make it this far, but now I am looking forward to my graduation date in Sept. 2016 and most of all, graduate at the top of my class! Even though I have a lot going on in my life, I learned to use my time wisely from my English Instructor. My writing skills has also improved dramatically. I'm better at Math, and also my computer skills has drastically improved. Additionally, I learned to use many different program languages and I really enjoy writing codes.

I am pleased that I've enrolled at ITT Technical Institute. It has been an awesome journey and I am glad that I made this choice to go back to school. It really showed me that I am stronger than I look mentally. Determination is the key and the skies are the limit. Never stop dreaming and believing in yourself. All my hard work will soon pay off in the end.

Sincerely,

(b)(6)

Sophea Hong

To whom it may concern:

(b)(6) was my first day of class. At that moment, I had no idea how much my life would change in 2 years. I had no clue what ITT had in store for me. ITT gave me a focus, they introduced me to individuals who really want to help me succeed, and they helped me develop my communication skills.

ITT gave me a clear view of the path I needed to take to achieve my goals. When I first became interested in becoming a student at ITT Technical Institute, I was at a point in my life where I had no job, but I had a dream. I had no diploma, but I had intelligence. ITT gave me focus. ITT gave me the road map to success. I no longer walk around aimlessly wondering, what I want to do with my career and life. They helped me see my way.

ITT introduced me to individuals who really want to help me succeed. Before coming to ITT I didn't believe there was someone out there like me going through a similar situation like I was. But here, I have met people who are on the same journey as me. I have found a support group in the advisors and administration at ITT. They have helped me with tutoring. They have helped with the search for employment. They even helped me prepare my resume.

They have helped me develop my communication skills. I had previous professional experience interacting with executives and officers, speaking at meetings, and teaching classes. Here at ITT, I learned methods of properly communicating. My writing skills have increased dramatically, as well as my verbal skills. Therefore, not only have my

professional relationships benefited, but my personal relationships have also greatly benefited. Yes, that is because of ITT.

Respectfully,

(b)(6)

Lashaun Bryant

5/3/2016

Mr. Hill,

First off I would like to thank you and the staff there at the ITT Technical Institute campus in Cordova, TN. The opportunities to learn and teach what I have learned in the School of IT have been very beneficial. My professional career would not be what it is today without the knowledge I acquired at ITT. As of this letter, I am employed as a (b)(6) (b)(6) I have been in this position for a little over 3 years, where my knowledge of Information Security has grown exponentially.

I am about to embark on a new endeavor as a (b)(6) a (b)(6) This new role will have me employed at the (b)(6) (b)(6) Without the hands on technical skills I received at ITT in Cordova, I'm not sure where I would be today. This letter is a Thank You to all of you there at ITT who helped me achieve the goal of gaining my Bachelor's Degree in Information Systems Security. Without you all, it would not have been possible.

Thank you!

Sincerely yours,

John C. Lewis

(b)(6)

May 2, 2016

To Whom It May Concern:

I am writing to you to discuss my experience while attending the ITT Technical Institute in Westminster, Colorado.

As a student of ITT Technical Institute, I am satisfied with the quality of the education I have been receiving. Thanks to the reliability of the administration, faculty and academic support systems at ITT Tech, I am better prepared to go out in the workforce as a focused and educated employee.

I have been fortunate to have instructors willing to work with me before class and on Saturdays when I needed extra help. I recently received a promotion and am the lead of five people at my current employer. (b)(6) I would not have had the confidence to seek the promotion if it were not for the career preparation that I received from ITT Technical Institute.

The technical support at ITT Technical Institute is irreplaceable. Any time I have had issues, the Systems Support Technician has been there right away to help solve the problem. The LRC, learning resource center, is a valuable resource for every student. The Library Assistant is always available, very knowledgeable and willing to help find a research article or proofread a paper.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I am receiving during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Most Sincerely,

Lisa Mullen

I am writing to you to discuss my experience in attending the ITT Technical Institute in Westminster/Colorado.

As a student of ITT Technical Institute, I'm proud of the quality of the education I am receiving. Thanks to integrity of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being a productive and career-oriented employee.

ITT Technical Institute has provided the necessary skills too properly take on any networking type jobs that I will apply for. It also will help me in any interview that is coming up in the future. This school has helped me excel in my classes because it reminds me so much of my small high school. The teachers where willing to go out of their way to assist with the students. The campus had even set up a tutoring program that students can come in on Saturday mornings and there will be teachers there that can assist with any questions.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I am learning during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

ITT Technical Institute
3800 N. Wilke Road, Suite 100
Arlington Heights, IL 60004

Attn: Mr. Scott Kawall
Campus Director

Re: Arlington Heights Campus

Dear Mr. Kawall,

I would like to take this opportunity to let you know how much I appreciate the extraordinary experience of being a student at ITT Technical Institute.

I originally chose ITT due to the great respect (ranking) it has in the industry I wish to work in; Construction. While I was appraising schools, in almost every conversation I had with Industry Insiders, ITT was mentioned as one of, if not the top school their companies would look at for potential employees.

While I am only approximately half way to my goal (degree), I have found my experience at the Arlington Heights campus could not be more exemplary.

It became immediately apparent from my first meeting with your staff that ITT was the right choice. I feel Darrell Russell did an outstanding job of helping me with financing my pursuit as well as the help I have received from Jill Pirtle, who began helping me revise my Resume and finding part time work while I attend classes.

The thing I would like to impress upon you most of all though, I feel that the admin and teachers actually care about their students (and their progress). Almost daily Dean Kramer asks how my classes are going and how other things are for me. I see him do the same with other students as well. I really feel the staff sincerely cares about the student's success. I find this rather rare in today's world.

Lastly, the physical campus is also to my liking. It is fairly conveniently located, always clean and in excellent condition, the equipment provided always in good working order (i.e. Computer Labs, etc.) And as I am permanently disabled, easy to maneuver.

Thank you for your time and consideration,

(b)(6)

To whom it may concern,

I have had a good experience going to ITT Technical Institute in Arlington Heights, IL. I had all the help I needed from the beginning of applying for financial aid through completing (b)(6) The director of financial aid helped me get approved by walking me through all of the steps necessary to getting approved for government loans, even when they did not want to grant me the loans right away. I have had all the help I needed in landing a job with the help of career services, which helped me get my foot in the door of the company I am with now. The dean and the IT chair have always been there to listen to anything that I needed and encouraged me to do the best I could. The Instructors are great with the real world experience they provide, it made it easier to go out and not take less than what I felt I deserved. I am glad I chose to get my degree from ITT Technical Institute as it has helped me become the better person I am today.

Sincerely,

(b)(6)

05/04/2016

To Whom It May Concern,

My name is Andrei Duk and I am a student of ITT Technical Institute, Arlington Heights Illinois. I am pursuing Associate Degree in Network System Administration and will be graduating in December 2016.

I am currently employed as a (b)(6)
(b)(6) I found this amazing opportunity through ITT Career Services. (b)(6) the Director, was helping me with all stages, starting with building my resume and reference list, and going step by step with preparing for my phone and on-site interviews.

My current job requires a lot of professional skills and knowledge in the field of Network Administration. Thanks to all my ITT Institute classes and instructors, I have enough understanding of majority of issues happening in the real world of the IT industry. Each and every class gives me more confidence and the ability to grow as an IT specialist.

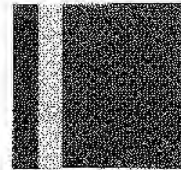

My overall experience of ITT Tech is very positive and optimistic. I love friendly atmosphere, professional crew and engrossing educational program. I am looking forward to continue my learning in ITT Technical Institute to get a Bachelor's degree and to obtain more specific and professional skills.

Best,

(b)(6)
(b)(6)

(b)(6)

May 3, 2016

ITT Technical Institute
13000 North Meridian Street Carmel IN 46032

To whom it may concern,

When I first decided to go to ITT Technical Institute, I was only interested in going because of the success (b)(6) had after graduating from ITT himself. After attending, I determined that I had made the correct choice and was going to do everything I could to get good grades, make the Dean's list every quarter and get a career in the Electrical Engineering field. After three and a half years of going to class with perfect attendance, I was able to graduate with a (b)(6) GPA in (b)(6)

The road to my (b)(6) was no easy task. From the time that I enrolled at ITT, (b)(6) (b)(6)

Even with all of the distractions that I have gone through during the years attending ITT Technical Institute, I was able to focus and the education that I received has given me amazing tools to get me prepared for a career moving forward in (b)(6) Right now I am working for (b)(6) (b)(6) providing support and troubleshooting to customers on their electrical diagnostic testing equipment. Going to ITT has helped me gain the knowledge in how electrical circuits operate and how to troubleshoot by isolating portions of the circuit to find the problem in the tester.

The instructors at the ITT Technical Institute campus in Spokane Valley, WA have the experience and knowledge to answer or assist in the education of any student that is working on a general lab assignment or while working on the capstone project at the end of graduation. While building my capstone projects for (b)(6) the instructors were able to help me when my partner and I were stuck on a problem that we couldn't figure out no matter how much research we did in our textbooks or while searching the internet.

Warm regards,

(b)(6)
(b)(6)

05/02/2016

(b)(6)

(b)(6)

I am in (b)(6) I am a (b)(6) who works 2 jobs and I don't have time to waste. My education has become the most important job I currently am focused on. Throughout my time at the Spokane, WA campus I have earned high honors four out of five quarters. I achieved these honors with a lot of support from my instructors and Dean Souders. The support I've been shown has changed my level of dedication and improved my attitude in a tremendously positive manor.

The lab environment with hands on approach has been one of my favorite parts of this learning experience. I have a much easier time when I can see and use the information I have been taught. The Spokane campus staff has helped me find work in my field of study. This work has given me a sense of pride and ability to provide. ITT-Tech is a stepping stone to a future I was unsure of and now with the help of my instructors I feel good about my future.

(b)(6)

May 3 2016

To whom it may concern

My name is (b)(6) and I am 52 years old. I am attending ITT Tech Institute in Spokane Valley Washington, in the Drafting and Design program.

I have had many jobs in machine shops (b)(6)
(b)(6)
(b)(6) so I looked at what I liked to do and how that could become work, I decided on (b)(6) When I looked around for schooling, there were too many classes that had nothing to do with what I wanted and very little hands on work with the programs that would be used at work. Then, I started looking at trade schools and found ITT Tech.

When I first came in for the interview, paperwork, and testing, I found the staff was willing to listen to what I had to say and adjusted things to my needs, to accommodate for my disabilities. They took the time to help me to understand what was happening and what I needed to do. We were able to get everything done in a timely manner, so I could start classes the next quarter.

When I started classes and found I was having problems, the teachers and the staff did all they could to help me out from finding a chair I could sit in for long periods of time to giving my daughters help when I was in the hospital. They allowed me to drop down to 2 classes a quarter when my health became an issue, so I could complete my program.

When I tried other colleges before this, I could not find the help or resources I needed and had to drop schooling, but ITT Tech did everything to find me the help and resources I have needed to get to this point.

I can actually see myself going back to work in the mechanical field as a designer of machines and their parts, which is a far cry from when I started. This has changed my whole outlook. I enjoy getting up and looking forward to the day and what it may bring. I am showing my daughters I can do this, and they are, in turn, looking at going to school as well. I no longer feel like a burden to them. This is the best gift I could get. Just because the people at ITT Tech helped me, I got all this.

(b)(6)

May 3, 2016

To whom it may concern:

My name is (b)(6) and I am currently a student at ITT Technical Institute in Spokane, WA. I am enrolled in the (b)(6) program, and have the honor of being a part of the (b)(6) bachelor's program the Spokane ITT has offered. I am writing this letter to share some of my experiences with ITT, and how my life has bettered since my time as a college student began.

When I first enrolled, I knew I wanted to go into coding. However, I was unsure of how I wanted to translate coding into a career I would enjoy, as well as thrive at. I had questions that needed answered before I would make the commitment to enroll, and the opportunity to answer my question was presented in my initial appointment with my recruiter. She not only took the time to cover details of the (b)(6) with me, she also guided me around campus and individually introduced me to a staff I will never forget.

My experience with my recruiter was the first of many wonderful memories with the Spokane ITT staff; through my time as a student, various staff members were constantly reaching out to ensure I was on track, and in a position to succeed in my studies. Due to smaller class sizes, instructors are able to personally work with each student to ensure material is being understood properly, as well as address any concerns that may arise throughout each quarter.

I have been thoroughly impressed with the staff's determination to ensure their students success, and look forward to continuing to thrive in my studies here at ITT.

Sincerely,

(b)(6)

ITT Technical Institute, Spokane, WA

5.2.16

To Whom It May Concern,

Enrolling at ITT Technical Institute is one of the most important decisions I've made for my future; it has opened so many doors to me that wouldn't have been possible otherwise. I have grown and improved so drastically since choosing ITT Tech. Not only have I gained knowledge and opportunities, but the self-imposed boundaries of what I thought I could achieve and how I imagined my future has been completely revolutionized.

During my time at ITT Tech, I have made lifelong friends and a network of acquaintances. One of my favorite parts of ITT Tech happens outside of class; it is the stimulating conversations with professors and with fellow classmates as class ends. I value those interactions as being equally important as the in-class education gained at ITT Tech. I can't speak for other campuses, but my graduating class bonded over the course of two years and became a tight-knit group of friends that encouraged and inspired each other. I think the small class settings had a lot to do with that. There is a lot more to education than books, especially in the IT field. ITT Tech provided hands-on lab experience, valuable interactions with individuals on the same path, and intelligent instructors that genuinely want to share their knowledge and real-life experience.

ITT Tech has changed my life, by providing tools and guidance so I could choose my own path of success. I have a high opinion of ITT Tech, and would recommend the CNS or ISS program to anyone looking to gain the skills and knowledge to join the technical field.

How ITT-Technical Institute Rebooted My Life

When I began my collegiate adventure in (b)(6) I was positively excited. I wanted to become a business major and attended (b)(6) expecting to become an advertising executive. Soon after classes started, I realized that I was simply not cut out for the business world. I later transferred to (b)(6) to become an English major, but soon found the course work tiresome and transferred elsewhere. After a year at (b)(6) (b)(6) I discovered that psychology would be more of a hobby than a career choice for me, and was somewhat disheartened about my future.

I decided to attend ITT-Technical Institute after seeing some of the commercials on TV and also because I have always enjoyed working with computers, and could troubleshoot a fair amount of problems at home and in High School. Going into ITT-Tech, I knew what a computer was, but not the slightest idea how they worked. As I began classes, I felt like an outsider, with nearly everyone else knowing a lot more than I did, however there is a great sense of community in the halls.

With the help of fellow students and guidance from professors, I found that I greatly enjoyed learning the ins and outs of computers. I never in a million years could have thought that I would find converting numbers to binary so fascinating; the same about learning the seven layers of the OSI model: how a computer talks with a switch or router and the levels of communication within the devices themselves. Databases, too, I found particularly mesmerizing, with the input methods and customizable search options, combining different search words/phrases to glean the exact information sought from its confines. How TCP resends the transmission if parts of it are lost along the way I found quite practical.

I graduated the (b)(6) and with the help of the school, found a job working for (b)(6) I'm continuing on at ITT-Tech in the (b)(6) working toward my degree in (b)(6) (b)(6) and for the first time in my life I absolutely enjoy attending class and doing the homework. ITT-Technical Institute helped point my life in the right direction, and I will always owe them a debt of gratitude.

(b)(6)

May, 03 2016

To whom it may concern,

I (b)(6) student of ITT Technical Institute, I started the path towards my degree with very little knowledge of the many hurdles I would have to overcome in order to achieve my goals. With the help of the dedicated professors and mentors at ITT Technical Institute, I was able to understand and overcome those hurdles and ultimately receive my degree.

I am especially thankful for Bob Duhainy, Dean of ITT Technical Institute, for his patience and dedication. I can remember the first time I walked into ITT Tech and he spent almost an hour with me explaining the benefits of attending the institution, the program I was interested and the benefits this would come to bring into my life and overall career path. Mr. Duhainy was incredibly helpful in explaining how I could and should prepare for this program and how this would come to improve my chances of a better job opportunity.

I can recall the many times I spent talking with Mr. Duhainy about the (b)(6) and the great benefits of the programs at ITT Technical Institute. Was incredibly inspirational and they helped me to further continue to push through the many obstacles I came across during my studies.

During my first year as a student at ITT Tech, I had to adjust myself to the schedule while being the head of my family, working full-time while still trying to attend classes, work on assignments and meet deadlines. At times, I struggled with adjusting to the new schedule and I would sometimes miss a class due to my work schedule or family emergencies. Mr. Duhainy was always the first person to reach out to me with a phone call to make sure I was aware of upcoming assignments and that my grades remained in good standing. He was always willing to assist me with anything I needed and never did I feel that I could not count on his support academically.

In the ways that I mentioned above, Mr. Duhainy contributed to my success as a student of ITT Technical Institute and I consider myself lucky to have had him as a Dean and a mentor during my time there.

Today I have (b)(6) and I'm working full time with (b)(6) as a (b)(6) and I'm continuing my School taking (b)(6)

Sincerely,

(b)(6)

(b)(6)

Before I came to ITT Tech

May,2,2016

Before I came to ITT Tech I was a (b)(6) working evening and weekend shifts because I felt that was all I was able to do. When I came to ITT Tech I learned about so many different studies of Information Technology and computer networking. I Learned Routing and Switching protocols and commands. I learned Sub netting, IPv6, Cabling and Linux Administration. Most importantly I learned to troubleshoot. In Information Technology it's not always about getting the answers it's about understanding why you reach that answer. Why technology does what it does and learning to look for answers that don't always appear easily. I studied hard maintaining a (b)(6) throughout my entire (b)(6) I never been so dedicated to something but I always wanted to work with technology.

Now I work as a (b)(6) I also graduated (b)(6) I am now enrolled still at ITT Tech in (b)(6) (b)(6) The most important lesson I can say I learned is to work hard for the things you want in life. There is no obstacle too big to conquer as long as your determination to conquer it is stronger. I did not just get bored and want a career change. Information Technology is my life career choice I want to learn as much about it as I possibly can. My dream is to be the best IT professional I can be I am only getting started.

(b)(6)

(b)(6)
(b)(6)

To whom it may concern,

My name is (b)(6), and I have been a student here ITT Technical institute Norwood Ma since December (b)(6). Throughout this time, I have faced a number of challenges in meeting my own goals for success as a student. During my time here I have had many great teachers and mentors. I was drawn to ITT Tech when I got back from a (b)(6) and I needed to do something with my life and I wasn't quite sure which direction that I wanted to go. And I saw a commercial for ITT tech and I figured why not and I came in and I talked with a counselor and I was given a tour of the campus and explained what they offered at the campus and I liked was I was hearing so I applied to enroll and I stated classes in December (b)(6) and from there I have hit the ground running I (b)(6) (b)(6) 2 years later and that following January I was able to get my first IT related Job I was hired by (b)(6) and I was able to apply all that I have learned here at ITT Tech towards the job and I have exceled greatly! Fast forward to today I am in my Final quarter in the Information Security Systems program and I start my job as (b)(6) in Brockton which I wouldn't have been able to get today if it wasn't for the education that I have received at ITT Tech. I will always be able to remember the core knowledge that I have learned and the people that I have met during my time here.

(b)(6)

Tuesday May 2nd, 2016

To whom it may concern,

The purpose of this letter is to share my experience as an ITT Technical Institute student and graduate and the value that this institution brought to my life and career.

I attended ITT Tech in Tempe Arizona from (b)(6) and graduated with (b)(6). Back then, I had recently moved from (b)(6) and the education system was very new to me. However, at ITT Tech every person from career services to student advisors and instructors made a genuine effort to get to know me at a personal level and walk me through my journey every step of the way. During my two years there, I had to (b)(6) and had to learn how to stand on my own two feet.

I found that the faculty at ITT truly cared about my education and that helped me get through the college life, and some very demanding and technical classes that I am know thankful for. The teachers I had pushed me and challenged me, which helped me build the expertise and work ethic that has been part of my success today.

I got my first job as a (b)(6) one year into my program thanks to ITT Tech Career Services. Their schedule allowed me to work and go to school full time without sacrificing quality. After a few years I went back to them looking for bigger opportunities and they helped me get my foot in the door of (b)(6). I started there as a (b)(6) evolved in the (b)(6) and today I am proudly a (b)(6).

It's been (b)(6) years since I graduated; after ITT Tech I obtained a (b)(6) from different institutions but always kept in touch with my mentors in the Tempe Campus. I have done seminars, helped students with mock-up interviews, and had the opportunity to (b)(6) for two years. I am very passionate about ITT Tech, not only on the hands-on education but on the lifetime support that I got and continue to get from them. I tell (b)(6) and my coworkers about ITT Tech and how they helped me shape my career, and now as a supervisor I look forward to hiring their graduates.

If you have any questions about my experience please feel free to contact me.

Kind Regards
(b)(6)

May 2, 2016

To Whom It May Concern:

My name is Tamika Denman. My experience as an ITT-Technical Institute student, has been a positive one. The faculty, professors and staff has provided me with all the tools I need in order to obtain my goals and succeed. ITT-Technical Institute offers a wide range of services which are included in my education, such as educational support; career guidance and technical support to increase our knowledge as students and apply them to the work place. Currently, I'm pursuing my Associates Degree in Network System Administration and continue to pursue my Bachelor's degree in Cybersecurity.

Since I've been enrolled in ITT- Technical Institute, I no longer look at technology in the same way. Now when I look at my PC or desk top computer, I'm aware of all the intricate parts as well as identify how the binary system works and operate in the computer. As a student we are also given an inside track as to how technology is moving at the speed of light. We are constantly learning about the latest technology and new inventions that are being developed. I'm confident as a student I will be prepare for what's next. As I continue to catch a glimpse of where technology will move next in our society, I believe with the education; skills and experience I acquire at ITT-Technical Institution, will not only prepare me for the future but it will set me apart from the competition.

(b)(6)

audience. Just like I am today. ITT Tech courses definitely showed me how to handle these certain situations.

It was those certain situations (Interviews) that lead me to the job I have now. Which is why I have to give my respects and up most gratitude to the career services! Mrs. Cherri Hedger and Mr. Bryan Johnson, Thank You for your hard work, passion and dedication to lead us in the right direction. It has definitely paid off. Thank you! Ladies and gentlemen lets give it up to them! I also want to thank our Dean Ray Enriquez, Assistant Dean Dr. G and my DDT Chair Alex Deveruex, You all believed in me that I could finish and i told you I would, I did - Thank you!

The company I work for is (b)(6), it's a dental lab. I started out as a model tech and after 2months; i became the (b)(6) I am my own boss.

I scan and design Zirconia bridges and crowns. I also operate a mastermill 5.0 CNC Milling Machine, which mills my designs and after a few more steps they go into a patients smile.

My education that I received from ITT Tech has help me adapt quickly, effectively, and confidently. It showed me how to be my own boss, love what I do and how to be a leader.

(b)(6)

May 2, 2016

To Whom It May Concern:

My name is Norman Glover. My experience at ITT Technical Institute was very positive because I thought I would never finish school.

In 2012, I was

(b)(6)

(b)(6) Because of this (and after seeing a commercial about ITT), I decided to join the school to get a good education and hopefully land a good-paying job for my family. I knew it would be difficult, and I also knew I may not finish the school.

I started ITT in June (b)(6) The teachers I had for the first semester helped me out very much. This made me decide to stay for another semester, and then another, etc. By the time my last semester rolled around, I felt I had a lot of knowledge under my belt. All the teachers I had did not give up on me and they did not let me give up on myself. Any time I needed help they always pointed me in the right direction, whether it was the learning center or just making themselves available for a phone call. Also, the classmates I had were great. We were able to form a study group to keep us on track. Because of this school I was able to complete all of my classes and graduate.

(b)(6) reached out to ITT for help in hiring and ITT submitted my resume. (b)(6) not only remembered me but they were so impressed I attended ITT that they hired me back at a (b)(6) The good thing about ITT is that they taught me how to negotiate and I was able to use this skill to land a higher level of pay.

Thank you again to ITT for helping me out and I cannot wait until I get back to

(b)(6)

Sincerely,

(b)(6)

May 1, 2016

To whom it may concern:

I am a (b)(6) year old student at ITT Tech that has decided that there has to be more to life than (b)(6). My experience at ITT Tech has been one of the most challenging yet rewarding experiences of my path to higher education. If I had to summarize the greatest strength of ITT Tech it would be the selfless work of the instructors. I feel extraordinarily fortunate that I was able to study under such caring and experienced teachers. The patience and methodical math instruction of Don Goss enabled me to understand mathematical problems like no one else very has. Larry Hansen with his open-minded style of teaching allows every student the chance to experience the best, and sometimes the worst of what human communication and current events have to offer. Damian Chung literally exudes professionalism and the wisdom and connections that only come from years of experience. Finally there is Stephan Gose, who above all instilled confidence in me when I needed it most. He was able to do this with a unique mixture of humor and charm that few instructors could match, while offering tidbits of knowledge learned in his many years in the field. Any students who attend ITT Tech in the future can feel fortunate if they are able to study with these instructors.

Regards,

Eric Hute

(b)(6)

May 2, 2016

To whom it may concern,

(b)(6) I have been going to Itt Tech for over (b)(6) now. When I got (b)(6) (b)(6) I didn't have a clue what I would do with my life. When I first received a call from Itt Tech in Tempe, I was nervous to go over there. Lucky, I did go because not only did I have an amazing experience and still having one. I have also started my own business thanks to all the staff that helped me. To open my own business was my dream, and because of the amazing staff my dream has become reality. Itt Tech has also shown a great deal of respect to me and whenever there is a problem I won't think twice about talking to one of the staff members. I left Itt Tech in (b)(6) and I couldn't be happier with how Itt Tech handle everything that happen. In fact, they were so good to me that I moved back and immediately return to school on campus where I'm currently pursuing a (b)(6) The staff not only helped me with school and my business, but also helped me be the (b)(6) program where we help other students grow. I frequently go to the Deans office, because I enjoy talking to Mr. Rodriguez and Dr Ghose. Every day I remind Dr Ghose that I'm here favorite student and she is my favorite teacher, I love coming to this campus, because I can talk to anyone and be myself with everyone in the class. I've made the best friends who will be with me for the rest of my life. Most of the teachers know me as the out spoken clown of the class, and I don't hesitate to ask question and talk to every single one of them. When I walk in through the door, I'm immediately greeted by my name with a smile. The front office people took the time to find out who I was so they can greet me. That say a lot of how the school thinks of their students, that the front office takes the time to talk to you. I have never been at a better college that holds such professionalism and respect for every one of their students. Itt Tech is like a home to me and the staff is my family.

Sincerely,

(b)(6)

5/3/16

To whom it may concern,

This letter is my way of expressing the education, personal experiences, and the start of my career in my field of study, as a (b)(6) I'm currently in my (b)(6)

First off I wouldn't be here if it wasn't for all the instructors and the staff at ITT-TECH with their support and encouragement. I have had a long path with many obstacles in the way but the support from the staff and fellow students is phenomenal. I always took the courses like a customer and just do whatever to get the job done. Every course from board drafting, Psychology, Team Leadership and even the basic math has all tied in to my current position at (b)(6)

I was always in career services throughout my education letting them know what I was looking for and how I could improve my interview skills. I've been on several interviews, and nine months ago career services offered me another opportunity where I was later hired. I am currently working for (b)(6) I was hired as a (b)(6) I'm also in the process of becoming an (b)(6) Two weeks ago I was instructed that I am going to start assisting in project managing a 6yr. 9.8 million dollar project. Currently I'm using my (b)(6) education that I've learned in several of my courses through ITT-TECH.

I've spent a majority of my work experience in (b)(6) than realized that I needed a career for my family and since I have had construction experience that this would be the most logical choice.

Career services has been phenomenal with giving me the proper tools I needed for interviews and now with Naomi Rivera (offering me the opportunity with my current position), and Veronica Hibbert pushing and counseling me through this transition with my new career has given me the confidence to become a project manager, and a team leader. The staff in the LRC, and the staff in all departments (Chris Reed, Kim Syverson, Saba Alsafar, Wendi Cline, Daniel Burk, Joshua Butcher, Amber Carpe, Wouroud Elfarmawi, Hector Gonzalez, Gilbert Mejia, Bruce Payette, Thomas Reilly, Chioma Semanas, Juanita Bonillas, Natalie Geyer, Lisa Primeau, and all on-line instructors) and many others I may have left out that have moved on in their own career that have offered great positive support to help shape and mold me into a the professional I am today. I know I've put in a tremendous amount of sacrifices in my education but the resources that have been offered to me have been the difference!

This has without a doubt been the best decision I've made to attend ITT-TECH for myself and my family showing my children that no matter the limitation that you think life has put on you to pursue happiness that you can be successful and it's never too late.

(b)(6)

Louis Hubbard

As the (b)(6) I was asked to contact local schools for potential (b)(6) to join our staff in our continued growth. I called ITT-Tech and spoke to Naomi Rivera and Veronica Hibbert. She was very helpful in finding us the right fit for our company. She sent me several resumes and Louis Hubbard was one of them. My first impression of Louis Hubbard during the interview was very professional, stood up straight, and answered all questions professionally and with great interests in the company. Louis has been with us almost a year now and has shown great eagerness to learn and help build this company.

When looking for more future employees, I will be confident in calling Veronica Hibbert again with ITT-TECH.

(b)(6)

Aaron Peterson

May 3, 2016

To whom it may concern,

I am writing this letter to express my personal and educational experience as a graduate student from ITT Technical Institute in Tucson, AZ.

At ITT Technical Institute I have received excellent encouragement and assistance from all of the staff for the past three and half years. I consider myself as a lifelong academic, always striving to learning new information and helping others along the way. I had chosen ITT Technical Institute for the hands on learning and the shortened time period to earn a degree. To this day the staff at ITT Tech Tucson continues to be supportive and inclusive of my goals.

I am young in age, just merely (b)(6) years old. I have spent the majority of my time being a student; I have recently acquired my (b)(6). Recently I have been hired by (b)(6). The curriculum in the (b)(6) (b)(6) has helped create a foundation of practical knowledge which has helped me greatly in my professional goals.

Throughout my time at ITT Technical Institute in Tucson, AZ everyone I have met and worked with are some of most caring and professional colleagues I have had the pleasure of meeting. Dr. Thomas Hassett, Dr. Donato Vincenti, Dr. Thomas Chappell, Lisa Primeau, and Adriana Bachmann have all offered consistent encouragement that has helped me grow to the person that I am today and the continuing pursuit of my goals.

It has been a pleasure to write this letter sharing my experience at ITT Technical Institute in Tucson, AZ.

Thank you,

Aaron Peterson

May 3, 2016

To Whom IT May Concern;

I am writing this letter to express my educational experiences at ITT Technical Institute in Tucson, Az.

Using the recruiters was very informative, and they provided accurate and relevant information for the information I wanted to know. The representative that I had was helpful in responding to questions and addressing issues with me and they continued to address issues when they had moved to another position.

My (b)(6) courses contained very relevant career-related content from studying current cases going on to conducting computer forensics. All of my instructors are very qualified and demonstrate a commitment to all students. I have had my teachers stay after class or come in early to help me. Course materials, textbooks and equipment used in labs are relevant and useful. With everything being digital now, it is hard from some students to get comfortable with. But once we did, it was smooth sailing.

There wasn't a staff member from the Director down to the newest teacher that wasn't willing to help. The staff at ITT does a tremendous job in my opinion. The ITT Tech staff provides all the academic support needed, including IT and library resources.

My dealing with Career Services was a little different from most. They have provided quality candidates that my company (b)(6) was looking to interview for employment.

Sincerely,

(b)(6)

Anthony Clyma

Wynn Meadows

May 3, 2016

To Whom It May Concern

Thank you for reading this letter of gratitude for my educational and personal experience as a graduate student of ITT Technical Institute in Tucson AZ.

The support, encouragement, and friendship over the course of three years in the school have been some of the most incredible experiences I ever had. I am a person that is always looking to improve and strive to learn new things; this is what drove me to higher education. While I was looking for colleges that would suit my needs of hands on learning in the Electronics field, I found ITT Technical Institute in Tucson, AZ, which would satisfy all my needs.

The staff of ITT Technical Institute in Tucson, AZ was very welcoming when I first came to the campus as well as being friendly and supportive throughout the time I attended. I was highly impressed with how the instructors taught with engaging subjects and conversations. The curriculum along with the instructor's teachings gave me the foundation in the electronics field that I can build a more advanced structure of knowledge upon.

Throughout the course of my learning at ITT Technical Institute in Tucson, AZ instructors like Dr. Thomas Hassett Jr., Dr. Thomas Chappell, Dr. Donato Vincenti, Doug Ekdahl, Chris Reid, and Amber Carpc have enlightened me the most. The people of ITT Technical Institute in Tucson, AZ like Kim Syverson, Lisa Primeau, and Adriana Bachmann have been the best of friends; encouraging me and helping me grow to accomplish my goals.

Thank you again for taking the time to read this letter and it was a pleasure to write it as well.

Sincerely,

(b)(6)

Wynn Meadows

Larry King Jr.

(b)(6)

May 4, 2016

To Whom It May Concern:

I am writing to you to discuss my experience while attending ITT Technical Institute, Plymouth Meeting, PA.

Here is a little bit of information about myself. My name is Larry King Jr. and I am a 16-year (b)(6)

During my career I served as a (b)(6) in both the United States and Europe. Most of (b)(6)

(b)(6) allowed me to perform in a leadership role as the (b)(6)

and the (b)(6) I also was an (b)(6)

(b)(6)

Prior to choosing ITT as my school of choice, I was new to the Plymouth Meeting/Lafayette Hill, PA area. I

was (b)(6) My living situation (b)(6)

(b)(6) trying to make a new start for myself. I had made

this move to (b)(6) During this time, I had

passed by the ITT Plymouth Meeting campus several times. I was familiar with the school because I am from Indianapolis, IN and have seen all the commercials. Something needed to change in my life so that I could provide for my children and so that I could be productive. At this point, I decided to look into what ITT had to offer and upon meeting with the Admissions Rep, I chose to attend ITT. I figured by challenging myself with something that I was not familiar with, this was the best option for me and ITT gave me that insurance.

Prior to attending ITT, I had been a student at both traditional and non-traditional colleges throughout my

(b)(6) and even prior to my career. ITT provided the perfect environment for an older learner by providing smaller classrooms which allowed for each student to get the attention they needed. Each instructor added their own personal touch to the classroom experience to make sure you had the tools to succeed. I often heard from many of the instructors that they didn't care about the grade you received, but rather your ability to understand the material and be able to actually perform the necessary tasks. This was different from any of my other educational experiences. The material being taught was relevant to what is being used in the current working environment. There was not a lot of time being wasted on subjects that did not make an impact on your ability to perform in a real world work environment and that was what I was looking for.

From a student aspect, I got more than what I had expected. It was a real joy to be able to meet with former students, especially since there was one on staff, and get some guidance from those students. Since this is a smaller school, I was able to meet with a group of students and stick with them from start to finish and get the needed support from them. As a group we supported each other through group studying sessions and also by becoming a family. Again, I did not have this experience at any other educational institution. I believe that ITT fosters this type of environment to ensure that the students gain success through this type of experience.

About half way through my education, I began to notice a strong presence from the staff of Career Services. They took a very proactive approach to ensure those who were close to graduating were prepared for what was next. They did an excellent job of critiquing my resume and keeping me aware of what jobs were available. They also did an excellent job of informing the student body of temporary jobs that were available that would allow any student to gain some experience in their chosen program. This is something that I have not experienced anywhere else.

The administrative staff at this location was like no other staff that I had encountered before and after my attendance at ITT. The environment was warm and welcoming from the front desk and beyond. Each lead administrator seemed to have an open door policy and always took the time to help students with whatever needs they had. I found it easy to work with the Registrar and Financial Aid departments because of their proactive approach to make sure that the education kept going without a hiccup.

Upon graduating from ITT, I decided to further my education at (b)(6)
(b)(6) ITT Technical Institute Plymouth Meeting, PA is the reason I decided to continue on with my education. ~~They gave me the confidence that I needed to pursue my education further.~~ I just completed my (b)(6) My experiences at ITT have led me to seek employment at ITT Technical Institute Plymouth Meeting, PA so that I can try and emulate the same experience to current and future students of ITT Technical Institute!

Sincerely,

(b)(6)

Larry King Jr.

May 04, 2016

To whom it may concern,

RE: I am writing to you to discuss my experience while attending ITT Technical Institute, Plymouth Meeting, PA.

Before I came to ITT Technical Institute I was a (b)(6) in High School (b)(6) (b)(6) It took so long for me to continue my education because I refused to pay for an environment where it would be the same as High School. I had a (b)(6) before starting at ITT but I knew I couldn't just think about it 24/7 so I decided to fill out a form online to be called by a representative. When I initially came here to tour the campus I was extremely nervous but that soon subsided when I met the very polite and friendly staff. I signed up for classes that same day and started that night. I met some amazing friends since that day and they've become like a family. I'm now a (b)(6) student with (b)(6) Without ITT I would still be stuck in the same rut I had been stuck in since graduating High School. The friends I've met while at ITT & I have been in a friendly competition with each other. We're always trying to out due each other in overall grades to see who's going to be the valedictorian.

Sincerely,

(b)(6)

Mark Burns

May 4, 2016

To Whom It May Concern:

I am writing to discuss my experience in attending ITT Technical Institute, Plymouth Meeting, PA.

In the years before I became a student at ITT Technical Institute I was living my life day to day not realizing any dreams or real advancement that could better me or my life. I was certain that I had surpassed the years where an education was not doable nor achievable. After a (b)(6) I found myself stuck in a position where not only (b)(6) (b)(6) I am (b)(6) years old. Re-grouping and re-directing my life was the only option left for me. I decided to come and get focused on a life changing endeavor- a career in (b)(6) here at ITT Tech.

I am in my (b)(6) here and since being enrolled I have developed an entire new lease on life and the possibilities open for me to excel in. I have achieved the honor of being (b)(6) for maintaining my GPA above (b)(6) for the entire duration that I have been a student here. This has given me confidence and motivation to continue and become not only well-taught in this area of study but to plan to go even further after completing this program in (b)(6)

The staff and the teachers here at ITT Tech Plymouth Meeting have been so influential and supportive to me. The desire they exude to sincerely care and help in all types of situations to find solutions and ensure I am okay in all the areas of my life is over and beyond anything I could have expected. I think I have gotten an entire new family from ITT Tech. This alone makes it a pleasure to come to class and arrive early to meet and greet. The atmosphere is just positive energy all around. I needed this at a time in my life where I felt so alone and out of sorts. Thank You ITT Tech, Plymouth Meeting.

Today I am taking one step at a time in completing my classes and maintaining my GPA. Of course the work is a little harder but I am confident I can succeed with the always available tutoring and help available. I definitely take advantage of the help. (b)(6) and already I am thinking about how I will miss this place.

Thank You

(b)(6)

To Whom It May Concern:

I am writing to you to discuss my experience in attending ITT Technical Institute, Plymouth Meeting, PA.

Before I came to ITT Tech I was working a part time job at a (b)(6) and being (b)(6). (b)(6) Needless to say working a part time job was not paying the bills, and it certainly was not showing (b)(6) potential. After becoming increasingly unhappy at (b)(6), I decided that it was time to go back to school and finally earn my degree. A friend of mine at work had suggest going to a field of study that included computers because I am able to learn quickly and it is a growing field. I chose a few schools to get in touch with and see what type of programs they offer but ITT was the only school to get back to me. I got a call the very same day that I requested information. Mike, my representative seemed genuinely interested in me, in why I wanted to attend school and what I was hoping to achieve. After going to an orientation I decided that this was the place to go. Everyone seemed so happy to have me there, it was very warm and inviting, it sent the message that I was cared about, that my future was cared about.

My experience at ITT Tech has, so far, been very rewarding. I was (b)(6). (b)(6) However here I am maintaining a (b)(6) never getting anything less than (b)(6) at the end of the term. The teachers for the most part are extremely helpful and genuinely want to see you succeed. Staying after hours or offering tutoring if a student is struggling. So far I am learning things that I will be using in my field, along with all of the general education classes that are needed. I also joined the (b)(6) which has been extremely fun and rewarding. Here the dean and the director both know my name, not because of anything special, but because they get to know their students on a personal level.

I am a year into my schooling, and really not much has changed, at least not in a career sense. I have put in my resume to see about getting a job opportunity that is being offered. I am hopeful that I will be able to enter into my field soon and find a career that is both rewarding and challenging.

Thank you

(b)(6)

Nicola Nolan

To whom this may concern,

I am writing this to discuss my experience in attending ITT Technical Institute, Plymouth Meeting, PA.

I had just moved to PA, and had (b)(6) I began searching for a job online and clicked "I would like to attend school again." Not two hours later I was on the phone with Michael Seay. Within a few minutes we had scheduled an appointment for the following day.

Ever since arriving at ITT Tech my experience has been excellent. I have forged very close bonds with many of the faculty, and just about all of my current and past professors. The classes are amazing and enjoyable and I love the material. People like Ms Rita King, and Jude Nix are really exceptional, I can approach and to talk to them of anything of interest. Nothing is out of bounds, and it is these individuals who help make my days at the school exciting and fun.

I am currently (b)(6) in a few weeks. I am calm, happy and enjoying every night I come here. As I've told many people, I would rather get fired than miss even a single day of school. Right now they are helping me with creating a resume so I can advance to where my field is. In the end I can't thank the wonderful people I've met here enough for helping me by being who they are, I am truly blessed to have had the fortune of being place here.

Thank you.

To Whom It May Concern:

I am writing this letter to discuss my experience in attending ITT Technical Institute, Plymouth Meeting, PA.

Before I decide to go to ITT Tech, I was working in the (b)(6) I was finding myself (b)(6) (b)(6) I also was seeing it as a dead end job even though the money was great. However something inside of me keep telling me that it was time to go back to school so I started doing some research on schools nearby. It came down between ITT Tech and Lincoln Tech, I decide on ITT Tech at the end just because it felt right.

My experience at ITT Tech has been good good = great, the classes have thought me a lot more than I anticipated, the teachers are very dedicate and hardworking, they truly care about us students. The students at ITT Tech are very focus and dedicated on their goals, we all work well together in group projects and we go the extra mile to succeed.

I am now on my (b)(6) at ITT Tech and I have (b)(6) GPA average throughout all the quarters, the funny thing is that I have (b)(6) I have always struggle with school, so I very proud of myself right now. I have learn so much here at ITT Tech it's amazing, I now work for (b)(6) as a (b)(6) and I'm able to come to class in the evening and that's great considering that I couldn't with my previous job. I have been able to implement some of my education from ITT Tech to my job witch is great. Once I graduate I plan to use my education in the Telecom Field in many ways.

Thank you

To Whom it May Concern:

I am writing to you to discuss my experience while attending ITT Technical Institute in Plymouth Meeting, PA.

Before I decided to attend ITT-TECH, I was a (b)(6) close to the campus. I made the decision to attend ITT Technical Institute in a way that isn't very common, I originally was not going to attend college or any type of post-secondary education after college but as I discussed this decision more with people around me I learned that we live in a society where most jobs require a degree or certification. As this discussion continued, a friend told me about the schools that he had applied to and the ones that he still had left to visit and ITT-TECH stood out to me. I decided to attend the information session with him after realizing that he was right that jobs are not easy to find especially without a degree. As I walked through the front-door of ITT, we were welcomed with open arms and at that moment I knew I was in the right place. We continued on to the information session and discussed our career goals and took a tour of the school and realized that we both wanted an (b)(6) The representative discussed what types of jobs we qualify for with that degree and we both knew we needed to apply. That day I made the best decision of my life.

While attending ITT-TECH I had so many experiences that I did not anticipate having and I encountered so many people from so many different walks of life. I loved walking around the school because you could have a conversation with someone who was twice your age or half your age at any given moment. One experience that stands out is from my first class, as I walked to the classroom I was anxious and excited all at the same time, I thought that this could be fun being in the classroom for the first time in a long time. But, as I walked in to Theory 8 for my Intro to PC class with Mr. Withstandley, you could've heard a pin drop in the classroom. There were at least 20 students in the class and it was dead-silent and I realized at that moment everyone were strangers so I took my place in the sea of unfamiliarity and patiently waited for the class to begin. Mr. Withstandley came in and introduced himself and welcomed us to ITT Technical Institute and began to address by saying that he was aware that this was everyone's first time in class and it is likely that most of you have not sat in a classroom for quite some time, which was true for all of us! Mr. Withstandley said that he was going to begin our class with an ice breaker, at this point I began to panic because I am terrified of ice breakers but Mr. Withstandley is very unconventional and this ice-breaker was the same. First he asked us to take out a sheet of paper and write our name and 3 fun facts about ourselves and then he said "take the paper crumple it up and throw it at me" I was stunned at this point and then he said I am certain none of you can hit me and now I am certain that some of you will think this is a challenge and will need to hit me with your papers. On the count of three Mr. Withstandley asked each of us to throw our papers at him and then he said once that happened he would then throw them to one of our classmate's. At this point in the class I remember feeling so comfortable that all of my anxiety about being a stranger embarking on a new journey. It was amazing to me that how in a matter of minutes one teacher could take all of us from strangers to classmates and even friends.

After I had been attending ITT-TECH for a couple of months I realized that the instructors were not there to just teach you the course material but they would tutor you, listen to you when you were struggling and they were so understanding when you were having a bad day. I never encountered a person at ITT-TECH in Plymouth Meeting, PA that didn't stop what they were doing at that moment and do whatever they could to assist a student. The same can be said for the all of the students that I encountered along the way. Every class I took at ITT-TECH was full of students who made it a collaborative effort to help each other and work together to reach a common goal of SUCCESS!! Everyone that attends ITT has a common goal to become successful whether it is to become a Police Officer, a Web Designer or a technical professional.

The courses offered at ITT-TECH are excellent and I could not find anything bad to say about the core classes that were offered in my program of study. I particular enjoyed the hands-on aspect of my education, it was one of the best things that ITT-TECH has to offer because by teaching with a hands-on approach you are able to tell people that not only did you get to learn about circuits today but you actually built one yourself and then there is the sense of accomplishment you get when you connect two wires to a resistor and an LED light turns on, once I experienced that I felt like I could do anything. Those are the things that happened to me frequently throughout my time at ITT-TECH.

The biggest accomplishment in my time at ITT-TECH was becoming employed a few weeks before graduation. I was hired as an (b)(6) a Worldwide Pharmaceuticals Packaging company and I can honestly tell you it is the best job I have ever had and I love waking up every day and going to work. I owe all of it to my friend who introduced me to ITT-TECH and to myself for choosing to stick with the decision. I also could not thank my family and friends enough for their support during my time in school but most importantly I owe a great deal of gratitude to all of the instructors and students who I encountered and for all of the knowledge they bestowed to me on the road to accomplishing my goals.

Thank you,

(b)(6)

To Whom It May Concern:

I am writing to you to discuss my experience in attending ITT Technical Institute, Plymouth Meeting, P.A.

I started the beginning of last year jobless, homeless and living in a shelter. I had been out of work for a year and I was looking for a job when I got a call from a representative from ITT Tech who told me that the school would help me find a job. A few weeks later I came to the school to check out the campus and I liked how nice everyone was and how willing to help me everybody seemed to be to help me find a job. I looked into the different programs that were offered, thinking that it would give me something to do while I was trying to find a job. I finally selected the electronics course because I have always liked computers and working with my hands and I felt that this course best fit who I am. I ended up choosing to go with ITT Tech because the people here seemed like they really cared for what I was going through at the time.

I met with Financial Aid, the head of the department and career services. Right off the bat I was introduced to the person who would give me a job, this was the first step towards where I am today. Being out of school for almost 20 years I was a little nervous about starting school again, I was never really good at school and had pretty bad grades throughout. However, the teachers here are very welcoming and they don't inundate you with work straight from the beginning. The classes were fun, the curriculum informative yet enjoyable.

I have been at my job for over a year now, I am the vice-president of the NTHS, as well as a 4.0 student. I met my beautiful girlfriend here at school, and also made lifelong friends. Going to school here has made me take a good look at what career path I want to follow. I would like to continue furthering my education and get my bachelor's degree, all of which would not have been possible without ITT tech.

To Whom It May Concern:

I am writing to you to discuss my experience in attending ITT Technical Institute, Plymouth Meeting, PA.

Before coming to ITT Tech I was in between (b)(6)
after my time in the (b)(6) I was unable to (b)(6) So
I choose to go back to school for computer technology, because of my love of computers. I choose ITT
Tech for the hands on training they have.

I have had a lot of good experiences at ITT Tech with the teacher being able to teach in various
ways, and the student helping each other out. Making it feel like a family here at ITT Tech. I also met my
(b)(6)

I have completed one degree and have started a second degree here at ITT Tech in hopes of
bettering my chances of getting a job.

(b)(6)

Jasper N. Freeman

To whom it may concern,

As an adult pursuing a college degree, I found that I needed a college that employed a more direct approach to learning, with hands on labs and instructors who were actually working in the field that I wanted to enter. ITT Technical Institute -San Antonio, gave me a clear path to earn my (b)(6) degree with a course schedule that allowed me to see what classes I would take and how they related to my chosen field. One of the most important parts of the school I found were the instructors. There are several who I really enjoyed having and learned a tremendous amount from, even quoting years later, who went well above the textbook in their lectures and were willing to assist anyone who asked. The support staff, such as the library assistants, were always will to tutor and point students in the right direction and making sure they had the resources they needed.

As (b)(6) I found ITT-San Antonio was very familiar with the challenges of (b)(6). Many of the Faculty and Staff (b)(6) (b)(6) This may not have been possible in a traditional school and is very important (b)(6) to feel a sense of belonging and know they are understood. I believe ITT was a good choice for me and I have learned a great deal that I hope will give me a greater advantage in the workforce.

Respectfully,

(b)(6)

David B. Wentz

3 May 2016

To whom this may concern,

As an undergraduate with an (b)(6) at ITT Technical Institute and a current student (b)(6) I would like to recognize ITT Technical Institute for their steadfast approach to upholding a standard of excellence in every student. ITT has certainly taken my expectations to new heights. Throughout my schooling I have had the privilege of participating in class with knowledgeable instructors who have an Industrial background in my field of study, each course has given me an understanding of my duties and talents as a student, employee, and as an individual striving to achieve greatness. ITT is not an easy school to complete. You have to trust the process to accomplish the goal. I cannot stress enough, what an outstanding support group I have here at ITT. My representative Steve Garcia has assisted me each quarter with his support, passion, and heart to see students like myself, succeed and move forward to greater opportunities. Since attending ITT my hard work has given me a career as (b)(6) working towards becoming (b)(6) in the very near future, unlike any other college, at ITT Tech I feel like a student and not just a number. I am a valued customer and the staff works diligently to exceed each student's expectations. **"Every contact we have with a customer influences whether or not they'll come back. We have to be great every time or we'll lose them."** – Kevin Stirtz. Almost as if we are one big family, ITT has remained consistent to their standards.

Thank you for your time,

(b)(6)

May 3, 2016

To Whom It May Concern:

I graduated from ITT Technical Institute San Antonio West with an (b)(6)

(b)(6)

I enjoyed the hands-on portion of my education and I liked that fact that the school provided Career Services Assistance. The department was instrumental in assisting me with getting prepared for the job market including resume writing as well as setting up interviews for me and ultimately helped me find a job that fit my career goals. I am presently working for (b)(6)

(b)(6) This position allows me to travel when needed, learn hardware, as well as apply my networking skills that I acquired at ITT Technical Institute.

In closing, I believe that going to school at ITT Technical Institute played a vital role in starting my new career and provided me with an opportunity that I may have not received otherwise.

(b)(6)

To whom this may concern:

Hello, my name is Vicente Casas. I received my (b)(6) from I.T.T. Technical Institute in the (b)(6). I am currently the (b)(6) and have been for the past 2 years. I am (b)(6) and have been an active member for over 5 years. I love giving back to the community at I.T.T. Tech, and do so every time I have the opportunity. I have done portfolio exit interviews for students to prepare them for what they may encounter in the "real world" to give them an idea of what employers are looking for. I have done guest speaking at orientation for students and their parents to give them a look at what they can expect at I.T.T. Tech and what is expected of them. I also speak to first/second quarter students to give them a glimpse of what they can accomplish with the knowledge that I.T.T. Tech will bestow upon them. With the knowledge and insight that I have gained at I.T.T. Tech, I was prepared for the industry that I am currently in. The curriculum that is given at I.T.T. Tech is that in its own. The positive reinforcement from students and staff is what helped me strive to my goal of graduation and pursuing my career in construction. At I.T.T. Tech, you are not just another number coming through those doors, you are a valued person that is appreciated and the faculty makes you feel as if you really do matter. I have been to other junior colleges and universities, and did not gain the knowledge that I.T.T. Tech gave me. I did not even know how to use the internet or what a .com was when I first attended I.T.T. Tech. Now I am (b)(6) (b)(6) all over the state of Texas and surrounding states. I have worked for employers that will only higher I.T.T. Tech graduates, as they know what type of student/professional I.T.T. Tech produces. (b)(6) (b)(6) I was employed by them and the determining factor for my hire is that I was a graduate of I.T.T. Technical Institute. The position that I held was a unique position being that there were only 2 people, my supervisor and myself, in the entire world that did the work that we did. (b)(6) (b)(6) but without the training, commitment, and skills that I learned at I.T.T. Tech, I would not have been able to say that I did something no one in the world did. I hope that this letter will give a look at someone that has been through the program and is using his degree to its fullest thanks to the hard work and dedication that was shown when I was a student at I.T.T. Technical Institute.

Sincerely,

Vicente Casas

(b)(6)

To Whom It May Concern,

I graduated ITT SA in

(b)(6)

(b)(6)

With the knowledge that I gained from my schooling at ITT SA, I interviewed and gained a position at Intel. I enjoyed my time in class with Mr. Cross, main electronics instructor. I found him to be quite knowledgeable and fun to learn from. Ms. Solis, the department chair, was also a very positive influence and person who made time to get to know me and work with me on scheduling difficulties for my classes. On the required courses that where with teachers outside of my field of study I found to be knowledgeable and helpful in getting the needed information across.

Regards,

Colleen Kulp

(b)(6)

Ladies and Gentlemen:

I am writing to you to discuss my experience in attending ITT Technical Institute in Knoxville, Tennessee. As a graduate of ITT Technical Institute, I am proud of the quality of the education I received. Thanks to the integrity of the administration, faculty, and academic support systems at ITT Tech, I am better prepared to take on the challenges of being a (b)(6)

(b)(6)

I earned both an (b)(6) and

a (b)(6) from ITT Tech.

Each of these degrees has assisted me in both my current and former jobs. I use both the technical skills learned from my (b)(6) and the administrative and planning skills I learned from my (b)(6) on a daily basis. Having both degrees makes me more valuable to my employer. My education was a factor in my survival of a corporate restructuring that occurred only a few months after I began my current job. My manager (also an ITT Tech graduate) valued my education and abilities and fought to keep me employed because he knew the quality of my education from his own experiences at ITT Tech.

There is also another part to my story. The education at ITT Tech opened many doors to me that were previously closed and this greatly improved my quality of life. I no longer worry about my ability to find employment that pays a livable wage. The peace of mind this brings me is invaluable. Additionally, my success at ITT Tech helped to raise my self esteem. There is nothing that compares to the feeling of accomplishment I have as a result of completing my education at ITT Tech.

None of the things I have described in this letter would have been possible, however, without the dedication of the faculty and staff of ITT Tech. Every employee of the school was helpful, caring and focused on providing the best education possible. Many times I needed assistance with various issues related to my education, and there was never a single time that my needs were not met. The professionalism and work ethic of everyone I met at ITT Tech in Knoxville was inspiring to me both personally and academically.

In closing, I would like to say that my education improved my life in ways that I could not have imagined. Before beginning my education, I was concerned that I might have missed my opportunity to continue my education. My success proved this concern to be unfounded and untrue. I completed my education, the education improved my life, and everyone at ITT Tech helped me to complete that education. Thank you for the opportunity to tell my story. My time at ITT was wonderful and I wish I could repeat it.

Sincerely,

(b)(6)

Phillip W. Ragan

May 3, 2016

To whom it may concern,

I am writing this letter to talk about my experience at ITT Technical Institute in Knoxville, TN. During my time here at ITT Tech, it has been nothing but positive. From the very beginning when I enrolled in (b)(6) the Director, staff, and instructors have been very helpful and went above and beyond for me. After my first quarter the former SST informed me of an (b)(6) I applied for the internship, then started a few weeks later.

Being a new student, I learned more (b)(6) than I could have ever imagined. That is just one of the great things that ITT Tech has to offer. While working on my (b)(6)

(b)(6) With the help of all of the staff at ITT Tech, I not only graduated, but I (b)(6) The staff here are not just staff, they do not just come here to do their job, they are willing to help the students any way possible. ITT Tech has many things to offer for the students such as the National Technical Honors Society, Alpha Beta Kappa Honors Society, the IT Club, and the Student Ambassadors. They also have Career Services where Beth Stone will go above and beyond to try and help you find a job, even if it's just temporary so you have some sort of income while you are in school. I have never had a representative like Kevin Huffman, as he is the most kind hearted and generous person I have ever met. It doesn't matter what kind of day he is having, he will always find a way to check up on his students to see how they are doing. Now Ms. Shafer, that woman needs a raise. She is probably one of the main reasons I made it this far. She knows her material, will help you anyway she can, and she will go above and beyond for any of her students. I cannot say enough about this school and how great it is. If it wasn't for all of the hard working instructors and staff, I would not be where I am today.

Sincerely,

(b)(6)

Amelia Mearman

May 3, 2016

To whom may concern:

My time here at ITT Technical Institute started when I asked to receive information about the courses that ITT had to offer. I spoke to Cam Alban, a representative of the school. I was unsure at the time about starting college, but Cam made me her priority. She called me every couple of days and I would make excuses about why I did not want to start. Thanks to Cam not giving up on me, I have graduated with (b)(6) and (b)(6)

I have had a few great instructors who have gone out of their way to ensure my time at ITT is well spent. Ms. Shafer is a wonderful instructor who cares about her students and goes out of her way to help anyway that she can. She has helped with (b)(6) and tutoring. I feel very comfortable knowing that I can speak with Ms. Shafer about anything that I may be having issues with.

Mr. Lay is another instructor whom I had the pleasure of being a student. He would also go out of his way to make sure his students were doing what they needed to in order to learn and understand the material. Both Mr. Lay and Ms. Shafer have a huge heart. I am lucky to have had them both as instructors.

Everyone here at ITT knows each other on a personal basis. We all consider ourselves to be part of the ITT family. The staff, Mr. Esway, Deborah Uberbacher, Kelly Armstrong, Ms. Shafer, Mr. Lay, Kevin Huffman, and many others have made it clear to all of us that we are one big family and have treated us as such. Mr. Esway is an awesome Director. He makes sure the students come first and, honors us every quarter with a student appreciation week where he will either cook for us, or have some type of food brought in to show his appreciation to all his students.

I can honestly say that I am very thankful I decided to join the ITT family instead of a huge community college.

Sincerely,
(b)(6)

Angela Clark

May 3, 2016

To Whom It May Concern:

I am writing this letter to you to inform you of how attending school at ITT Knoxville TN has affected my career and life in an immensely positive way.

I began my educational career in (b)(6) and have thoroughly enjoyed every class I have taken. In my first quarter at ITT, Knoxville campus, I enrolled in the third week of a new quarter; yet with all of the encouragement from the Director, Dean, faculty and administrative staff, I not only overcame obstacles, but my grades bypassed all of the other students in my program. In (b)(6) in my graduating class. I am (b)(6)

(b)(6)

Due to leadership roles I have been elected into, I have been able to pay forward all of the assistance I was given from everyone on the campus to any student who requests help. Without the staff and faculty of ITT standing beside me, I would not have (b)(6)

(b)(6)

(b)(6)

I also would not have the ability to work in my field of study. During my first year, I became (b)(6)

(b)(6)

and was hired by my current boss, (b)(6) Mr.

(b)(6)

and hires ITT students to train them in the real-world environment. My success stems not only from the program curriculum, but also from the knowledge, and the passion of sharing that knowledge, from many of the ITT instructors.

I would like to sincerely recognize those who have positively impacted my education, and my life. They are: Director Esway, Dean Rizzi, Librarian (LRC assistant) Dr. Deborah Uberbacher, Head of Finance Ms. Kellie Armstrong, Ms. Virginya Shafer, Mr. Greg Smith, former Chair of Information Technology Mr. Doug Lay, SST Mr. Jordan Rosenow, and all of the other staff. From taking extra time explaining what is required on an assignment and staying late after class, to greeting me with kind words in the halls and assisting with employment, I thank them all from the bottom of my heart.

Kind regards

(b)(6)

May 3, 2016

To whom it may concern,

I am writing this letter to express my personal experience with attending ITT Tech of Knoxville, TN. The list is short for the reasons that I started here, but the list is even longer for why I have come to love the school, faculty, and all of my peers.

Let's start with why I made the choice to come to ITT Tech of Knoxville, TN. First was the fact that I knew from doing my research ITT Tech was the school that had what I wanted available. Second was that with attending here I could advance my career with (b)(6). Third was that I wanted to prepare myself (b)(6) to one that would be less stressful, and more permanent.

Now for the reasons as to why I have come to love everyone that I know here. Let's start from the top the Director listens to everyone and cares more for others than I have seen in a long time. Next the staff is always there to listen and give a shoulder for someone to lean on during a time of need. I recently (b)(6) and all of the faculty to include the Director and the Dean knew (b)(6) that was going through, but they always gave me words of wisdom, as well showing me that I could do it. The instructors here have played a huge role in me having the ability to maintain my

schooling, family, and (b)(6) which is a lot to take in for some, but I'm able to do so because everyone at ITT Tech of Knoxville supports (b)(6) school, and maintain my family life. Then there is my peers, that have been a support system like no other. L. Wingate, A. Clark, C. Hicks just to name a few have been there to help me with something that I may be (b)(6) Without any of these people I would most likely not be here. This school and everyone that comes within its walls has changed my life for the better and made a huge impact on me.

Thanks,

Brian Boyd

(b)(6)

03 May 2016

To whom it may concern,

I began my academic career at ITT Knoxville, TN in (b)(6). Before coming to ITT I had recently completed a (b)(6). I had tried attending a traditional school (b)(6). (b)(6) I found the transition to be exceedingly difficult, and that a traditional school simply wasn't a solid fit for myself and my family. I then began searching for alternative learning paths, and decided to research ITT. Within ten minutes of filling out my information, and clicking the submit button on ITT's website I received a call from a counselor.

The counselor on the other end of the line was Cam. Cam was very polite and pivotal in my choice of coming to ITT. In only a few minutes of the being on the phone we had scheduled a visit and discussed the potential of becoming a student at ITT. When I arrived for my tour of campus I met with Cam, and Kelly Armstrong. After completing the tour I sat down with Cam and discussed my educational path. Initially I chose the electrically engineering degree plan. I then met with Kelly Armstrong and worked with her (b)(6). Mrs. Armstrong has a deep knowledge of (b)(6). (b)(6) and worked with me any way possible to ensure that I have the courses I need and answer any questions I may have.

Along my academic career at ITT I have had a chance to work with several different instructors that I feel personally have went beyond the calling of a professor to help myself and others succeed. I would like to the time to recognize them individually. Firstly I would like to recognize Dr. Schmidt, mainly because I feel that he is one of the single smartest individuals I have ever met. No offense to ITT, but I feel that honestly Dr. Schmidt could be doing anything he wanted in the scientific world, but he instead found a passion for teaching. I have had three classes to date with Dr. Schmidt and his personal teaching style and time and effort reached me in way that no other instructor has. Secondly I would like to recognize Mrs. Schafer. I originally started in the engineering program, but do to (b)(6). (b)(6) I switched to the (b)(6). Mrs. Schafer has been a key player in this transition, and oddly enough somewhat of a personal role model to myself. She already has a strong rooted deep knowledge of the IT field and networking. Even with this and working a regular nine to five job in the IT field, she comes to school and teaches 3-4 classes a quarter and dedicates herself to her students during that time. Furthermore, her thirst for acquisition of knowledge in the IT field is insatiable, currently with everything she is doing she is still seeking more certifications in the IT field and showing her students that even as busy as she is, if you want it you do it if you work for it. Lastly I would like to recognize Mr. Walker. Mr. Walker was my instructor for the majority of the classes that I had taken pertaining to the engineering field. He used his military background (b)(6). (b)(6)

In closing my experience at ITT has been overall very positive. The faculty and staff have aided in the transition from (b)(6) in a positive somewhat less painful fashion. Ultimately if I had to make the choice again, I would choose the same route.

Sincerely,

(b)(6)

5/13/2016

To whom it may concern,

I remember the day I first decided to visit ITT Technical Institute. I was fed up with my online education and felt I wasn't receiving the education I needed to be successful in my field of study. I saw an advertisement for ITT while searching for schools online and decided to give them a call despite the bad reviews online.

During my first visit to the campus with my counselor Lois I felt I was making the right decision. She was so kind, courteous, and made me feel like I had the ability to succeed. She gave me a tour of the building and I was greeted by the Dean and Director who were equally as warm and welcoming. After the tour was over I felt I had found a new home at ITT.

During my study here I have been exposed to many professors who have shown me they have a passion for teaching and care for each student individually. The professor who has made the biggest impact on me by far however is Mr. Smith. Mr. Smith is very experienced in his field and has given me knowledge I couldn't have hoped to gain anywhere else. His lectures can best be compared to a good book, you have to know what happens next, I cannot explain in a short letter alone how much he has positively impacted my education.

The professors at ITT are not the only people responsible for making students feel like they have a second home at ITT however. The faculty and staff here always make you feel welcomed and loved. I have had concerns over the course of my degree in (b)(6) (b)(6) and they were all handled in a timely fashion by either the dean herself or the director. Dean Rizzi is a woman that taught me the true meaning of strength. After (b)(6) (b)(6) she has continued to make the students here a top priority and also continues to (b)(6) of her own. She has proven there truly is no obstacle that can't be overcome. Director Esway has an aura about him that can't be matched. When you have a conversation with him no matter how brief your mood is lifted. His dedication to the student can only be matched by Dean Rizzi. The two of them truly make the school such a wonderful place to be. They with the help of other faculty members do their best to make sure students feel appreciated with events like student appreciation week and honors ceremonies. It's just another reason I can feel like I'm home when here.

Overall my experience at ITT has been one I will always cherish. I enjoy coming to school and furthering my education. Unlike most other schools it isn't something I dread. I sincerely thank all the faculty and staff for everything they do on a daily basis to make the school such a wonderful place to attend. I am currently a (b)(6)

(b)(6) The motivation, confidence, knowledge, and love I have received from here shows me this is just the beginning of my success.

Sincerely,

Lacey Clark

(b)(6)

To Whom it may Concern,

My name is Carey Hicks. I am a (b)(6) year old student in the (b)(6) (b)(6) at ITT-Tech, Knoxville, Tennessee. The opportunity to present my considerations about ITT-Tech is a privilege. Seldom are we taken on our own merits to put our thoughts in writing.

My experience here began with an inspiration. My remarkable wife believes in education. (b)(6) Very simply, my wife believed in me enough to set forth on this endeavor. Enrollment took place to enhance my career with studies in computer sciences. My ITT-Tech education has been a journey. I become a better employee, mentor, student, team member and person for this collective experience.

Each and every step of my education has been brought along with the guidance of an exceptional faculty and staff. Many of the staff are closer to my age and there has been a commiseration of collaboration, learning and challenges. The challenges for me being different as I have worked in my career field as (b)(6) for the past (b)(6). This involvement with the real world, with the good, the bad and the unusual has taught lessons about due diligence, preparation and following through. These same qualities have been emphasized by my instructors and the staff of ITT-Tech. The experiences have provided me with a perspective and forum to share what I've been through. Certainly my enjoyment has been the enrichment I have benefitted from. My thanks to all the faculty and fellow students.

To call out certain individuals would be to tell about (b)(6) (b)(6) I have traveled extensively on a national basis for work. All along the way ITT-Tech and my employer have diligently sought for the best in me as a student dealing with many situations. My personal thanks to Mr. Douglas Lay, Ms. Virginia Shafer, Dean Pamela Rizzi, & Director Joe Esway

among many others who have taken the time to see my education and my growth as a student and serving in a mentorship capacity for the students. New opportunities and challenges await, and I am stand ready to face them all. Thank you ITT-Tech!

With my compliments & respects, / s/

(b)(6)

May 3, 2016

To whom it may concern,

As a current student at ITT Technical Institute, I am grateful for the opportunity they have provided me to expand my knowledge in the career that I am working towards. As I work two jobs and go to school full time they provide me with a flexible schedule that allows me to work a full time job and another part time job. Everything I am learning here I am able to apply in my everyday activities.

About the middle of my educational career (b)(6) I came into the school not knowing where else I could go. I sat down with a few representatives and a few other faculty members who I had explained my situation. They then decided to help me anyway they knew how. (b)(6) and (b)(6) Dean Rizzi, being one of the faculty members I had told had not only got me all the resources that the community could provide. She also made sure that I was okay every week. She also helped me (b)(6)

(b)(6)

Words cannot express how grateful I am to this school and how it has helped me now and in my future. I look forward to be able to call myself an alumni of this wonderful school. I have learned more from the staff here than I ever would have going to a major college. I feel like the staff at this school starts to become your family because you are in a smaller setting. The teachers and the staff motivate you to do better and they believe in you being able to do better.

Sincerely,

(b)(6)

Kristina Stephens

May 3, 2016

To Whom It May Concern,

I have only been attending ITT Knoxville for a short period of time. Over the course of (b)(6) I have had an amazing experience in such a short period of time. The staff, faculty, the dean and everyone in between are constantly making random appearances into classrooms which proves to me that they actually care about their students and the well-being of everyone in this environment. That being said, I am extremely glad I chose ITT Knoxville due to the size of the campus. I doubt the dean of universities just randomly walks into class asking how everything is going and if we need anything or have any concerns. I always am being greeted immediately after walking in the front door with a smile and someone asking me how my day was. The instructors, staff, and a majority of the faculty know me on a first name basis without ever speaking to me before. I find that extremely nice and it makes me feel good to walk into those doors. This institution may be small, but the quality of education, instructors and professionalism is above and beyond what I was expecting. The amount of care this school has for its' students is out of this world and I, and I'm sure the rest of the student body, appreciate it to the highest levels. My classes are small, usually 10-15 students at a time, so for me that is a huge plus. I can easily get that one on one time with the instructor if need be. I don't think I've been able to make it from the front door to the seat in my class, without shaking a staff members hand or engaging in conversation, which turns out to actually make my days better considering I'm coming straight from work. I can guarantee many others appreciate that as well. I got offered the opportunity to write this letter based on my opinion and experience that I have had at this school and I took it. Going to ITT Knoxville after serving (b)(6) is surely a huge change for me, but I quickly found out how (b)(6) (b)(6) and I respect that beyond words. I was actually shocked to find out how supportive ITT Knoxville is (b)(6) and it made me feel very welcome here. I'm proud to say that I am currently attending ITT Technical Institute in Knoxville, TN. Thank you for taking the time to read my letter and I am honored to be able to get my voice out there to be heard. I hope this can help in any way, thank you for this opportunity.

Brooks, David A

(b)(6)

May 5, 2016

To whom it may concern,

I have been a fulltime student at ITT Technological Institute, located in Knoxville, TN, since (b)(6).
(b)(6) During this time I have been more than satisfied with the curriculum, administrative staff, academic staff, as well as campus environment.

I was (b)(6) (b)(6)
(b)(6) By reaching out to the staff I am pleased to say that I have a (b)(6) GPA,
I have been (b)(6)
(b)(6) at our campus. I owe most of my success to the ITT staff's positive reinforcement, encouragement and willingness to help me at any time.

I am so glad that I chose ITT and I would recommend this school to anyone who wishes to better their chances of landing gainful employment by attending a secondary education institution.

Sincerely,

(b)(6)

Lorie A Warren, LMT

Michael H. Stenger, M.Ed.
ITT Technical Institute
5425 Robin Hood Rd, Suite 100
Norfolk, Virginia 23513

To Whom it may Concern,

On behalf of myself, my children and ^{(b)(6)} family members, I wish to say a big thank you to ITT Technical Institute staff. I began in ^{(b)(6)} and am set to graduate in ^{(b)(6)} with a degree in ^{(b)(6)}. My specific focus is in ^{(b)(6)}. At first it was anxiety, *"How would I do well in this well-known school?"*

Anxiety then quickly turned into incredulity. I found out that I was just as smart as the other students here. The staff works tirelessly to make me fully understand the materials in and outside the classroom. This really endeared me to the school. Not only have they contributed their time and experiences to each student, but they have also come and shown me that it is not demeaning to use your own gifts and talents to help others. This strong and beautiful school will be an indelible mark of praise place for me.

One of things I love most about this school is that everyone is on an equal learning field. This is achieved successfully. I now have a much needed education. ITT also creates a learning opportunity where students learn a lot of different things. The school is very big on the virtue of selflessness and being mindful of students in need.

I can only wish ITT Technical Institute well and hereby state that I am very happy to be associated with you. Thank you! Thank you!

(b)(6)

Mohammed S Sahid

(b)(6)

05/03/2016

Michael H. Stenger, M. Ed.
Dean
ITT Technical Institute
5425 Robin Hood Rd., Suite 100
Norfolk, VA, 23513

Dear Dean Stenger,

I write you today to inform you about my experience since I began attending ITT Technical Institute. First, I will like to introduce myself to you. My name is Mohammed Sahid. I enrolled in the school of (b)(6). Since then, I have (b)(6) classes and currently in my (b)(6). I am in the (b)(6) and decided to attend college full time, which means that I needed to find a school with a flexible schedule and is able to work with students with tight schedules like myself. Luckily for me, I found ITT Technical Institute.

Since the first day I walk into ITT Tech, everything has been smooth. Starting with the student representative that was assigned to me, who was of great help and did everything she could to make sure that I was properly enrolled and answered all the questions I had. She then handed me over to the (b)(6) whom with their knowledge and support made my initial experience short of perfection.

In addition to this, the instructor I have encountered since attending ITT Tech have been amazing. They show a lot of knowledge in their fields and are supportive of the student. Especially of these instructors who have been most helpful is Dean Flynn. She has been a great instructor and mentor in and out of class, motivating me to do more and helped me become a better writer. She also helps myself and other student in work study programs which has been very helpful.

Since nothing is perfect, all great institutions always have room for improvement. In my experience, ITT Tech has a lot of classes to choose from but not during the day. This might restricts the success of students (b)(6) to attend classes on campus three times a week. I hope to see more classes being offered during the day in the near future.

I look forward to continuing my study at ITT Technical Institute in my pursuit of a (b)(6)

(b)(6)

Sincerely,

(b)(6)

Corey Dudley
ITT-Tech

My experience at ITT-tech was exciting and challenging at the same time. At first I was feeling nervous of being in college (the fear of the un-knowing). Once I started my first quarter I realized it's not as hard it seems. Life has challenges, and for the most part this was one of them. One great goal at this time in my life was to have a degree no matter what it takes.

Coming in with little or no knowledge of college I was scared, I admit. This was the best school, the best option to further my education. The staff was very helpful, and the atmosphere was superior. Once the ice was broken I was on a role. Most of the time when I was in school I felt comfortable at home so to say. I can say it was like a roller coaster ride when you're in line fear builds up, but once it starts it all fun. My experience at ITT was very challenging and fun. I am so glad I came to this school.

I got my (b)(6) and I'm currently working in my field of study. This school is excellent, I have decided to come back for my bachelors in project management to boarding my horizon. Actually I am currently still attending ITT for that degree, and I'm still loving this experience.

To: Dean Stenger

From: David Edwards (b)(6)

Subject: My Impression of ITT Technical Institute, Norfolk Campus

To Whom It May Concern,

After a completing (b)(6) as well as holding a few other positions, I decided to return to school at the age of (b)(6). I applied for (b)(6) (b)(6) and started attending ITT in (b)(6). No undertaking of this type will be easy and I approached this new beginning with a positive attitude. I resolved myself to put forward my best effort with assignments, don't fall behind, and don't miss classes unnecessarily. Although the decision to start school was a hard one to make, I don't regret it a bit.

In the short time I have been here I have been fortunate to have studied under several instructors that I truly consider to be some of the best I have ever met. The faculty and staff have been very helpful and eager to lead me in the right direction when I was having trouble with particular course work. I have put forth my best effort and have been recognized by my instructors in both positive comments and fair grading. I am also pleased with most of the resources that ITT provides for instruction. These resources include the Learning Resources Center, the adequately sized computer labs, e-books for all text books, and the student lounge.

Although I can only speak for the program I am enrolled in, I would have no problem recommending others to enroll ITT as long as they intend to be serious. If the student

approaches the material with a positive attitude then the school will do their part also. I have every intention of completing my education at ITT. I look forward to moving on to a Bachelor program in the near future.

If I can be of further assistance in this matter please feel free to contact me.

(b)(6)

David Edwards

To Whom It May Concern

I would like to start out by saying, that when I decided to reenter school I did some research on the forums and everything I saw was negative. But I like making my own opinions based on my own observations. And what I have seen so far I do not have any regrets. My first day here was one hundred and eighty degrees from what I read on the forums. I am on (b)(6)

(b)(6) And I am considering the (b)(6) that is starting up next semester, but I am still undecided. The teachers here are wonderful, they do a great job and I have no regrets. They have all been supportive and helpful. I like it here so much I got (b)(6) It has taken some adjustment I have not been in school in over (b)(6) years. So having to adjust to the school environment has been fun. But the teachers have been there for me every step of the way.

To Whom It May Concern:

I am currently a student of ITT Tech Norfolk campus (b)(6) I've learned to make

(b)(6) I can specialize in (b)(6)

(b)(6)

Most (b)(6) Salaries vary, depending on the industry, with (b)(6) making the most money. Some are called (b)(6) and salaries are comparable.

Since I've been schooling here I've learned a lot about the (b)(6) The teachers work with you constantly and make sure you know exactly what you're doing so when you get hired at a job you have great experience.

With everything I learned from ITT Tech, I can go far and beyond expectations. I would actually like to find (b)(6)

(b)(6)

ITT Tech is a very great school and I wouldn't trade them for anyone else. From the moment I stepped foot in this school my teachers have really been behind me all the way. They really look for you to graduate and learn what they teach you so you can have the best life possible for your family and yourself. The school never gives up on you from start to end and is right there to help you walk across the stage at graduation.

Sincerely yours,

Troy Harper

Date: 05/02/16

To Whom It May Concern,

For the (b)(6) I have attended ITT Technical Institute in Norfolk, VA, with the intention of attaining a degree in (b)(6). My experience, up to this point, has not only been pleasant and insightful, but has challenged me to make better use of my time, skills, and energy to better serve that purpose. I have had nothing but positive experiences at this campus, and have worked with my classmates on many projects for which I would have been ill-prepared had I not been under the tutelage of the professional and very knowledgeable faculty here. I have so far learned far more than I thought possible in (b)(6) and have had positive interactions with all of my instructors regarding any issues or questions I may have had. But more than that, they have also challenged me to learn more and peaked my interest in the subject of (b)(6) taking it from simply a flight of fancy to a serious career focus.

This school has given me an opportunity to fit an education and my personal goals into a life where I am full-time employed in a very demanding field, raising a family, and constantly busy with life's many other demands. This is something other schools would not afford me. In particular, the Dean and the Chairman of (b)(6) have been very personable, attentive, and have met each question I have had with an answer, and have worked with me to resolve any conflicts in my schedule so that I can continue to earn a living and raise my children as I better myself. The small classes and faculty mean I actually speak to and know my instructors, and they take an interest in every student's success here. They challenge us to do better, to think outside the box, and to become problem solvers. These are the essential skills needed to attain success in our chosen fields. We are also encouraged to work together and assist one another, and now we, the students, discuss class projects and future plans as if we all knew one another. This is an experience and spirit not often found at other institutions.

Owing to this school's flexibility and inviting atmosphere, I can pursue my degree and keep my job without feeling overwhelmed or having to make extraordinary sacrifices. This is essential for me, as my working situation and the fact that I am raising a family dictate that I must have as flexible a schedule as possible if I wish to earn a degree. As we all know, a degree can make a big difference in one's life, beyond simple finances and job placement. A degree gives a person the option to achieve their dreams and excel in a field that would otherwise be closed to them.

My overall experience at this ITT campus has made me believe that attaining a higher education is not only possible, but can be an enjoyable and rewarding experience. The staff and faculty are courteous, knowledgeable, encouraging and challenge us to think outside the box and research and learn whatever we can whenever we can. I have proposed an idea to the Dean and several instructors of forming a (b)(6) to further that mentality and foster intellectual growth, develop problem solving skills, and provide real-world instruction on the industry as it exists today. I have been met with enthusiasm and support, and been actively writing and re-writing a charter and operational guidelines for the society. The knowledge needed to make this succeed exists here, as does the drive and the ingenuity to make it valuable to the educational experience of the students who will

attend after I have left. In short: I believe in what I am learning here to the extent that I want to leave something here for future classes to take advantage of.

I have been fortunate and have made many good decisions amongst the bad ones in my life. Going to ITT was one of those good decisions, and I know what I learn here will serve me well. I was fortunate enough to (b)(6) Other students speak of loans and grants to pay their way through, and all but a very small minority are happy with the arrangements and are driven to graduate. (b)(6) (b)(6) we all feel them to be fair in exchange for what we are offered here. There is nothing hidden in the fine print, and I have not spoken to anyone who feels they are unfairly taken advantage of.

In conclusion, I have nothing but positive things to say for this campus. I have thoroughly enjoyed my time here and am looking forward to continuing, graduating with (b)(6) (b)(6) If there is anything I can say about this school, it is that I simply cannot stress just how positive the impact on my life has been. Going to school has changed me for the better, and going to ITT in particular has pushed me to improve my study and time management skills, and has opened me up to a range of new experiences that have given me a new sense of confidence in myself and in my future.

(b)(6)

Norfolk, VA

May 2, 2016

To Whom It May Concern:

I am writing this letter to express my experiences while attending ITT Technical Institute at the Norfolk, Virginia site.

As a student of ITT Technical Institute, I was very impressed at the way the staff and instructors worked closely with the students. The quality of the education received is well worth the money spent in my program. The hand on experience and the advice from my instructors better prepared me for the work force I planned on entering. Even when it was time to start looking for my career, Career Services helped me obtain a great job with (b)(6).

ITT tech has provided me with the skill and ability to perform at a great value to any company that I will work for. ITT has taught me how to conduct interviews, manage time, and also helped me become better organized. Without these experiences I may still be working at dead end jobs with no hope for advancement. Having the training and knowledge learned at school I see a great future for me which means a better life for my family.

As a proud student of ITT technical Institute I would recommend our school for anyone who is trying to move further in a career and looking to gain the knowledge it takes to get there.

Thanks for wanting to know about my personal experiences while attended ITT Technical Institute. To wrap this up I would say ITT provided me with a quality education and also help position me to be successful.

Jamaine Palmer

May 3, 2016

To whom it may concern:

My name is Quirt Marlon Collins I am a graduate from ITT-TECH in Canton, MI as of (b)(6)
I hold an (b)(6) and now work with (b)(6)
(b)(6) My mailing address is (b)(6) and my
email address is (b)(6) By phone I can be reached
at (b)(6)

I would like to comment on how my experience at ITT-TECH in Canton has changed my life by re-installing hope and confidence and by helping me find the job I was looking for.

I (b)(6)
(b)(6) I thought I was ready for anything. I found out that most don't recognize the education I received and employers want to hire only the best educated. After years of trying I had and I expected that I would not find the job of my dreams. My wife convinced me to try going back to school and I chose ITT-TECH. They have a reputation for teaching (b)(6) and they can work with a wide range of schedules. What I didn't know is how much help they would be in finding a perfect fit for my job likes. From the first class, I learned skills for being prepared for anything. I didn't see how this fit in right away but as the quarters went by I found that the classes before were helping the classes that came after. During this time the Career Services personnel were going through lists of available jobs looking for the very skills I was learning.

I am required to fall back on many things that ITT taught me, every day at my job and throughout my life dealing with people. Even in writing this summary those skills are helpful. I thank ITT for restoring hope to an old man that thought he lost his chance.

(b)(6)

To whom this may concern

5-2-2016

Throughout my time at ITT Tech I have learned a lot, some technical based and some real life application. I attended ITT Technical Institute in Canton Michigan and received a (b)(6) (b)(6) Though out the course I had several times where I wanted to give up and throw in the towel. I would talk to several individuals and they helped motivate me (Lynn Benton, Joanne Fairbanks and Jessica Miller) Just to name a few. ITT Tech was not just a way to get a degree it was a experience, the instructors would help you with anything you needed. I can remember one time Mr. Medhi sat me down and explained how a circuit worked, the instructions he gave me made me stand out at work and my boss was very shocked that I was able to figure out the problem.

Some people may say bad things about ITT Tech, but I must say I was able get a good education from there. The education I received set me aside from others. It was a lot of work and a lot of the time I wanted to give up but I kept fighting and now I have a story to tell to hopefully help motivate others to do the same. I'm not saying I know everything but I am saying ITT Tech has tough me a lot and I'm really thankful for my experience. When I first sighted up for ITT Tech I was (b)(6) (b)(6) As I was about half was done with (b)(6) the career service department found me a full time job as a (b)(6) At this company I leaned more than I thought I would but was still not sure what I wanted to do with my life. I then decided to (b)(6) I found a job as an (b)(6) I was making decent money and I was happy. One day I randomly was talking to Jessica Miller and I was telling here the name of the equipment that I was working on and she stated that she had a contact with that company. She asked me to forward my resume to her and we could see what happens. I did, and now I'm a (b)(6) thanks to her and my experience at ITT Tech. To me this showed that hard work does pay off to those that want to work for it. If you see something you want figure out how to get it and be patient but persistent and all will work out the way it should.

Thanks for everything ITT Tech

(b)(6)

Trevis McClure

May 3, 2016

To Whom It May Concern,

I am writing to you to discuss my positive experience as a student at ITT Technical Institute's (b)(6) in Albuquerque New Mexico.

As a current student of ITT Tech, I am extremely proud of the education, and clinical experience I am receiving in the (b)(6) program. I have grown not only in my education, but as a professional in the (b)(6), as I am about to start a career in the (b)(6) profession. The level of expertise the instructors at this institution possess has insured I will have enhanced abilities as I enter the job market in the (b)(6). They have not only instilled a higher level of education in me, they emphasize morals, safety, and the importance of always doing the right thing, the same philosophy stays true with clinical settings, and sites. The opportunities I have had in clinical settings to enhance the classroom and lab scenarios have been outstanding encounters, which have definitely allowed me to flourish as a student. At any time I have needed assistance from staff due to not understanding material, or requiring further explanation of subjects, it has always been available. The staff takes the time to not only assure we are staying on track on the education level, but they have reminded us to be kind to ourselves, as well as offered encouragement during this two year process. At any time whether it be a question pertaining to (b)(6) career services, or academic issues, the staff is always willing to spend time with me finding solutions. The different resources we are given through text books, LRC, virtual library, Kaplan, Evolve, and instructors have assured my success while attending this institution, some of these resources I will continue to utilize as I plan on furthering my career after completing this course.

I am very happy to have been a student of the (b)(6). I have not only gained an education that is invaluable to me, I have gained confidence, and self-worth. This program has offered many opportunities for me to grow in my personal, and professional life since the day I met with financial aid, they have made this experience very easy to stay dedicated to.

Thank you for allowing me the chance to share my life changing experience I have experienced as a student at ITT Tech, it is one I am very proud and privileged to be able to communicate.

(b)(6)

Shannone M. Pairett

03 May, 2016

To Whom It May Concern:

I am writing to you to discuss my experience in attending ITT Technical Institute in Albuquerque, New Mexico.

As a student and graduate of ITT Technical Institute, I'm proud of the quality of education I received and am still receiving. I originally began as a student in (b)(6)

(b)(6) Previously I had attended (b)(6)

(b)(6) and my best experience so far has been

with ITT Tech. This experience continued when I graduated with an (b)(5) and began working

on (b)(6) (I'm set to graduate at the end of (b)(6) and

will evaluate future education paths then, including a possible (b)(6) Thanks to the

integrity of the administration, faculty, and academic support systems at ITT Tech, I am better

prepared to take on the challenges of being a successful (b)(6) I want to stress that all

members of the educational community at ITT Tech have done their job and so much more to

make my education the best it could be: the faculty are passionate about their subjects and the

administration have always been there for me when I had a question or concern.

There are many examples I could use, but for the sake of brevity I'll restrict myself to a handful.

Across both my common core classes (math, language arts) and subject-specific classes (b)(6)

(b)(6) the level of dedication to my education and the level of enthusiasm sees no

bounds from the faculty. Many of the instructors are also working full-time, and as such they are

teaching as a second-career. Yet they bring an often infectious enthusiasm for the subject and make

the classrooms vibrant. Additionally, they are highly knowledgeable in their subjects. It is rare for

a class to pass without the instructor bringing a real-world example into the classroom to use when

teaching, which helps me and the other students connect the dots between what we're learning and

what we'll be expected to do upon graduating. Having formally attended (b)(6)

(b)(6) this is

the first time that I've had this experience - connectivity - be regular. Not only are my instructors

connected to the subjects they teach, but through their enthusiasm, knowledge, and integrity, I

have become more connected to the subjects as well.

As a proud student and graduate of ITT Technical Institute, I believe the knowledge and skills that

am continue to learn during my education help demonstrate the integrity and quality of their staff,

faculty, and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education

at ITT Technical Institute.

James A. H. Broomfield

(b)(6)

5/2/2016

To Whom It May Concern,

I am a current student at ITT Technical Institute in Albuquerque, NM. I am also currently enrolled (b)(6) and have graduated from the (b)(6) (b)(6) program from this school as well. ITT Tech has had a very strong impact on my life while I have been here and I can only thank the instructors that are here for that. They have worked with me the past four years while I have been attending with my coursework and with helping me better understand the concepts to be able to reach the next level in my degrees. In my first degree Mr. Stephen Smith, an instructor for many of the (b)(6) as well as being (b)(6) has helped me gain knowledge and tricks to improve my performance and presentation with (b)(6). He has also been very helpful with all other students that have been in his courses with me. I can't thank him enough for the effort he has put forth in courses that I have taken with him as well as with coursework I had with other instructors during the degree. I would also like to thank Walter Fayne and Phillip McCauley for the amount of effort they put into their teaching and helping me as well as other students. They have helped me better understand the difficult topics of information systems and proper ways to secure digital information. The instructors here have put forth a lot of effort to help students understand and learn to be better prepared for the workforce. They are also very understanding and have worked with us that come to class late because of work or if we are having trouble grasping lessons. If it wasn't for the instructors here at ITT Tech I wouldn't have the knowledge I needed to get a (b)(6) (b)(6) this last year. The group of instructors this ITT location has are exceptional and I haven't experienced the help they provide at any other higher education institutions here in Albuquerque, NM. I am glad to say that if it wasn't for ITT Tech and the instructors, I would not be where I am today.

Sincerely,

(b)(6)

May 2, 2016

To Whom It May Concern,

I am writing to discuss my experience as a student at (b)(6) at ITT Technical Institute in Albuquerque, New Mexico.

As a current student of ITT Tech, I value the quality of my education. This program has allowed me to develop fundamental skills, utilize my critical thinking, and is paving the road for a successful career as (b)(6)

The quality of education I have been receiving is significantly enhanced by the abilities of my instructors, for both the clinical and class settings. One of the most beneficial aspects to my education is learning from staff who have a passion to teach and a wealth of knowledge to share. The clinical experience has allowed me to solidify the fundamental concepts and apply the knowledge I have been dedicating myself to for the past two years. By learning the material in class, practicing skills in the lab, and participating in various clinical settings, I feel as if staff addresses multiple learning styles and modifies teachings for each class. Smaller classes has allowed me to have more one on one time with the instructors when I need additional help, and the instructors take the time to get to know each individual in the class. I strongly feel like my concerns and my education are taken seriously by the staff.

The textbooks and resources I have been given have carried me throughout my education. Most of these resources I use every quarter, even after passing the specific class. All of the materials and classes transition smoothly from one to the next. Every quarter staff walks us through logging onto the virtual library and guides us on accessing pertinent materials for each class, as well as any additional information or resources that may be helpful to us.

Thank you for your time,

Harmony Hayes

(b)(6)

Brian Lucero

(b)(6)

May 3, 2016

To whom it may concern,

My name is Brian Lucero and I am writing to inform, those of you concerned, that ITT is a valuable institution for learning. I started my education at ITT Technical Institute in the (b)(6) (b)(6) but decide to pursue a degree (b)(6) (b)(6) so I could obtain an education not found at other state or federally funded institutions.

I do prefer the opportunity of education through post-secondary schools because they offer a close knit group that allow us to learn from one another. The classes are much smaller and they offer more interaction between students and staff. And in my opinion these type of circumstances are fundamental and replicate work environments, that other in-state institutions do not come close too.

There are many vast differences between the state or federally funded universities and private colleges. I did mention a few instances about class size, interaction and that fact that the curriculum replicates work environments.

There is another benefit to the small student body, which is, (b)(6)

(b)(6)

Unlike Central New Mexico Community College, this gives me more time studying and completing assignments.

These are just some of the ways my education at ITT Technical Institute has given me a chance to improve my knowledge and (b)(6)

(b)(6)

Sincerely,

(b)(6)

Brian Lucero

April 30, 2016

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Albuquerque, New Mexico.

As a student of ITT Technical Institute, I'm proud of the quality of the education I am receiving. Thanks to integrity of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being a productive and career-oriented employee.

ITT Tech has really opened up so many different avenues for me, by providing me with the necessary skills. So I can be well prepared to go out on the job market and be looked at, because of the education I received through this amazing organization here at ITT Technical Institute. The attention I received from all my teachers, faculty along with all the support. Is something I will always be able to carry on with me in my future and why I am in the place I am today. I received a promotion at work which enabled me to work in the field of study I came back to college for. This would not have been possible if I had not received the career preparation I did with ITT Tech. I will continue my education with ITT Technical Institute and recommended the school to my family and friends that are looking for a very high quality education.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I am learning during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

(b)(6)

May 2, 2016

To whom it may concern,

ITT Tech has played a positive role in my life since day one. ITT has made it possible for me to work during the day and pursue my education at night. It has been a long road for me (b)(6)
(b)(6) With the guidance of the Instructors, the Career Advisor, the Registrar and the Recruiter, they have allowed me to get the direction and gain the confidence I needed to (b)(6)
(b)(6) The instructors gave me the extra knowledge I needed and the resources to allow me to (b)(6) educate myself on courses I was taught when I first enrolled. When I had questions, they never made me feel that my questions were stupid. They were more than willing to assist me or give me examples and this allowed me to soar in ways that I never thought I had the strength to do. With this said, I graduated (b)(6)
(b)(6)

Furthermore, I have decided to pursue (b)(6) I am now enrolled in (b)(6)
(b)(6) Since I had such a great experience the first time around, I was excited to continue my education path with ITT. I have to give thanks to the Instructors and the rest of the staff for assisting me in my journey and I look forward in sharing my future successes with ITT.

Thank you.

Sincerely,

(b)(6)

May 3, 2016

To whom it may concern,

My name is Rodger Watson and I went to ITT-Tech from (b)(6)
(b)(6) at the Clovis California campus. I am
also (b)(6) While I
was attending the Clovis campus I was able to graduate (b)(6)
(b)(6) I obtained an (b)(6)
(b)(6)

(b)(6) My experiences at ITT-Tech were great. Scott
Limbrook was the one I sat down with here at ITT-Tech he was
straight forward and honest with me, about what the school
expected form me and with what I can do with the degrees I am
going to obtain.

I loved the class sizes, because when they are small you
can get more attention form the teacher and I needed that in
some of my classes more than others. I loved the fact that they
had tutors here on campus so that if you are struggling you can
get the help that you needed to pass the class. The curriculum
was close to what is actually going on in the field. The
teachers knew what there were talking about because they worked
in that field so they were able to relate roal experiences to
the material. The teachers cared about the students and wanted
them to succeed.

May 3, 2016

In my first quarter here at ITT-Tech career services came into my English class. Telling us that they would like to see us and help us in any way possible to succeed in getting work after we graduate. Their door was always open and was helpful in helping me set up my work portfolio and resume. There was even a class for students and the end of the degree that was all about how to get a job after you graduate. They went over everything you would need to know and do to find a job.

(b)(6)

(b)(6)

I was able to obtain everything I need to get and hold a job (b)(6) I know I will always have career services to assist me in getting a job, updating my resume and portfolio, help with mock interviews and so on. I am fully prepared for my future.

Sincerely,

(b)(6)

Rodger Watson

ITT-Technical Institute,

My experience at ITT Tech was one of learning and progressing as both a life-long learner as well as an adult preparing for the professional workforce. There were many times where going to school was not something that I wanted to do, but I knew I had to. Countless nights were spent trying to complete assignments while juggling a full-time job, but I constantly reminded myself the reason I had my job was because of my school.

My professors were excellent examples of well-studied, well-equipped individuals that had a passion for teaching. Our different topics covered prepared us for entering into the real world and applying our schooling to real world scenarios. We owe our education to those professors that took time out of their lives to teach us the curriculum.

There have been many interviews I have gone to and they usually touch on the fact that (b)(6) (b)(6) degrees are from ITT. I have sat and listened to them question the integrity of the school and how it compares to the prestigious, well-known universities. I am happy that my retort involves experience interviewing those candidates from the prestigious colleges and knowing that ITT stands on its own as a competitive college whose students are just as, if not more equipped to perform in a real world scenario. I have my (b)(6) through ITT Tech, and I am proud to say without the push from my professors and my representative, I would not be where I am today.

Sincerely,

(b)(6)

Richard Barenier

IT Manager

05-02-16

MY ITT EXPERIENCE

What has been my experience with ITT-Tech? How can I quantify this? It began with a dream after Orientation. I was dreaming that night about all the stars and constellations in the heavens when some young people, roughly my age joined me. I was on the Campus at the University; a smile emanated from my face and I said, "You know the skies the limits now that I'm at ITT-Tech, I will achieve my Degree. I will step into that dream Career!" What would you say if I told you that the dream has come to fruition? My experience to summarize, has been stupendous! My dream is now a Vision! Thank you to ITT-Tech coupled with perseverance and dedication. I have achieved all that I sought for.

May 3, 2016

To Whom It May Concern:

I have been a student at ITT Tech since (b)(6)
Throughout my time at ITT Tech I have really enjoyed the teaching staff and all the hands on learning I
was able to do. I am planning on continuing my education at ITT Tech in Clovis in (b)(6)

Recently I was able to obtain a job in my field through the career services department at ITT Tech and
I'm really excited to start putting to use all the information that I have gained through my (b)(6)
(b)(6)

All in all I really think ITT Tech was the perfect school for me and I'm excited to (b)(6)
(b)(6)

(b)(6)

May 3, 2016

It is my pleasure to write this letter expressing my experience as a student at ITT Technical Institute of Technology. I have had pleasure attending ITT school and finishing my (b)(6) and further continuing my education to obtain my (b)(6) and if time permits obtaining (b)(6) The experience and knowledge that I received has already paid back in my professional life as a manager at my current job. My most valuable experience at ITT is the relationship with the instructors, they are very friendly and caring and most of all provide the right information for future career. As a (b)(6) having a full time job ITT has a great team of instructors and administrators that understand me and help me to succeed.

Sincerely,

(b)(6)

Andrey Borsch

May 3, 2016

My time at ITT Tech was a very rewarding experience. The sacrifice I made to complete my degree program was changeling with a family and full time job. The staff at ITT Tech of Clovis was very supportive and a joy to learn from. Besides the good time I had I would like to address an issue I did have with the school. Online math classes were a huge mistake for anyone trying to learn a new concept for the first time. Besides that, my life has been changed forever and I feel good about it.

(b)(6)

To whom it may concern,

My name is Susan Hilton and I am (b)(6) student here at ITT TECHNICAL INSTITUTE. May I say that I love this school! It's more of a family environment and I am truly grateful for all the support I am getting. (b)(6)
Being (b)(6) enables me to choose my own hours and is a blessing. I do a lot of my school work at the Clovis campus and the people here are absolutely fantastic! For me, it's more than getting an education. It's about being part of a community and feeling like I really can reach my career goals and fulfill my dreams. I have a tremendous support system here at the campus and I am truly grateful and I don't feel like I'm alone on this journey. Thank-you to all the online staff and Clovis campus staff for all the support!

(b)(6)

To Whom It May Concern, I am a student at ITT-Tech Clovis, Ca. Campus. I am currently pursuing a degree in (b)(6) The staff is awesome, the instructors or caring and always willing to help. The hands on training offered at ITT is outstanding, the equipment is state of the art and the course work in on point. The campus has a support system in place that's focused on the student's needs, ranging from tutoring, job placements and everything in between. I am very impressed with the tireless efforts of the instructor's, always willing to give their time to help.

(b)(6)

Ricardo T. Lara

My name Ricardo T. Lara, I am writing at ITT to let you know about my good time here at ITT .

I am a student here at ITT Tech, I have been here for (b)(6) and to tell you I have had good times and bad times. My good times here are the staff here They have all been supportive of me

(b)(6) Everybody here has helped me to bring up all my grades for all my classes. When I have asked for help, they have all made the time to be here to help any day of the week.

(b)(6)

Greetings,

My name is Christopher Villalobos I am a Student at ITT-Tech Clovis Ca. I am currently enrolled in the (b)(6) I graduated with my (b)(6) (b)(6) I've enjoyed attending the Clovis Campus, it's always very clean and the Instructors are great. They are always willing to go out of her way to help a student or encourage us students to achieve our academic dreams. The Instructors also make the class material understandable, they bring the "real world" into the class room which helps tenfold when we actually get out to the real world. I know first-hand, I am employed as (b)(6) and the professional success I've had has come with the help from my instructors and their teaching.

Being in the (b)(6) now I have seen some management issues and can only hope that the Dean as well as the instructors stay with the Clovis campus. Many of my fellow students and I really appreciate their guidance, vision, and demanding struggle to keep us on top of an ever changing technical world. I would like to see more power put into their hands when it comes to how the school is run.

For me a school is only as good as its instructors and this campus for now has a great team.

Sincerely Christopher Villalobos

5/4/2016

To whom it may concern,

Thank you very much for the opportunity to attend ITT Technical Institute in Swartz Creek, MI. I enjoyed learning about software development while tutoring and teaching at ITT Technical Institute. I have enjoyed success as a direct result of the experiences earned while attending ITT Technical Institute.

I began my education at ITT Technical Institute in (b)(6) with a diverse work history and an (b)(6). I immediately inquired about math tutoring and earned the opportunity to tutor students based on my past educational experience, work history, and academic performance record. I enjoyed success tutoring a variety of subjects including Physics, Java, C++, Visual Basic, HTML, and all levels of Mathematics while attending courses and working part time.

I was recently hired as an adjunct faculty here at ITT Technical Institute in Swartz Creek, MI to teach Intro to Java. I was also hired as a (b)(6) company as a result of my academic history. I would not have been afforded these opportunities without the educational experience that I earned here at ITT Technical Institute. I am currently a full time student, adjunct faculty, and tutor at ITT Technical Institute. I will graduate in (b)(6).

Again, thank you for the opportunity to attend ITT Technical Institute in Swartz Creek, MI. Please let me know if you have any questions or concerns or need more information.

Best regards,

(b)(6)

Monday, May 02, 2016

To whom it may concern,

I wasn't really sure where I was going with my future. I've gathered a lot of different skills in my life and wasn't sure quite what I was going to do for the rest of my life. Of those skills, one stood out, one skill I've really enjoyed, electronics (b)(6) attended ITT and she introduced me to the Swartz Creek campus. I saw the labs and classrooms, talked with some of the instructors and decided ITT was where I wanted to go.

While enrolled in my (b)(6) I was contacted by career services, they wanted to assist me in finding a job in my field. Before I came to ITT, I was looking for a job in electronics but could never find a place willing to hire me. Career services sent me a list of compatible jobs and helped me build my resume. It took a couple tries, but by the end of my degree I was hired by (b)(6) I know apply what I've learned to my job (b)(6)

I really enjoyed my time at ITT. The challenges presented by the curriculum kept me busy and helped build on my experiences. I managed to graduate with a (b)(6) GPA, maintaining that (b)(6) for each quarter in each class. I'm now enrolled in ITT's (b)(6) (b)(6) and hope to maintain that record. My goal is to obtain my (b)(6) (b)(6) and I appreciate everything ITT tech has done to get me where I am today.

Regards,

Joshua Alto

(b)(6)

5/2/2016

To whom it may concern,

I'll have to admit that I was skeptical of ITT Tech when I started looking into attending. There were a lot of mixed reviews online but I decided to start talking around and actually called some businesses and asked them what an ITT Tech degree meant to them. I found that a lot of places employ ITT Tech grads and had no concerns about the school what so ever. It was just a couple weeks later that I was all signed up and ready to start my first quarter.

From my first day at ITT through my (b)(6) it has been very hands on and has had me in classes in my field every quarter. This has been very important in keeping my attention throughout my degree and motivating me to learn more. I think this concept is the key to teaching and keeping people involved in learning. As a lot of things are moving to online I hope that ITT stays at the forefront of the hands on approach.

Working full time my schedule was not very flexible but ITT providing night classes allowed me to work full time and attend full time. Other colleges only offer classes during the day and you have to work around their schedule. This was also very important to my attending school here.

Finally I would like to say that I am very thankful for the career services department for helping me in my search for a job. They were very helpful throughout my (b)(6) in preparing me for my career search. The continuous work done every quarter helped build the skills I needed to achieve a job.

The staff's willingness to help throughout my associates and their genuine concern for how I've been doing throughout my schooling has really kept me going. Most of the Instructors have gone the extra mile to make sure you are doing well and understand the material which is hard to find on large campuses. In the end you will only get out what you put in and ITT has provided the staff and resources to get as much as possible to help me succeed.

Sincerely,

(b)(6)

Michael Hubbarth, ITT Technical Institute Graduate

May 2, 2016

To whom it may concern,

I am writing this letter to discuss my experience at ITT Technical Institute in Swartz Creek, Michigan. When I started here in the (b)(6) I was a very shy and insecure person. Because I was so shy it was very hard for me to be open and willing to speak in front of people. Well that would all change as I got to know my fellow classmates and my teachers. It seemed like it was not long and I was feeling more relaxed. After my first semester I was asked if (b)(6) We are supposed to get 120 SPE hours before graduating and in a year and a half I accumulated 150 SPE hours. I graduated in (b)(6) with a grade point average of (b)(6) Because of the one on one that I received from my teachers I was now a more confident and determined person. (b)(6) (b)(6) After graduating I would love to come back and teach at ITT Technical Institute and teach. I want to be able to give the same encouragement as Mr. Dye our Dean of Students and all the teachers have given to me.

Ann Marie Sahlke

(b)(6)

John Weissmann

May 2, 2016

To whom it may concern,

While deciding my future, I looked and experienced many different paths. Experiencing these has helped me on my path to the future I am looking for. ITT is the type of learning environment I fit best into. The hands on experience and smaller class sizes give students the best learning experience possible.

During my time in the (b)(6) ITT career services helped me find a position working toward my career as well. My job position is as a (b)(6) in which I have, in multiple instances, used aspects of my learning at ITT to complete my daily job duties. Without the help from career services, I may not have the position I do at this point in my early career. ITT has helped make my transition from classroom theory to the work on the job easier with the hands on experiences.

Lastly, after the experience that I had during my associate program, I have

(b)(6)

(b)(6)

I look forward to the new experiences ahead as well as any challenges that arise.

Sincerely,

(b)(6)

John Weissmann

2 May, 2016

To whom it may concern,

I am writing to discuss how my time at ITT Tech has affected my career. I am (b)(6) (b)(6) who has relied on my working experience and background to land a career (b)(6) (b)(6) After submitting my resume to several companies, only receiving a couple interviews and zero job opportunities I decided to enroll in the (b)(6) program. ITT Tech has given me a leg up on the competition and much more technical skill required to compete for skilled positions in the work place. I am currently a (b)(6) and have finally found a long term career. My (b)(6) attributed to my career but ITT Tech is the leading edge.

(b)(6)

Signed, Jamie Decker

4 May 2016

To Whom It May Concern,

I am writing to you to express my experiences in attending ITT Technical Institute in Chantilly, VA. As a student of ITT Technical Institute, I'm proud of the quality of the education I am receiving. Thanks to the integrity of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being a productive and career-oriented employee.

For example, the instructors are always kind and available to assist me, even if they cannot take immediate time for me, arrangements can easily be made. The knowledge of my fellow classmates also gives me a great edge and a feeling that we are all receiving the same technical information from our instructors. I am held in high regard at my job position, my supervisor and co-workers feel they can come to me more often for leadership and guidance.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I am learning during my education help demonstrate the integrity and quality of the staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT

(b)(6)

May 5th 2016

To whom it may concern,

I am writing to you to discuss my experience in attending the ITT Technical Institute in Chantilly Virginia.

As a student of ITT Technical Institute, I am very pleased with the education I have and continue to receive from the professors. The administration is very accommodating and understanding and the faculty strives to make everyone happy while simultaneously providing a quality service. ITT Tech has equipped me with the tools necessary to be great at my job as a (b)(6) Inc.

On multiple occasions I have had work conflicts and have been unable to attend class. Teachers have arranged meetings with me to cover material as well as provided the worksheets so I may complete assignments. This has allowed me to be able to miss a class worry free and still be able to remain caught up for the next week. Being able to know that I am not penalized for missing a stray class due to work is very beneficial because I can keep up with my education as well as not let down my team at work. I work with a team of 8 other people and we provide service 24/7/365. This means that we must always know what we are doing and not have to hesitate when it comes to resolving issues. ITT Tech continues to provide me with knowledge to be the best I can be at work. Much of the reason I got the position I have now is because I am attending ITT Technical Institute (b)(6) recognizes the Institute as a reputable source of intelligent IT professionals and continues to challenge me but my preparation at ITT Tech has allowed me to tackle each obstacle and task in a timely and professional manner.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I am learning during my education help demonstrate the integrity and quality of their staff, faculty, and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

(b)(6)

To whom it may concern

I am writing to you to discuss my experience in attending the ITT Technical Institute in Chantilly, VA.

As a student of ITT Technical Institute, I would like to mention that this is a great school choice beyond others. The administration and faculty is always available to help or to provide assistance with any issues regarding login problems, financial questions and the professors are friendly. The professors are friendly which make learning better and they are always available to answer questions. The career center is very useful and there are always new job opportunities that come up or to assist with resumes.

ITT Technical is providing me with the necessary information that I will be using in the career that I will have when I graduate. The benefit that the professors can provide real work experiences in each class make is better to learn and to enjoy learning the course or courses. The classes provide hands on experience in each course with makes it better to learning and the work is split in a way that provides flexibility in schedule.

As a proud student of ITT Technical Institute, I believe that the learning that will be done during the journey of my school years will provide an understanding how much the school helped me to achieve the goal in obtaining a future job.

Thank you for the opportunity to describe my personal experience in obtaining an education from ITT Technical Institute.

To Whom It May Concern:

I am writing this letter to discuss my experience here at ITT Technical Institute in Chantilly Virginia.

I have been a student of ITT Technical Institute for (b)(6) I'm proud of the quality of the education I am receiving. Thanks to integrity of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being a productive and career-oriented employee.

Students at ITT Technical Institute Chantilly have some of the best instructors in their fields. I have an English teacher that actually has me writing and enjoying it. My computer class were very intimidating on paper, but not that difficult once the instructor taut the lesson. The best

thing I like about ITT Tech is the instructors always have time to tutor. I am starting a new career (b)(6) I know I choose the right place to do it.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I am learning during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to talk about my campus.

Michael Nicholas

May 3rd 2016

To whom it may concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute Campus in Chantilly, VA. As a student of ITT- Technical Institute, I am extremely happy with the quality of education I am receiving here at ITT. As a student here I am better prepared to take on the challenges of being a (b)(6) in a real world setting.

The classroom environment here is excellent. All of the instructors here have been chosen because they are professionals in their particular course of study. ITT has also given students this same opportunity by allowing them to apply skills they have learned through the student professional experience. The student professional experience allows students to take the skills they have learned in class and apply them in their field of study. The tandem of book knowledge combined with real world experience is extremely valuable.

I would like to thank-you for the opportunity of sharing my personal experience here at ITT Technical Institute.

Sincerely,

Karen Fuller

To Whom It May Concern

Sometimes words cannot express our immense gratitude towards any one person. Today I am facing short of words to express my immense love and respect that I have for this school right from the time I appeared in my first class.

In this competitive world where every person thinks about minting money your main aim was to deliver quality education. After (b)(6) started preparing for the college exams, I always felt nervous about what will happen in the upcoming entrance into ITT Tech. To my happiness, all my fear vanished when I attended my first lecture. The instructor's had a spirit that brings the best out of students. They gave me the required motivation to move ahead in life. I was taught to just work hard and appear in the class without worrying about the results will be. It was just what a perfect mentor is all about.

I really want to thank ITT Tech from the depth of my heart for being there. You were and you will be always my inspiration.

Again, please accept my sincere thanks. I look forward to future.

(b)(6)

(b)(6)

May 4, 2016

To Whom It May Concern:

I want to take this opportunity to talk about how great ITT Tech has been to me. On the first day of school, I didn't have an ideal of where my future in the IT field was going to be. My kids are very important to me, it's important for them see me as a winner and not a just a dad that will work and not have time for them.

After the first quarter I didn't have an idea of what a computer, swishes, network or IP addresses were. Mr. Butu always helped me no matter if he was busy or on his way to a meeting, he always found a way to make sure that you are back on track. The first half of the semester, I realized that I liked the classes and the job opportunities available in the (b)(6)

I realized that no company will give you an opportunity if you don't have some type of experience, that is why I decided to go to the Career Services department, Mr. Craig Mcleod sat down with me and asked me about my goals and helped me explore my goals and aspirations for (b)(6) years. He give me a detail plan to follow and recommended that I kept a job log. Mr. Craig was always accessible to me during my time in school, because of him I got my first job as a (b)(6) and then an (b)(6) in Ashburn, VA. After a few months, the talented Nobiana Dodi helped me obtain a (b)(6) (b)(6) that is very good for my family and I.

ITT Technical Institute is made of staff that is perfect for this school. The knowledge, passion, courage, persistence, wellness, nurturing, and dedication of each professor has is very evident. The classes that I have been taking are making me understand and become more confident with the material. All the professors are willing to guide me through (b)(6) Some of the professors I would like to name are: Dr. Jackson, Prof Borja, Prof Charlton and Prof Chema, these professors are very good of what they do and the qualities are the best in the industry. I never been happy to be and a school that will provide me a professional job in a short period of time

(b)(6)

May 4th, 2016

To Whom It May Concern:

I am writing to you to discuss and share a moment with you with regards to my experience in attending the ITT Technical Institute in Chantilly, Virginia.

As a student of ITT Technical Institute, I remain humble when it comes to the how proud I am of the quality of the education I am receiving. Thanks to the integrity of the administration, faculty and academic support systems at ITT tech, I am better prepared to take on the daily obstacle, and of course, the challenges of being a productive, meticulous, and career-oriented employee within my industry.

Since the beginning, I realized how much I was missing before I began going to this school. I have become wiser, much more efficient at work, and my intercultural communication skills have improved. Without the attention from my educated teachers, career counselors and scholarship support, I honestly do not know where in this world I would be at right now. People look at me and ask me, "Are you working?" "Are you attending school?" The fact of the matter is that I am able to answer their questions with a humble and lucid "yes." My parents are proud of the person I have become and it seems as if everyone admires me because I work full time and I am able to balance the time at school with the time at work; something that not many people are willing to do. I am doing all of this; I am sacrificing time that I could be investing in something else in this life, but I am choosing, and in the beginning, I chose to invest time and money in myself because I know that I am capable of so much more in the corporate world. ITT Tech has taught me to become self-motivated in order to balance out of the requirements that are needed within the corporate world. Those who are looking for candidate; those who are looking for students with the ability to do whatever it takes to bring out the best within those industries, and this is why I am proud to call myself part of the ITT Technical Institute here in the state of Virginia. Many people do not know about this school, and many people are not aware of how important education is, so on a daily basis, I recommend many of the people I know and have within my circle to look into ITT Technical Institute because I know that they will not regret investing in their future.

As a proud and humble student of ITT Technical Institute, I believe the knowledge and soft/hard skills that I am learning during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for bestowing this opportunity upon me to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Ricardo Vinicio De Leon

To whom this concerns:

It is my pleasure to recommend ITT Technical Institute to anyone looking to go into the (b)(6) field. I had Mr. Grant Sketo as my instructor in several of my classes while in attendance at ITT Technical Institute. Mr. Sketo was one of my most dedicated, sincere, and purposeful instructors at our school. He consistently earned outstanding comments from other students about his teaching, as evidenced in his superior achievement in the number of students that graduated from the (b)(6) program.

ITT Technical Institute truly embodies the educational, ethical and personal standards of honesty, integrity, and dedication that has helped me through my chosen career. Anyone who puts forth personal effort can truly make their chosen field into a career that they will find very exciting.

If you have any questions or need additional information, please feel free to let me know.

Respectfully

(b)(6)

May 2, 2016

To whom it may concern,

I graduated from the Nashville, TN ITT Technical Institute on (b)(6)

(b)(6)

I am currently employed as an (b)(6)

(b)(6)

The education I

received from ITT Tech was directly applicable to my position. I was able to utilize what I

learned in (b)(6) and apply them to my job.

During the time I spent at ITT Tech, I received helpful advice from my instructors. My

representative also assisted me by answering any questions I have, and (b)(6)

explained the details completely. Overall, I feel that my experience was beneficial, and had a positive impact on my career.

Sincerely,

(b)(6)

Allan Que

To Whom It May Concern,

I entered ITT Tech in (b)(6) At that time I was returning to school after being out for approximately (b)(6) years. Having previously attended a large university, ITT was a wonderful fit for me. The classroom settings are on a much smaller scale and as the student, I was able to work more one on one with my instructors. Being a working student, the evening classes offered such a wonderful convenience.

Since that time, I have earned my (b)(6) and will graduate in (b)(6) Since my time at ITT Tech, I have made wonderful working relationships with instructors, students, and the administration. I feel that this school provides the comfort that a mature working student needs in order to make it through the program and to be successful.

(b)(6)

Sonya Clark

To Whom It May Concern:

My name is Matthew Sawyer and I am currently attending ITT Technical Institutes Nashville Campus. Before enrolling at ITT Technical Institute, I had attended similar institutions with little success. Due to these unsuccessful attempts at earning my degree, I was apprehensive at giving it a shot at ITT. However, almost (b)(6) later

and (b)(6) graduating with my (b)(6)

(b)(6) I know that I made the right decision in attending ITT Tech.

My time here has been, to say the least, unforgettable. I have made lifelong friends that have encouraged and supported me throughout this journey that I am extremely grateful for. With that, the faculty here have been informative, supportive, professional, and passionate at helping me reach my goals. Their unwavering commitment to my success has not gone unnoticed and has truly changed my life. Having been a student here for (b)(6) I have had the opportunity to work with many different staff members, from the LRC staff all the way to the campus director, and can confidently say that all of them did everything in their power to assist me in whatever it was I needed to be successful. I had not experienced such commitment, until I started here at ITT Tech.

In addition to the faculty that I mentioned above, the one group of people I have yet to mention are the professors. Putting into words and furthermore condensing into a single paragraph everything they have done for me is next to impossible. Their encouragement, professionalism, expertise, passion, and most importantly their unrelenting commitment to my success is the reason I will finally, come (b)(6)

(b)(6) be a college graduate. They, in my opinion, surpassed all of my expectations and again are truly the reason that I will have, this time, been successful in my endeavor.

I would like to extend my sincere thanks and appreciation to all the faculty and staff that have provided me with this opportunity. ITT Technical Institute has laid the foundation for my future and has changed my life for the better and for that I am sincerely grateful.

Sincerely,

(b)(6)

Matthew Sawyer

May 2, 2016

To Whom It May Concern

My name is Katherine Neese. I have been coming to ITT Nashville for (b)(6)

(b)(6) and I have had the time of my life. I have learned so much from the professors that I have had. I have been wanting to change my life to where I didn't have to struggle anymore. I decided it was time to come back to school when (b)(6)

(b)(6) and it's time for me to make changes in my life and go for it. I have him to thank for getting me through the door. (b)(6) and they will work with me if I (b)(6) because of the work load.

I love coming to ITT because all of the staff makes you feel like you are family. I haven't ever been in a school that everyone knows your name and your family's names. I love all of them like they were my own family. They have student appreciation week every quarter because they care about us and I feel like they really appreciate us.

(b)(6)

May 3, 2016

To whom it may concern

My name is Yvette Walker, (b)(6) I attended ITT technical Institute, (b)(6)

(b)(6) I received an (b)(6) My purpose for writing this letter is to inform the accreditation committee of the wonderful experiences I gained while attending ITT tech. I feel it is imperative for ITT to remain an accredited institution for several reasons. The first reason I was considered a non-traditional student; I have (b)(6)

(b)(6) ITT allowed me the opportunity to work and attend school without missing a beat (b)(6) I did not have to time to sit in a classroom for four years, nor did I have the time to take classes that I felt wasn't a necessity to the career I wanted to obtain. Secondly, I am currently an employee of (b)(6) TN, and I have had the opportunity to precept students from other universities that offer (b)(6) I am not at all attempting to be biased, however I will say that the learning and hands on experiences I acquired at ITT prepared me at an advanced level than majority of the students I have trained from prestigious universities. ITT offers the more seasoned student to flourish and not dwell in an intimidating atmosphere conducive for learning. On a personal level, I love the way ITT never made me feel like I was just a student ID or a number. To my instructors I was Yvette Walker, the student who was (b)(6) (b)(6) in order for her succeed. ITT was a wonderful source of encouragement. I was made to feel empowered by the teachers and staff; they were a great source of strength when times got devastatingly hard. In closing, ITT is not just a school; this institution gives people of all walks of life the ability to achieve goals and dreams that other colleges and universities may not be willing to give them.

(b)(6)

To Whom It May Concern:

I wanted to take some time to share my experience at ITT Technical Institute in Nashville, TN. I started attending ITT Technical Institute (b)(6) I was (b)(6) While taking this course, I quickly learned that (b)(6) is not something that I would like to do as a career. Knowing this, I went to talk to the Chair of the IT department and several teachers. This is what caught me off guard. (b)(6) having attended many other seminars/courses, you learn quickly that many people in positions such as Professor, Instructor, Chair, etc. think of you only as a number or statistic. At ITT, instead of sending me down another path immediately, the staff at ITT took the time to speak with me one-on-one to discuss this decision I was making to ensure that it was best for me. I changed programs and started down another path. While this path proved to be difficult (as it should be), I learned very quickly that the staff at ITT Technical Institute in Nashville, TN, were there with me every step of the way. There were numerous nights that I stayed late, numerous weekends I came in voluntarily to review material, etc. However, there were also many teachers that volunteered their time to come in on those days and help me (and others) review and study. The instructors at ITT truly have a heart for this and do everything in their power to ensure both professional and personal growth in their students. I will forever be indebted to the individuals who have taught me the skillsets I know, guided me down this new and exciting path in my career, and polished me for success. I graduated with an (b)(6) and I am now a (b)(6) for a global company. If it weren't for the Chair of the IT department and the instructors and ITT Tech, I wouldn't have this job. The Chair, Carolyn Jenkins, truly invested time in us all as students. She even put her name on the line to recommend me for the job I am currently at. In my opinion, it really comes down to this: if you attend ITT Technical Institute with the determination and will power to succeed, you will enjoy the school, make every-lasting relationships with both students and mentors, and you will ultimately succeed the field of your choice.

Sincerely,

(b)(6)

Kaitlynn M. Crossno

(b)(6)

05/02/16

To whom it may concern,

ITT Technical Institute is truly a unique and wonderful school, that provides an enriching and encouraging experience for all students. Mixing theory work and hands on, giving students the best way to learn in the ever changing field of (b)(6)

A positive experience I had with the campus departments here at ITT Tech, was in my Math II class (b)(6) I had taken the final exam, (b)(6) (b)(6) That very same night, my teacher found me, sat down with me, and (b)(6) It stood out to me because it benefited only my knowledge. (b)(6) (b)(6) It did not benefit him, (b)(6) and it only benefited my knowledge going forward. That really influenced me and made me realize that my teachers really cared about their students and them succeeding.

I originally started attending college just for fun. I needed a degree, so I decided to go into one of my hobbies, electronics. I enjoyed it so much that it became a career change for me, switching jobs from a (b)(6) my current job. It has inspired me to (b)(6) or one of their affiliates once I graduate.

Deciding to attend ITT Tech is one of the best decisions I have made, and I am excited to achieve my (b)(6) with them. It is a place where the designers of tomorrow are molded today.

(b)(6)

May 2, 2016

ITT Technical Institute, Greenfield campus

To whom it may concern:

My name is MyLinna Drehmel (Linna) I am a (b)(6)

(b)(6)

(b)(6)

together. I came across some of (b)(6) from high school. I had a feeling that this is what I should do.

I went on to website, simply put in my name and phone number. The next day I had a phone call from a man by the name of Larry Reuben. He invited me to come take a tour of the school. Only a few days later I was in the Greenfield campus of ITT. I knew from the moment I set foot in the building that this was where I needed to be.

Just after registering for classes with ITT, I applied for a job at a place called (b)(6)

(b)(6) They were impressed with the fact that I was registered with ITT. They offered me to job.

In (b)(6) I started as a full time student in the (b)(6) program.

Something about me that spread quickly through out the school was that I am a skilled writer. As I was studying I would see other students who needed help with writing. (b)(6)

(b)(6) It was not long after this that the school (b)(6)

(b)(6) The IRC assistant Alex Boll took me under his wing from day one as a mentor.

Currently I have (b)(6)

(b)(6) I also have several other (b)(6)

(b)(6)

Some have asked me why I work so hard for the school. The reason being is this: I was (b)(6)

(b)(6) The school became more than a school. This became my home. The people in it, my family. When I had problems with anything academically help was given, when it was time to (b)(6)

(b)(6) Career Services was there to help. The staff were all so understanding and kind when they learned of my history of domestic violence.

My life has changed for the better in less than a year because of ITT Tech.

Best Regards,

(b)(6)

To whom it may concern,

My name is Christopher Wawrzyn, I am currently attending ITT-Technical Institute in Greenfield

Wisconsin, under my (b)(6) I recently graduated from this school with my (b)(6) in

(b)(6) ITT-Tech has helped me get a job in the field I am currently employed through (b)(6)

as a (b)(6) This is a full time position and I am able to comfortably have a full time work schedule and attend school and maintain my grades. The staff here at ITT-Tech have been very encouraging and motivating to get their students out into the field, with very frequent requests of students get in up-to-date resumes for employers that are actively seeking individuals in our field. I am very happy and pleased with care and efforts of the instructors, the team down in career services, and the very easy to get access and help down at the Learning Resource Center (LRC). Everything that ITT-Tech has been able to provide for me and help me grow in this remanding industry has reflected only positive experiences.

Christopher Michael Wawrzyn

Larry D. Kassens

May 2, 2016

(b)(6)

To whom it may concern,

I wanted to send you this letter describing my experience attending ITT Technical Institute, the level of education provided to me, how it prepared me for my professional career, and the opportunities the degrees I earned afforded me.

I would like to start with why I chose ITT Technical Institute. When I was investigating the higher education schools in the Milwaukee area, I was interested in learning from an educational provider that focused on the areas I would benefit from. ITT Technical Institute was a perfect fit in the level of education and the speed at which the classes got to the topics I was most interested in.

Here are the specific campuses I attended and the associated years/degrees:

(b)(6)

Joining the Greenfield campus in (b)(6) was the greatest educational decision I made. I was able to excel in all aspects of the education, act as a student worker, lab assistant, tutor, and receive various awards. Working at the campus solidified my work ethic and kept me immersed in the electronics world that I was interested in.

This foundation of schooling, work experience and helping others has benefited me throughout my career. I have carried it through 3 major positions.

(b)(6)

All of this started with my initial decision to attend ITT Technical Institute. Thank you for the excellent years of schooling. Feel free to contact me if you should have any questions.

(b)(6)

(b)(6)

To Whom It May Concern:

I have had the distinct pleasure of attending ITT Technical Institute between (b)(6). I graduated in (b)(6). Before my graduation I began working for (b)(6). ITT had numerous Corporations seeking ITT to recruit educated and talented students with the electrical skills employers sought and I'm grateful for ITT for their connection to (b)(6).

The academics team, in my opinion are highly educated and most teachers are full time employees outside of ITT themselves. They shared real world experiences and had the first-hand knowledge in (b)(6) to educate their students. I myself found the Greenfield ITT facility to be ideal with the location, advisors readily available and how the staff was professional and helped guide the students to graduation.

Since graduating in (b)(6) I have worked for (b)(6) years. (b)(6) of those years were in roles related to (b)(6) and I have been in the (b)(6) field. I may not work (b)(6) field in my current role, but my years of (b)(6) has helped me better understand the (b)(6). I highly recommend ITT Technical Institute for their academics and passion in believing their students can make a difference in the workforce.

(b)(6)

(b)(6)

(b)(6)

To Whom It May Concern:

I graduated from ITT Technical Institute in Greenfield, Wisconsin in

(b)(6)

(b)(6)

I have been employed at (b)(6) since (b)(6) and currently I work as the (b)(6) for the company.

When I think about my time at ITT, I appreciate the instructors, how they connected with students and how they made it a fun educational experience.

Prior to my education at ITT, I had minimal experience and was incredibly intimidated by technology. Through education and experience, ITT gave me the confidence to seek out positions in these tech heavy fields, ultimately putting me on course to find a career that requires I use the latest in software and hardware.

Respectfully,

(b)(6)

Luis Herrera

(b)(6)

May 2, 2016

To whom it may concern,

I attend ITT Technical Institute at the Greenfield, WI campus. I graduated with my (b)(6) with a (b)(6) GPA in (b)(6) I continued on with (b)(6) I continue holding (b)(6) During my (b)(6) (b)(6) Sharing my experiences with new students and answering any questions they may have had.

I currently work for a (b)(6) My position is at (b)(6) (b)(6) Beside my normal daily routines, I have done a few projects for them. I updated all data entry and filing system. I changed their Material Safety Data Sheet system from binder form to Safety Data Sheets binder and electronic form. I research each Safety Data Sheet for all chemicals used by (b)(6) maintenance department. I am currently changing the inventory system in the maintenance department.

I enjoy attending ITT Technical Institute. With smaller class sizes, the instructors have a better one on one with the students. All the instructors I have had are wonderful, helpful and care about you. Sharing their experiences and allowing the students to share theirs.

When I started college, (b)(6) (b)(6) I had experience in (b)(6) but not the degree. ITT Technical Institute has taught me to be not just a better business person, but to be a better person.

Sincerely,

(b)(6)

Tina Olson

May 3, 2016

To whom it may concern,

I was a student at ITT Tech in Greenfield WI. I
currently own and operate my own business;

(b)(6)

(b)(6)

I owe my current success to my degree obtained from ITT, along with the career services offered through ITT Tech. Right out of college, I was able to break into the (b)(6) field, obtaining a position at (b)(6). This position elevated my career into the (b)(6) enabling me to obtain other positions which further developed my knowledge by gathering and utilizing vast on the job experience and training.

It is my degree and post degree assistance with ITT that led me to where I am today; a driven, focused and proud business owner, working for myself.

Sincerely,

Jamison E. Ashby

(b)(6)

Domenic Santoro

5/2/2016

Dear, to who it may concern:

My name is Domenic Santoro. I am (b)(6) degree at ITT tech at the ITT Greenfield campus. My experiences in coming back to school and choosing ITT were life changing for me.

I graduated high school in (b)(6) and (b)(6) I went right to work in the (b)(6) (b)(6) But this field is not what I wanted to do for the rest of my life. So after a lot of thought and research I decided to go back to school.

When my wife and I met with the staff from ITT Tech they were very encouraging to the fact that I could achieve what I wanted and they would support me to make it happen. But my thoughts from the years since I have attended any type of school made me a little scared of failing and getting left behind.

On my first day till now the staff, from the director, to the dean, to every instructor have encouraged me that I could achieve my goals. ITT tech instructors provide a learning experience along with tutors to help me in every way possible. This in turn makes my learning experiences here at ITT Tech a comfortable, relaxed place to learn with a great staff to help you.

I look forward to continuing my education here at ITT Tech and I would not go anywhere else. ITT Tech as far as I'm concerned has the best of the best when bringing out the best in students and really wanting to see students succeeded.

(b)(6)

To Whom It May Concern,

Shortly after high school I fell into a decent job that eventually turned into a career. I felt I never really needed to go to college because I was making a pretty good living. After working my job for nearly (b)(6) years it began to rapidly decline. It turns out I that printing was starting to go by the wayside due to the increased availability of electronic media. After a (b)(6)

(b)(6) I decided that I needed to make a change. I had always been interested in computers and curious about the way that they worked, so I decided that ITT-Tech would be the best fit for me.

My time at ITT has been an extremely valuable experience. I have developed many relationships with instructors that will last beyond my schooling. These instructors have provided me with more than just knowledge. They have been a source for advice as well as inspiration due to the fact that they are working in my desired field. Through them I have received numerous job opportunities that otherwise would have been unavailable. These instructors are not afraid to go the extra mile to make sure that I was doing the best job that I could. The hands on real world experience was beyond what I expected from ITT and its instructors.

I graduated with an (b)(6) and during my last quarter I was able to get a great job in my field. I am now working for a nationwide IT company doing router and firewall support. I started there making more than I was after (b)(6) years at my previous job with better benefits on top of that. Without ITT that would never have been possible. The hands on experience that I gained was what got me in the door and for that I will be eternally grateful. I was so impressed with ITT (b)(6)

(b)(6)

Sincerely,

Dennis D. Herskind, JR.

(b)(6)

To Whom It May Concern:

I went to ITT for a few different reasons. I tried (b)(6) and it wasn't for me. I didn't know what I wanted, but I knew that at the time what I wanted wasn't more schooling. (b)(6)
(b)(6)

After touring local schools the one that had grabbed my attention was ITT. I liked the focused approach of the curriculum and the amount of hands on time that was part of the classes.

The instructors are knowledgeable and willing to work with you when an emergency comes up. The instructors I worked with have a huge amount of real world experiences and painted a good picture of how and in what situations I could apply what I am learning. Even the nontechnical instructors were amazing. I discovered a love for writing in my Composition classes and also that I had a talent for research. The section heads and dean are friendly and easy to work with as well.

I am currently working part-time helping a friend with his (b)(6) or (b)(6) and look forward to finding full-time work once my schedule clears up.

Sincerely,

(b)(6)

Erik Doty

(b)(6)

To Whom It May Concern:

I knew I needed to attend college after high school but I was not focused on continuing my education immediately. I wanted to get out and enjoy life and experience it on my own and be away from the constant education. After (b)(6) I realized that life without an education is a lot more difficult than it sounds (b)(6)

(b)(6) With my experience I was highly valued in the workplace but there was one thing that I lacked, an education. I decided I needed to get that education to better my job outlook and better myself and I needed to go someplace that would work with my schedule.

After visiting ITT Technical Institute in Omaha, NE I made the decision to attend. I met with Jennifer and decided that with the courses they offer and the schedule that worked with my work schedule, I would be able to attend night classes for courses that would work toward the field I would like to be in and that I currently do work in.

The teachers are more than just knowledge based, they actually work in the career fields that they teach in. Many teachers are able to go through the curriculum and even expand on what they were teaching with real world experience. With open labs available weekly for courses and the instructors willingness to work with student schedules, has allowed me the ability to perform to my peak potential and maintain one of the top grade point averages in the degree program.

I have (b)(6) and currently work in a (b)(6) position of my interested field of study. I work at (b)(6) doing (b)(6) and with my education (b)(6) With a full time schedule at work and taking a full course of study at ITT Technical Institute in Omaha, NE I am still able to find time to spend with my family and continue my education while learning at a very high potential.

Sincerely,

Anthony Knickerbocker

(b)(6)

Toni Mettler

(b)(6)

To Whom It May Concern:

I am a (b)(6) year old female who has made the choice to come back to school and continue my education. I decided that I wanted to get into an IT field for the simple fact that computers are not going anywhere and there is money to be had. I was interested in ITT technical institute in the fact that it is more hands on learning and honestly it is close to my house.

I work full time and have a family which makes it very hard. I liked the fact that the program I was enrolled in was only an 18 month commitment. I finished my first 18 month program with an (b)(6) With my husband's support I have recently started my next journey (b)(6)

I also like the fact that the ITT campus in Omaha is not to large so the administration and staff know me. I also like that most of my classmates are not right out of high school so we have more in common. Most of them also work full time and have children of their own so we are all in the same boat.

This is most definitely not where I thought I would be at this point in my life. School has never been my forte. I have found that the instructors here are willing to put in the time and help you with any assistance you may need to further you in your classes. I am excited to (b)(6) (b)(6) here at ITT and find a good job in my field.

Sincerely,

(b)(6)

Toni Mettler

To whom it may concern:

Hello my name is Tim Hare and I would like to express my opinion about ITT. I use to do (b)(6) and (b)(6) I had to decide what I was going to do for the next (b)(6) years of my life. I kept seeing the commercials about ITT and decided to give them a call. So three days later I set up an appointment with the career department and after an hour of talking I went home and discussed it with my wife. We both agreed that I needed to go back to school and get a degree in something that I can do into my retirement years. She told me that I could be making a decent salary. I got help with the career department 6 months into my schooling doing an (b)(6) I really love the labs and the hands on training that this school provides. I enjoy the fact that there are a few teachers that actually went to school here.

I graduated with my (b)(6) and am now (b)(6) (b)(6) I feel that the instructors here will help with homework or help look for jobs even on their own time for students that actually make the effort to ask for help. Raising a family and going to school is very difficult but someday I'm going to wake up with my kids moved out and be happy that I have a job that pays well thanks to my dedication to get my degree at ITT.

Thank you!

Tim Hare

(b)(6)

Tuesday, May 3, 2016

Lloyd S. Couch jr.

(b)(6)

To Whom It May Concern,

I spent [b] years in the (b)(6)

(b)(6) During that time I always meant to get a degree, but was always giving excuses as to why I never started. Ultimately the reason I never persuade it was due to not being motivated. After I (b)(6) I found myself in (b)(6) job working with computers doing close to the same job I was doing while I was in. [b] years later I was still doing the same job at the same pay looking back at my life and asking one question "Why?".

I started looking into colleges and technical schools, looking for a degree in my career field that would allow me to get promoted. I found that ITT-Tech had that exact degree and in half of the time as other colleges. I toured ITT-Tech and learned that most of the class time is hands-on, and to me that is worth more than any piece of paper saying someone was good at writing and taking tests. So I signed up at ITT-Tech so I could go to my employer (or a new employer) and hand them the degree I earned along with all of the knowledge and real world experience I received at ITT-Tech.

I am (b)(6)

(b)(6) which will open up so many doors in my career field. I am grateful I finally got off my butt and went to college, but I am more grateful I decided to go to ITT-Tech because I will be able to (b)(6)

(b)(6) All of the faculty I have had the pleasure in interacting with have taught be a great deal, and all have spent the majority of the class time making sure everyone in the class grasps the real-world/hands-on applications of each assignment and each core concept of the class.

Sincerely,

Lloyd "JR" Couch

(b)(6)

To Whom It May Concern:

I always knew that I needed to go to college, but after high school I wasn't sure on what angle to start with the future of my education path to success. I made an attempt complete a career choice (b)(6) so I was forced to choose another path to find my educational success. I then attempted to (b)(6) and become a (b)(6) and was feeling like something was still missing. I was place in a community college and still felt like I didn't fit in with the other students around me.

After visiting ITT-Technical Institute in Omaha, NE I made the choice to jump one more time back into school. I chose to go to school because the person I met with explained to me and told me what I need to know about the school and the time line to complete on a specific time. I felt like a person that was a part of the greater good in the career field of choice and was able to show how my smarts to others as an equal.

I was a great student in high school so I was sure of my ability to make it at the college level. I felt welcome and many of my classmates had similar stories as to why they were now in college. It was tough at first, but my instructors were very knowledgeable and helpful. The gentlemen in charge of (b)(6) was and still very supportive. The extra assistance he gave me along with the open labs helped me a number of times. Eventually I gained confidence and became a stronger student and started helping other students.

I will (b)(6) and with the assistance of the Career Services department, (b)(6) I will (b)(6) I hope to be able to have the opportunities to be able to (b)(6) There are many rough days while going to school, but now I feel much better and my family and friends is so excited for me.

Sincerely,

(b)(6)

Harold Mason

(b)(6)

To Whom It May Concern:

In (b)(6) I went to ITT to find out more information about the college. At the time (b)(6) (b)(6) I knew it was time for me to attend college and get the degree I had been wanting. A commercial came on one night and it talked about how ITT now offered financial assistance. I went the next week and enrolled in classes.

The enrollment department made it easy for me (b)(6) classes that would help me get the degree I was wanting. Working a full time job and a part time job was a worry but the class schedule was flexible with evening and weekend class times.

It had been (b)(6) years since I was last in school. The small class size and instructors experience made it easy for me to get back into the school routine. Being in a class with other students who also had the same goals in mind, allowed me to find the support and encouragement I needed to be successful.

Each week, I was learning more and more about the field that I wanted to work in. This boosted my confidence that I had made the best choice for me. Having the ability to work with equipment that was used in real job environments has given me the valuable experience, which can be applied to my current and future jobs.

The ability to have one on one instruction with a knowledgeable chair (b)(6) has improved my techniques to overcome the challenges of learning different areas in my field. I have had the opportunity to be mentored by experienced individuals. It is such an honor to have chosen a school so devoted to its student's success.

While (b)(6) I have had several interviews in the job field I want to work in. With the help from my instructors and other students, I am able to perfect my resume and interview techniques. I look forward (b)(6) seeing what job opportunities become available.

Sincerely,

(b)(6)

Harold Mason

To Whom It May Concern:

I am writing to you to share my experience in attending the ITT Technical Institute in Jacksonville, Florida.

I started my experience in (b)(6) From the beginning, I developed respect to all faculties of this ITT. The Instructors are very knowledgeable, and hands on. They are always willing to help, and answer complicated question. The other departments such as (b)(6) Recruiters, and Scheduling, as well are very friendly, and very professional. As a student/graduate of ITT Technical Institute, I am proud of the quality of the education I am receiving. Thanks to the integrity of the of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being a productive and career oriented employee for (b)(6)

ITT Tech provided me with the necessary skills to successfully deliver what the company expect of me as an (b)(6) Without the attention of my instructors, learning resource center, career counselors, (b)(6) I am not sure I would be where I am today. All the changes in my life, coupled with the accomplishments I am having, would have not been possible if I had not received the career preparation I did with ITT Tech. I have recommended the school to my friends, and colleagues as well.

As a proud student/graduate of ITT Technical Institute, I believe the knowledge and skills that I am learning during my education help demonstrate the integrity and quality of their staff, faculty, and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at (b)(6)

Dear: To Whom It May Concern

I am a (b)(6) ITT Technical Institute in Jacksonville, Fl. I applied at ITT with many options for (b)(6) and it was not an easy choice for me considering the different lengths in programs, tuition fees, close locations and having a school to help with resumes and job-placement programs. The school curriculum and facility was very important for me to get the best possible education. I needed a school with great hands on equipment, exciting lab time and lectures. I wanted to be excited to go to class and clinical. I needed that open door communication with all that participated in my education. I needed instructors that were accessible and easy to approach and I am pleased to say I made the right choice when decided to start classes here at ITT Technical Institute

My experience here with the staff, instructors and (b)(6) has all assisted me in preparing to provide high level care to patients and family members, without fail the instructors challenged me to grow far beyond my comfort level and met those challenges with skill and much grace. The ITT (b)(6) here in Jacksonville, Fl. Carries a professional, caring and skilled team that is teaching a positive and compassionate approach to the (b)(6)

I would like to take this opportunity to say thank you for the support and encouragement here at ITT. Your expert advice and help is preparing me for the most important dream of my life and that dream is becoming the (b)(6) that I could be. I appreciate the instructors hard work, thoughtfulness and caring. I thank them for helping me tremendously through my journey of challenges that I endured, with their stern, and direct and helpfulness they helped me to stay motivated. I truly appreciate you all.

Because of This (b)(6) my dedication and hard work and the help of Faculty, I can and will be successful. This is clearly an outstanding Facility which places great emphases on high quality (b)(6) and I am proud to attend ITT Technical Institute here in Jacksonville, Florida.

(b)(6)

**ANTONIO THOMAS
SUCCESS AT ITT TECH**

Hello, my name is Antonio Thomas, I am (b)(6)

(b)(6)

I was originally (b)(6)

(b)(6)

When I came back to ITT Tech, it felt like

coming home. The classroom structure as well as the instructors are phenomenal. The instructors are very knowledgeable and bring quite a bit of real world experience to the classroom. I enjoy being able to obtain a better understanding of the material through the real-world experience. I've attended other institutions before deciding to attend ITT Tech and none can compare to the overall experience at ITT. Not only are the instructors great but the supporting staff are rock-stars as well. Anyone that I go to for help are more than willing to give me their complete and undivided attention until my questions have been answered and all of my issues have been resolved. I cannot forget to mention career services. I came to ITT with (b)(6)

(b)(6)

Tracy Rizzo, the Director of Career Services, took me under her wing to help me find and acquire an awesome position at (b)(6) where I've been for (b)(6) years. Tracy went above and beyond during this process, from rewriting my resume to conducting mock interviews. She followed up with me from start to finish and I must say, on behalf of myself and my family, I am very grateful to her for all of her assistance. I look forward to earning my degree and securing a challenging and lucrative career (b)(6)

(b)(6)

Regards,

(b)(6)

To Whom It May Concern:

My Name is Adam Buchert, I am a current student at ITT Technical Institute, at the Jacksonville, Florida campus. I graduated in (b)(6)

(b)(6)

(b)(6)

(b)(6)

My experience here at the campus has been great, from the administration department to the instructors. Everyone is nice and willing to help. The instructors have been extremely knowledgeable in the classes they teach. They also bring in "real world scenarios" to help explain information or to help keep the information in the class current. The amount of hands-on the students get on equipment via virtual machines and physical network equipment was a great learning experience for those who have not worked with this type of equipment.

Career Services at the campus helped me get a job in the field with my prior IT experience in the (b)(6) and the knowledge I have learned during my time here at ITT Technical Institute. Career Services has placed other students with no IT experience with a job in the field by helping them through mock interview questions; to make them confident in what they have learned, to get through thru the interview process.

ITT Technical Institute has been a great school to jump start my career in the (b)(6). It has allowed me to have a great job using my (b) years' experience and the knowledge I have learned in school. I would recommend this school to anyone to come here to learn if they want to better their lives.

Sincerely,

(b)(6)

Adam Buchert

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Garba Manou

(b)(6)

Overall I have thoroughly enjoyed my time here at ITT Technical Institute of Fort Lauderdale. For my (b)(6) Program I was thrilled to be learning in a hands on environment that utilizes the latest technology that is being used in the field today. For someone like me, I love learning in an environment where the classes are small, making it feel more individualized. The instructors are very knowledgeable in their field and always take the time to help the students, even if it is outside of class. ITT provides me the foundation to help further my career.

I appreciate the flexibility of the class schedules. I love that I can use the campus computers at my leisure. I love that I can download software so that I may practice at home. Although this can vary from campus to campus, I never thought I would meet such a great student environment. The people I have met have made these (b)(6) years such a wonderful experience. This environment has also given me confidence in meeting new people and being more open to new things.

On my final semester (b)(6) Program I pursued an internship in my field.

(b)(6)

I could not ask for a better group of instructors. The instructors are knowledgeable, understanding, experienced, and motivated. The staff of ITT, from financial aid, to career services, and all the way to Dean Greene, have been incredible.

Overall I have absorbed so much in these (b)(6) years, and I will continue to utilize what I have learned from my instructors and fellow students for the rest of my life.

X

To whom it may concern:

I would like to share briefly with you my experience with ITT Fort Lauderdale-068, since starting with their (b)(6) was not an easy accomplishment; it took a lot of dedication and effort on my part to accomplish my goal. Thankfully I was fortunate in my choice in an educational setting as the Instructional staff at ITT is exceptional. I graduated (b)(6) program but that was not without an occasional struggle. The instructors always made themselves readily available to tutor students and help us to understand a concept if we didn't initially.

ITT Fort Lauderdale-068 for me was a great choice in the foundation of my (b)(6) Since graduation I have (b)(6) and thanks to the support and guidance that I was provided continuously throughout my education at ITT I know that I have the knowledge and ability to do great things in the (b)(6)

Since graduating from ITT-Fort Lauderdale I have continued to come back and speak to other classes starting up in the ITT- Fort Lauderdale (b)(6) meeting when my work schedule permits. I want to share my experiences with incoming students and our clinical locations to help provide insight from my experience what was most helpful during my program so that their experience can be just as rewarding to them as it has been for me.

I have recently started working a (b)(6) in Plantation, FL as (b)(6) I was offered and accepted an (b)(6)

With Warm Regards,

(b)(6)

Kerrian Cohen

(b)(6)

May 2, 2016

To Whom It May Concern:

My name is Kerrian Cohen and I attended the Ft. Lauderdale (b)(6) as a (b)(6) and it was the best decision I had made as a student. My experience at ITT was a pleasant one. The instructors in which I encountered were very knowledgeable in all areas and (b)(6) and very willing in assisting there student towards greater success. During my last semester, students were assigned (b)(6) who assisted us along the end of our journey as nursing students. That was a brilliant idea, as during those times, students are extremely stress about (b)(6) it gives students a feeling of relief that our professors are there to help and it's a useful guide as to how to prepare for these major challenges. ITT also offers their students great options for possible employment through their career services department.

Immediately after graduation in (b)(6) (b)(6) I was offered a position at the (b)(6) (b)(6) and I happily accepted. I started on (b)(6) and currently still working there. I can proudly say that ITT gave me the foundation I needed as (b)(6) and I highly recommend them as a great institution for (b)(6)

Sincerely,

(b)(6)

(b)(6)

5/3/2016

ITT-Technical Institute

(b)(6)

Dear Dean Greene,

On (b)(6), I graduated from ITT-Technical Institute with an (b)(6) and I wanted to tell you how grateful I am to you and the staff, faculty and administrative staff, for the support and encouragement I received during the time that I was there as a student. For that reason I have decided to continue with my education; I am currently (b)(6) (b)(6)

While attending ITT Technical Institute I received the best training (b)(6). The classes were small and I received the careful hands on training that I needed to master the skills – a combination to theory and practice – that anyone would need to perform at a higher level in the workplace and be in demand by employers. It was much better than any training I had ever received in any of the other intuition of higher learning that I attended. I can say this, because prior to attending ITT-Technical Institute I had attended many other institutions (b)(6). When I compare my skill level upon graduation from ITT-Technical to the training I received from those other schools, the quality of the training I received at ITT-Tech was far superior.

I have now received the training that I needed to go and get a job and perform at the level that is expected. I have the confidence I need and I know that I will be able to do the job that my employer would want me to perform. I feel that I have gained a competitive edge by attending ITT-Tech. I will gladly recommend ITT-Tech to any student who would like to pursue a degree in Software Development, Electrical Engineering, Nursing, Business Administration or any of the other majors that are offered by ITT-Technical Institute.

Sincerely,

(b)(6)

Coral Thompson

(b)(6)

May 3, 2016

ITT Technical Institute

Dear ITT Technical Institute:

I have had the pleasure of attending your school in Ft Lauderdale FL. I have attended your school for approximately (b)(6) years and have obtained (b)(6) from your institute. I Have (b)(6) and have also received my (b)(6). Since my time there I have met some incredible professors that have really made an impact in my life. The professors there have helped me reach my lifelong dream of receiving not only a degree, but three degrees. The teachers at the school I attend, have made a huge impact in my life, not only because they are great instructors, but because they are professionals that work in the field and are not just book worms explaining how to do something that they have never actually done themselves. The instructors have real world experience, and that is something that cannot be taught.

Because of ITT I have a career now. I am currently a (b)(6) (b)(6). I have been with the company since (b)(6) and I could not be happier with my current situation. I was always a (b)(6) in the (b)(6) industry, with dreams of making it big in the (b)(6) industry. ITT has made it possible for that dream to come true one day. Everything that I have now, I owe to ITT Technical Institute, and I will always be grateful to you for that. Not only have you made my dreams come true, but you have made my mother extremely happy, that her baby boy finally received a degree, and that is the one thing that I am most thankful to ITT for.

(b)(6)

Sincerely,

(b)(6)

(b)(6)

(b)(6)

5/3/2016

ITT Technical Institute
3401 South University Drive
Fort Lauderdale, FL 33328

Dear ITT Tech:

I want to acknowledge how greatly and deeply the education provided by the institute has helped me accomplish many feats in my profession. While at ITT I was given several opportunities to of employment, and thanks to my education I was able to learn and apply my knowledge from the classroom to field.

My classes always taught me the fundamentals and most necessary of (b)(6) to survive and of course the tools to advance my career. I can testify to this, because of my school and great professors I was able to move up in my current field of employment to one of (b)(6) my company now employs. I have solved countless problems thanks to my years at ITT.

And I know with all I have learned I can continue to rise to the occasion while advancing my career thanks to the fundamental of my teachings, but the most important lesson I learned from ITT was never stop learning, I have been given the tools to continue my education and hope to always apply it in my everyday life.

Respectfully Yours,

Nathan Biddy

(b)(6)

May 3, 2016

To whom it may concern,

I am writing this letter to address my experiences while attending ITT Technical Institute in Tulsa, Oklahoma.

As a (b)(6) student from ITT Technical Institute, I am very pleased with the quality of the staff and education I have thus far received. The knowledge and integrity provided by the instructors, administration, and other supporting staff have made the challenges of pursuing a college education while working a full time job and maintaining a family life much easier than I had expected. I have been working within (b)(6) first with (b)(6) and now with (b)(6) and the confidence and ability I was able to step into this career field with has been overwhelmingly pleasant.

As an example, ITT Tech has given me the skills that were needed to proficiently design and model the products that are manufactured by the companies I have worked for. Without the dedication of the instructors and the quality of instruction provided by them I would have struggled when entering this career field. I was quickly promoted within my first company, but due to (b)(6) had to (b)(6) After (b)(6) I was able to (b)(6) with my new company, as I was recruited when they heard I was in the market and offered a larger pay base and better benefits.

It is easy to say that ITT Technical Institute has provided me with an undoubtable skill set and knowledge that reflects the quality of education provided at the Tulsa campus. I have no doubt that my current studies in (b)(6) will be just as beneficial to me and the (b)(6) has been.

I greatly appreciate the opportunity to express just how much the experience and quality of education I received at ITT Technical Institute has improved my life.

(b)(6)

May 4, 2016

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Tulsa, Oklahoma.

As a graduate of ITT Technical Institute, I'm proud of the quality of the education I received. Thanks to the integrity of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being a (b)(6) LLC.

ITT Tech provided me with ability to confidently work with any (b)(6) program that is needed. ITT has also provided me with the knowledge, confidence and ability to take any project from beginning to end no matter the obstacles. Finding solutions to everyday problems to make the work flow smoother is another task that I attribute ITT for. My (b)(6) has help tremendously in the (b)(6) field.

The academic support systems in the (b)(6) degree programs was beyond helpful. The understanding and the willingness to help went above and beyond any school that I have had dealings with. The personal nature and the field knowledge that each of the staff brought into the classroom was more educational than anything that could be learned from a book.

As a proud graduate of ITT Technical Institute, I believe the knowledge and skills that I learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience is obtaining a quality education at ITT Technical Institute.

Brittney Badgwell

(b)(6)

To Whom It May Concern:

ITT-Tech has helped me fulfill my dream of becoming a nurse. I owe my success to the amazing faculty. Every step of the way, on this journey over the past (b)(6) years, there have been enthusiastic and dedicated professionals guiding my progress. The faculty, throughout the whole program, has been very helpful and friendly.

My professors were passionate about their subjects, and went above and beyond my expectations to help me succeed. I had teachers who were available to me for personal tutoring when I was struggling to understand a particular subject. They held bolus sessions, and I made use of informal student study groups. I never felt as though I was left without resources or options when I faced an academic challenge.

I had the opportunity to be involved in the (b)(6) and (b)(6). (b)(6) These associations helped me stay informed about my school and gave my class and myself a voice for feedback to the administration, as I was my class's student (b)(6) representative. I will be proud to add both of these activities to my academic resume.

I would absolutely recommend ITT-Tech to people interested in expanding their education. I have had a great experience in the (b)(6) program and expect to have a bright future filled with opportunity and reward because of it. I have enjoyed my time here at ITT-Tech and I am proud of the education I have received.

Sincerely,

(b)(6)

► **ITT-Technical Institute**

To Whom It May Concern:

I would like to take a moment to share some of my feelings about my experience as a student at the Tulsa, Oklahoma campus of ITT-Technical Institute.

I (b)(6) program. Since then, I have passed the (b)(6) and am now a (b)(6) in the state of Oklahoma. I would like to thank the knowledgeable administrative staff for assisting with everything from financial aid to creating an effective résumé. The true honor, however, is owed to the incredible teaching staff who have been able to turn students into professionals. The instructors impart incredible amounts knowledge and experience, all the while, enduring comments and criticism from students. I know, at this point, every student from my graduating class who has taken the (b)(6) has passed on their first attempt. This is a testament to their abilities as instructors, and true assets to ITT-Technical Institute.

This is what I believe to be, but the first step in my education and career, I plan to further my education by enrolling in an (b)(6) program soon. I would like to thank ITT for helping to lay a strong foundation for my future.

Respectfully,

(b)(6)

5/2/2016

05/03/2016

To whom it may concern,

It's a great pleasure for me to write my personal experience at (b)(6) at ITT-Technical Institute in Tulsa, Oklahoma. From the time of admission to the time I graduated from (b)(6) school, I felt like I have made a right decision in choosing a right (b)(6) program at ITT. As a (b)(6) graduate of ITT Technical Institute, I am proud of the quality of the education, I have received. Thanks to faculty and academic support system at ITT -Tech for providing me quality education and hands on skills to work as a competent and safe (b)(6) the teachers in ITT always try to incorporate new scientific findings in the curriculum. As a (b)(6) student I have learned many skills in lab which mirror the (b)(6) environment and also received (b)(6) in the variety of (b)(6) as well as community based (b)(6) in Tulsa area.

(b)(6) school is considered as one of the hardest and stressful period of (b)(6) life, but for me it was like a breeze. During my (b)(6) program at ITT, I found many great people. This journey has allowed me to see how amazing these people are, how much I mean to them, and how blessed I am! I have thought about this dedication for a very long time. When I received a phone call yesterday from ITT to write my personal experience at ITT, I thought this is a perfect opportunity for me to show my appreciation for ITT and the staff I encountered with during (b)(6) programe and writing this letter will forever stay with me. Throughout this journey there are many people to thank and people to whom I dedicate my success in and after the (b)(6) school. One of the name I really want to mention here is Miss Mary Miller, who have always inspired me, she has been very patient, she had always listen when I felt overwhelmed. She is

one of the great instructor who taught me, mentored me, supported me, put me first, and were committed to me and my work, all because she has a vision and a dream to see every single nursing student to become a successful nurse. Most of all she has always watched out for me and always been there for me. I will never be able to thank her for everything she has taught me and done for me. All I can say is, I love her. Every time I left her office, she made me feel I have ability to accomplish anything. I miss our conversations about nursing and healthcare. She is a nurse I can only hope to emulate. The remaining professors Miss Beth Loerke, Miss Suzanne Williams, Miss Leona, Miss Lori, Miss Wendy, and Miss Lily, have all contributed to my learning (b)(6) my ability to look beyond what is in front of me and help me reach my aspiration. Thank u to each of u. Your suggestions helped me to become a confident and (b)(6)

As soon as (b)(6) As a proud graduate of ITT, I believe the knowledge and skills that I have learned during my education will help me demonstrate the integrity of staff, faculty and academic program at ITT. Thank u for providing the opportunity to describe my personal experience in obtaining education at ITT Technical Institute.

(b)(6)

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Tulsa, Oklahoma.

As a student of ITT Tech, I'm proud of the quality of the education I am receiving. Thanks to the integrity of the administration, faculty and academic support systems at ITT Tech. I am better prepared to take on the challenges of being a (b)(6)

I have been in the (b)(6) field for over (b)(6) years and good jobs were getting harder to come by. After I (b)(6) the jobs more physical, it was time for a new career. I filled out a questionnaire on line and received a call from ITT Tech. Lexie Fussell was very easy to talk to, she asked me what I was interested in. At first I was considering going back into the (b)(6) as I had gone to school for (b)(6) I finally decided on (b)(6) as I have always been interested in architecture. I was worried about going back to school after being out for so long, but the instructors here at ITT Tech are very helpful and patient. Miss Rowe is an awesome math instructor, she explains things so that they are easy to understand. All of my (b)(6) instructors also have been very helpful always happy to answer any questions.

When I tell my friends and family that I am already working in my field, they are surprised. I know it wouldn't have been possible without the help of career services and the education that I received here at ITT Tech.

As a proud student of ITT Tech, I believe the knowledge and skills that I have learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experiences in obtaining a quality education at ITT Tech.

May 2, 2016

To Whom It May Concern,

I have been asked to write a letter about my schooling and experiences at ITT-Technical Institute. I attend the Pittsburgh Campus located at 5460 Campbells Run Road, school code 070. I am (b)(6)

I want to first state that I really never planned to return to school to obtain a degree from ITT-Tech. It was a major decision I made to do so. I made an inquiry about going back to school, never really planning on carrying out that thought. I received a call from Mr. Kevin McIntyre, a Recruiter for the school. He convinced me to check the school out. Through his introduction to the school and the programs of study, particularly, the school of study I wanted to go into and what the school had to offer I enrolled. That was probably one of the best decisions I could have made.

ITT-Tech has proven to be what Mr. McIntyre said it would be and more. It's not perfect, no school is, but what ITT has done for me is above other schools I attended.

My experience here has been awesome. What I love is the practical side of the school. The classes are structured right, 2 hours of theory and three hours of lab time. You not only learn theory, but during the lab time, you actually put that theory you learned to use. This only reinforces what you learned in class. Another reason I am impressed with the school are the Instructors. They not only give instruction on

the subjects, but actually enjoy teaching it. They want you to succeed. A lot of the Instructors here work in the field they teach and they also bring their knowledge to the classroom. They have helped me be inspired and strive to do my best and learn as much as I can – to know what they know. Look, as our Dean John Flinter is always preaching at our awards presentation for the previous quarter, it's your investment, invest in yourself, strive for perfect attendance. Believe me, I have since day one. I have (b)(6)

(b)(6) I've been here. I hated to (b)(6), but even so my school work never lagged. The Instructors are always there to give the assignments I was going to miss and help when I needed it.

I have had (b)(6) since I started and (b)(6) (b)(6) I plan on that. If it wasn't for the great faculty here, I do not know if I would have learned as much as I have. Faculty members such as Mr. Philip Dupont, Mr. Lucas Troianos, and Mr. Kevin Kees are some of the most knowledgeable and helpful instructors I have ever had. They explain things and are always willing to go the extra mile to make sure that you truly understand the material. Their labs are well thought out and challenging. Dr. Matthew Kisow is the one professor who sparked my interest in LINUX. His knowledge has influenced me to learn as much as I can and to master it as much as I can. I definitely want to know what he knows. These faculty members are but a few of the great faculty and staff members at ITT-Technical Institute.

After graduation, I plan to continue on to achieve my (b)(6) from ITT-Tech on line. I wish they offered the (b)(6) I

would love to finish at this school. I only hope the online courses can meet this schools standards and education level I have achieved here.

(b)(6)

ROBERT MONTANA

May 4, 2016

To whom it may concern,

I've been a student at ITT-Technical Institute-Pittsburgh since (b)(6) My current program is (b)(6) ITT-Tech has taught me how to work with (b)(6) in a hands on environment. This style of teaching, in my opinion, is extremely beneficial to a person such as myself.

At ITT-Tech, the staff and faculty members show devotion and commitment that I have rarely seen elsewhere. For example, when I took the course on (b)(6) Ms. Richardson was patient and helpful at all times. Even when I was struggling with (b)(6), Ms. Richardson was very encouraging and supportive.

The Administration has also been very helpful. For example, they helped find grants and loans that I was eligible for, so that I wouldn't have to owe as much in student debt.

Overall, I feel that ITT-Technical Institute-Pittsburgh is the place to be if one wants a solid foundation on the inner and outer workings of (b)(6)

Sincerely,

Michael Saul

(b)(6)

05/03/2016

To Whom It May Concern:

This letter is to recognize my outmost appreciation towards ITT Technical Institute – Pittsburgh 070 Campus for the love, care, especially the knowledge and experience that the staff and instructors have shared with me to reach my future goals. Any school could show love, care, knowledge, and experience with their students, but ITT Technical Institute does that through a unique family bonding. This is due to the size of the classes. I don't think the professors of any University or College could fully get to understand every individual student as ITT Tech instructors could do for theirs.

I came (b)(6) My skills
and experience only (b)(6) None of those skills would help me in
(b)(6) With no skills and goals for the future, I felt like a
helpless and useless. It just happened that one day, I decided I had to change my life around. I got on
the computer looking for schools online. The school that stood out to me was ITT Technical Institute and
it was only forty-five minutes away from my residence. I scheduled a meeting and went on a tour, I
learned of its many programs that included Computer Networking Systems, Electronics, Graphics and
Design and Criminal Justice.

It happened that I was interested in learning more about computers so I chose the (b)(6)

(b)(6) decided to become a full time student and graduate ITT Technical Institute with an (b)(6) time. Throughout my (b)(6) I have gained so much knowledge from the very understanding and very caring instructors. I touched up on the general education that included Mathematics and English. The (b)(6) Core classes were difficult at times but the instructors got me through all of it. ITT Technical Institute also gave me the opportunity to experience the skills that I have learned in class through their (b)(6)

(b)(6) was able to put my classroom skills to work and learn more skills that I would never have gained knowledge of in a classroom environment. I would like to also mention two amazing curriculums that ITT Technical Institute offers which include Capstone and Portfolio. In Capstone, it's amazing how the school provides you with a certain real-world scenario and recommended tasks. The project requires you to put all the skill sets earned from class together and teamwork to get those recommend tasks accomplished. In Portfolio, you will have the opportunity to put together all the necessary documents like resume and recommendation letters to get you prepared to obtain a job or career. It also teaches the necessary soft skills necessary for your future job.

At this very moment, I feel alive as (b)(6). I feel alive because ITT Technical Institute has given me the greatest opportunities in improving my future. ITT Tech has given me a future. It has done all that through its' amazing staff and instructors. ITT Tech has done that through it uniqueness of class size and the ability to make its' staff, instructors and students feel like a community, feel like a family, feel like a team with a purpose. That purpose is to give its' students the future they yearn for.

Words are not enough to express how thankful I am for ITT Technical Institute's support to connect me to a better future. All I can do to show my appreciation is reach those goals and take advantage of the opportunities offered by ITT Technical Institute. They have given me the tools to build that future and to

be appreciative, I should make use of those tools. Lastly, I would recommend ITT Technical Institute to anyone who is looking to better their future. I appreciate the time you have taken to read and understand my appreciation for ITT Technical Institute.

Regards

(b)(6)

To whom it may concern:

My name is Janel Paffie and I am (b)(6) of ITT Technical Institute at the Pittsburgh area campus. Before attending ITT Tech, I received (b)(6) (b)(6) I (b)(6) for (b)(6) years and decided that wasn't the career for me. I attended an open house at ITT Tech and left feeling inspired and eager to start. Very quickly, I was enrolled and sitting in a classroom learning valid information in a healthy learning environment.

The faculty and staff are willing to go out of their way to meet a student's needs. They truly want all students to be successful and will give guidance to achieve goals. The campus has a close-knit vibe and the teachers know the students by name and not a number. There is a perfect ratio of students to instructors, and in turn, creates a comfortable classroom atmosphere. I am encouraged to ask any questions about material that I am struggling with which is not the case at all institutions.

Being in (b)(6) I am very excited to get into my job field. I am confident I will graduate with the skills needed to pursue my new career. The career services department on campus adds an extra layer of security in obtaining a job. Thank you for opening this door of new opportunity and I can proudly say that I am happy I chose ITT Tech.

Sincerely,

(b)(6)

Janel Paffie
ITT Technical Institute Student

May 4, 2016

(b)(6)

Dear ITT Tech,

My name is Alex Paris, I am pleased to be writing this letter expressing my feelings on the school and staff here at ITT. First I would like to address the cleanliness of the school. Not a day goes by that I don't see someone keeping the school clean and in top notch shape. Not only is the school sanitary, it is up to date and modern. Thus giving it a very welcoming atmosphere, that I feel at ease when I walk through the doors.

Here at ITT I enjoy coming to class. I am in currently in my (b)(6) (b)(6) and couldn't be happier. Everything is well organized and run smoothly. Every single one of my teachers have done a great job and I couldn't be more thankful. Professor Mr Yamber, does a magnificent job helping students, and myself of course. He guides us in understanding (b)(6) and how things are made up in the (b)(6) industry. I know that I made the right choose in furthering my education at ITT.

Sincerely yours,

Alex Paris

(b)(6)

To whom it may concern,

Being a student at ITT-Technical Institute, specifically Pittsburgh, PA campus, has been an amazing experience for me. A lot of hands-on learning compared to a normal college gives the average person more practice to learn the material. Classes start easy, but progress in difficulty as the (b) year degree goes on. All my teachers have been there to help me when I need it, and some of the time, I'm the one teaching other students in the peer-tutor program. Awards are given out for Highest Honors, Honors, and Perfect Attendance, things that look really good on a resume. Expensive software, like all Autodesk programs, are included while you're in school, and can download them as many times as needed. Even Microsoft Office come free, but you only get a limited number of licenses. There are 3 classes each week, once per day for 3 days, lasting between 4 and 5 hours each, and are flexible with being late considering people's lives outside of school. A student can come right out of high school, or be near retirement, and still get the same treatment as everyone else. Being in (b)(6) program, I was able to take a trip to Falling Water Home in Mill Run, PA and saw the beautifully architected building which contains a water fall and appears to be floating over a river. It was an amazing experience. The faculty in the office are here most the day to ensure all paperwork is completed, and can answer any questions about financial aid. Near the end of graduation, they will work with other companies in your field to get an internship, a chance for you to show what you learned and what you can do to better suit them and their company's needs. Once I get a job in my field and am able to settle down, I hope to come back for a second degree in (b)(6)

(b)(6)

I highly recommend this school.

(b)(6)

May 4, 2016

To whom it may concern,

I attended the Pittsburgh campus of Itt and graduated

(b)(6)
(b)(6)

I am currently employed by

(b)(6)

I can never express enough words what attending Itt has did for me and my life.

When referring a good education and attentive staff I will always recommend Itt for my first choice for education and job placement.

Itt definitely saves lives and can be good positioning for anyone young or old. As for myself while attending Itt I had some of the best support team all over the facility including from instructors that had nothing to do with my program or studies. I still was able to receive a learning experience from all. By the facility being small I was able to be more focused and getting the attention that I needed for getting the education that I needed.

Itt was and will always be an experience well worth it and never to be forgotten.

(b)(6)

Sinc

Gre

To Whom It May Concern,

My experience at ITT has been a positive one. I have learned a lot about my chosen field of study, (b)(6) I started coming here to (b)(6) in my field, I decided to continue coming for my (b)(6) degree as a result of my experience. The teachers are good at explaining the topics and giving time to ensure that you understand the material that you need to know. The staff is good at responding to problems and concerns as well as encouraging you to continue in your studies. While I have not gotten a job through the school as of yet, because I already had one in my field, it is not from a lack of effort by the staff's part. They are constantly trying to make sure your resume is in good order and that you know of all the opportunities that they have found for your chosen field of study. I believe my decision to go to ITT has been a good one, I think they do an excellent job, and I feel confident that I will be able to succeed after getting my degree. Thank you for your time.

Regards,

Kevin Scheffler

5/3/2016

To Whom It May Concern:

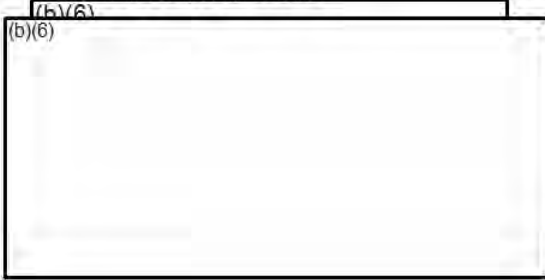

My time here at ITT Tech has been very rewarding. I started in (b)(6) as someone who had been out of school for [] years. Since that time ITT Tech has more than helped me within the field of education, the workforce, and generally a fun place to be. The material learned here has allowed me to gain a full-time internship and also professional hours working around the school. My knowledge of (b)(6) (b)(6) in general was nonexistent when I started school. I am now starting my (b)(6) and I am looking forward to learning more

Sincerely,

Zebaylon D. Woodruff

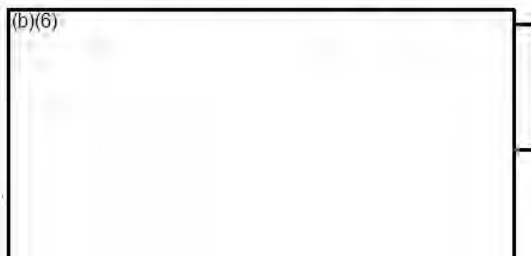

(b)(6)

Joel W. Satterthwaite

To Whom It May Concern,

I began my academic career at ITT Tech (b)(6). Previously, I had been to other schools and had a lackluster performance, mainly due to disinterest and a focus on humanities. Once I began the (b)(6) program at ITT, I was instantly enthralled. The course materials, in combination with the hands on lab experience, were geared towards my specific learning style. After my first quarter, I had gained confidence in myself and began venturing out further in to the programs and activities offered by my campus. I joined the (b)(6) club, where I eventually became (b)(6) and I entered the (b)(6) lab. After honing my skills and earning my (b)(6) award, I began assisting the (b)(6) in his day-to-day duties. I do not believe I would have been given these opportunities at another school, much less have courses created with my style of learning in mind. The professors have been helpful, understanding, and knowledgeable. Staff members know my name and greet me every time I walk in the door. Career services have been critical in my search for employment, helping me prepare my resume, and honing my interview skills. Overall, I have had an incredible experience at ITT Technical Institute, so much so that my two best friends are now earning their (b)(6) degree as well.

To whom it may concern,

During my time at ITT Technical Institute, I have learned so many new skills that will give me more knowledge in the field of study of my choice. I currently already have a job in my field and I feel like my time here at ITT has helped me out so much already.

I have been working in the field for about (b)(6) now and I have already been

(b)(6) I

truly believe that this has all happened because of my time enrolled here at ITT. The

instructors here make learning the curriculum easier people like myself (b)(6)

(b)(6)

(b)(6)

I believe that because of the smaller

class sizes, more students are set up to succeed than if the classes had more students enrolled in class.

(b)(6)

(b)(6)

To Whom It May Concern:

I am writing you to discuss my experience at ITT in Louisville. I'm a student and am proud of the education that I am receiving from this school. Thanks to ITT, I am able to be successful in my career and was given the help needed to enter my field of study.

For example with the career service center's help I was given the opportunity to start working in the (b)(6) field for a (b)(6). They've all helped me add to my knowledge of (b)(6) alike.

As a proud student of ITT Technical Institute, I know that the faculty and staff here are among the best that there are! My teachers have been nothing but helpful, making sure I have everything I need to complete assignments.

Thank you for the opportunity to share my experience.

(b)(6)

Andrew Vessels

May 04, 2016

To Whom It May Concern:

As a student at ITT Tech in Louisville, I am writing to express my current satisfaction with the success I have experienced through this attendance. Thanks to my former (b)(6) instructor urging me to visit career services, I was provided an excellent opportunity for a (b)(6) (b)(6). What was initially a (b)(6), has flourished into (b)(6) with the possibility (b)(6). The general (b)(6) skills I learned from ITT, along with troubleshooting skills and analytical thinking, have been a great help for my current position. I consider myself lucky having this opportunity, and the opportunities for growth within this company, well before graduation. I am very grateful for Mr. Young and Mr. Alcorn pointing me in this direction, and I believe the Instructor Reference provided by Mr. Young was also a great help in my receiving this opportunity.

My instructors at ITT Tech have all been very knowledgeable and helpful throughout my time here. And it is especially reassuring that they are currently working in their field, all while relaying their knowledge to us as students.

I look forward to (b)(6) ITT Tech, and also appreciate the opportunity provided to join the (b)(6).

Thank you for taking the time to read about my current experience with ITT Tech,

DeeDee Mills

(b)(6)

Hello. My name is Tarra Mitchell. I am a (b)(6) (b)(6)
(b)(6) I started ITT Tech in (b)(6) The first day I
walked into the building I felt like it was very student oriented and the I belonged here. It
was very family oriented and close knit. It seemed like every staff member knew my
name. That goes from the Dean down to the registrar. (b)(6)

(b)(6)
The Learning Center would open at 7am, so if I wanted to study or print homework off
before class. The library workers are very knowledgeable and taught me how to navigate
through the Internet, virtual library and finding reliable sources for papers. The recruiters
are very nice and know you on a first name level. The (b)(6) instructors are
phenomenal. Always going above and beyond the call of duty to see students succeed. I
had several instructors that would come in early and stay later to explain a concept or
give you extra help if I needed it. The head of the (b)(6) department had an open door
policy. If I had a problem or just needed encouragement, she would be there to listen and
offer wisdom. After I graduated the (b)(6) program some of the instructors kept in
contact with me and offered assistance and advice on studying for the (b)(6) I took my
(b)(6) The Career Center has
reached out several times asking if I need assistance finding a new job. My experience at
(b)(6) was great! I wouldn't trade it for the world!

Warm regards,

Proud (b)(6)

Tarra Mitchell

(b)(6)

To Whom It May Concern,

My name is Jeffery Robinson an (b)(6) year student at the ITT Technical Institution located in Louisville, KY. It has been a dream/goal of mine to achieve a (b)(6) degree in the (b)(6) field since I was a young boy. I have always been fascinated with electronic devices. I enjoyed disassembling things to see how they function, then reassembling them to see if they will continue to work. (b)(6)

(b)(6)
(b)(6) I decided to endeavor in achieving a form of higher education. I researched different technical schools in the area, and decided that ITT was the best school to attend in order to turn my dream into a reality. I never lost that fascination, in fact, (b)(6) field that allowed me to so.

The reason that I chose to attend ITT Tech was because of the atmosphere that the institute provided. I am a hands-on type of person and ITT provides that hands-on experience. I could have taken online classes, but that would not suit my needs. For instance, if I had trouble with something, i.e. homework assignments or understanding the context of something I was learning, the instructors and my peers are there to help me. In essence, by being in a classroom environment there is a certain bond that a person gains and that bond is hard to achieve when you're in an online environment. Also, being able to go to the staff to resolve any issues with your schooling is a plus. I am the type of person who likes to take care of any issues that may arise in person and expeditiously. The staff at ITT Tech has been great at helping me to resolve and conflicts or situation that may hinder me from achieving my educational goals. There are areas that I believe need improvement, but that goes without saying. Every business has a need for improvement if they want to continue to be successful. In the end, if I had the opportunity to do it all over again, I would. I have enjoyed being associated with ITT Technical Institute. So much so, that I have encouraged others to attend ITT as a choice of obtaining a higher level of education.

That is about all I have to say about I have to say on the matter. I just want to emphasize that I truly enjoy the level of professionalism and comradery that one obtains from being associated with ITT Tech and its alumni. Thank you for taking the time to read this letter, and hope that ITT Tech continues to be an excellent institution for higher learning.

Sincerely,
(b)(6)

Jeffery C. Robinson, Jr

(b)(6)

(b)(6)

Date 5/3/16

To Whom It May Concern:

I am writing to let you know about my experience at ITT in Louisville. I graduated from ITT in (b)(6) with (b)(6) and I am very thankful for the education I received there. The staff at ITT were very knowledgeable and ready to help me anytime. Thanks to the education I received from ITT, I have been able to pursue a very rewarding career in (b)(6). When I graduated, ITT's career services found me a job working for a fast growing (b)(6). After being employed for (b)(6) years the down turn in the economy started to hit my company very hard. Once a company with 22 employees, by 2009 we were down sized to 7 people including the owner. Out of those 7 people, 2 of us were ITT graduates. I am now a (b)(6) and a (b)(6) and I use the skills I learned from ITT every day.

Thank you for the opportunity to tell my experience with ITT

Sincerely,

(b)(6)

5/2/2016

To Whom It May Concern

I am writing you to discuss my experience at ITT in Louisville. I am a student and am proud of the education I have received. Thanks to ITT I have been able to earn a (b)(6)

(b)(6) I am currently working as a (b)(6)

(b)(6) This is actually my first job in the field but I owe a great amount of gratitude to ITT for the knowledge and assistance through their Career Services department.

An example of why this opportunity is so beneficial to me is it is a great starting point in my early career. I owe a great amount of gratitude and appreciation to several of my instructors for their encouragement and recommendations in order for me to receive such a rewarding job. My career possibilities will only grow thanks to my education from ITT.

As a proud student of ITT Technical Institute I can only speak highly of the school. The staff are all very professional and extremely knowledgeable of the subjects they teach. All course materials are of high quality, thorough, and very informative. I constantly surprise myself with how much more knowledgeable I am of the (b) industry and I owe every bit of it to ITT. All other staff are equally as knowledgeable and professional. Without the assistance of Career Services I wouldn't be working in my field of study as I am today. ITT is an all-around fantastic school and I have never been more proud of myself for the decision I made to enroll.

Thank you for the opportunity to tell my story.

(b)(6)

Jennifer Wethington

(b)(6)

May 2, 2016

To Whom It May Concern:

I am writing to share my wonderful experiences at ITT Technical Institute in Louisville, Kentucky.

As a proud student of ITT Technical Institute, I am continuously impressed with the quality and integrity of the education I am receiving. I sincerely trust the unification and honesty that the administration, faculty and academic support teams provide to me on a regular basis; and I feel prepared to face the challenges before me as an articulate, interactive student.

I can still remember the first day I walked through the ITT Technical Institute campus and immediately felt a professional, caring environment. My representative Bill Gray gave me a tour of the school, answered my questions and showed genuine concern to my educational need. Tresa Smith, (b)(6)

(b)(6)

(b)(6)

I do so every day with constant encouragement from faculty and staff.

I am extremely fortunate to have Anne Sahingoz, (b) as both a (b)(6) (b)(6) instructor. Ms. Sahingoz's passionate commitment to student comprehension coupled with years of (b)(6) experience proves to be an excellent example of the quality and integrity that all instructors should attain at all levels of education. As a member of (b)(6) I have the opportunity to have to voice concerns directly to (b)(6) Chair, Deb Pizzuti, (b) and other (b)(6) faculty to foster change and resolution to issues from the student body and administration.

I possess the knowledge and skill to successfully demonstrate understanding obtained while attending ITT Technical Institute thanks to the committed administration, faculty and academic support teams. ITT Technical Institute is giving me tools toward a rewarding career.

Sincerely

(b)(6)

Jennifer Wethington

MAY 2, 2016

To whom it may concern,

Throughout my collegiate experience at ITT Tech, I have come to appreciate and love the educational opportunity that has been provided to me. From the moment I walked in to inquire about the (b)(6) program I was greeted with smiling faces, and this warm feeling inside that I may graduate one day and fulfill my destiny in helping others. ITT Tech has provided for me the academic resources through an assigned computer to which enhanced my ability to complete my work, and hands-on training within the lab time to learn valuable skills. All of the instructors that I have had the pleasure to know were highly qualified and very knowledgeable in their field and teaching coursework. Among the faculty that this facility has housed I can say with the utmost confidence that although within the classroom I had everything I needed, there has never been a door unopened when I have knocked. Emotional support and tutoring throughout my educational career has been immensely supportive and important to my success at school and has provided me the opportunity to balance my (b)(6) as well as family life. Having attended on-campus at a community college, an online degree program, to now this private school; this has by far been my favorite and best experience. The sheer quality and integrity of this school surpasses my expectations each and every day I walk into the college. I am proud to call (b)(6) at ITT Tech my second home, and would recommend anyone wanting to earn and pursue their degree to attend this school.

Thank you for your time in reviewing this letter as I cannot say enough good things about what ITT Tech Louisville campus has done to change my life even thus far.

Sincerely,

(b)(6)

Sarah Ledford

(b)(6)

MAY 2, 2016

To Whom It May Concern

I have attended ITT (b)(6) for (b)(6). I am a current student of the Louisville campus. Currently employed at (b)(6). While attending ITT I found that the staff is very supportive and encouraging. I was never turned down when faced with question and lack of understanding of the material. I had many one-on-one sessions to make sure that I am keeping up with schedule and assignments. All the instructors are very easy to approach and willing to help. Having a mentor was priceless since I could talk with someone about practically anything resulting in me making the right choices. The encouragement is not only academic but personal as well. When there are situations that come up, I was greeted with empathy and assistance.

It is refreshing that the bookstore is available to me and that I did not have to spend time seeking out learning materials and text books for each class. All lab materials are provided which was very helpful. The lab was also available to me for practice any day of the week. The lab reminds me of (b)(6) and it make me feel less intimidated when it was time for real world experience.

I have been pursuing my education for several years at several different colleges in Kentucky. I finally settled at ITT and was very pleased. I considered myself lucky since I really did not have any programs that was laid out specifically that gave me a visual of the entire course. ITT gave me direction and focus which was lacking in my educational pursuit. Now I am nearing my goal and can see the end of the program as well as the future I always dreamed about. Accomplishing this was not feasible until my enrollment at ITT (b)(6).

Warm regards,

Annette Wainwright (b)(6)

(b)(6)

5/1/16

To Whom This May Concern:

My name is James David Byron and I have been attending this school for (b)(6). I am a (b)(6) trying to make a living in today's society. ITT-TECH was able to give me the tools I needed to land a position with (b)(6) in Louisville. Within my time at ITT-TECH I have had the chance to gain the tools I need to survive as a (b)(6). Those tools gave me the ability to advance in my career pretty rapidly. I have had the ability to grow from (b)(6) if it wasn't for the teacher at ITT-Tech having real world experiences I don't think my achievements would have been possible. The staff that ITT-TECH carries is second to none. They make you feel like family and will push you to the limits to make you a better person. After (b)(6) this is what I needed. A school that wouldn't treat you as a name and number but would take you in as family and push you to strive to be the best that you can be in your occupational field. Teacher that just would teach a class and throw you aside. I am good friends with my teachers today outside of school and they continue to provide help when needed.

(b)(6)

5/4/16

To whom it may concern:

I am a graduate of ITT Technical Institute at the Orland Park, IL campus in (b)(6) I have a (b)(6) in (b)(6)

I am employed with the (b)(6)

The experience at ITT-Tech was very inviting. The staff was a big help in making me feel comfortable and at ease when I first started. I had a little trouble with the core classes at first but the staff always was available before and after class to help me with any problems. ITT-Tech always kept my moral up by giving awards for my academic progress and achievements. I was awed at the various social events and guest speakers they provided.

By continuing my education with ITT-Tech, I have made a difference in my life to have more of a stable future for me and my family without disrupting any present day goals.

Clae Donaldson

To Whom It May Concern:

My name is Corey Gowdy. I am currently a student, as well as, a (b)(6) ITT Technical Institute in Orland Park, IL.

I first came here to acquire my (b)(6) (b)(6) I have had the best support from instructors and students, alike. ITT Tech is my backbone. Once I fulfilled that mission, I worked as a (b)(6) for some years, then returned to ITT to obtain my (b)(6) Degree in (b)(6) Ever decision I make here, leads me to a new endeavor elsewhere in life.

Throughout my years of attending ITT Tech, I have had some of the best experiences EVER!!! I have met and been introduced to some of the most inspiring people our country has. I have worked for the (b)(6) and was flown around the USA for free. The money and benefits are absolutely amazing. I have traveled extensively and with no cost from my personal savings. A person has to love that...Right!!!

Pursuing an education at ITT Tech made a huge difference in my life. I know that had I not come here, I definitely would not have had the skills to get employed by such high profile companies. Attending ITT has opened so many doors for me. Also, the opportunities are endless and I intend to explore them to the fullest.

Sincerely,

(b)(6)

My name is Angel and I am a current student at ITT Technical Institute in Orland Park. I am an (b)(6) currently employed in my field, (b)(6) with a company called (b)(6) and have been for the past 1 years.

ITT found me this job early on and I was lucky enough to have gotten it and be working and studying at the same time. ITT has helped me prepare for the work environment that I wanted to be in. A fast paced work environment, where I'm always learning something new. Technology is always advancing and so is ITT, I am glad for my time and experience here on campus with instructors who have real world knowledge and experience. Now close to graduation I am filled with passion and ambition to continue moving forward in life, and all in thanks to my experiences here at ITT Technical Institute.

Sincerely,

Angel Amador Ortega

(b)(6)

To Whom It May Concern:

My name is Donald Dortch. I am currently enrolled in the (b)(6) degree program at the Orland Park, IL campus. I am currently employed at (b)(6) where I am a (b)(6)

I have had the pleasure of acquiring knowledge of many (b)(6) systems and components that have had an immediate impact on my current work experience and I feel will definitely impact my future career endeavors. I am one of the few students that had the honor of being taught the majority of the core required classes by Mr. Lauck, whose real world experience and gifted teaching abilities come together to create one the most exceptional learning experiences I've encountered in my educational journey.

I think ITT-Tech has made an immediate imprint on my life by providing me with a stronger, more secure knowledge base that will prepare me to take on any challenges or assignments that I will face as I continue to grow and be encompassed in my field of study.

To Whom It May Concern:

My current status is a (b)(6) student in the (b)(6) I have attended the Orland Park, IL campus since (b)(6)

My current employer of (b)(6) years is the (b)(6) I have worked my way through the ranks over the years to my current title of (b)(6)

With the promotion to my current position it became apparent that I have met my maximum potential without a degree. I started researching available schools with online or night classes and ITT Tech stood out to me. I made an appointment to speak with an admissions liaison and was very excited to see the flexibility, student to instructor ratio, proximity to home and many other advantages to enrolling at ITT. At first, I was concerned that I was going to have difficulties coping since it's been (b)(6) years since my high school graduation. I have met a few other students my age and have enjoyed the friendships created over the past months.

Since enrolling at ITT, my abilities to be a knowledgeable (b)(6) at my job has increased significantly. Recently, I have been assigned to (b)(6) for a few sizable (b)(6) projects within the village with positive results. I have also utilized my knowledge to work closely with (b)(6) hired by the village and I've been complimented on my abilities to comprehend and even begin to (b)(6) I enjoy utilizing my newly found knowledge in my workplace every day and my experiences at ITT have also helped me at home assisting my children with homework assignments that I have long since forgotten or not even learned in high school!

Sincerely,

(b)(6)

05/03/2016

When I first attended ITT technical institute, I wasn't sure what to expect in a (b)(6) program. It's been some time since I attended an institution and getting accustomed to its entirety. I knew that I came here for a reason, to graduate with my (b)(6) I made a lot of friends that were more like family to me. Any areas I lacked they helped support me and I did the same for them. We helped each other making sure no one was left behind. (b)(6) is difficult but not impossible. It takes diligence, perseverance and strive to push forward. (b)(6) made a huge impact in my life. I met potential lifelong friends, experiences I can bring to the (b)(6) and overall appreciation for the (b)(6) profession. ITT taught me that education isn't how much you have committed to memory, or even how much you know. It's being able to differentiate between what you do know and what you don't.

(b)(6)

Kelly Flamon

(b)(6)

May 4, 2016

To Whom It May Concern:

I am currently enrolled in the (b)(6) degree program for (b)(6) at the ITT-Tech location in Orland Park, Illinois. I find the program both challenging and rewarding. The teachers and staff have gone out of their way to offer assistance when more time is necessary to grasp the materials. The professionalism displayed by the teachers and faculty, is an example of that which is demanded of all the students.

Student achievements are met with joy and pride from instructors. When a course has been successfully completed, the confidence in my abilities grows exponentially. Because of my education at ITT-Tech I can hold my head up high as I enter an interview knowing I have a firm grasp over the necessary principles to procure the job.

Respectfully yours,

(b)(6)

Kelly Flamon

May 3, 2016

I am (b)(6) from ITT-Technical institute. I attended the Everett Washington campus, I am working full time in a job for a (b)(6) Washington.

My experience while at ITT-Tech was intense but in a good way as I tried to take in as much knowledge as possible, as well as the interaction with the staff, although at times I would ask myself what the purpose was of some of the course material was, but the question would always come forth later on in my more advanced class. The staff on campus was always willing to help find answers to questions and would always be up front about what would be coming are direction. The career services is always contacting me about possible job placements, the rest of the staff I had the opportunity to work with as I was a student worker on campus and was treated as if I was part of the work force.

The layout of the programs went in-depth and very detailed with long hours of to complete assignment's but well worth the time as to gain as much education in to my fields of study. If I had to do all over again with the same staff I would without question.

Thank you

Randy Hilliker

(b)(6)

May 2nd 2016

To whom it may concern

My name is Alan Craig and I (b)(6) ITT Technical Institute Everett, WA campus.

Currently I am employed for (b)(6)

(b)(6)

As (b)(6) of ITT Technical Institute, it has been an experience that has set my current educational foundation on a road for success. I learned about ITT Tech on a field trip during vocational school where students were given a chance to see different colleges in the area. I was amazed once I was able to see the campus for the first time, I knew I wanted to attend ITT Tech after learning about their curriculum. The recruitment process was informative and out of their main branches of study I choose to learn about networking in their (b)(6) program. ITT had classes on a very personal level, the teachers cared about their students and had more than enough time for each student in class, they were even willing to come in on their off time and assist students who needed one on one sessions if they were struggling. The campus has many labs each dedicated to specific category's ranging from computer labs, electronic labs, literature and many other relevant sources. ITT provided appropriate academic support and library resources to all of its students Monday through Saturday whenever they needed the equipment or extra time to study.

Overall the education I pursued at ITT is not one I will forget, it has made a positive difference in my life and has set me on a path for success, I have recommended many of my friends to ITT Technical Institute which a handful did attend and I continue to support their school of study as a graduate in the real world.

Alan Craig

(b)(6)

To Whom It May Concern,

My name is Christopher F. Brett and I am (b)(6) at the (b)(6)

ITT Campus. I am employed at (b)(6) which is

(b)(6) My job title

is (b)(6) for various projects we

have. I have had a very positive experience at this Campus. One of those positive experiences is when Dean Rocki Adrian-Hollier helped me rework my resume and that helped me get into the job I now have and Remy Conway a teacher here, helped me get ready for my interview and I got the job due to the help I got from those 2 individuals. Howard Johnson My

advisor is wonderful. I have honestly had (b)(6)

happen while I was here and he always was to talk to me and to help me out. All in all, it's a great Campus very helpful toward all the students they hold resume writing workshops and interview prep workshops which are instrumental for all the students here. Honestly they come here wondering about their future and leave here with their future in hand and in the job they were hoping to get. The Programs here are taught by amazing people, they are more than teachers, they are people who are actually working in the fields we are going to school to get our degree and find jobs in. There are many other positive experiences I have had here such as when I

helped a friend struggling to pass a class and on the verge of quitting. I helped him pass the class and talked him out of quitting school. All the teachers I have had are extremely knowledgeable which, in my opinion, is extremely positive. They are almost always willing to come in on a day off and help you if you are struggling. I'll admit I have had to once or twice but, honestly who hasn't. There is one teacher who still stands out in my mind. Tanya Fuller is very smart and knowledgeable and is always helping someone out during class or when there isn't class. The Programs and teachers at ITT hold a lot of relevance to the real world and the jobs, people, and equipment you will encounter when you finish school. Having teachers with experience in what they are teaching is extremely beneficial and relevant to the students who take these classes. They get a lot of insight into the job field they are going to school for.

(b)(6)

04/29/2016

To Whom It May Concern,

This is a letter informing those concerned about my experience as a student at ITT Technical College in Everett, WA.

As my (b)(6) realized in order to continue supporting my family a career change was in my best interest. I was still currently employed and (b)(6) fulfilling my goals in what I wanted to accomplish at the time. It was a difficult step to take but I made some inquiries with ITT Technical College.

Howard Johnson contacted me from ITT and helped me transition through this trying time in my life. It took a number of phone calls and persistence from Howard but eventually I was able to wrap my mind around the concept of using my intellect more so than I was using my body and the skills I learned in my trade.

The first quarter was a struggle transitioning but through Howard's encouragement in combination with much hard work on my part allowed me to succeed and (b)(6). The curriculum has helped me on a personal level and I was also able to share techniques with (b)(6) for their benefit as well. It was exhilarating getting back to school and learning about technologies that I am passionate about.

The faculty here at ITT in Everett have been so helpful and have allowed me to immerse myself even more so in my studies and endeavors through constant positive reinforcement. Applying for ITT and remaining steadfast has changed my life for the positive.

I am satisfied with my decision to attend ITT, and because of my positive experience (b)(6) is considering enrolling as well.

Sincerely, /

(b)(6)

David A. Colclasure

To whom it may concern,

I am (b)(6) the ITT campus in Everett WA. I received my (b)(6)
(b)(6)

During my time attending ITT I not only increased my erudition in (b)(6) but I also learned a great deal about teamwork, personal assessment and commitment. It's not easy working full time and then some while attending a full time curriculum and I will always be grateful for the instructors that sacrificed all those evenings to help me achieve my goals.

I believe in the quality of the material taught at ITT. I don't think any other similar institution could provide the same level of content in the represented fields nor do I think the Integrity of the instructors could be any higher. They truly want the students to succeed and those students that do not have simply not availed themselves of all the help and resources that are available.

The recruitment team and career services helped me find my current position at (b)(6)
(b)(6) that allows me many opportunities for advancement in my field as well as other fields that I had not even considered. The instruction and training I received at ITT allows me to understand (b)(6) in practical, real world applications and after graduating it was really up to me to decide which direction my career would go.

Sincerely,

(b)(6)
(b)(6)

Calvin Gant

Jason Mitchell

(b)(6)

5/3/2016

To whom it may concern,

I am writing you this letter to thank you for the opportunity to attend college at your ITT Technical Institute location in Little Rock, AR. (b)(6) (b)(6) (b)(6) due to my now previous job, my wife and I decided it was time to make a change.

I found the Institute's contact information online and made the call. I received a call from Michael Harris, a student representative, promptly. He was very knowledgeable in the variety of programs that were offered. I came to ITT Tech for a specific reason however, I wanted to work in the (b)(6) The (b)(6) (b)(6) program looked challenging and could teach me the skills I would need. The skills that I am learning while going thru this program are opening my life up to new possibilities every day.

I really enjoy the environment of the school. They have picture frames up to show everyone who has perfect attendance. There is even a dinner for those who achieve perfect attendance at the end of each quarter. There is a plaque by the reception area that recognizes a Student of the Quarter, Instructor of the Quarter, as well as, Employee of the Quarter. There is an Awards Ceremony, where Mrs. Biddle recognizes the students who have worked hard to be where they are. Probably everyone's favorite, though, is Student Appreciation Week. YUM! They even have their hallway lights patterned with the school colors. How cool is that!?

The student representatives are very friendly, and seem genuinely concerned about you as a person, not a statistic. The instructors here are very knowledgeable about the courses they are teaching. The class size for each course is ideal. The smaller class size allows for a more personal and inclusive environment for learning, in my opinion. Several students that I began this life changing course with have now become friends.

The most important and positive thing I can say about attending this school, is that if you have a suggestion or an issue, there is someone there who will listen to what you have to say and it will be addressed. You are not set aside as if you are not important or your ideas and issues do not matter.

As intimidating as it was to make the decision to go to college over the age (b)(6) I am grateful I have, and I am thankful I chose ITT Technical Institute.

Best Regards,

Jason Mitchell

(b)(6)

Eric Thornberry (b)(6)
ITT Technical Institute
Little Rock, AR
May 2, 2016

Dear To whom it may concern:

I would just like to take a few moments to speak on the positive interactions I have experienced here at ITT Technical Institute. I began working at (b)(6) industry. After (b)(6) years I had a desire to return to school and my choice of school was ITT. From the first time I walked in I was welcomed here the staff went out of their way to (b)(6) so I could tour the campus, and was introduce to the Director as well as other staff members so that in and of itself was one of the deciding factors for me. Upon attending my first day I felt a little overwhelmed and unsure of my ability to return to school after all of this time however, I just kept on working and learning. Since then I have earned an (b)(6) (b)(6) and have enrolled in the (b)(6) program in the same field. I am currently pursuing a career in the (b)(6) field and am getting close to securing a position with a (b)(6), all of which I could have never achieved without this school. In closing I would like to say a word of thanks to all who have made my present and future education possible.

Sincerely,

(b)(6)

Eric Thornberry (b)(6)
Student (b)(6)

Chad Howard

(b)(6)

(b)(6)

May 2, 2016

To whom it may concern:

My name is Chad Howard and I am (b)(6) student at the ITT-Tech Little Rock, AR campus. I am writing to you today with the intent to show how much this ITT campus has encouraged and prepared me for my future in the (b)(6) field.

I came to ITT-Tech because of a commercial, thinking "well I will go see what they say". To my surprise it was not even close to what I was thinking at all. Everyone was cheerful and knowledgeable. They gave me a tour of a professional campus and enlightened me about how beneficial a Tech school really is. I went forward with ITT-Tech and the success they told me I would have did not stop.

There are many things about this school that has contributed to my success. My representative, teachers, and students. I consider this place as a second home. It is so family oriented that you cannot fail. There is always someone pushing you to do better, and helping you understand so you do not fall behind. In the labs our teachers go above and beyond to give you the most of what it will be like when you get in the field. If you are having a bad day it will stop at the door, because there is so much energy and positivity inside these doors that you cannot have a bad day while you are here.

I must also talk about Mrs. Biddle. She is the one that makes all of this happen on a daily basis. I have been taught, been inspired, and been helped by Mrs. Biddle time and time again. Her door is always open and you will always see her smiling in the hallways trying to help everywhere she can. We call her the lady with many hats. I even thought she was the head director of ITT-Tech until (b)(6) She is the rock that this campus is built on in my opinion.

So thank you to everyone that has changed my life for the better. You do not know how much this school means to me and how indebted to I will always be to you. As I sit here today there is no other choice that I could have made that day but ITT-Tech and I thank you for all that you do.

Thank you again,

Sincerely,

(b)(6)

To Whom It May Concern

I (Alicia Freeman) am a (b)(6) tudent here at ITT-Tech here in Littlerock Arkansas. Before I started ITT-Tech, I was a (b)(6) Since I started at ITT-Tech I am (b)(6) and my bosses now see me as motivated in my career. My teachers here at ITT-Tech help me when I need it and will even stay over just to help me understand what we were going over in class. When they help me, it actually feels like they care.

The representatives, director (b)(6) librarian, and even secretary at the front desk are always eager to help me with anything I need. They are the nicest people. I am so glad I go to school here. The classes here are not so huge that the teachers don't even know my name. Teachers will pass in the hallway and say "Hey Alicia, how are you doing today?" . What other school can you go to and get treated like this? NOWHERE!!!!

I Alicia Freeman Love It Here At ITT-Tech!

03/03/16

(b)(6)
(b)(6)

To whom it may concern,

I Damien Harding attended ITT Technical Institute (b)(6) I still to this day feel this was one the best decisions I have ever made regarding my future. The staff was very dedicated to helping me reach my potential. My advisor was Donnell Edwards, and this man tried to work miracles to get me the best schedule he could and help make sure it didn't interfere with my personal life to the best of his abilities. I truly enjoyed the hands on experiences that we participated in, I honestly wish there were more availability for hands on training. When I started one of my first classes was (b)(6) I was able to take everything that I learned in that class and found a job within two weeks of completing that course. The job was working for (b)(6) this started my love for the career path I had chosen. I then moved on to work for the (b)(6) (b)(6) ITT gave me the knowledge and confidence to explore other job opportunities. Upon graduating ITT, I received an opportunity to become the (b)(6) here in Arkansas which I still maintain today. I have also had offers to move to other states to work. The teachers really showed plenty of knowledge about their fields of study. The facility was well maintained and a great environment for learning.

X

(b)(6)

2 May 2016

ITT Technical Institute
2051 Solar Drive, Suite 150
Oxnard, CA 92036

To Whom It May Concern;

Am grateful for my experiences here and there is much to share in regards to my time here at ITT. The people in general are all easy to work with and helpful. Starting with recruiting where you meet Donalee who will help sort the stressful fluff that you really don't need to be concerned with from what you need to concentrate on, in a humorous, friendly manner. Being kind and considerate there is Anna and Alisha assisting with what classes you need and assisting you with (b)(6), they help keep it all up to date. The Dean, Brian Mitchell; brings a light to the end of the tunnel while assisting with problems large and small; also, introducing you or directing you to where you will receive the best assistance.

There are many instructors, knowledgeable, helpful, and take the extra step to assist with the learning process. With the (b)(6) department, Mr. Alex Duenez and Curtis Beall go above and beyond to make sure everyone coming through the program has the knowledge to be successful as a student strives forward. Mr. Duenez with (b)(6) took me much deeper into these programs than my (b)(6) years of experience had. Mr. Beall, who teaches (b)(6) and introduces (b)(6) challenges, these two teachers combined assisted me with my growth and the depth of knowledge that expanded my abilities to obtain the position I hold today.

General education with the classes that are the most difficult challenge; Mr. Gregory Wilson along with Mrs. Gezelle Segundera made math and physics understandable and attainable. Mrs. LaDeania Cox is amazing with Accounting and Bookkeeping. Not to mention the teachers Mr. Ronald Hickling and Mr. David Mandell who took their time and came on campus and assisted this overstressed, upset student (at a point of tears); calmed me down and tutored me with amazing humor and talent. Neither of these gentlemen were my teacher; however, they started at the level I was at and helped me to get to the level where I needed to be.

Now moving forward (b)(6) and looking back, there are so many people that work hard for the students in this school with amazing grace; to name a few there are Dr. Silvia Neves, Mrs. Evelyn Williams, Mr. Joseph Shofner, Mr. Evan Ward, Mr. Al Kassir; along with several teachers who have retired or moved on, Mrs. Josephina Boner and Krystela Taylor to name a few.

Mr. Charles Merritt, Chair of the School of Business is an amazing teacher, tutor and another light within the walls of ITT. Our Director, Mrs. Kelly Lishman is an asset that leads and assists staff and student; guiding, teaching and building each doing her best to assist each person to grow and become the best we can be.

Outside enrollment, (b)(6) the class schedule there is much offered with training days / workshops in the tools to assist us on our path in Microsoft Office (Excel, power point, word, project, etc.); clubs to assist in stretching and building what we have learned, the IT Club and The National Society of Leadership and Success; along with welding shops to name a few. One of the experiences with a club involved the combination of (b)(6) students, IT, Electronics, and the software developers – we designed and drafted a “Smart House”. This platform gave students the experience of working together and learning more about other fields to get a big picture of what a true project would need to take into consideration; as well as, building stronger bonds between students to take into their network for the future.

The (b)(6) assists me in setting goals for today that guide me toward the future. Building leadership skills, further building a professional network and assisting to make the community we live in a better place. The teams of people building this club, assist each other, the school and the community; reaching for not only a better experience here at school but an international better world for tomorrow.

ITT Technical Institute has assisted me in learning, growing and accomplishing the vision of being able to continue to grow and become much more than I had originally dreamed.

Sincerely,

(b)(6)

To whom it may concern,

My name is Matt Cochran and I'm (b)(6) from ITT Technical Institute Oxnard. I received my (b)(6) at the beginning of (b)(6). I chose to attend ITT simply because of the (b)(6) program that was offered. I've always had a fascination with (b)(6) that started in high school. ITT was and is one of the few institutes around that offers a program focused on (b)(6). ITT appealed to me due to the small class sizes and the hands on atmosphere. I would do it all over again in a heartbeat if I had the chance.

The curriculum was great I was given the basics to really get started. Not only were things explained in a manner that was understandable, but we had access to the software from day one of classes and we had enough time with it over the quarter. The instructors were wonderful, they took the time to make sure that we as students had a grasp of the concept before moving on. What allowed them to take the time to really work with us was the small class size. I learned a lot from each one of the instructors that I encountered in my time at ITT. They were willing to go above and beyond for each and every student that they had. They made the classes enjoyable, even the classes that I didn't really care for. I wouldn't have made it through the program without their help.

The entire staff at ITT was wonderful to work with everyone from the recruiters to financial aid to the dean. The recruiters are all very nice and were interested in helping me to better myself. They didn't try to talk me into something that I wasn't ready for. Along with that they helped to answer any questions that I had along the way. They were there to help even after I was enrolled in classes, checking in on me to see how I was doing. (b)(6)

(b)(6) They took the time to explain things to me in "plain English" and walked me through each and every step of the paperwork that was required. (b)(6)

(b)(6) The dean and campus director went above and beyond to make sure that we as students knew that we could approach them with any problems that we might be having. They told us from day one to not be afraid to come to them with any issues that we might be having. I've never encountered a staff like this in all the years that I've been in school. They helped me to succeed like never before. Career services was there to help me track down a job from day one. They helped me put together and refine my resume and send it out to potential employers. With their help I was able to land not only a job but to start a career in my field of study. They made things so much easier for me and I can't thank them or anyone else on the staff enough for all they've done for me.

The academic support was excellent, the instructors made themselves available to us through office hours. Even when it wasn't office hours they helped students all we had to do was ask. If we started to fall behind in classes the instructors were there to help and ask what

was going on. If it wasn't for the academic support that I received I wouldn't have done so well. The tutoring that was offered was a huge help to me. That made all the difference in a difficult class. I felt like I wasn't going through this program all on my own, that I had a support network there for me if I needed it. I couldn't have gotten to where I am without them.

ITT has had a huge positive impact on my life. I wasn't the greatest student in high school or even when I started college. With the help of the entire staff I went from (b)(6) (b)(6) To say that ITT has changed my life is a bit of an understatement. They showed me that with support and the right instructors and program that I can do great things. I currently work for (b)(6) (b)(6) I wouldn't be working where I am if it wasn't for the career services department. They were there for me from day one working to help me land a job and start a career. I didn't take advantage of the services that they offered until I was half-way through my program. Looking back it wasn't the greatest decision to put it off the way that I did, but once I put myself in their hands and really worked with them I landed one of the best jobs that I could have hoped for. Its more than just a job though, it's the start to a great career and in couldn't be happier with where I'm at.

Attending ITT was one of the best decisions that I have ever made. I would encourage any person that is looking to make a significant life change to look in to attending ITT Technical Institute. If you put in the work, show up to class and give it your all its amazing what you can achieve. I'd like to say thank you to Brian and the rest of the staff at ITT Oxnard, you have changed my life for the better and I can't thank you guys enough.

Sincerely,

(b)(6)

Matt Cochran

Dear ITT Technical Institute,

My experience at this school has been wonderful, and completely life changing for me. The curriculum was good, I learned quite a bit from it and it gave me a nice foundation to build on with added real-world experience. The instructors at this school are incredible, every single instructor I have had has made an impact on my life and it is amazing how they want to be there, and don't make me feel like they are forced to be there. The instructor that has had the biggest impact on my life has been Mr. Daigre; he has pushed me to be more than I thought I could be. He encouraged me to keep pushing through and strive for bigger and better things, rather than simply settling for where I am. I obtained my current position (b)(6) he and Brian had offered to me, and this has been a huge life changer for me. There are no words for me to express how thankful I am that these two provided me with that opportunity which then turned into a career. I have learned more than I could have through books, and it has provided me with a career that I love. I am able to wake up every morning and want to go to work, and I enjoy every day. There is always something new, not a single day is identical to any other, there are new challenges every day, and I absolutely adore the team of people I work with, they are incredible; those are just a few things I adore about my job. Every department here is very friendly and helpful; they all have very different but amazing personalities! When I have to work with them, it is always a pleasure due to how knowledgeable and easy to work with they are. Career Services is also great, although I did not obtain my position through a lead they sent me, they send several great opportunities when you ask them to and this is great for somebody who would like to be employed in their field, because they will find it without a doubt. Choosing to attend this school has been one of the best decisions I have made, if I did not I would still be going to a job I hated and stuck because I didn't have a degree or any education beyond high school. I would not be living independently, have the confidence I have now, or wake up every morning incredibly happy I get to do something I love doing every day. I had no idea I would end up where I am today at the age of twenty years old, and without the amazing people in my life, and the people at this school, I would not have made it to where I am today. I would not trade my experience at this school for anything else, it has been so good to me and I am thankful for every single opportunity that has been granted to me. I am excited to continue pursuing my education and see where the journey takes me.

Sincerely,

Beranda Brusoe

(b)(6)

5/3/16

To Whom It May Concern;

I began attending ITT Technical Institute in Oxnard in (b)(6) I came after attending (b)(6) My reasoning for joining ITT is because of the convenient location, and that the class schedule is made with the student in mind. By that I mean that I wasn't given a long list of classes I needed to complete and sign up myself. If a class conflicted with my personal schedule, alternatives were given to me so that I remained within my timeline.

Once I began attending classes, the small sized classes and knowledge of the instructors helped me not only follow and learn, but gave me the ability to understand more on my own. This was a new quality for me as I was used to larger classes with hands off instructors. Within a couple of quarters, I began (b)(6) (b)(6) By being able to work in the daytime, I was able to meet with the Career Services Director while there weren't many students. At the time, he helped me apply for jobs that I otherwise would not have done on my own. (b)(6) I started working at my current job, a job I had applied for with the help of Career Services.

After (b)(6) years, at ITT that is, I am approaching the end of my school career. I have been able to obtain a (b)(6) GPA, become the (b)(6) and soon get my (b)(6) While I owe these achievements to the school, I also owe it to my wife and children for understanding my absence as I achieve my goal.

Thank you,

(b)(6)

Maggie Rabizadeh

To whom it may concern:

My name is Craig Swan and I attended ITT Technical Institute earning my (b)(6)

(b)(6)

I was very impressed by the school quality

of curriculum and instruction they had to offer for my particular degree program. ITT appears to be well equipped in meeting the future challenges and continued growth to meet the needs of the new and upcoming students. I also had a chance to observe the Administrative and Teaching Staff who were always eager to participate and interact with the students.

There were times teachers would stay late and provided their knowledge about difficult concepts in a text to ensure that the student wouldn't fall behind in his class. I enjoyed the camaraderie that I had with the other students in my class and outside of class because we all were going to the same struggle. I highly recommend and endorsed ITT Technical Institute for the school to attend.

(b)(6)

May 2, 2016

To Whom it May Concern:

I have been a student at the (b)(6) at ITT Technical Institute in Bessemer, Alabama since (b)(6). My experience in the (b)(6) program at ITT has been very positive. Many of the instructors have been helpful and have gone above and beyond to ensure that the students understand the subject matter. In particular representatives in the (b)(6) Department, office of the Registrar and Career Services have all been very helpful as I have navigated through the enrollment process at ITT. I have thoroughly enjoyed my experience as a student here and am excited about the positive impact that the education I have received will have on my career as an (b)(6) after graduation. The staff and members of career services are particularly helpful in offering guidance about navigating the work force, and locating potential career opportunities after graduation.

Sincerely,

(b)(6)

I am Jeremy Moore (b)(6) of ITT Technical Institute. I began my journey at ITT in (b)(6) in the (b)(6) program. I have always been interested in being creative. I can recall before entering ITT I was sparked by an advertisement I saw on the Internet. I clicked on the advertisement and began to read. After reading the ad, I wanted to learn more so I requested additional information. Shortly after my submission, I received a call from an advisor. The advisor was very helpful in answering my questions and was instrumental in assisting me in my desire to further my education.

While attending ITT all of my instructors were very knowledgeable and provided me with hands-on experience. I learned over all how to carry myself in a professional manner at all times which proved to be helpful in a professional environment. I often found myself communicating with the Career Services team, evaluating and updating my resume, and practicing in interviews. Career Services help me tremendously by keeping me abreast of new opportunities as they became available.

(b)(6) my program, I landed a position in my field of study as an (b)(6) I took a year (b)(6) to learn as much as I could in my role. I have returned for a (b)(6) degree in (b)(6) plan to use this degree as a way to further advance my career. ITT Technical Institute was a perfect choice for me and to others, I hope it is as well.

Thanks,

(b)(6)

May 2, 2016

To Whom It May Concern:

I have had a positive learning experience here at ITT Tech Bessemer Campus. The instructors have taught me so. Their caring and eagerness to teach has been so rewarding. It's been time when I thought that I wasn't going to make it, and was always giving encouraging advice. The other departments including (b)(6) have been helpful also. I know I should have driven the computer tech crazy with so many "help" questions, but he never showed it. The front desk is always pleasant even at 7 in the morning as if God put her there. And last, I won't ever forget the guy that got me started here because from the first day I met him to get information about the school, he has been a blessing.

(b)(6)

May 2, 2016

To Whom It May Concern:

My experience at ITT Technical Institute's (b)(6) has been very good. I was first in the (b)(6) program and couldn't get the concept of (b)(6) concepts. I almost didn't want to be a (b)(5) anymore. Since I've been enrolled at ITT Tech my (b)(6) and (b)(6) level has increased and I am able to understand concepts and put them together to figure out the abnormalities. I also understand the Fundamentals of (b)(6). The (b)(6) process has consistently been drilled in our heads and it helps us become competent (b)(6). The teachers are knowledgeable and very willing to help. The integrity of the (b)(6) school is excellence. Everyone is treated with integrity and fairness. I would recommend (b)(6) (b)(6) to any person whom is interested in the (b)(6) field.

Sincerely,

(b)(6)

May 2, 2016

To whom it may concern:

I have been attending the (b)(6) program at ITT tech in Bessemer, Al since (b)(6). During my time here I have had many positive experiences and I feel as though this school will benefit me with future career as a (b)(6).

One of the things that I enjoyed about this school is that I feel as though my education is more personalized due to the smaller class sizes and each of my instructors give out their personal numbers and e-mail addresses at the beginning of each quarter in in case I don't understand an assignment or need further explanation about a topic discussed in class. Each of my instructors has always made it a point to contact me back as soon as possible to make sure that I am well informed. Another positive part of the school being smaller is that the instructors all remember my name and care about if I am in class or not, I don't feel like just a number to them.

The services that they offer here are great as well. The ladies in the learning resource center are very helpful and help with signing you up for free tutoring if needed. One thing I tend to forget about a lot (b)(6).

(b)(6) They are always sure to remind everyone ahead of time when it is about due and assist me every step of the way through the forms. The (b)(6) instructors build us up by encouraging us to become the best (b)(6) we can be by doing town hall meeting with the (b)(6) students and offering advice about not only how to pass the (b)(6) but how it's going to be when we get out on our own.

Sincerely,

(b)(6)

May 2, 2016

To whom it may concern:

My experience at ITT Tech has been very positive. I am in (b)(6)
(b)(6) Having gone to another (b)(6) school previously, and not being successful, I know a little about how other programs operate. My experience here at (b)(6) Bessemer has allowed me to feel positive about learning. I feel like they want us to be successful and want us here.

(b)(6) program is set up so that we can learn all of the necessary things we will need to become (b)(6). We are able to practice the skills and techniques needed for (b)(6) safety and then apply them in a (b)(6) setting.

We have different resources we can utilize here so that we can get a job in the (b)(6) field, such as, career services. If we need to build a better resume, they are here to help us do so, and if there are job openings, they can refer us to them.

My overall experience here has been very positive, and I would recommend (b)(6) to anyone interested in the (b)(6) field.

Sincerely,

(b)(6)
(b)(6)

May 2, 2016

To Whom It May Concern:

I have been a student here at ITT-Tech Bessemer Campus since (b)(6) I have enjoyed my experience here as a student. I am currently in my (b)(6) I have appreciated all the help I have received from the first visit here on campus with Mr. Litvine, (b)(6) (b)(6) to my clinical instructors. I'm most appreciative that we have Ms. Canty as our (b)(6) chair. Her kind words of encouragement always seem to brighten not only my day but the day of my classmates. I look forward to the rest of my time here at ITT-Tech Bessemer campus with great anticipation.

Sincerely,

(b)(6)

My experience here at ITT-TECH has been a pleasant and enriching adventure. I have recently started back to college to advance my education and start a new career. I wanted to learn more about computers other than just playing games on them. I did some research and found that you had the field I was looking for. I am currently enrolled in the (b)(6) program here in Bessemer. The instructors here are keyed in on teaching me the courses and making sure that I understand what I am being taught. I am a little slow in understanding some things like algebra but the teacher is helpful and spends extra time with me and tutors are readily available. Every instructor that I have had really cares in my success in the courses that I am taking.

The classroom environment is a change of pace for me. I am (b) years of age and thought I would have a rough time adapting back to school with my work schedule. I have been pleasantly surprised at the ease of which the transition has been. The staff and instructors are geared for my success. My family has noticed a change in my attitude since I have started back to school here. I am not as stressed because I know I can change careers and provide better for my family. ITT-TECH has helped me advance toward my future goals and my families' financial security for the future.

Because of my experience here I have recommended to my friends that they return to school and further their education as well. I have learned different approaches to tasks that I have had and more efficient ways to deal with them. I have been given new and different ways to think since I have started my courses. I have been shown ways to improve my overall life by making better decisions and making plans and sticking to them.

I just wanted to take a few minutes out of my schedule to say Thank You ITT-TECH for being there for my future. I have had a good experience here and look forward to continuing this wonderful relationship with all of the good folks here in Bessemer, Al.

Sincerely,

(b)(6)

My ITT Tech Experience

Before I started to attend ITT Tech I really didn't have much direction, I had a vague idea of having a job where I worked with my hands but nothing beyond that. I came here with the intent of getting a degree and a job that made decent money and benefits and I left with a degree and a job I truly enjoy. Student Resources helped me find an area of study that compelled me to enjoy what I was doing and follow through on my degree

(b)(6) While I was going to school, administration and teachers worked with me for me to excel in my school work and to find gainful employment in my field of study. I made exceptional grades and followed through on every job opportunity the school gave me and now I am (b)(6) and I have a job with the (b)(6) in the U.S. I had the drive to better myself and ITT tech provided me with the knowledge and opportunity to better myself. Because of my degree of study I have the opportunity to advance to whatever position I want within my company, the only thing limiting me is drive and determination.

(b)(6)

May 3, 2016

To Whom It May Concern,

I am writing to you to discuss my personal experience while attending ITT Technical Institute in Bessemer, Alabama.

While being a student and (b)(6) of ITT Technical Institute, since day one I have been proud of the quality of the education that I have acquired here. I have had the opportunity to meet a lot of incredible people that have helped me grow as a student and (b)(6) The school holds their standards high for the teachers and faculty. The ones that I had the pleasure to meet and get to know exceeded those standards beyond measure. Now as I am close to graduation I feel prepared to take on the challenge of being a skilled (b)(6)

My time at ITT Technical Institute has been filled with many great memories like having the opportunity to be a (b)(6) This experience gave me insight to the operations of the school and allowed me to get to know the faculty and administration on a more personal level and it shaped me into the hard working student I am today. As a student I was challenged to open my horizons and take risks. I worked on hard quarter long projects using the (b)(6) software which helped me learn it to the full extent that I know now. My teachers pushed me to work hard and do my absolute best on every assignment no matter the intensity.

I am a proud student that (b)(6) and I have worked very hard for this day to come. The knowledge and skills that I have learned will help demonstrate the integrity and quality of the staff, faculty and academic programs. This experience is something I will never forget and I plan to work just as hard and build similar relationships while obtaining my

(b)(6)

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Sydney McLaren

(b)(6)

5/3/16

To Whom It May Concern:

My experience at the ITT Technical Institute in Bessemer, AL was a positive one. While here for the (b)(6), the administration was very supportive and provided a high quality education. I was able to obtain a job in field as a (b)(6) where I have been for the past (b)(6) years. My (b)(6) allowed me to promote at a fast pace until became a maintenance technician. I decided I wanted to position myself to obtain the role of (b)(6) (b)(6) and I also had a desire to teach; with this in mind, I decided to return for the (b)(6) program.

The (b)(6) program was challenging in the beginning but once again I greeted with the support of the administration. With their help, I was able to get back into the routine of working full-time and also going to school full-time. The instructors wouldn't allow me to slack with my attendance nor my academics. To be honest it felt great having the one-on-one relationship with my instructors, and I wasn't just another body in the class. Mid-way through the program, my program chair assisted me with positioning myself for the (b)(6) which is the position I hold at this time.

As a graduate, I feel that the dedication and commitment that was shown by the administration for both programs, not to mention the hands on experience that I received, has better suited me for future success.

(b)(6)

(b)(6)

5/8/16

To whom it may concern,

I (b)(6) at the ITT Technical Institute (Bessemer) campus. I am currently in the (b)(6) Program for (b)(6). There are a few things that I would like to share with you about the program offered here.

The program has given me a career change for the better. Upon entering the program, I knew very little about (b)(6). The instructors are knowledgeable in their field. Also, they provoke students to want to learn the materials given. During the course of my tenure here, my current supervisors are impressed by the level of my comprehension with power (b)(6). I must give all credit to my instructors as they afford a level of understanding that is easy to absorb and use independently. I feel that the level of education obtained from here (especially the (b)(6) program) provides me with an advantage in my career choice. My experience at the Bessemer campus has been great thus far and extremely beneficial.

Thank You,

(b)(6)

Shundrika Clark

May 3, 2016

To whom it may concern,

I am (b)(6) at the ITT Technical Institute Bessemer campus. Please allow me a moment to express my gratitude to the (b)(6) program of ITT Technical Institute. I'm thankful for the program due to the hands on experience that I have currently gained, the atmosphere is great and the instructors meet the same standard.

While at this campus I have encountered great people and I have built an amazing networking system with my fellow aspiring (b)(6). The dedication is incomparable within this program and the ceiling seems nonexistent as we continue to grow with each other as well as our teachers. Our teachers exude excellent workmanship and a continuous thirst to pour within vessels that require knowledge such as myself. I've gained in field experience and executed my job in an astonishing fashion based on my education gained from the campus. For this program I am truly grateful and I am excited to continue to grow.

(b)(6)

DaMarcus D. Washington

5/3/16

To whom it may concern

I really enjoyed this program; (b)(6) at ITT TECH in Bessemer. One thing I like about this program is the friendship it brings; the comradery it brings. We communicate with each other when we have an issue about a certain thing or a problem we cannot figure out how to solve. Another thing I like about this program is the ability to speech to your teachers on a personal level, in a bigger class room setting you wouldn't be able to get that much one on one help with your teacher and your peers. The thing that stood out the most was when I was in my (b)(6) we did a lot of hands on activity like creating circuits and fixing things, now that I'm in (b)(6) is a lot less of hands on in that sense but we did have to make plans about how things would work and how they should work.

I do recommend this program to other people, the teachers here work with you a lot and you can actually have a full time job and still learn! It doesn't stop your life up, but allows you to move up higher and higher in life.

(b)(6)

Jam'Mel Giddens

5-3-2016

To whom it may concern,

I am (b)(6)

(b)(6) at the Bessemer campus, and I would like to discuss the positive impacts it has had on my life.

After completing my (b)(6) I was able to get a job working (b)(6) (b)(6) which uses my (b)(6) skills I have learned, and I continued my education (b)(6) (b) I love the fact the classes are hands on and that the instructors actually work in the field that they teach. I also like the fact that the classes are only eleven weeks and that allows for us to get a degree faster than a normal college. After I graduate with my (b)(6) degree I hope to one day work for (b)(6)

Sincerely,

(b)(6)

Carl E Petty III

5/3/16

To whom it may concern,

The program I am taking at ITT-Technical Institute is (b)(6)

(b)(6) there are a few aspects of going to this school and participating in this program that have been very helpful to me and make it easier on me to learn the material of this program.

This program has been very helpful to me, being able to be in a classroom with only a few students and being able to get the one on one attention from the instructor is in my opinion the best way to learn. Most of the instructors that I have had, have in-field jobs and the knowledge that they have helps make it easier to have a better understanding of the material that is being taught.

Sincerely,

(b)(6)
(b)(6)

May 3, 2016

To Whom It May Concern,

I have been a student at ITT Technical Institute in Strongsville (b)(6) I entered with a goal of graduating with my (b)(6) I will be presenting my Capstone Project, and on (b)(6) will be fulfilling my dream of being a college graduate.

Throughout my time at ITT I have had the privilege of having Instructors that are knowledgeable and bring enthusiasm to the classroom. Outside of the classroom the staff have made them available to always answer my questions, or just to catch up on how my education is going. One area of the staff that have helped me so intensely is the Career Services. With their help with writing and editing my resume, I was able to gain employment at (b)(6) At (b)(6) I am using what I have learned and putting that knowledge to practical use.

Due to my experience at ITT Technical Institute Strongsville, I am very excited to return in (b)(6)
(b)(6)

Sincerely,

(b)(6)

Amanda L. Martin

Dear ITT Tech Strongsville,

Going to ITT Tech was a life choice that has lead me down a path to my career. I started ITT after having a really crappy job at a warehouse, working minimum wage and at 40 hours a week. When I left the warehouse I promised myself that I would never again work a job that I hate. Having an interest in computers, I found that education from ITT tech would be a great option.

Signing up for ITT Tech was one of the best decisions that I have ever done. I get to work with like-minded people, learning about computers. The work was fast and non-stop, but I was able to absorb all the information, and within 7 quarters, I had an (b)(6) Since having my (b)(6) I have had more calls for jobs then I have had in the past. I have had 4 interviews in one week, more than what I had before going to school thanks to the Career Services Department.

I accepted a (b)(6) Ohio after having a job at (b)(6) Ohio as an

(b)(6)

I started school to learn about what I love. From the passion of what I'm interested in, I have grown to love my job and my career. ITT Tech has prepared me for my career by helping me develop the skills and knowledge necessary to prosper in the world of (b)(6)

Sincerely,

(b)(6)

Dear ITT Technical Institute, Strongsville:

My name is Donald E. Plumley. I decide to go to ITT Technical Institute in (b)(6) because I (b)(6) and had to change career or (b)(6) (b)(6)

My decision to come to ITT has impacted my life in so many ways for the best. It has allow me to advance my education in the greatest ways. It has also allowed me to proceed with a career that I can go in many different ways. I'm

(b)(6) (b)(6) (b)(6)
(b)(6)

I'm currently working at (b)(6) My title is (b)(6) (b)(6)

My choice of come to ITT was the best decision of my life. I would recommend anyone who want to advance their education in (b)(6) at ITT to do so. They will really gain a lot of experience to enter in this field.

Donald E. Plumley
(b)(6)

ITT-Technical Institute, Strongsville:

I have been a student at ITT-Technical Institute in Strongsville since (b)(6)
(b)(6) Thanks to ITT-Tech, I am in the (b)(6)
(b)(6) degree program because it has been a dream of mine since I was
young. I will be graduating in (b)(6)

I thank the people here at ITT-Tech, especially Career Services because of their
helpfulness and compassion with the students. I have revised my resume and
landed the career that I always wanted. I work at (b)(6) as a
(b)(6)

Sincerely,

(b)(6)

(b)(6)

Joseph woody

(b)(6)

Dear ITT Technical Institute, Strongsville

My name is Chris McHugh, and I am a student finishing my (b)(6) here at ITT-Tech in Strongsville Ohio. I decided to go to ITT-tech because I prefer learning in a hands on environment. ITT-Techs instructors take the time to help any student that is struggling with a class. Thanks to ITT-Tech I was able to secure an (b)(6) job in my field. I am currently working in field as an (b)(6) (b)(6) ITT-Tech's Career Services was very important in helping me to prepare for the job and to negotiate my Salary.

Yours truly,

(b)(6)

Chris McHugh

To whom it may concern,

I chose ITT Technical Institute and the Harrisburg, Pa campus for several reasons. The recruiting staff was very upfront, accommodating, and knowledgeable. When I approached this campus, originally I didn't really want to make the trek from (b)(6) back and forth two or more days a week for school. However after talking with the staff who patiently answered every question I had for them and touring the campus, I enrolled.

Since my classes started here at ITT I am extremely pleased with the experience. My classes are challenging, but the instructors are more than willing to take the time to make sure that I understand the material and all the resources available to me. Before coming to ITT Tech I had very little knowledge of (b)(6) outside using basic programs. Now I have a library, both physically and virtually, labs, texts, and professionals who are teaching me more than I ever thought I would learn about (b)(6) both physically and functionally.

Thank you for your time.

(b)(6)

Christopher Murphy

(b)(6)

05/04/2016

To whom it may concern,

My name is Christopher (Chris) Murphy and I'm a (b)(6) student here at ITT Technical College, and this is about my experiences here at school since I saw the ITT Technical College advertisement. Everything has been excellent and I'm very glad to be here.

I had been looking for job opportunities and found I didn't want to continue in the (b)(6) field and wanted to start a new career in (b)(6). I always likes writing computer programs for personal and professional needs and felt this is something I would like to do in a new career. I had been feeling this way for a while and had been watching college advertisements.

The college commercials I saw were a mixed variety, but the ones that I paid particular attention to had to do with technology, and the ITT Technology advertisements caused me to visit their website which led me to visit their campus. And because I studied the ITT Technical College website, I knew when I visited the campus I wanted to sign up for classes.

My visit to the ITT campus was fantastic and easygoing. I already decided that (b)(6) was the track to follow. I want to (b)(6). My visit began by discussing my needs and what I wanted to do. We filled out the necessary paperwork for placement (b)(6) and it was a matter of just waiting for classes to start.

Classes wouldn't begin for at least a few weeks, but I wanted to start now. However, classes would not start for a while, but I wanted to familiarize myself to being in school, so I would visit the school library and read. School did finally start and I have been learning a lot. I had forgotten how fast college classes are and the amount of homework required for a better school like ITT Technical College. And everyone that is a part of ITT has been very helpful. The deans say hello to me and are friendly, everyone always asks if everything is ok and is willing to help. In fact, Alexis, who is my school contact, calls a lot, (more than I expected) and sends phone messages to check up on me to see how I am doing.

ITT Technical College has been a wonderful experience for me. From the classes I'm taking to the instructors and the others in administration, such as Career Services (b)(6) everyone is helpful and I am learning a lot by being here.

Sincerely,

Christopher Murphy

(b)(6)

To Whom It May Concern:

Though out my experience of (b)(6) attending ITT Technical Institute, the experience was great. I got to meet new teachers, learned a lot of lessons, and most importantly learned new abilities from my field of study. I love the (b)(6) program, it's very fun and very open to new experiences through projects, architecture, and computer design work.

I've enjoyed my time at ITT Technical Institute so much, I've decided to continue on with my education in the (b)(6) program (b)(6).

Sincerely,

Derrick Shipman

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Norwood, Ohio.

As a student of ITT Technical Institute, I'm proud of the quality of the education I am receiving. Thanks to integrity of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being a productive and career-oriented employee toward a position in (b)(6) and eventually (b)(6) areas.

I have been pleased about the campus recruiter, finance, and career services from day one, making everything a simple, easy, and worthwhile process before beginning and during classes. All of the personnel have been very friendly and truly concerned that the student can succeed in all of their endeavors, whether classroom, student worker, part-time, and full-time employment during and after completing their program(s). My general study courses have been great with some amazing instructors that truly knew how to give great feedback on every assignment so that you can honestly improve versus just getting thru the course. The virtual library chat and email functions or options have been very useful in my research for papers and projects. My core course instructors have influenced me to perform my own research not just to solve a problem, but also to enhance the course work; that is why I have become accustomed to studying 40-60 hours outside of normal theory/lab classroom time to understand and aid others to understand the material.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I am learning during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute,

(b)(6)

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Norwood Ohio.

As a Graduate of ITT Technical Institute, I'm proud of the quality of the education I have received. Thanks to integrity of the administration, faculty and academic support systems at ITT Tech. I am better prepared to take on the challenges of being a (b)(6)

(b)(6)

ITT Tech provided me with the necessary skills to land a great job with are (b)(6)

(b)(6) (b)(6) Without the attention from my teachers, career counselors (b)(6) I am not sure I would be where I am today. As and (b)(6) I train anywhere from 50 to 95 (b)(6) every other weekend. This would not have been possible if I had not received my (b)(6) in the field of my choice, and the carrer preparation I did with ITT Tech. I have reconmended the school to my (b)(6) that I train in my class room and (b)(6) I work with as well.

As a proud Graduate of ITT Technical Institute, I believe the knowledge and skills that I learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Ronald Ashbrook

(b)(6)

(b)(6)

My time thus far at ITT Technical Institute has made an incredible difference in my life. Between the professors that actually care about their students, the administrators who are always available to talk to, and my fellow students who like myself are self-motivated to better themselves, the environment at ITT Tech is perfect for a student like myself to succeed. In my classes, the information is explained in ways I can grasp but also in ways that force me to work hard to achieve the grades I strive for. As a non-traditional student who thought a GED was as far as I'd get, ITT has allowed me to not only get higher education in a setting that works for me but also made it possible for me to picture myself down the line in a career that I'll love.

Sincerely,

(b)(6)

My experience at ITT-Tech

By Toveh Seibel

I started at ITT (b)(6) and when I started here I was looking for a new direction. My (b)(6) The staff at admissions helped me find a program that worked with my existing skill set and experience but still offered me something new. (b)(6) In the (b)(6) have developed several new interests and skill sets and honed my existing ones. (b)(6) and on the occasions that this has interfered with my studies the instructors and staff have been very helpful in finding ways to work with me and get me back on track. I have found that all the instructors and staff here are willing to provide any assistance I may need to reach my professional and academic goals as long as I'm willing to put in the effort on my end. I am looking forward to graduating (b)(6) (b)(6) (b)(6) and would recommend the program to anyone interested in working in the (b) field.

(b)(6)

(b)(6)

Toveh a Seibel

Michael V Brabec
ITT Technical Institute
Getzville, NY

Dear Sir or Madam:

My name is Michael V Brabec and I (b)(6) here at ITT since (b)(6) I have enjoyed my education here at ITT and have found the teachers to be extremely knowledgeable. My experience has been a positive one, and the school has many resources available. Another thing I would like to mention is that anytime I had a question or needed assistance, the teachers were always more than willing to help.

Sincerely,

Michael V Brabec

(b)(6)
(b)(6)

I am a (b)(6) student at ITT-Technical Institute Houston South Campus. I am in (b)(6) (b)(6) program. Over the past (b)(6) (b)(6) I have learned a vast amount of knowledge about the (b)(6) field from numerous teachers and fellow students, who either work in their field or are actively pursuing an IT career. Chief among these things I have learned have not only helped to me achieve success in the classroom, but also to start my career in the field of (b)(6)

In my final quarter of my (b)(6) Program I was able to open the door to my career with the help of the Career Services department. Since my time at ITT-Technical Institute I have worked at (b)(6) in Galveston as a (b)(6) and currently I am employed at (b)(6) During this time I have been able to further refine the knowledge and skills I learned while attending ITT-Technical Institute.

Sincerely,

(b)(6)

Michael Tadych

Dear ITT,

I have gained knowledge, understanding and friendship, I never thought would be possible by going back to college. The pressure was one while searching for the right campus to attend, reading online about the reviews at ITT kind of made me second think attending. Rumors such as an easy "A", school or anyone who graduates truly doesn't what they are doing etc. I decided to put all that aside and see for myself what all the fuss was about.

When I arrived at ITT I was greeted and treated as a member already, I enjoyed the conversations and understanding between myself and the ITT recruiter. They really dove into my degree plan and helped me pick the right one and asked various questions about my interest and hobbies. I initially wanted to attend ITT for my (b)(6) degree, as I spoke with my recruiter they helped me realize I wouldn't be as happy as I'm now learning about (b)(6)

(b)(6)

I was a bit nervous after I got all the paperwork done and received an email immediately telling me I was accepted and that class would start in two weeks. I was eager to get in the classroom setting again, my first instructor was Mrs. Musgrave and awesome caring woman, who treated all of her students the same and helped to condition me into the student I'm today.

As each semester/quarter would end and the next would begin I felt my attitude change towards school and develop my mind to thirst for more knowledge. Education is not the only thing offered at ITT, they have student appreciation weeks and events for veterans. Myself being a veteran I truly appreciated the teachers recognizing those who served their country and making us feel right at home.

ITT Technical Institute is an opportunity school where if you really want it bad enough, they will go out of their way to see you succeed. People may talk or down play this school but as I've learned each day life is what you make it, and that includes your education too. I personally feel I can grow and develop from here, thanks to the efforts and sacrifices made from my professors along the way.

I began my scholastic experience at ITT Technical Institute in Webster/TX. I earned my

(b)(6)

Before graduation I decided to

come back to school and I am currently working to complete my (b)(6)

(b)(6)

which I am due to graduate (b)(6)

From the start of my education here at ITT I have been proud of the quality education I have received. Through the integrity of the administration, faculty, academic programs and support systems at ITT Tech, I am better prepared to take on the challenges of becoming a technical professional and prosper more in life from my ability to make better decisions based of the knowledge I have gained through (b)(6) degrees.

Throughout my educational experience at ITT Tech Webster, from the representatives, instructors and administrative staff, there was always someone there who was more than happy to answer any questions and fully explain the information I needed clear and precise. ITT Tech provided me with the necessary skills to compete for a new career and to begin a new chapter of my life. Without the education from my teachers, career counselors and (b)(6) I am not sure I would be as far along as I am today. This would not have been possible if I had not received the career preparation I did with ITT Tech. I have recommended the school to many of my friends and colleagues as well, I believe the knowledge and skills that I learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

I believe I made the right choice in pursuing my education at ITT Technical Institute and appreciate the invitation to share my experiences with you today and or in the future. Since my

(b)(6)

degree I have obtained two full time jobs in both fields of study working at

(b)(6)

(b)(6)

(b)(b)(6)

Richard Lynn

To whom it may concern:

It is with humble honor and gratitude that I write this letter of endorsement for the school of, ITT-Technical Institute, Webster, TX. I willfully and whole-heartedly recommend this particular school location to any future potential candidates looking for an education in the field of Information Technology.

This academy has meant the world to not only myself, but my family as well. I was a member of this institute from (b)(6) and I am now experiencing the endearing future it has provided. Having a background in the (b)(6) field, I have personally watched my colleagues with minimal to no experience grow within this environment and ultimately succeed to reach their goals, including some who achieved multiple degrees and career advancements.

ITT-Technical Institute, Webster, TX, is well-suited to provide the current applicable knowledge being utilized in the (b)(6) field to date within the work-force. I myself have experienced this first hand. Upon starting classes here my first year, I made several contacts, friends and colleagues wherein I was offered several employment opportunities. As my knowledge grew, in turn so did the opportunities have expand and I now am gainfully employed by (b)(6)

With dignity and humility, I thank the staff and instructors of ITT-Technical Institute, Webster, TX for the dedication not only to their careers but the level of care they extend to all their students. Rare is it seen where an instructor will take a student under-wing and care for them as if they were teaching their own child. This is the norm for the staff of ITT-Technical Institute, Webster, not just a fad. They truly care about the education and life projections of their students. They will forever be part of my family.

5/1/16

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Webster, Texas.

As a graduate of ITT Technical Institute, I'm proud of the quality of the education I have received. Thanks to integrity of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being an electrical engineer.

For example, the small classroom sizes were an advantage because it allowed the Instructors to never have to settle on teaching to the entire class. They were able to identify the strengths and weaknesses of every student and tailor a lesson plan that would focus on the overall success of each student. Also, by having knowledgeable Instructors who work in the field, they were able to reinforce much of the book theory with real world practical application of skills. Most of what I know has come from the insider knowledge bestowed upon me from my former Instructors. They were instrumental in my career development and with their help and endorsements, I would not have been able to pursue a wonderful career.

As a result of my professional success, I have been able to integrate a much better quality of life for myself and my family. I owe much to the staff and administration of the Webster, Texas campus. For anyone looking for a path to a rewarding career, I would highly recommend ITT Technical Institute.

As a proud graduate of ITT Technical Institute, I believe the knowledge and skills that I have learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs. Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Dear, to whom it may concern

Hello, I'm in my final quarter at ITT technical at the Webster campus and my time was well spent. Also has shown me how to communicate and ability to interact in culturally diverse environment even my team work with other people has improved. As a student working in the field it has enhanced my performance at the job, and made my more efficient as a worker in a corporate environment. This school was my best decision I've ever made, I was presented with numerous challenges and on each occasion I turned it into my advantage. I recommend everyone that wants to improve their craft or work defiantly give ITT a try you'll won't regret it. The school facility is responsive to the changing programs of educational delivery, they believe is to develop, clarify, or review the educational mission, vision, philosophy, curriculum, and instructional source. I hope this letter was helpful in all endeavors.

Warm regards,
Horton Pyrtle

Ivan Suarez

(b)(6)

Dear ITT Staff or whom it may concern,

First and foremost, thank you for the opportunity to be a part of this esteemed organization. I have and will continue to enjoy my time at the campus learning new items and building my knowledge base. The school is like a second home and the teachers are an extension of our parents. During my time with the staff and students, I have expanded my extended 'the family' with honorable people with strong morals. Every organization has its tribulations and challenges, but challenges are what staff enforces, doing it that each student will and has accomplish their goals.

When asked "What did I learn while attending ITT?" I always mention life and growth. I know, in my time at the organization, I have grown with my instructors' teaching. I have learned how to use the tools needed for my trade. Also how to implement them in my career field. The core studies have strengthen my basic skills, while the technical courses have embedded my skills even further.

In closing, I want to thank the staff of ITT for giving me the opportunity to learn and grow, while challenging me in each course of study. I have had wonderful mentors and would not change them, their guidance and opinions are highly respected amongst the students and myself.

(b)(6)

To whom it may concern,

My name is Yosif Santiago I am a Student at ITT Technical Institute enrolled in the

(b)(6)

Bachelors program. I am writing this letter in support of ITT

Technical Institute. I have nothing but high regards for this institute. The instructors and staff are very friendly, it shows that they truly care about the students their enthusiasm.

The sense of compassion and character is only match by their level of professionalism.

The instructors and staff are committed to ensure each student succeeds not only in the professional world but in the personal as well. Instructors stay engaged with the students making the learning environment fun and enjoyable. The instructors make sure

that all required for the courses are available and on time for the students. The institute encourages new ideas and viewpoints which helped with my learning experience and

allowed me to learn in a method better suited to me. Instructors kept me motivated and helped prepare me for work as an IT professional. I am sure that all the time and

contributions the instructors put into me will continue to be used throughout my professional career. In short it was an absolute pleasure being and still currently

attending ITT Technical Institute. I highly recommend that if you are currently considering continuing your schooling or even going back to school to earn a degree

that you would take ITT Technical Institute as your first choice.

Sincerely,

(b)(6)

Yosif Santiago

BS ISC Student

To whom it may concern,

As am an alumni at ITT Technical Institute Hialeah campus, my experiences with this school have been nothing short of outstanding. At this location staff members go beyond out of their way to assure students understand materials as well as have the right guidance whether personal or educational. Just a few names that should be honored and stand out at my time here are:

- Roger Olivier
- Dr Luis Naredo
- Gorgeta Rialic
- Saddy Bulla
- Dr K

There are many more I can mention, but for purposes of keeping this short and sweet I won't go any further.

ITT has impacted my life in a manner so great that I am closer than ever to achieving my goals in life. This has also influenced how I manage my daily life with people I encounter on the daily basis. If it wasn't for this school I would still be struggling to find my way in life and unable to show my children the differences education has on life. This school gave me structure, knowledge and technique on how and when to use.

I truly appreciate the experience of studying at ITT and opportunity to have met their staff. I would not change it for anything in the world.

Sincerely,

I

(b)(6)

(b)(6)

Joshua Hartnett

To whom it may concern,

My name is Lindsey M. Dombroski. I am a (b)(6) graduate of the Tarentum, PA ITT location. My program of choice was (b)(6). ITT was a perfect choice for me working full time, with a child. Close to home, with night classes.

ITT's course work is very hands on. Interactive course work is very important in this type of field. Any instructor that is assigned to teach a class, is a professional in the course work. Being taught by someone with experience is incredibly helpful. Also, career services at our location were very much helpful. Bart was always available for questions, or to help you. Information Technology is a very experience based profession. ITT definitely gives you the 'stepping stones' with entry level skills to find your first job after graduation. I have always had great communication and people skills. (b)(6) class enhanced those skills on a more professional level. Those are definitely a few of my favorite things from school.

I am currently employed with (b)(6).
(b)(6) I am help desk manager/level I support. I oversee our entire helpdesk/service requests, the glue holding our puzzle together! Currently with my company 2 years, and could not be happier!

(b)(6)

To Whom It May Concern:

I am currently writing this letter to explain the experience I had attending ITT Technical Institute in Tarentum, PA. I am an alumni and I Graduated in (b)(6)

The education I received during my time there was unmatched in my experience. Between the administration and faculty, and the ease of access to the support lines for students and graduates I was capable of easily obtaining a variety of contracting jobs in the CNS field, not limited to but including (b)(6). As a (b)(6) the support channels could not be matched, be it financial aid, who took many hours out of their scheduled time attempting to assist me in any way when I (b)(6) or Career Services who went above and beyond to assist me in the interviewing process to further set me up for success.

The classroom training and hands on learning were up to date for the time and the instructors were not just people who learned how to teach, they were people who succeeded in their given field and it shows when they helped students find workarounds for non-working programs or showing shortcuts that otherwise were unmentioned in the textbooks to assist with making the job easier. Work smarter, not harder was a mantra in my classes and it helped me immensely because now at my current job I can get projects done much faster as a result.

On the administrative side the counselors and systems in place made the whole experience very hassle free. Any time there was a discrepancy, I was immediately notified so the issue could be rectified. (b)(6) years after graduation I still keep in touch with the Career Services department who, no matter the issue that arises or the challenge, they are fully willing to jump in and assist me in any way they can, be it mock interviews or potential job leads in my field that would fit my skillset.

In the end I could not have asked for a better experience with the education I received and I thank you for allowing me this platform to discuss my experiences with this school.

Very Respectfully,

(b)(6)

Matthew McMunn

May 2nd, 2016

Daniel Meglio

To whom it may concern,

I am a graduate of ITT Technical Institute located in Tarentum, PA. I Graduated in July of (b)(6) with an Associate's degree in (b)(6)

The time I spent at ITT was very beneficial to me. I felt the instructors I had were very good. All of them were very knowledgeable in their respected field of study. Some instructors were knowledgeable in several fields. Most of the instructors also took extra time to meet with me outside of the classroom whenever I wasn't fully understanding the material right away, if I had fallen behind, or if I wanted to learn more about a certain subject.

The career service department was extremely dedicated to helping me find a job. Bart Blum not only helped me to find a job with my degree, but continued to look for a job that would fulfill my employment needs even more.

Also the financial aid team that was there when I was a student was far more helpful than I ever would have expected. They always made time for me and helped me with anything that they were able to.

ITT taught me numerous programs that I am now able to apply to my career and helped me build upon certain skills that I already had. I also learned other skills at ITT such as patience, teamwork, finding different ways to learn, and different ways to teach.

I would highly recommend the ITT Tech Tarentum campus to anyone that was looking to get a technical degree.

Sincerely,

Daniel Meglio

(b)(6)

To whom it may concern:

My name is Justice Shirley, I am a proud graduate of ITT Technical Institute in Tarentum PA.

I would like to take a moment to thank the staff and instructors that helped me get where I am today. The instructors were knowledgeable and took time to make sure that everyone understood the material we were presented. I would especially like to thank Bill Gano and Bart Blum, without whom I would not have made it thru. Mr. Gano made it a point to always be encouraging and to listen to our input and clarify anything we had questions about. Mr. Blum, even after I graduated, took time to help me get interviews and coached me in how to respond to questions that I was asked during interviews. Without these men I would not be working happily in my field at (b)(6) as the information technologies help desk and support representative where I use most of what I learned during my time at ITT Tech.

Thank you for your time and attention in this matter.

(b)(6)

Justice Shirley

Tuesday, May 03, 2016

To whom it may concern:

I am a (b)(6) graduate of ITT Technical Institute, Tarentum, PA branch and I am writing this to express my gratitude for the tutelage that I had received throughout my education. Prior to my enrollment, I had spent (b)(6) (b)(6)

(b)(6) It was at that moment I knew a change was needed. I met with Lisa, my Admissions Representative. Along with the Registrar and their dedication to ensure my transfer of credits kept me on point towards graduation. They were able to answer all of my questions and concerns and made me feel as if this school was the right choice. As for Career Services, Mr. Bart Blum, is the most dedicated in comparison of the other schools that I have attended. He is always striving for us to have job opportunities, making sure we are prepared for job interviews and is constantly updating us with new openings. Not only was the administration staff helpful and resourceful, but the teachers went above and beyond to bring real life experience to the classrooms. With technology forever changing at a rapid rate, it is expected that some of the course materials are outdated. With the teachers that I was privy to have, they were able to combine the required materials and update us with current and relevant information.

Going into the (b)(6) program, I was unsure what I wanted to focus on in terms of a career. Instructor Mr. David Smouse, went above and beyond the classroom. He was able to explain what to expect in the workforce as well as starting out in the industry. Ultimately, what helped me decide my career path was my biggest influence, Mr. Phil DuPont. His experience, knowledge, ability to teach, and his desire to see us succeed makes him one of ITT Technical Institute's most successful teachers. He taught us a working knowledge of Windows Server, Active Directory, Networking, Programming, and Databases. After having him as an instructor for Databases, I knew my area of focus. He helped further my knowledge by providing reading material outside of what the school provided. The guidance I received in Databases and in the Server classes, along with Mr. Smouse and Mr. Blum in Career Services, helped me obtain my current position as a (b)(6)

(b)(6) I have been in this position for a year and I monitored and troubleshoot various issues with servers and databases for a variety of companies. Had it not been for the excellence and hard work of (b)(6) I would not be on my current career path of becoming a (b)(6)

Thank you, ITT Technical Institute of Tarentum, for your excellence.

Sincerely,

(b)(6)

Calli A. Baroni

To whom it may concern,

I'm a graduate of ITT Tech in Tarentum, PA. I originally chose to attend ITT Tech because I wanted to attend a school that had small class sizes so you could have a one on one interaction with instructors, but also a school that was known for it's ability to not only teach it's students but also to be able to assist them with career opportunities. When I started at ITT Tech I was working at a local grocery store. Even before I graduated, I had a position with (b)(6) in their Computer Operations group. In my time at (b)(6) I have been promoted several times and I'm currently a (b)(6). Without ITT Tech I don't believe I would be in the position I am currently in. ITT Tech gave me a great start into my career in the IT world. The instructors at the school were extremely beneficial in not only what they were teaching, but also in giving insights into what you can expect to see when you actually begin your work in the field. That, paired with a career services team that is constantly providing leads for open positions in the area, made ITT Tech a great school to attend. To this day I still receive updates on new positions and jobs in the area that peak my interest. At this point I still fall back on the foundation that ITT Tech gave me, the knowledge and the know-how I use every day in my current position. As part of my job in a data center I have to work with hardware, i.e. servers, routers, switches, cabling, and the like, which I learned all about at the school. A large aspect of my job I was able to be familiar with from the start, rather than needing to learn something new. I also turn to my foundation from ITT Tech as I move on to attain my Bachelor's degree in the IT field. What I've learned from ITT Tech has assisted me in my classes that I'm currently taking and I know it will also help me in the classes still to come. ITT Tech has opened a world of opportunities for me, and I can be nothing but thankful and grateful to the instructors, faculty, and career services personnel for giving me the great head start into the field of technology.

Thank you,

(b)(6)

Brian Richey

To whom it may concern,

As a student attending ITT Tech I have been asked about my experience here many times. Now there have been a couple that stand out. The first being able to learn from some very experienced instructors. Most knew what was going on in our field and did what they could, with an ever evolving field, to make sure we students would be able to keep up with what's out there. Which has allowed me to graduate with the knowledge I have so I can successfully land and hold a job in my field. As well some of the teachers pushed us to make sure we did our best and with that helped me achieve a better work ethic and be confident in what I do.

One other good outcome for me coming to ITT Tech was the fact that I got to build a solid foundation to get my career in (b)(6). Many of the classes ran along the fundamentals of what I may need out in the field. With all this being said, I am glad that I did come to ITT Tech for my education do to its flexible classes letting me provide for my family and advance in a new career.

Sincerely,

Jacob A. Yencik

(b)(6)

5/2/2016

To whom it may concern,

My name is Ashley Rizzo and I am a past graduate of ITT Technical Institute in Tarentum Pa. I graduated from the (b)(6) program and now work at (b)(6) as a shift manager.

I enjoyed the smaller classrooms and the hands on projects and how much the instructors were involved. It helped me be successful and today I work in corrections.

In my daily schedule I often remember what I have learned in class.

Bart Bloom in Career Services helped me find this job and he checks up on me which is greatly appreciated.

The education I have received at ITT has helped me move forward in a career.

Ashley Rizzo

(b)(6)

To whom it may concern,

I am (b)(6) years old and a recent graduate of ITT Tech in Tarentum, PA. I have worked in (b)(6)

(b)(6)

(b)(6)

(b)(6)

I decided to check out the ITT-Tech across the street in the local mall. At first I was pretty skeptical (I mean after all, the second link you see when you Google "ITT Tech" is "ITT Tech Is a Scam!"), the price was a little high for a 2 year degree and (b)(6)

(b)(6) and on top of that this was 2 years straight through with no lengthy summer or winter breaks. Lisa assured me the time would fly by and it would sink in without the added long breaks, where you could lose some of the momentum you had built up.

I took a risk and took the plunge into ITT Tech. I really do not regret it at all! The time did fly by! I made a few close friends I still keep in contact with that are now in my professional network. I cannot speak highly enough about the staff at the Tarentum PA ITT Tech. They were always helpful, answering all of my lengthy questions, always cheery and generally awesome to talk to! Gary the registrar would BS with me about Black Sabbath and Led Zeppelin, Allison and Kayla would always warmly greet me and help me with all of my financial aid issues, and Bart was the man at tracking down potential jobs for me and my friends! The biggest draw to ITT Tech was the staff and the teachers! Dr. Gano, Mr. Palumbo, and Mr. Geyer were key roles in my success. They would stay late and help with projects, had great advice from their knowledge in the professional field, and were just down to earth and cool as hell (Mr. Geyer played guitar in a metal band and Lou Palumbo would talk hip-hop with us)!

Since graduation, I landed a job at (b)(6) This is a marketing firm that developed websites for universities, CVB's and a broad range of other clients. I am employed as a (b)(6)

(b)(6) but I assist in (b)(6) as well. My skills I honed at ITT Tech helped give me the knowledge and confidence I needed to land job. I owe it to the friendly and outgoing staff of the Tarentum ITT Tech. I don't feel destined for any particular field of work or stuck anywhere, but I feel I have a broad range of options in the tech industry now.

I couldn't really be happier where I am at now, but I do hope to grow as a tech professional and collect some certifications and hopefully guide some tech industry newcomers someday!

Best,

(b)(6)

Gregory M. Luniewski

Patrick Presutti

(b)(6)

To whom it may concern:

I am writing this to describe the positive experience I have had with ITT Technical Institute at the Tarentum campus as a current student, expected to graduate in September of (b)(6). I decided to pursue a career in (b)(6) about two years ago. From students, to teachers, and staff, everything has been beneficial to me. I am glad I decided to choose ITT Tech for my school of learning, and I would recommend it to anyone looking to further their life in the technical field.

From day one, I can remember how enthusiastic my recruiting staff member was. She made things easy to understand and made it clear to me that I belonged at ITT. The financial department is always willing to help anyone who is having an issue. They are extremely nice and are willing to go out of their way to help any student in need. I have always enjoyed the teachers that I had. Teachers at ITT Tech are concerned about the success of their students, which is important to me. Career Services has always been there for me. Mr. Bart Blum is always sending students leads to new or upcoming jobs. I know, if I have a question, I can knock on his door for further assistance. I am in the process of searching for new jobs, and thanks to Bart, I have applied to several positions already.

I am glad I have the opportunity to write this letter to show my appreciation to ITT Tech. I want to take this time to thank all of the staff, who have helped me succeed thus far. I am grateful for all the experiences ITT Tech has provided me. Thanks to ITT, my future has a stronger foundation, and I could not be more proud of that. Thank you to all who have helped me get this far!

Sincerely,

(b)(6)

Patrick H. Presutti

Positive Outcome from my Experience at ITT Technical Institute Tarentum.

My name is Wesley R. Mihm and I am a former graduate of ITT Technical Institute in Tarentum, PA. I am from the Pittsburgh area and it was (b)(5) commitment to go to ITT Tech. I had done drafting and design throughout high school and really got into using the AutoCAD and Inventor programs. After enrolling in the school there were many teachers that had help better my knowledge and understanding of the programs. All of my teachers were really easy to talk to and very understanding when it came to learning new things. They all did their best to explain the material in an excellent fashion. There were many times that I would walk away from a lesson still unsure of how I was able to get to the outcome I did, but with the teaches making time for the students with after class availability it was easy for me to get any extra help/explanation I needed. This really help further my knowledge of the programs and gave me a much stronger background for learning the programs. Which this can directly correlate to my current job position that I have. I am now a (b)(6) for a company called (b)(6) in Trafford, PA. We design group/motor operated air break switches for substations. I have been with the company now for almost four (4) years. There have been a few people hired after myself and because of my strong background I was able to learn the company standards quickly and help assist others that were hired after me. Although the program is very large and I am still learning things about it daily, I can dedicate a good portion of that knowledge to ITT Tech for assisting me to where I am today. It has made me become a much more valuable employee and beneficial to my employer.

By,

Wesley R. Mihm

X (b)(6)

5/4/2016

My name is Brenden Shellhammer and currently I am enrolled at ITT-Technical Institute. This is my (b)(6) and am on my way to graduation (b)(6) with the rest of my class. With enrollment there have been a lot of experiences that I have encountered such as the environment, the staff/instructors, and the classes being taught.

All my experiences at ITT have been fairly good. I have had a lot of help with anything that has become troubling to be in class. The instructors are fast at responding and very helpful/knowledgeable in the given fields. The other staff are very nice and supportive with everything. I have had no issues with help from any problem that I might have been dealt with at the time. I have also had much help from the career services as well with resume advice and job seeking.

Currently, Along with being enrolled at ITT, I am also working in the field that I am studying at ITT. I study (b)(6) My current employer is (b)(6) This (b)(6) plant specializes in the renewable power such as solar. While working on a large project there with my co-workers, I have been able to use a lot of the knowledge that I have received from ITT at (b)(6)

Brenden Shellhammer

(b)(6)

To whom it may concern,

My name is James Rosvanis. I am a graduated of the (b)(6) program in March (b)(6) from ITT Technical in Tarentum, PA. The courses I took at ITT Tech. helped to provide an understanding of electric circuitry on a component level. I graduated feeling prepared for the future. At graduation, I was already working in a job in my field and I still hold the job I had at that time. I am an employee at (b)(6) in the (b)(6) and my job title is (b)(6). I work in a clean room facility for fabrication of nanoscale circuitry, memory, and MEMS devices. If not for the experiences, courses, and dedicated instructors at ITT Tech, I would not be where I am today. The instructors endured countless questions and beyond class time discussions to make sure students were satisfied with the information.

Another big reason for my current success was the relentless efforts of the Career Services department. They offer so much to anyone feeling unprepared for employment. From boosting a resume to practicing interviewing to a flood of job offers to grads and prospective grads in the local area, the staff would do anything to help you be employed. Bart Blum helped me to find my current position. If my employment status were to change, I'm sure the career services department would still be willing to help and that is an invaluable resource.

The skills I developed at ITT Technical Institute helped me to grow into a person prepared for the future. With the knowledge and aptitude to be employed in a high tech, fast paced environment, I am confident in my abilities to continue to prosper.

Sincerely,

(b)(6)

James A. Rosvanis

(b)(6)

May 3, 2016

To whom it may concern,

I am currently in my fourth quarter bachelorette program studying (b)(6) here at ITT-Tech in Arnold, MO. We have excellent instructors here at our campus that are not only very knowledgeable, but helpful as well. They often donate their time to help students succeed in their studies, and to excel in their careers paths.

I am the president of the (b)(6) and our instructors and director Terri have helped us and supported us with engaging our students and community in activities to help our school and community grow together. We have also worked with the student representatives together on our TechFest- engaging (b)(6) members, representatives, and incoming students with information and hands on experience that engages our new students with the programs they are wanting to pursue their career in.

Our career service Representative, Rachel, is also very helpful. She will send your resume to potential employers, and follow up with them to find out where we stand in the process.

Coming back to school at an older age can be difficult, but the staff and instructors are eager and willing to help you succeed, and obtain your career goal. ITT-Tech in Arnold is a wonderful school to start your career path at!

Sincerely,

(b)(6)

Chris Conklin

May 3, 2016

To Whom This May Concern:

I'm writing this letter to let you know of my experience while attending ITT Technical Institute in Arnold, MO.

As a graduate and student of ITT Technical Institute, I'm completely satisfied with the quality and positive attitude of the education. I've received my Associate's Degree in (b)(6) (b)(6) and will be receiving my Bachelor's Degree in (b)(6). Thanks to the helpful representatives, faculty, and instructor's I've achieved my dream even farther along than I had expected.

The course related content is based on what companies are using so when we go to interview's we are not going in with experience in the old version of the programs but with the experience with the new or updated versions. Our course materials, textbooks, and equipment were all really helpful, useful, and very easy to use. If a student has any trouble as long as they told the instructor or any of the faculty they received the help they needed within a very fast result.

The career services are always helping the students by sending their resume's out to possible employer's and then letting the student know that they had sent the resume and to prepare for a phone call from the respected employer.

I'm proud to be a graduate and student of ITT Technical Institute, and I believe that the knowledge and skills that I've learned and will be learning throughout my education helps to demonstrate the integrity and quality of the faculty, and the academic programs.

Thank you for the opportunity of letting you know of my personal experience in obtaining a quality education at ITT Technical Institute.

Jessica Mueth

(b)(6)

Brandie Hosier (b)(6)

(b)(6)

May 3, 2016

ITT Technical Institute

1930 Meyer Drury Drive,

Arnold, MO 63010-6004

To whom it may Concern,

My name is Brandie Hosier. I have been a student of ITT Technical Institute from (b)(6) (b)(6). Through my time here I have grown in many ways thanks to the efforts of the staff and teachers at the Arnold campus. The instructors at this campus have ensured nothing but the best to aid and guide me in progressing through the EET Program. Using the tools ITT provided, such as textbooks and test equipment, I was able to experience a well-balanced educational experience with both lecture time and hands on Lab time. The instructors always seem to go above and beyond to ensure I understand and retain the material covered. All of the staff members here have far exceeded my expectations as well. It all started with the prompt and persistent efforts of my representative. From the very beginning he was able to guide me in the right direction and answer all my questions while staying in contact with me all the way through graduation. I would also like to say thank you to the staff in the Career Services as they helped me build and improve on my resume and were even able to get me in a job in my field.

I am grateful that I chose ITT Tech in Arnold. My experience with the school has changed my life for the better in many ways. I am now working in my field with many more doors open before me. I now feel more confident and ready to face the next phase of my life and career because of the education and support I received at ITT Technical Institute.

Warm regards

(b)(6)

Brandie Hosier (b)(6)

To Whom It May Concern;

2 May 2016

I am a (b)(6) graduate of the (b)(6) program from the Arnold, MO campus. My education from ITT Technical Institute provided me with the edge to be one step ahead of my peers in the job market. I was hired by a major corporation before I graduated and started one week after I graduated. Career services at my campus were instrumental in assisting with my job search.

My representative was very informative and knew exactly where I would fit into the ITT curriculum, based on past education and goals I had set for myself. She was as excited as I was to get the process started. There was only a week between my initial recruitment and the day class started, but my representative kept me informed and up to date. As my classes progressed, I found that the instructors were there because they **wanted** to be there. Each and every one of them was from within the skill set they were instructing and would incorporate real life scenarios into the class making it easy to associate course materials with how it might work in a real world situation. I myself had an issue with math and was provided the tools I needed to pass the classes.

I returned to the Arnold campus as an (b)(6) because I believe in this institution and what it stands for. I would recommend it to anyone looking to further their education in the technical field.

Respectfully,

(b)(6)

Terry A. Sheldon

May 2, 2016

To Whom It May Concern:

My name is Deborah Orton and I enrolled in ITT Technical Institute in Dec. (b)(6) I am currently on leave from school because (b)(6)

(b)(6)

My Representative was very helpful in the enrollment process. He answered all of my questions and made the process very easy and enjoyable to get thru. My program of study is (b)(6) I have nothing but good things to say about my instructors. They are very knowledgeable and are always there to answer any questions I may have. I appreciate the real life scenarios that they throw in for our benefit so we know what to expect after graduation and entering into the "work world". The material covered in the classrooms are relevant to the work field.

The staff at ITT Technical Institute is very helpful and informative. All the students know that we can come to them at any time and get the help that they need. The IT person at the Arnold, campus is one in a million. He is always ready and willing to help in any situation and at the drop of a hat. Anytime I have a problem I can always depend on the Dean/Director to listen and help me solve whatever problem may have come up. Just a very supportive experience I have had at the Arnold, ITT. The Learning Resource Center is always open to the students and Edy in the library is always so very helpful and informative in any situation.

I have spoken to Career Services many times and Rachel is also very helpful. I know I can depend on her to help me find gainful employment when the time comes.

The people at ITT are like family to me and I have had a very positive experience at the Arnold, campus. I know that with what I have learned, I will find a job to use my degree. I look forward to working in my field and providing for my family. Just a very positive with Arnold, ITT.

Thank you for the opportunity to let you know how supportive and informative the staff and facility at the Arnold, campus are.

Sincerely,

(b)(6)

Deborah Orton

May 3, 2016

To Whom It May Concern:

My name is William Kohler and I am a graduate from the (b)(6) program at ITT Technical Institute, in Arnold, MO. My representative was very helpful and informative in the enrollment process.

All of my instructors were very helpful and many of them went out of their way to make sure I understood the course content. They took a good, keen interest in making sure all students were informed, up to date and prepared for the classroom material. The course materials provided prepared me to be academically successful.

The staff at ITT Tech in Arnold, MO were very helpful in making my financial aid process was easy. Dr. Terri Leap continuously goes out of her way to ensure that all of my needs and concerns are met. The entire staff is dedicated to our success, is easy to work with and essentially treats students very well.

I am actively working with Career Services to secure a job I enjoy in my field of study. I am always kept up to date with new job openings and employment trends.

I believe that ITT Tech provided the quality education that I was looking for. I was always kept up to date with my courses and provided the support that I needed to continue my education.

Thank you,

(b)(6)

William P. Kohler

To whom it may concern,

My name is Adam Ford I am a graduate of ITT-Tech, I graduated from the Oak Brook IL campus March (b)(6) with my (b)(6) bachelor's degree. I was enrolled in this same campus since September (b)(6) and have a majority of the same instructors during that time frame. I have to say that my experiences with this school have been nothing short of outstanding. Not only where the instructors that I had very knowledgeable in the fields of study they taught, but a majority of them went above and beyond to help a student in many ways. For example (b)(5)

(b)(5)

(b)(5)

Then as time progressed and my internship ended there I

was offered a position working with an instructor at the company he worked as his lab assistant. This kind of attention to student needs was one of the biggest reasons I choose to continue on with my bachelor's degree. The environment of the school is very relaxed and easy to get comfortable with even from the very beginning. When I had any issues with a class or in the rare cases an instructor I was able to talk with the faculty and truly be listened to and made to feel like my concerns were important and that something will be done about them. I would highly recommend Oak Brook ITT-Tech to friend and family looking to further their education. Lastly I wanted to mention that even after I graduated I have been able to keep in touch with the instructors and one of them was able to help me get into the current position I am in now which is an (b)(6) without my instructors glowing recommendation I may have not gotten this amazing opportunity that I have now. Over all the

(b)(5)

that I attended ITT-Tech Oak Brook was the best thing I could have done.

Respectfully,

(b)(6)

(b)(6)

Adam Ford

May 3, 2016

Dear Sheree,

Before coming to ITT Technical Institute, I had no idea about how in-depth the information age and electrical trade had become. I was even uncertain on how to turn a computer on and off. Through hard work and perseverance, and also with the help of Julio (Systems Support Technician at the Oak Brook campus) and the rest of the staff, I was able to overcome basic obstacles. That time allowed me not only to learn and progress into a volunteer student worker position but also face more challenges and learning opportunities that further improved the skills I had already acquired in my life.

Moreover, you were a major influence and help, by not only setting up interviews, and helping me find/land a job, but also by showing me how to sell myself and incorporate my past with my present. The time I had being a student worker, not only for Julio and Mr. Chin, but when I was assigned to administration were the most valuable experiences I could have ever gained.

Finally, during my stay with ITT I have not only acquired many new abilities but I have furthered the skills and expertise I have already had as well. Thank you for the knowledge and help that I was allowed to obtain, not only by yourself, but also by the rest of the academic and administration staff.

Kind Regards and Many Thanks,

(b)(6)

Eric J. Hornung

To whom it may concern

As I make final preparations toward earning my Associate of (b)(6) degree in Network Systems Administration and graduating on June 23, (b)(6) I'd like to take a moment to reflect on several of the various & meaningful things that this ITT Technical Institute – OakBrook campus has generated & provided for me throughout my precious time here as a student. I feel it's very important that I express my thanks and appreciation for the great service & job performed by you and the entire ITT-Tech Oak Brook staff.

Let me begin by noting the great learning skills that I've gained through the academic curriculum here at the ITT-Technical Institute. My personal reading, writing, and math skills have increased largely due to the college level composition & math courses required and provided.

My personal leadership & management skills are now stronger & developed around a positive mental attitude; my short, medium, and long term goal setting skills, time management, and strong work ethic skills are all the result of great ITT courses like Problem Solving Theory, Strategies & Advance Strategies for the Technical Professional, and Group Theory.

(b)(6)

(b)(6)

But most of all

one of the greatest treasures that I've gained in my time here at ITT – Technical Institute is understanding the invaluable power of the ability to learn which every person has and must tap into to be successful.

I found that power & ability to learn and combined it with a love for learning thanks to the great teaching staff & learning resource center of ITT-Tech OakBrook campus which has counseled, tutored, and encouraged me. With their help I've transitioned from an average student into an honor student which is something to be very proud of & a big deal.

Let me say in closing, that what seems like a short time ago I walked into the doors of ITT-Tech OakBrook campus a dreamer with the desire to learn about computers & business; and with the help, guidance, and expertise of a great administration, teachers, an incredible learning resource center / aide, and office staff I'm very proud that I've become a (b)(6)
one in (b)(6)

Again, it is with my sincere thanks & appreciation that I submit this reflection of success to all that have so richly made a profound contribution to my life & success sincerely,

Lonnie Walker.

(b)(6)

(b)(6)

(b)(6)

I am very happy with my experiences here at ITT Technical Institute. I must say that I have learned so much since coming here in June of (b)(6). I liked the fact that I learned a lot of skills needed to work IT. Some of the classes I enjoyed taking was Computer Logic and Structure, because I learned about the parts of the computer and the history of the computer. I also learned about IP networking, IP addresses and subnetting. I learned about the various classes of IP networking and the differences that set them apart. The curriculum itself fit the type of career I want to go into because I always wanted to fix computers and learn how they operate. So I going to this school really helped me make my dreams come true and a reality. I liked the fact that I was able to work for the school in the Career Services department, the finance department, and be an assistant to the System Support Technician. Through working with the System Support Technician, I have acquired so many skills that I can use in the real world. I have learned how to wipe a hard drive, how to remove a virus, and basic troubleshooting skills. I have had a chance to work on other students laptops and assist the System Support Technician in helping the new students connect to the Campus Wi-Fi. I have also tutored the students in various school subjects such as binary and math. I have done operating systems installs/upgrades, installed driver software, and set up user accounts. I also learned a lot from the labs I did in my classes. I was able to assist the Career Services department in setting up the campus for various events and I even covered the front desk for important events going on the campus. I have even provided entertainment at the campus for the graduation dinner.

Shante' Young

(b)(6)

(b)(6)

Too often people only focus on the negative things in life. Unfortunately, I am sure you are used to complaint letters, however I assure you this will not be one. Instead this will be a letter of thanks and appreciation. Today I can proudly state that I am a graduate of ITT Technical Institute Oakbrook, with an Associate's of Science Degree in (b)(6). Not only that, but I am avidly pursuing my Bachelor of Sciences at ITT Oakbrook as well. Furthermore, I have a full time job in my field of study, that without my education at ITT I never would have qualified for. For all of this and more I thank you. (b)(6) years ago I never dreamt I would be where I am now. (b)(6)

(b)(6) Over the next 8 years, I worked as a (b)(6) a labor of love with no chance of financial or professional growth. (b)(6)

(b)(6) This was the mindset I walked into ITT Oakbrook with the week before the June Quarter was starting. Not a positive mindset to say the least. In the days leading up to my ITT enrollment I read all the disparaging reviews about ITT and several times picked up the phone to cancel and yet I knew with the financial aid and flexible schedule this was the best opportunity available to me and I needed to see it through. So see it through I did and I am proud to say I was able to graduate with highest honors. It hasn't been easy or effortless. In fact, (b)(6)

(b)(6) The difficulties and challenges though were an integral piece to my ITT education. During the past (b)(6) quarters at ITT Oakbrook I learned much more than (b)(6) learned time management, diligence, professionalism, but most of all I learned that an opportunity is only what you make of it. I learned that education, no matter where you choose to attend, is only as good as the effort you put in. I saw that first-hand, by taking ownership of my educational experience at ITT. The administration and faculty at ITT Oakbrook saw that I was invested and therefore invested in me. Over the past two years I have had the pleasure of working closely with the John Metych, Steve Kramer, Sheree Gilmore, Mo Suleiman, Jerry Chin, Rich Manprasio, Mark Hatef, Sung Kim, Joanne Bugyie, Claire Zvolanek, Julio Martinez, Bonita Kelly and Matt Dornbos. These individuals, regardless of their position, help to make each student's educational experience better each and every day. I can honestly say that without ITT Oakbrook, especially its administration, staff and faculty I would not be where I am today. In closing I just want to say thank you. Thank you for helping me to reach goals I had given up on. Thank you for providing me the resources (b)(6)

(b)(6) Thank you for giving me back my future.

(b)(6)

To whom it may concern,

I would like to introduce myself, my name is Rossford Orciro, I am going for (b)(6) program at ITT Tech. I have started for my Associates program back in (b)(6) in which I was able to transfer my credits from a Junior college. I was bored in what I did and wanted to do something different. I fell in love with the subject (b)(6) I have went to school for over (b)(6) until unfortunately I have to leave for a long while because of (b)(6) in the middle of (b)(6) I was surprised that my credits were still here and was able to continue where I left off. I was really motivated and wanting a better life for myself. Within a year from coming back I soon graduated for my Associates in Science for (b)(6)

My mind was set to succeed and want a better role in my life. The career center of ITT was able to find me jobs in my major in which was a great asset. There was an availability of mock interviews so you can be ready for a future interviews. They teach you how to recite and words that would be keywords that the interviewer would be paying attention to. As soon as I got my Associates I had the opportunity to get an interview for a big company in the bay. I gotten through the interview process in a breeze. The next few hours after the interview I received a phone call telling me I got the job. I wanted to be more in my career and wanted my Bachelors of Science. I continued until this day and soon enough I'm already almost done in a few more months.

The campus was a welcoming environment making me feel I can do what I need to do. There was available help when I need it. The great thing was that the area was also near many restaurants when there is breaks students are able to go out and ease their minds. The teachers are motivated in making your learning a wonderful experience. There are many examples

provided in making you understand what the problem is and how to work the problem. In your field they show how an example such a volt meter of how it is used and how to be safe when connecting your contact points. I do believe everybody will get a great experience in getting a great degree in the growing work world of today.

ITT Technical Institute

16916 S. Harlan rd.

Lathrop, CA

May 3rd, 2016

ITT Technical Institute and employees.

I want to start with a simple Thank you. When I first arrived at ITT Technical Institute I had just graduated from high school. I attended ITT from (b)(6) and have earned four degrees over the years. I have learned so much over the years from the teachers and my peers. As a result of all the education provided by ITT I am working as an (b)(6) designing control panels for water treatment plants, solar systems, and other industrial applications.

Over the years I have learned a lot. AutoCAD was a tool I never heard of until I attended my first AutoCAD class at ITT. Since then I have been using the software for eight years. Practicing and constantly perfecting my skills. As a result I am currently continuing my education and preparing for the (b)(6) exam next year.

Thank you

Joshua Ramey

May 3, 2016

To whom this may concern,

I'm an ITT-Tech student that is in the business management program writing about my experience here at the campus. I've been attending the school since the Fall of 2015 and a lot of positive experiences since I've been here. The school challenges students to be more critical thinkers and teaches how to be an active learner. Even in some of struggles with some of my courses in the brief time I've been here I was able to use these skills that I learned from my fundamental strategy course it helped me to pass my other courses with flying colors.

The program is fast pace but the instructors our patient with students to ask any question they have about the subject. For a case of point, my instructor for my math 1 class Mrs. D she is the best math instructor according to my opinion I was in for tutoring in her class every week that helped me to get an A in her class. The instructors are very good with the students insisting them with the material that is given to them. The instructors are very open with the students they don't mind answering any questions the students may have.

Since I've been at ITT-Tech I learned how to be an active learner taking advantage to complete assignments. The instructors are very patient with the students because they want the students to be successful in their careers. That's what I like about the instructors at ITT-Tech.

To Whom It May Concern:

I am writing to you to discuss my experience in attending ITT Technical Institute in Lathrop, Ca.

As a current student of ITT Technical Institute, I'm proud of the quality of the education I am currently receiving. Thanks to the integrity of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being a productive and career-oriented employee.

For example, my counselor, Lana, constantly checks in with me to make sure I have everything I need and am having a positive experience. If, for any reason there happens to be any issues, she brings it to the attention of the appropriate people and it gets resolved quickly.

Also, my instructors do not hesitate to spend more time with me if needed, answering my questions so I can better grasp the material they are presenting me with.

Not to mention, by attending school here, at ITT Tech, I have expanded my professional networking circle, and with what I have learned already, I now have the knowledge to join one of my classmates working for his company, thus allowing me to get a step up and a leg into my field of study.

As a proud current student of ITT Technical Institute, I believe the knowledge and skills that I am learning during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

To whom it may concern:

May 3, 2016

I started at ITT Technical Institute in March (b)(6) in the (b)(6) program and graduated with my AS degree in (b)(6) I started the BS degree in September of (b)(6) and will finish my BS degree on May 28, (b)(6) in the same field of study (b)(6) I have done both degrees back to back non-stop and at least G.P. A. of (b)(6) The Recruitment department has done excellent job and also the Career Services. The course materials are good and the instructors have always done a great job. Academics has always had great support system for the students and also Financial Aid has always been very helpful throughout my whole experience at ITT Tech.

Thank You

(b)(6)

Carl Nielsen

May 2, 2016

My name is Phaedra Rosengarth and I am a graduate of the Lathrop campus of ITT Technical Institute. I graduated (b)(6) with my AS (b)(6) degree and plan to return for my BS (b)(6) degree. I have attended school at ITT since September (b)(6) and have had a very positive experience. I have learned so much from the school and look forward to translating that knowledge into a career in the near future.

From the first day I stepped foot in the school, I have had nothing but good things happen for me. From learning about the school and my Associates program from Johnny Bowens, my recruiter, to meeting the school chair, Jeff Brockman and then-dean Bill Robinson and current dean Dr. Harry Miller, to attending classes under many wonderful instructors, I have had the best time at ITT. I have also received great support from the Financial Aid department under Sheila Swanson and Career Services with Cristal Kemp. Overall, I have thoroughly enjoyed my time at ITT and if I had any regrets, it would be that I didn't think about attending school here sooner.

(b)(6)

Phaedra Rosengarth

May 3, 2016

To whom it may concern,

It is with great pleasure that I recommend ITT Tech. I had the privilege of attending during the (b)(6) semesters. During this time, I became a part of the student family and was able to gain my degree with all the support needed to do so. Therefore, it is my pleasure to write this letter in support of ITT Tech Albany.

Throughout my time at ITT I had the teachers and faculty went out of their way to provide everything needed to ensure my success in my curriculum. Having completed my Bachelors at another school I was surprised at the amount of support given here, I had never experienced this during my BA. All of my instructors provided the materials needed to be successful in their class, even extra tutoring time if needed. They did their best to work around my schedule if I needed tutoring because I also had a full-time job. During my time here (b)(6) and if it was not for the encouragement of Mr. David P. Laccetti and other teachers to keep going and helping me with my missed work I may have dropped out. Mr. Laccetti sat me down went through the things I missed and helped me prioritize so that I was able to pass and continue most of my courses. I will always appreciate this support because it was a very difficult time. The assistance did not stop at the teachers, the Career Services Specialist has also been a great help during school and after graduation. I have had the privilege with working with two who have been amazing, Mr. Marty Pellegrino and Mr. Aric Aery. Mr. Pellegrino sat me down and listened to what I would like to do after graduation and helped me get into an internship that has asked me to stay on with them longer than the originally needed me. After graduation, Mr. Aery continued to touch base with me concerning my resume, portfolio, job applications, and opportunities. He has continually sent me job opportunities and kept me accountable in the pursuit of a new job. It is because of his encouragement that I now have a paying job in my field.

I am pleased that I was able to continue and graduate from ITT Tech Albany. Please feel free to reach out to me if any further information is needed.

Charlene A. Dodge

04May2016

(b)(6)

I was a student here at ITT from (b)(6) and graduated with Honors and am a member of the (b)(6). I enjoyed my tenure here as a student, and it has benefited me with my employment. I have a better paying job and the skills that I learned at ITT have helped me grow as a person and helped grow my career.

Sincerely,

(b)(6)

Charlene A. Dodge

5/4/16

To whom it may concern,

I graduated ITT in (b)(6). My experience while a student was very positive. I received plenty of hands on experience in the classroom and labs. I was quickly hired by a local ISP while still a student. After graduation I was promoted several times and now a senior engineer specializing in (b)(6).

(b)(6)

Rich D'Ambrosio

My name is Levonne Burris

I'm currently in the (b)(6) curriculum at the ITT Tech Liverpool campus. The classes that I taken have prepared me for my current position as a field service technician with (b)(6). The staff here are very helpful and will try to help you succeed especially if life throws you curve balls. like working late or having family issues. They've worked with me through (b)(6) and now with my demanding job. The labs are similar to the same type of the work i currently do for my job. The library has access to a lot of information needed for research or if you just want to browse a particular book or piece of literature.

(b)(6)

(b)(6)

May 3, 2016

To whom it may concern:

Attending ITT Technical Institute, Liverpool Campus, has really helped me get where I am today. Without the education I have received I wouldn't have landed the job I have today. I completed an (b)(6) program at (b)(6) and was only rewarded a certificate after completion which wasn't enough to secure employment in the field. I needed an actual degree that companies' look for in their hiring process. At ITT Technical Institute I achieved, what most companies' desire, an actual Associates Degree. ITT definitely gave me the education I needed to be successful in the field.

The Administration
ITT Technical Institute

Dear ITT,

My name is John Richmond and I am a student at the ITT Technical Institute in Liverpool, New York. I just wanted you to know how satisfied I am with my experience here at the Liverpool branch of ITT. From Reggie and Tammy in recruiting to Jodi in the Registrar's office to all of my instructors like Mr. Gilbert, Mr. Lynch, Mr. Martin, and Ms. Kent to name a few. All of the staff is doing a fantastic job at helping me get my education and feeling like part of the ITT family. Going to ITT is undoubtedly one of the best choices I have made in furthering my education.

Thank you,

(b)(6)

A rectangular area of the document is redacted with a solid yellow fill and a thin black border.

John Richmond
Student

Hello my name is Jason Harvey I have been attending the Liverpool
Itt-Technical Institute since March of (b)(6) this is my second time attending
this campus. I have had a wonderful time learning new things at this campus.
I enjoyed the teachers here, especially Mr. Gilbert, Mr. Lynch, and Mr. Martin,
who taught in a humorous style keeping the classes from being a boring
lecture. There are many instances of what I've learned here from each of
them. Mr. Gilbert taught me AutoCAD and Revit, which are building
programs that help architects create blueprints or 3D rendering of what a
building will look like as a finished project. Mr. Lynch taught me Inventor, a
3D parts program and Civil 3D, which is a landscaping layout creator. Mr.
Martin taught me how to communicate effectively in a group, business, or
public setting. This experience has shown me that there is many styles of
learning and this school fit with my style of picking up new programs and how
to handle situations differently.

(b)(6)

(b)(6)

Daniel Toro

(b)(6)

May 3, 2016

Dear ITT Technical Institute,

I would like to say that my experience at Itt Technical Institute has been very eye-opening. The staff has been nothing but supportive with my needs to achieve my goals in this institution. I have been fortunate to have teachers that have bent over backwards to accommodate my schedule, staying after hours to help me with my studies Mr. Casey, Mr. Higgins and Mr. Martin, who after I finished his course, was still willing to assist me with a project I completed my foliotek are examples of the committed attitude among the faculty.

In class I also have been allowed to let my leadership qualities shine through in group projects. My classmates ask for my help, and I encourage my classmates to interact and realize their potential, as well.

This experience has also taught me that even after being away from formal education, I can still become a student and be a very productive one.

Thanks ITT Technical Institute.

Sincerely,

(b)(6)

Daniel Toro

Scott Davis
Itt-Tech Graduate

(b)(6)

March

(b)(6)

As a recent Itt-tech graduate I would describe my experience as nothing less than amazing. The staff and instructors made me feel very comfortable from day one. Everyone made it easy for me to learn in a situation that was highly demanding. Each instructor gave an in depth curriculum that was a combination the latest coarse work and real world experience. They also guided me on the things that prospective employers would be expecting. With the skills and education I received I was able to get a job working in my field before I graduated. I would highly recommend Itt-Tech to anyone looking to further their education. If you have any reservations about continuing your education visit your local campus and speak to current students about their situation.

Sincerely,

(b)(6)

Scott Davis

May 2, 2016

To Whom It May Concern:

I was working as a (b)(6) for a computer consulting company with no prospect of advancement. I have always been very creative and wanted to explore other career opportunities. I signed up for more information and was contacted by ITT Technical Institute in Richardson TX.

I took a tour of the school and the marketing representative answered all of my questions and I enrolled in the (b)(6) program. I worked hard to maintain a (b)(6) with almost perfect attendance. The curriculum was challenging and the instructors were extremely helpful. I graduated in September (b)(6)

I found my current job in April 2012 as a result of talking with an employer at a hiring event setup by the Career Services Department. I am employed as a (b)(6)
Now, I am making great money and have a rewarding career because of my experience with ITT Technical Institute.

Best Regards

(b)(6)

Tammy Briggs

(b)(6)

Erick Rosales

May 2, 2016

To whom it may concern,

My name is Erick Rosales; I graduated from the ITT Tech campus in Richardson on March 24th (b)(6) from the (b)(6) program. I can proudly say that I graduated with not only honors, but as well as the (b)(6) I am current employed at (b)(6) (b)(6) as a (b)(6) I started working at the company since October of 2015. I was quite lucky to have career services come to me and ask me if I was looking for a job at the time. They were able to help me setup the interview and proceed into working where I am now. The months prior to working at (b)(6) was working as a federal work study at ITT Tech. I helped out my program chair and other teachers that needed help during the school hours, and was a tutor on the side at school. I helped out students that needed any help that were in the (b)(6) program.

My time at ITT Tech was very beneficial; all of my instructors were great in what course they had taught. If I had any questions or concerns, they were more than happy to help out with any subject I was lacking in. The influence that the instructors had was immense, especially if the students were willing to put forth much effort into striving for their future. As much time as I spent before class and late into the night at school, my instructors always had not only my needs in mind, but as well as other students around me.

I can honestly say that I enjoyed my time at ITT Tech and being able to proceed forward in life and knowing that I have good education. I can move forward and be able to know that through all my long hours at school and effort that I put into it really showed in the end.

Thank you for taking the time to read this.

Sincerely,

Erick Rosales

(b)(6)

To whom it may concern,

My name is Sara Purcell,

I would like to first take the time and explain who I was, the aspects of ITT and go forth with an ending of what ITT Technical Institute has brought me. I hope you enjoy this letter, and take the efforts and really understanding what ITT truly means to me, and how it has impacted my life.

Visualizing my future and my stand point 4 years ago, I saw a future not bright enough to motivate. (b)(6)

(b)(6)

One late night I saw a commercial for ITT Technical Institute. The commercial shows students successful in their current jobs, because of the skills they brought on from ITT. I decided to do a tour because, honestly; what hurt could it bring towards me to do a simple tour. I attending the tour at the Richardson location and instantly felt like I was home. I took efforts in expressing my emotions on electronics, puzzles, and expressed my passion for education when I was in school. I expressed how perfect of a student I was in everyone's eyes back then. After my tour and my meeting, I was accepted. My first day of class would begin just weeks after my acceptance offer.

Walking through the doors of ITT I had the walk of confidence; believing it would be easy starting back at school, like an analogue of someone getting back on a bike after a long time of not riding. Walking into my first class, I immediately developed the standard jitters. Now I

(b)(6)

(b)(6)

ITT has a set schedule for classes that everyone attends, and moves up gradually to the next level of education, so everything becomes smooth sailing. My very first class was to help me develop a resume, and help with my communication skills. During the course I was gradually

(b)(6)

(b)(6)

I have also learned many skills. One of the aspects of ITT is to show students equipment's and what they are used for. While I would love to have more properly working modern equipment that is used in the world today; the very few equipment's we have at ITT shows in general what the material can do in the world of electronics, and how we can apply electronical math to pin point the fault of the equipment we want to fix. ITT has strategically taught me every aspect of electronics to where it becomes natural for me in my everyday life.

Another momentum of educating myself was the electronic communication skills. My (b)(6) and I am grateful that ITT professors show the same efforts as I do when it comes to electrical terminology. Every teacher I have come across at this location has genuinely showed efforts in making sure we walk out the doors with confidence in being the most successful people of our future. I feel grateful to have a school that strives the same efforts in bettering everyone in school, and couldn't be more happy to call ITT one of my favorite schools I have every attended.

So Who Am I...

I am an Associate graduate in (b)(6) Currently a student for Bachelors of (b)(6) at ITT. I was awarded numerous times for Highest Honors, and also

awarded for Highest Academic Honors out of the entire class of (b)(6) I am a person who lives for studying, and pushing me to the max. (b)(6)

(b)(6)

(b)(6)

(b)(6)

ITT has shown me there is a bright amazing huge future for me, and a happy future at that. So this letter is to say thank you ITT. Thank you for giving me a drive in life, thank you for showing me the possibilities in this world. Thank you ITT for (b)(6)

Sincerely,

Sara M. Purcell

(b)(6)

ITT TECHNICAL INSTITUTE – RICHARDSON CAMPUS

Michael Hepburn

(b)(6)

May 3, 2016

To Whom It May Concern:

I am a recent graduate of the (b)(6) Associates program at the Richardson campus of ITT Technical Institute. I graduated with honors with a GPA of (b)(6) and not only received the outstanding student award for my class, but also had the honor of being the class speaker. I am currently working in my field as a technical support specialist at (b)(6).

With all those accolades mentioned above, as well as my current position, I think it should be made known that I never thought I'd be where I am. I had attempted to obtain a college degree a few times before coming to ITT with varying degrees of poor results. Upon arriving at ITT, though, I found new purpose and motivation. As can clearly be seen from my above achievements, something clicked in me and I was able to accomplish that which my mother always knew I could (even if I didn't). I believe the mix of a more informal setting, the experience of teachers (who are actually working in the field) and the focus on group work and real-world type projects played an instrumental role in my success this time around.

In conclusion, I would (and have) highly recommend the ITT programs to any students who have, like myself, tried and failed to attain a college degree, or any students that appreciate a more real-world experience in their learning. The hands-on approach and group setting was most helpful.

Sincerely,
(b)(6)

Michael Hepburn

[Street Address, City, ST ZIP Code]

Office: [Telephone] | [Web Address]

To whom it may concern:

When I joined ITT, (b)(6)

(b)(6)

(b)(6)

I requested information on-line

and within 10 mins of my request, I received a call. The recruiter was very nice and provided enough information, I agreed to meet with her. I went into campus and before I left, I'd signed up for class. It was a scary, but exciting feeling. From the orientation to the first day of class, the staff made me feel wanted, like I was supposed to be there. From semester to semester, I learned new and exciting things about my program, (b)(6). The instructors were passionate about making sure their students learned what they needed. There wasn't an instructor there that would not help at any time and even come in early or stay late if a student needed extra time. Needless to say I did start working again and my instructors worked with me, because they understood, life happens. They made sure I got the correct information to study and if I had to come to class late, also made sure I was caught up, even if it was to stay late to get me to understand the curriculum for that evening. Instructors like Jake and Issa, who studied the field and is currently in the field of study and is flourishing, gave me hope that I could do it also. I wanted to get into the field, so I spoke with career services and Mr. Mills or any one of the other staff was always there for advice and give an encouraging word. I was in the health insurance field in management, but I knew if I wanted to make that transition to my field of study, it would have to be sooner than later. I spoke to Mr. Mills again and he reviewed my resume and pushed me to step out on faith to look for something outside of what I was currently doing. I came across an (b)(6) position as (b)(6). They were looking for someone with a health insurance experience, but with a technical background. I clearly fit the mold. Again, I was scared because I knew that it was a good fit for me, but the technical part was new. By going to school at ITT and close to getting my degree, the Director and VP knew I was the person for the job and hired me on the spot. Honestly I knew that without the knowledge I now possess from school and sticking with the program, I am succeeding in my field and didn't have to start over. I have to give thanks to those that help me get to this point, the staff at ITT. Because of them pushing me to want me to do better for myself, I am. I currently make more money than I did as a supervisor and I discuss system and network systems daily with my peers and I report directly to my Director and Vice President concerning these issues. I am a living witness that if you want something out life, you have to take the time and put in the work to get it, but I know I couldn't have accomplished this without ITT. In conclusion, I say Thank you.

Sincerely,

(b)(6)

Kendall Elam

May 3, 2016

To whom this may concern,

My name is Ryan Irby and I am a student at ITT Technical Institute in Richardson, Texas going for a degree in (b)(6). I recommend this educational institution above the other universities I've attended in the past.

After serving four successful years in the military, I started my education at the (b)(6)

(b)(6)
science program since I'm passionate about computers and technology. Halfway through my degree, my passion was losing it's fire because I had a strong foundation in math and computer programming concepts, but no application of that knowledge. My advisor and some senior students even recommended that I choose another school if I want to apply that knowledge, as (b)(6) most likely won't give me that. (b)(6)

(b)(6)
Since it was close by, (b)(6) Nice campus, veteran friendly and my family highly recommended it. The application process was a bit backed up being a popular campus, but they gave me special privilege to attend classes while they worked on my transfer of credits. After a week, I found out that only two credits would transfer. I didn't want to start over so I gave school another break and looked at other options.

ITT Technical Institute was right across from UTD and I had a friend that was graduating from there. He told me about his time in the drafting & design program and said he enjoyed his time there a lot more than UTD because of the small and focused size of the campus. I gave ITT a try and was immediately hooked. Not only do I enjoy the small class size, the instructors actually have time and patience to help with any questions I have. I also enjoy the fact that instructors have worked and applied these skills in their workplace, and they share that experience with the students.

The hands on practice with the labs and homework has reignited my passion as a computer programmer and software developer. I am graduating on June 23, (b)(6) and I'm proud to say that will be a graduate of ITT Technical Institute. Thank you.

Sincerely,

(b)(6)

Ryan Irby

To Whom It May Concern:

I writing on behalf of ITT Technical Institute, Richardson, TX. ITT Technical Institute has helped me go (b)(6) per hour in my career. I came to ITT Technical Institute (b)(6) years ago (March (b)(6) – March (b)(6)). I wanted to make more money because I had the experience but not the degree so I attended ITT Technical Institute to get my Bachelor's Degree so I could earn more and I was able to do that. When I completed my degree (Bachelor's Degree in (b)(6)) I shortly got a job in my field as a (b)(6) for (b)(6). I am so blessed to have gone to ITT Technical Institute Richardson, TX Campus. The instructors were great and I learned a lot. They have given me what I needed to be successful in my career. I am so grateful and glad that I attended ITT Technical Institute.

ITT Technical has proven to do what they said which was to get me a job in my field. Now, I am doing what I love and in my field.

Thanks ITT Technical Institute –Richardson, TX for making my dreams come true which was to graduate with my bachelor's degree with honors and I have done that.

Best Regards,

(b)(6)

Thomas Scott Hughes, letter on behalf of ITT Tech

From:

Thomas S. Hughes
ITT Tech Student

(b)(6)

To Whom It May Concern:

I am writing this letter to reflect some of benefits, advantages, and positive experiences that have been part of my ITT student career. First and foremost, I would like to express I am a (b)(6) in the Bachelor's degree program (b)(6) and am speaking from a great deal of experience at this facility, with this teaching staff, and with these administrators.

First, the teaching staff at this campus is fantastic. I had tried to go to a more standard college and had a lot of problems with class sizes and professor availability. Every teacher I have had at this campus: wants to be sure I am learning my materials, has offered or has actually taken their own time and teaching materials to give me further guidance and instruction, and matches the investments of any student they are responsible to teach. This is a culture and I see it outside of my classes when I am allowed to use lab classes that are in session.

The staff themselves make sure to guide students and keep students on path with any "out of class" issues such as financing, curriculum and degree decisions, and even technology purchases (being able to have access to software they need to test on use that most people could not afford as individuals). On the occasions that I have had a conflict, the staff rarely lets me worry about the situation, assures me that they can help me, and has never failed to assist me and follow through on their word.

The facility itself is very well planned. The Virtual Library system gives access to the texts of your study, but also offers countless other texts to further your own personal or professional research. The students are offered technology to use on campus for anything we do not have personal access to, and I have never been turned away when I have requests to sit in a class I might have an interest in or talk to a professor who might not be my instructor, but can help me in my studies.

I apologize for the generalities of my experiences at ITT, but the only way I could explain "Who has helped me at ITT?" would be to walk you through the building to almost every room. And "How they have helped me develop as a student, in my present professional position, and for my future plans?" could only be answered by saying: "They have helped me in every way that I have requested and usually more than I expected".

Thank You for Your Time and Attention,

(b)(6)

Thomas S. Hughes, Student

ITT TECHNIAL INSTITUTE

Richmond, VA 23235

To who it my concern:

I have attended ITT Technical Institute for the past (b)(6) years, and I'm currently enrolled as a full time student at the present time in the bachelor degree program (b)(6) I'm also currently employed full time with the (b)(6) as a (b)(6) (b)(6)

Below are some of the positive impacts that I have observed during my three years tender here at ITT Technical Institute:

- Campus: Well maintain with adequate parking, speed bumps, lighting, a roaming security guard on site, surveillance cameras, and an easy entrance and exit outlet.
- Staff & Faculty: Very high degree of professionalism, highly educated, very knowledgeable on the subjects they are teaching, and always willing to go that extra mile for the students. Must commend the staff and faculty on the free food and soft drinks they provide during student appreciation week.
- Software: Very appreciative of the 162 old and current up to date free software that is available from DreamSpark which include Microsoft Office, Project Professional, and Visio Professional.
- EBook: ITT-Tech decision to switch to EBooks gave the students not only the ability to download and view their books on smart phones but it also eliminated the need to buy bulky back packs.
- Computer Equipment: There are adequate computers in each of the too lab rooms, and the Library Resource Center (LRC). Every class room has an overhead project and screen for teachers and students usagé.
- Virtual Library: Great resource information coming from a small school.

- Library Resource Center (LRC) Highly functional for students who don't have computer equipment and need internet access.
- Career Counselor: Have a career counselor on site to help with resume writing, interviews and job placement.
- Grade Report: Students receive a weekly grade report to let them know where they stand in their grade assignments.
- Syllabus: At the start of each semester syllabus is provided.
- Vending Area: Hot and cold drinks are available.
- Photo ID: Available at the start of each semester.
- Online Student Portal: Give the student ability to access class schedule, email, grade reports for each class, Virtual Library, ITT Tech Faculty Directory, Career Opportunities, and Student News.

Sincerely,

(b)(6)

To whom it may concern:

I am writing to you to discuss my experience in attending ITT Technical Institute in Richmond, Virginia.

As a student/graduate with an Associate on (b)(6) working on my Bachelors in (b)(6) (b)(6) I just want to take a moment and say thank you to all the administration, faculty, and academic support systems at ITT-Tech. I already had a job in my field of study before I started ITT-Tech, but with ITT-Tech help and support teams I was able to advance to a better position at my job.

ITT-Tech has sharpened my computer skills and has provided me with the knowledge to advance in the mechanical and electrical working fields at my job. The teachers take time out of their busy day just to help us student to succeed toward our future. I have recommended my family and friends to the school. Going to ITT-Tech was one off the best decisions I ever made.

As a satisfied student/graduate of ITT-Technical Institute, I currently use the skills and teachings of all faculty and staff towards the betterment of myself personally and professionally. While here I have greatly appreciated the constant attention during my times of struggle to achieve what I consider to be a brighter future.

Thank you for your time and consideration while I express my personal experience while here at ITT Technical Institute of Richmond.

To Whom It May Concern:

I am writing this letter in regards to my experiences while attending the Richmond, Virginia campus of ITT Technical Institute.

First, I am happy to say that all of my classes has helped improve my critical thinking skills. Not only has the way I view problems and issues changed but also how I express them, both verbally and in written form. The instructors are always helpful in and out of the classroom. The letters of recommendation from my instructor and the Department Chair was very instrumental in me gaining employment with the (b)(6) as an (b)(6). The instruction that I receive is visible in my work every single day. I am currently considering applying for a promotion due to the confidence that I have received from the quality of instruction at ITT Technical Institute.

Thank you for allowing me the opportunity to define my educational experiences at ITT Technical Institute.

Sincerely,

(b)(6)

To Whom it may concern

This letter is to express my experience while attending ITT Technical Institute in Richmond, VA

As a student of ITT tech and (b)(6) graduate with my BS in (b)(6)

(b)(6) I am proud and excited about the opportunities that lie ahead. I was blessed to have some of the best instructors in all my courses. Instructor with real world experience Although I have years of experience as a Technician, ITT enabled me to think outside the box. To listen intently at what the customer is asking for. What steps go into building projects. The lab time and group discussions were special. The lab time was invaluable. Building projects and seeing them actually work as they were designed to. Seeing each other's point of view, testing and with the instructor help coming to conclusions. I know that we were given the information and opportunity to succeed. The Learning Resource center was great. The assistants in the LRC were very helpful with finding information and showing textbooks that were available to help. The career services people were always concerned about our employment. Were we working in field or out of field.

As I move on to bigger and better things, I know that my education at ITT will have touched on things that are going to enhance and make better in my career.

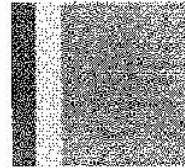

I am a (b)(6)

ITT Technical Institute

May 2, 2016

To whom this may concern,

During my years at ITT Technical Institute, I have been through a lot of trial times and many times was on the verge of dropping out. Sometimes words cannot express our immense gratitude towards a person. Today I am facing short of words to express my immense love and respect that I have for some of my instructors. In this competitive world where every person thinks about minting money your main aim was to deliver quality education. Most of the instructors had that spirit that brings the best out of students. They gave me the required motivation to move ahead in life. Not only were they teachers but also mentors. It was just what a perfect mentor is all about. I look back upon that time as so important in the development of the person that I am today. You taught me discipline. You taught me dignity. Much more than English, Math, Statistics, and Engineering which was what you were supposedly teaching me, you taught me that I could achieve more than what I or other people thought that I was capable of. I could be a success.

To whom it may concern:

I am writing to you to discuss my experience in attending ITT Technical Institute in Richmond, Virginia.

As a student/graduate of (b)(6) I will be receiving my Bachelor's degree in (b)(6) in (b)(6). I feel the faculty and academic support system at ITT gives the Graduates a well-rounded educational background to be competitive in today's electronic job fields.

I have enjoyed my time here at ITT and have gotten a lot of positive feedback from various companies since I've been attending ITT Tech. With smaller classes it has been easier to communicate with the instructors on a one on one basis which makes the learning process easier especially when you have questions.

Thanks for the opportunity to describe my personal experience at ITT Technical Institute

Tanya Kirpaul
Richmond, VA
ITT Technical Institute

To whom it may concern,

Sometimes we forget the impact that we have as teachers. Schools are busy places, and teachers are busy people, so it's not surprising that sometimes we miss out on chances to stop and reflect upon the influence that we wield over the young people in our care. Often, it's the little conversations, the easily-forgotten asides, the having your back, the friendly smile or brief compliment that mean the most to young people, and while we might forget them by the time it comes to write the next report or plan the next lesson, those words can remain with a young person for a very long time, shaping their personality and their thoughts. For instance my dean Mrs. Olsen has sat with me many of times, for words of wisdom, a motivation session that was needed, or just a moment to breathe. She's bestowed an abundance amount of what she has learned throughout her journey in life upon me, and for that I am grateful.

During my many years as a student here, I've learned more than I thought I anticipated I would. I want to express my sincere gratitude for all the efforts you have taken during these academic years. I appreciate the way the professors and career services showed concern about my work, and how they were willing to go out

of their way to help me through any issues I was having at the time.

ITT Technical Institute has changed my whole aspect on my learning, I wouldn't be where I am today without them. Their encouragement and persistence in my associate and bachelor years has taught me that I am who I am, and to get to the top, it's all down to me. I am capable, but it will take hard work and lots of dedication.

Warm regards,

Tanya Kirnaut

(b)(6)

To whom it may concern

I Kevin Williams have attended ITT-TECH for almost (b)(6) years now. I have developed many skills that I haven't had since I attended high school. I have learned several skills in

the (b)(6) department for the associate degree and working on my Bachelors in

(b)(6) I have received one degree already and has helped me develop work skills, better education, and computer skills. ITT-Tech has provided me with many options and now available to apply for jobs I never qualified for in the past. The teachers are very hand on and easy to talk to. I would like to thank Mrs. Taylor for making it her business to get me to school. Mrs. Taylor called me every day until I came up to the

school and signed up. I also stayed on the dean's list the whole time carrying a three point seven grade average the whole time attending school. Thanks to ITT-TECH I am now working as an (b)(6) and looking to achieve greater goals.

Sincerely,

(b)(6)

Enclosure

(b)(6)

To Whom It May Concern:

Funny how time flies when you're having fun. This really is a true statement.

Greetings my name is Corey J. Cook, I am a student at ITT-Technical Institute in St. Rose, La. I am having the most unbelievable time of my life right now. I started my journey in (b)(6) by coincidence another student Zina Richards whom I met at my previous job. (b)(6)

(b)(6)
(b)(6) Zina told me about ITT in St. Rose and about her recruiter at the time who was Karen Barrett. I saw the commercials several times over the years, but had never really given it any thought because I wasn't sure where St. Rose was, I thought it was really far until she explained to me it was right past New Orleans Louis Armstrong International Airport. Knowing this made me feel much better about traveling to this location. I called and spoke to Karen Barrett and scheduled an appointment with her to take a tour of the school and get some information.

It was almost (b)(6) so I didn't think things would move so fast. I arrived on Tuesday September 9, 2014 and met with Karen Barrett, took a tour and the most important thing I can say that I remember her saying to me was: "Why would you put your future or something you enjoy doing on hold any longer?" Before I knew it, paperwork was done and most importantly classes started Monday September 14, 2014. I thought it was too late for that quarter and that I would have to wait until December quarter, but Karen informed me that classes started on Monday and I was all set.

My first quarter was very interesting; upon meeting my instructors I had a greater sense hope for a brighter future in the IT field. However, the real task came in the beginning of my second quarter. Two weeks in I was ready to give up. The instructors gave me an updated weekly report on my progress in class. I will never forget I had (b)(6) for the first quarter, (b)(6) I had

(b)(6)
(b)(6) am so grateful to Karen

Schuber (b)(6)

(b)(6)
stacking for tuition. The most amazing thing happened while listening to her was just that: I listened. I heard everything she was saying clearly and Karen Schubert (b)(6)
(b)(6) I finished my second quarter with (b)(6) and
(b)(6) I have not looked back since.

After that experience I truly opened up to be the person that I really am and allowed myself to meet some awesome instructors and make some great friends. Cedric Turner is a life saver for both College Math 1 and 2, I lived in the LRC for tutoring and I am forever grateful to him as well. Terry Armstrong is one of the best instructors who actually cares about his students in college math. Barry Pike is one of the best instructors I have ever met in my life and very informative. Nicole Williams is well-rounded and is definitely needed here; she is always willing to help whenever and keeps pushing you. Dean George

Williams always has some great words of encouragement and motivation to keep me going. All the instructors whom classes I've gone through have had some impact on my education here at ITT, but those that I have named have truly impacted my life.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

(b)(6)

ITT Technical Institute

To Whom It May Concern:

I am a graduate of the (b)(6) in (b)(6) and a multi-graduate of ITT Technical Institute (St. Rose, LA) in (b)(6) (Dec (b)(6), (b)(6) (Oct (b)(6), and (b)(6) Sept (b)(6). From the time I started at ITT Technical Institute, in (b)(6) the Recruiters, Financial Assistants, Director, Library Assistants, Dean, Associate Dean, Chairs, and Instructors are all amazing, knowledgeable, and competent individuals. Without meeting them, I would not have attended this institution.

Not only was I a student at ITT Technical Institute, the Associate Dean, at that time, noticed my talent for mathematics and hired me as a Learning Resource Assistant to tutor students. This is not my primary job position, but I enjoy working with the students and understand them since I had the same experiences when I was a student. I am also employed as an (b)(6) (b)(6)

I obtained this position with assistance from Career Services personnel and a couple of dedicated instructors. They have made the biggest impact in my career field and I am grateful that I have this opportunity to still work beside them. For my career decision, in Information Technology, choosing to attend ITT Technical Institute was the correct choice. I will never forget all of the positive outcomes that have happened since the day I started my education and I am forever indebted to the kindness of the employees and their awesome service that I received then and still do today.

Thank you for taking valuable time out of your schedule to hear me out.

Sincerely,

(b)(6)

Graduate Class of (b)(6) and (b)(6)

To ITT-Tech

ITT has many great qualities for the fields of study that is offered. I attended the St. Rose, La.

campus, There I pursued my Associate and Bachelor's degree. I currently work for (b)(6)

(b)(6)

within the Technology Services department. ITT has help

develop the skills I needed for the work force at the time I was in school. The courses and labs

which is offered at ITT help me understand technology more because of the teaching style and

hands on experiments in class. ITT Tech also help with developing my social skills by having us

work with our classmates in groups and coming together to get things completed. I feel that still

today ITT is preparing students for the IT field to be more productive than traditional college

because of the teaching style and teachers at ITT. I think that most students attend ITT enroll

because of other students that have attended and want the same experience and hands on

education that their friend or family member received at ITT. ITT has definitely changed the

way I look at technology and it most definitely prepared me for the Technology field.

(b)(6)

May 2, 2016

To Whom It May Concern:

I am writing to discuss my experience while attending ITT Technical Institute in St. Rose, LA.

As a recent Associate's graduate and current Bachelor's student of ITT Tech, I can say that I have had a wonderful time. The learning environment and has been more than adequate to assist with my transition from military life. The administration, faculty and staff all help and care about every student that passes through the doors. They ensure we have the best education we can receive and if there is any concern that may arise they ensure they help us to get through. I know I can personally go to the Director, Dean or Associate Dean if anything were to happen and they would provide immediate assistance if their schedules permit. The Career Services department helped me and continues to check on my work experience and assist with job placement.

I am proud to be a student of ITT Technical Institute and proud to demonstrate what I've learned during my time here while I am on the job, and to be a reflection of the students, faculty and staff in a positive way.

Thank you for the opportunity to express my thoughts and feelings on experiences while here at ITT Tech.

Respectfully Yours,

(b)(6)

Andria Barnes

To whom it may concern:

Hello my name is Marcus Corbacio I am writing this letter in regards to my attendance at ITT Technical Institute Dunmore, PA Campus. I attended class in June of (b)(6) to June of (b)(6) and majored in (b)(6). I can say with certainty that the success I have retained was because of the experiences I had while attending ITT Tech. I am currently employed at (b)(6) (b)(6) an engineering drafting firm. My work day consists of drafting node pole profiles and site plans for where the nodes are to be set; this is usually in major cities throughout the United States. Nodes can best be described as mini satellites that are set on existing utility poles, or they can be placed on new poles as well. The purpose of the existence of these nodes is for better cell phone connection in areas where there is a significantly large population and there is a weak wireless connection. However, I would never have attained such a position if it were not for ITT Tech. All of the class instructors were always there to entertain any questions I had and always made time for one-on-one conferences for all of my classmates. The career service aspect end of ITT Tech was absolutely outstanding. When I was approaching my last quarter this is when the job search began. I couldn't thank Lore enough; Lore was always informing me of new job opportunities that may be coming in the near future. Lore not only did this for me but for all of the students that were soon to be graduates from ITT Tech. As I mentioned before ITT Tech Dunmore, PA Campus formed the individual that I became today.

Sincerely,

(b)(6)

Marcus A. Corbacio

To whom it may Concern:

My name is Samantha Gonzalez and I am an Alumni for ITT Technical Institute for the Dunmore, Pa campus. I graduated in July of (b)(6) with an Associate's degree in (b)(6). (b)(6) am currently employed as a full-time (b)(6) a (b)(6) which is a Civil Engineering, Environmental and surveying firm in East Stroudsburg, PA. My experience at ITT Tech was great. IN my opinion, the instructors were very knowledgeable. They taught us the necessary curriculums as well as life-lessons on what we should be expecting to see out in the field. The classes were challenging, however, our instructors were more than happy to go out of their way to help us. The Career Services and administrations have also gone out of their way into helping us achieving our goals to graduate and find careers. Never did I think that I would have been employed at (b)(6) without their help and support. It gives me great pride say that I am an Alumni for ITT Technical Institute.

(b)(6)

Samantha Gonzalez

Date:

(b)(6)

May 2, 2016

To Whom It May Concern:

I am writing this letter to you to tell you a little bit about my experience at ITT Technical Institute in Dunmore Pennsylvania.

As a student of ITT Tech, I love the education I am receiving to help further my career in the IT field. The support I receive from all faculty and administration is exceptional. From speaking with individuals that are working in the IT field, I am receiving a great education and have been given the stepping stones to launch my career in the field I am passionate about.

The teaching faculty is outstanding and goes out of their way to help every individual student with one on one help. I feel that that kind of commitment to the students is what helps the student learn more efficiently and allows us to understand the material.

ITT Tech has given me unique opportunities with the skills I have learned so far. I was able to obtain an internship with the company I am currently employed with. I was also given the task by my manager to create, design, and maintain a database for my current job to facilitate the reporting process. Without the knowledge I have received at ITT Tech, I would not be able to take on such responsibilities.

The person I am today and the knowledge I have, as it pertains to the IT field, would not be the same if it was not for the support and guidance I have received from the faculty and administration at ITT Technical Institute.

Best Regards,

(b)(6)

Ken Smoke

2 May 2016

To Whom It May Concern,

I currently attend the ITT Technical Institute campus in Dunmore, Pennsylvania. I first enrolled in June of 2015, and am excited to graduate in June of (b)(6). Over the (b)(6) that I have been going here, I am glad to say I have learned so much in my program (which happens to be (b)(6) (b)(6)), and that is mostly because of the support of instructors, administrative

(b)(6)

knowledge would get me. From the very first class I took here, I immediately began learning. It's hard to gauge what you do or don't know about a subject and that can be either scary or inspiring. Through the classes I have taken I have grown so much confidence in my own ability to work in the IT field and have taken interest in multiple subjects that I wish to pursue even past ITT Tech. As for the curriculum itself, it is easy to grasp for when you need to learn and challenging for when you want to get a further understanding for it. The content they are teaching us is definitely shining through in my life outside of school. I and the people around me are noticing that I am recognizing more and more of what I know and need to know in real life situations.

When you attend such a small campus, it's quick to make friends or at least get to know people. It's much easier to learn when you are learning alongside friends and even people currently working in IT fields. If someone in class is having an issue grasping an idea the instructor is trying to convey, there have been many times where we all pitch in to help them understand. I would also absolutely have to credit the instructors who teach the core IT classes. They all have experience in the "real world" regarding the fields they are teaching, and they are happy to apply that experience to their lessons. They are dedicated to the students and will go high and low to make sure we all understand exactly what we need to so we are able to excel after we graduate. It's due to the people of the Dunmore ITT campus and the things I am learning here that I am positive I will succeed in my chosen career that they are opening me up to. A year ago I would definitely not be able to navigate, let alone manage a network containing switches, routers, and multiple PCs. Nor would I have been able to edit or create databases, or execute and write scripts in Linux.

Thank you for taking a chance to read my own take on why I am so happy with what I have learned so far at ITT Technical Institute and what I hope to learn.

(b)(6)

Jill Christian

May 2, 2016

To Whom It May Concern:

I am writing to you to tell you about my experience at ITT Technical Institute in Dunmore, Pennsylvania.

As a student of ITT Tech, I'm proud of the quality education I am receiving. Thanks to the amazing staff I feel prepared to take on challenges when I am finished here.

For example, the teachers are some of the best. They focus on making sure we understand the content and aren't afraid to help or answer questions. Without their help I wouldn't have been able to get a job at (b)(6). The Career Services department is amazing is always keeping me updated on job openings out there in the IT field.

The content being taught is very informative and hands on which is the best way to learn, I think. Programs of study are very relevant to what is being used out in the real world, which is what we need to excel once we are done with our time here. Lastly, the academic support is amazing with all the resources and more we need to finish projects.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I am learning here during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Best Regards,

(b)(6)

Sean Kerrick

To Whom It May Concern:

I am writing this letter from the ITT Campus located in Dunmore, PA to express my feelings and experience towards the school.

I am a student of ITT Technical School and am very happy to have this opportunity. That aside I would like to mention the quality of the services that are provided in said school. I am very impressed with the faculty and staff who don't hesitate to help whenever I need them. I have had very few instances where I have had any issues that needed to be addressed in this school, but the few times I did I quickly brought the issues up to staff. They immediately took responsibility and fixed the issue. As far as the teachers go, I have also had an excellent experience. Professors are very attentive and have tremendous patience with all the students. I feel as if I have no problem with ever coming up to them for assistance. I can always count on them if I need them. This school has given me far more opportunities than I was hoping for and would highly recommend this school to anyone.

I certainly believe that the experiences and skills that I have learned from the (b)(6) (b)(6) program at ITT will follow to bigger and better things, whether it be career related or life related. I also hope to demonstrate these abilities that I have learned into the work force so that I can better show what ITT is really capable of.

Thank you so much for giving me this opportunity and I hope to make this school proud.

Sincerely,

(b)(6)

Steven A. Serfass

To whom it may concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Dunmore, Pennsylvania.

As a student of ITT Technical Institute, I'm proud of the quality of the education I am receiving. Thanks to reliability of the administration, faculty and academic support systems at ITT Tech, I am prepared to take on the challenges of being a productive and career-orientated employee.

Since I started ITT Tech I have been given many opportunities to progress in the areas of electronics. I am very grateful for this. The instructors and staff have been there for me and helped me to be in a position to succeed. Career services, registrar and all other services have gave me the tools to be prepared here and be at my best. I feel like when I graduate from ITT Tech I will be prepared to go out to the workforce of electronics and have a future with longevity. I speak highly of ITT Tech and the education that comes with it. Thank you again to the team at ITT Tech.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

(b)(6)

Justin Current

To whom it may concern

I am writing this to you to talk about my experience in attending the ITT Technical Institute in Dunmore, PA.

As a current student of ITT Technical Institute, I'm very grateful for the quality of the education I am receiving. If it wasn't for the companion and support of the administration I would never have made it this far. Since returning to this school I feel like I am better prepared to tackle the challenges of being a desirable employee.

When first enrolling in ITT I was having a lot of personal issues and it was effecting my ability to give my schooling all the attention it needed. It got to the point where I had to leave the school and take a break to get my life straightened out. But the ITT staff remained supportive and did everything they possibly could to help me straighten things out and get back to school and I am very grateful for that.

Since returning to ITT I am consistently making high honors and maintain a perfect attendance. I am significantly more confident in what I do and it reflects in my work. Without the skills and work ethic that ITT has taught I would not have my current job and be able to maintain my current life-style. ITT Tech has opened a lot of opportunities for me and with the help of the teaching staff I am in contact with potential employers. This is priceless to me because it gives me the chance to see what it will be like you in the real world along with giving me the insight of what it's that these employers are looking for and expecting from me. I will be graduating this summer and it would not have been possible if it wasn't for all the support that I have received and continue to receive and I am so grateful for that.

As a proud student of ITT Technical Institute, I believe that the knowledge and skills that I am learning along with all the compassion and support that the staff has demonstrated shows their true integrity and quality of the staff and program as a whole.

Thank you for the opportunity to talk about my personal experience and with ITT Technical Institute will remain an important milestone in my life.

May 2, 2016

To Whom It May Concern:

I am writing this letter is to share my experience in attending the ITT Technical Institute in Dunmore, Pennsylvania.

Before applying to ITT Technical Institute, I worked as a (b)(6) for 12+ years. I then decided to change my career field from healthcare to information technology due to the passion I have working with computer systems and other technology. At first I was a little skeptical about attending a technical school instead of a traditional college but after having attended ITT Tech for over a year now I can say that I made the sensible decision to attend this school.

As a current student of ITT Technical Institute, I am very pleased with the hands on atmosphere that the school provides for me while working and studying in the computer lab. When I graduate from ITT Tech, I am confident that the exposure to the computer systems, software, hardware, and other technical equipment will prepare me to excel in the Information Technology field.

Also, the extensive knowledge of my teachers who have been sharing with me their experiences with real world applications has also made me feel confident in what type of work I will be doing when I graduate. Listening to their stories or even asking them questions about how the lessons and training I am learning would apply in the Information Technology field when I graduate has made me feel very satisfied with my decision to attend ITT Technical Institute.

Another thing I would like to share with you is how eternally appreciative I am with the staff of The Career Services department. They were instrumental in assisting me in obtaining my current (b)(6) position with the (b)(6) in Honesdale, Pa.

The knowledge and skills I have attained at this point demonstrate the integrity, devotion, and excellence of the staff, faculty, and academic programs here at ITT Tech.

Thank you for the opportunity to share my personal experience in obtaining a quality education at ITT Technical Institute.

Sincerely,

(b)(6)

John A. Ortiz

To Whom It May Concern:

My name is Jennifer Miller and I am a recent graduate of ITT Technical Institute: Breckinridge School of Nursing in Lexington, Kentucky. I am writing this letter to share my experience at ITT Tech while pursuing a degree in the field of nursing.

I will start by sharing my first experience with the school. I walked into the door knowing that I wanted to pursue more in my life and to have a career in the medical field where I could help people. I also walked through the door (b)(6)

(b)(6) I was welcomed by the staff at ITT, the admissions representative encouraged me yet ensured that I knew of the difficulty of the program and the commitments I was going to have to make. After making the decision to begin school again I was slightly overwhelmed but was given much direction by the staff. Everyone from the admissions office to the financial aid office were very friendly and helpful.

It wasn't long before I found out that the admission representative was correct about the difficulty of the program. Even though it was difficult I enjoyed that I was being challenged and taught how to 'rise to the occasion'. All of the instructors were knowledgeable in the classes that they taught. They were able to give me the information that I needed to be successful. Most importantly all of my instructors cared about my success. I knew I wasn't just another seat filling up a classroom to them. Although they challenged me to become my best they made it clear that they truly cared if I succeeded. I could not express enough how important it is to have instructors and faculty that care for your success while completing nursing school because although a rewarding career it is difficult and stressful. There were times it was very hard to manage school work, clinicals, a full time job, and a family, however, just knowing that the instructors were there for me caring if I did well made a huge difference. You can have all the knowledge in the world but if your heart is not in it success is difficult. I never doubted that my instructors wanted me to succeed. They made their selves available for tutoring, phone calls, and encouraging words when needed.

After two and half years I successfully graduated with an Associate's Degree in (b)(6) in March (b)(6) and went on to pass my NCLEX. I am thankful that I chose to complete my degree at ITT Tech because I believe they not only gave me the knowledge I needed to be a successful strong nurse but they guided me in a caring way that ultimately helped with my success.

Sincerely,

(b)(6)

Jennifer Miller, RN

May 3, 2016

To whom it may concern,

I am currently a student at ITT Tech-Breckenridge School of nursing located in Lexington, KY. I am a full time student and full time employee at (b)(6)

(b)(6) From the very first day that I entered ITT I have felt welcome. One of the most positive experiences at this school is the interaction between students and instructors. All the instructors make you feel like you belong.

Sincerely,

(b)(6)

Cheri Harris

Mary Goodman (17606972)
PO Box 1076
Berea, Kentucky 40403

May 3, 2016

To whom it may concern:

I am in my (b)(6) quarter at Breckenridge School of Nursing in Lexington Kentucky. I work full time as a (b)(6) at (b)(6) also in Lexington Kentucky on the Telemetry floor. I have had a positive experience with the college and I am very pleased with the assistance offered from administration.

Mary Goodman

(b)(6)

To Whom It May Concern,

I am currently enrolled at ITT Tech's Breckinridge School of Nursing at the Lexington, KY campus. I am employed at (b)(6) I attended classes at other colleges and was unsuccessful. I was recruited to come here by co-workers who were current students and have now graduated and successfully passed their NCLEX test to be registered nurses. My first day applying to the school and getting everything together with financial aid was one of the most refreshing experiences I've ever had at any university. The staff new my name and still know it to this day. The small classes make learning more personal because the instructors make it a point to get to know each student as an individual. I know I will be successful here. I know I will be able to graduate and pass my NCLEX. I know this because of the phenomenal support system that comes with being an ITT student.

Sincerely,

Sarah Oakley

(b)(6)

To: Whom it may concern

My name is Kisha Crowders. I currently attend the Breckinridge School of Nursing in Lexington, Ky. I am employed at (b)(6) as a (b)(6).
(b)(6) The positive experience at ITT-Tech for me is the willingness of teachers to help you when need it. I have never encountered the compassion that the teachers share to make sure you achieve your ultimate goal. Their time, dedication, and attitude are phenomenal with students they come into contact with. I am forever grateful and much appreciative of the staff and directors of this program.

Sincerely,

Kisha Crowders

(b)(6)

May 2, 2016

Dear ITT,

I am currently enrolled in my third quarter at ITT. I am in the (b)(6) program at the Lexington campus.

Previously I have been employed in the IT field as a (b)(6)

(b)(6)

(b)(6)

(b)(6)

ITT has been a very rewarding experience. I am learning new skills in my field and updating my knowledge with newer technologies. The instructors teaching me have a passion and skill for teaching. It is obvious they enjoy teaching and have the knowledge and background to do so.

I look forward to utilizing the skills I gain at ITT to provide future employers with a competent skill set. I believe they will appreciate the value of ITT as much as I do.

Sincerely,

(b)(6)

/Tony A. Sseresses

May 2, 2016

Dear ITT,

I am student currently enrolled in the (b)(6) program at the Lexington, Kentucky campus in my third quarter of study. I am also a (b)(6) to Scott McCombs, the IT Chair here at the school.

Deciding to attend college in your (b)(6) The staff here in Lexington have been very encouraging. My student advisor, Abby is like having my own personal cheerleader, she often asks me how I am doing when we pass in the hall. Mr. McCombs has a very hands on approach and working in the lab helps apply the reading materials.

My main concern when enrolling was the two Math requirements. That was before I met Dr. Bendall. He breaks down the concepts into manageable categories and then explains the formulas in clear, simple language. The pacing is even good, not staying in one topic so long that I get bored. Math is now one of my favorite subjects.

The (b)(6) programs classes I have taken so far are broad-based concepts, teaching the terminology and building blocks that are built on in each consecutive quarter. I look forward to my classes and the instructors are knowledgeable and helpful.

Sincerely,

(b)(6)

Cynthia Dawn Grant

To whom it may concern,

My name is Tanesha Thurman, I am a current student at ITT-Technical Institution-Breckenridge School of (b)(6) at the Lexington, KY location. My experience here at ITT-Technical Institution has been very positive. Going into the (b)(6) program I didn't have the highest confidence that I could do what it takes to obtain my (b)(6) the staff here at ITT-Technical Institution made every effort to give me the boost of encouragement and tools that I needed to succeed. I currently work at (b)(6) in Lexington KY as a (b)(6)

Ricky Casey

(b)(6)

My experience at ITT TECH has shown me the value of hard work and determination.

In addition to my enthusiasm for performing well, I would bring the technical and analytical skills necessary to get the job done.

The staff helped me by guiding me through the steps and procedures for each task in class. They always gave me a good idea of what expected of me with the syllabus of each class.

Now having a degree from ITT TECH has created a better life for me and my family.

Thank you again for your time and consideration.

Sincerely,

(b)(6)

Ricky Casey

March

(b)(6)

May 3, 2016

To whom it may concern:

My name is Ron Kerber and I am a graduate of the (b)(6) Associate Degree program and a graduate of the (b)(6) Bachelor degree program. I am also currently enrolled the (b)(6) Associate degree program planning to graduate in June (b)(6). Following graduation, I plan to enroll in the (b)(6) Bachelor Degree program.

The practical hands on experience we receive at ITT Tech is hard to come by. Our capstone classes really drive us to show how much we have learned throughout our degree. For my (b)(6) Capstone Project in 2012, I demonstrated voice automated residential home by using a microcontroller. I demonstrated how to control lighting, not only on and off but different intensities. I also had demonstrated temperature control. I designed a customer circuit in order to power everything.

For my current capstone project in (b)(6) I met with the (b)(6) classes in hopes to create a larger scale Capstone project that would include all three programs here at ITT Tech. The capstone project is based on the national electrical grid. The project will demonstrate how the utilities generate power by using fossil fuels, hydroelectric, nuclear power, and renewable energy such as wind generation and solar generation. This will also break down how each facility operates. The Drafting and Design students created 3D models of a solar equipped house, fossil fuel facility, hydroelectric facility, nuclear facility, wind turbine, substation, and solar generating facility. Along with the 3D models and elevation and section cuts are created labeling each part. All the models are to be placed on a display with an underlay of google earth showing location and proximity of facilities. Each facility was chosen by location. They are all on the same river. Each facility is broken down to location, operation and construction. The Electronics Engineering students created an interactive display by using a microcontroller and custom design lighting boards as each topic is covered the corresponding model will light up to show location on the map. The lighting is controlled by a remote. There is also an AC/DC generator, and a solar panel that explains how electricity is created. The AC/DC generator and the solar panel is setup in a way that they will generate electricity and go through boosters that increase the voltage and route it to different parts of the grid. This is how the electrical substation is demonstrated. The solar house was designed to be connected to the electrical grid and run off solar during the day and the utilities at night. The Networking students broke down the supervisory control and data acquisition system (SACDA). This is the way the utilities can communicate with the different facilities on the grid. SACDA is comprised of human interface units (HMI), supervisory (computer) systems, remote terminal units, programmable logic controllers and communication infrastructure.

With the time I have spent at ITT Tech - Charlotte South I was able to obtain the valuable tools needed to work and understand the engineering field whether it is electrical or design implementing the different techniques and different software platforms.

Today, I am employed at (b)(6) assisting in the design of electrical substation across the country. The quality of the education I received at ITT Tech has provided me with everything I need to be successful in my career field for years to come.

(b)(6)

Ron Kerber

May 2, 2016

Brenda S. Chipman

(b)(6)

Nathaniel Walker

ITT Technical Institute

(b)(6)

Mr. Walker,

I am writing this letter to express how much I have enjoyed ITT Technical Institute and how much it has impacted my life.

At the age of (b)(6) I decided to switch gears and start a new career. I have always enjoyed architecture and thought it would be an interesting field to go into. I started looking at schools but could not find anywhere that had night classes. My sister recommended that I talk to the people at ITT Technical Institute. That one suggestion changed my life.

I went over to ITT Technical Institute's Charlotte-North campus. They had exactly what I was looking for so I asked if I could enroll for the Fall semester. They explained that they work on quarters and that they had the June quarter starting in a couple of days. I said I would love to but I didn't have any money and not sure I could get everything done. They explained that it was a very easy process and that they could get everything set up for me to begin on time. I was beyond thrilled and totally amazed how easy it was. I was able to start on time and on my way to completing my Associate's degree.

While I was in school, I was able to get an entry level job with a contractor for (b)(6) working on the field plans for their cable wiring. It was an interesting job but not exactly what I was looking for. The 2 years of my Associate's degree went by so fast. At the end of that time, the chair of the department, Mr. Walker, had explained the Bachelor's program and that it was a good extension to the Associate's program. So upon graduation I enrolled in the Bachelor's of Science (b)(6) with an emphasis in (b)(6). This really built upon what I had already learned and while working on that degree, I received a job with a production home builder. This was such a great job and I was able to apply what I had learned in school so far to my job.

I have now earned my Associate's degree along with my Bachelor's degree and I am currently working towards my Master's in (b)(6) This is all with ITT Technical Institute. I have also recently started a new job that I absolutely love, drafting custom homes.

If it were not for ITT, I am not sure what I would be doing now. Because of their programs, ease of admissions, assistance with financial aid, and class schedules, I am now doing what I love.

Thank you ITT Technical Institute!

Warm regards,

(b)(6)

Brenda Chipman

May 3, 2016

To Whom It May Concern:

I wanted to write this letter to speak to my appreciation for the faculty and staff of ITT Technical Institute Charlotte South. I am currently enrolled in the (b)(6) program and planning to graduate in September. (b)(6) When I moved to Charlotte, I came directly to the Director of Career Services, Jennifer Fulton, and made her aware of who I was and what kind of job I was looking for after graduation. She worked with me to find a job opportunity that was not only in field but also exactly what I was looking for. Ms. Fulton presented the right jobs to me and submitted me for several job opportunities over the past year. I was able to gain practical experience while enrolled in school.

Last week, Ms. Fulton submitted me to an opportunity at a very prestigious engineering firm and I immediately received a call for an interview. The faculty and staff gave me excellent references that landed me a job offer. I have my dream job and I am still two quarters from graduation. Mary Elmore, Campus Director, has the right staff in place at ITT Tech Charlotte South. These people care about us as students and our success. This group of people made all of this possible for me. I would not have this amazing job opportunity without them. The decision I made to attend ITT Tech was the best decision of my life. I could not thank ITT Tech and the people who work there enough for all they have done for me.

Sincerely,

Brenna Mrugala

(b)(6)

May 3, 2016

To Whom It May Concern:

I am writing to you to inform you about my experience at ITT Technical Institute in Charlotte South. I am currently a student in the (b)(6) program preparing to graduate in June (b)(6). I have already landed an infield job at (b)(6) as a (b)(6) (b)(6) and use the knowledge I received from my education at ITT Tech every day.

Unlike many of my classmates, I started attending ITT Tech immediately following high school. The faculty and staff were very supportive of me throughout my all of my courses. I did not have a lot of work experience and it was helpful to hear from my instructors and peers how to be successful in the information technology industry. If it were not for our Director of Career Services scheduling on site interviews on campus, I would not have gained the position I currently have today. ITT Tech gave me an opportunity that I never expected to receive. I received hands application to content that fully prepared me to be successful in the career field.

Enrolling at ITT Tech was a breeze. I had a fantastic representative in the Recruitment department that walked me through the admission process with ease. Financial Aid was always available to assist me and answer my questions. This is something my peers do not receive at other institutions.

Choosing ITT Tech was one of the best decision I have made in my lifetime so far, I believe the knowledge I gained will sustain me throughout my career. The faculty and staff always supported me and pushed me to be my best. The faculty, staff and administration of ITT Tech make the campus a better place to be because they truly care about the success of their students.

Thank you for listening to my story and how ITT Tech changed my life.

(b)(6)

Tamela Watts

May 3, 2016

To Whom It May Concern:

I am writing to you to tell you about my experience at ITT Technical Institute in Charlotte South. I am proud graduate of ITT Technical Institute and I am very thankful for quality of the education I received. I was well prepared to enter the work force and it is all thanks to caring, thoughtful administration, faculty and staff at ITT Tech. I currently work as a (b)(6) at (b)(6) and use the knowledge learned from my associate degree in (b)(6) every day.

(b)(6)

(b)(6)

ITT Tech gave me an opportunity that no one else would. The admission process was easy and the Financial Aid staff always made sure I had the funding I needed to continue my education. The faculty and staff supported me and my dreams, I would refer any of my friends and family to ITT Tech if they are seeking higher education.

I believe the knowledge and skills that I learned during my time at ITT Tech proves the integrity and quality of their faculty and academic programs.

Thank you for listening to my story and how ITT Tech changed my life.

(b)(6)

Channing Brown

To whom it may concern,

I am currently a student at ITT Tech Columbia, SC location, and in my (b)(6) quarter of my (b)(6) degree. I have enjoyed my experience at ITT Tech immensely. The instructors that I have had are very passionate about what they teach. I have learned a lot from them during the time that I have been here. Mr. Zakkary is a wonderful instructor that is always willing to go above and beyond for his students. He is extremely knowledgeable on all topics involved in the IT field. It has been a pleasure to be his student, and to be able to take in a fraction of his knowledge during my time at ITT Tech. Mr. McClain is a programming genius and has many connection in the field. I have learned a ton having him as my programming instructor. He has done more for me than I could ever ask of anyone especially an instructor. He is also very knowledgeable when it comes to his field and what he teaches here at ITT tech. He has helped me go passed any knowledge of programming I could have ever imagined to reach. He has also helped me when it comes to knowing exactly what is expected of me in the programming field. Then there is Mr. Haney who is also an amazing programming instructor. He also has taught me so many things to help me along the way when it comes to the field of programming. He has also been there to answer any questions I might have when it comes to programming. Ms. Wyndham was my Composition teacher without her I would have had all kinds of trouble throughout my Composition classes. All of these instructors go so far above and beyond what is asked of them for their students. I would have had a much harder experience if it wasn't for these instructors. They are always willing to do whatever is needed of them for their students. It doesn't matter what it is if a student needs their help they are there. I can never thank them enough for what they have done for me during my time here. All I can do is go on to pursue, and use the knowledge they have given me to make them proud. This is a just a glimpse into what my experience has been like here at ITT Tech. It has been a great experience meeting and having these people in my life. I know I will stay in contact with them for many years to come, and hope to work with them all someday in the field of IT.

Sincerely,

(b)(6)

Michael Weber

May 2, 2016

To whom it may concern,

I am currently a student at ITT Technical College, Columbia, South Carolina Campus, majoring in (b)(6). My experience at ITT has been an insightful one. The faculty and staff care as well as motivate their students. Instructors demand your best work as well as give accountability. Instructors are always available for outside help via phone or email, which is personally appreciate. The staff is always willing to stop and help by any means necessary. ITT was there for me when my condo burned and my family loss many of our belongings. Dean Brown would periodically call me to make sure we were okay as well as ask how classes were going. Her door was always open. Many of the staff such as Mr. Zakkary, Mr. Fathi Mohamed, Ms. Judy Williams, Ms. Jean Singleton, Dr. Stanley Harris, Mr. Matthew Calder, and Mr. Sam Haney all made some type of contribution at the time of this tragedy. I have learned teamwork and networking though some of these instructors and staff. ITT is just not an ordinary college, but family to me.

Sincerely,

(b)(6)

Stephen Gladney

To Whom It May Concern,

My name is [redacted] and Travis Perreault I am a current student of the Breckinridge
[redacted] (St. Petersburg campus). I started in [redacted] I will be
graduating [redacted]

So far, my experience here has been like anything in life, it has had its ups and downs. Its gets difficult when trying to keep up with the work, but eventually, it falls into place.

The instructors are great. My best instructor is animated, and is willing to work with me as long as I am also willing to put the work in. She cares about my success and makes herself available to me to help me be successful.

I currently work as a [redacted]
[redacted] My education has given me a more well-rounded understanding of the everyday issues I am faced with in my job.

My goal is to graduate this year and successfully pass my NCLEX. I would like to work in a hospital setting in emergency or intensive care. I would also like to further my education in a few years.

Thank you,

[redacted]

Travis Perreault

I am a Graduate of ITT Technical Institute with (b)(6)
(b)(6)

I graduated from the St Petersburg, Florida Campus back in (b)(6)

I am currently employed with (b)(6) which is an I.T. Company that uses all aspects of computer technology. We provide our clients Data recovery, Computer forensics, Network security and intrusion detection. As well as the standard computer and network installation and repair. I hold the position of (b)(6) and enjoy it immensely.

The experience I had with ITT Technical Institute was fantastic. The instructors were able to translate what we were learning into real life situations. I still keep in contact with some of the instructors today. I learn by seeing and doing not so much by reading books and the hands on approach really helped me understand the what the book was talking about. I recommend ITT Technical Institute to anyone that is interested in getting an education in I.T., Electronics, Drafting and Design and Nursing. I will also be reaching out to ITT Technical Institute's Career services when it comes time for (b)(6) to hire new employee's.

One of our clients is an Engineering firm that does Electrical, Plumbing and Mechanical for many of the building currently under construction in the Tampa Bay Area. Due to my education with ITT Technical Institute. They say their network and computers have never run smother.

To Whom It May Concern,

My name is Kendall Griggs and I graduated from the Information Systems/Cyber Security program in Tampa, Florida in (b)(6)

My experience while as a student at ITT Tech was both fulfilling and rewarding. I started attending ITT Tech at the St. Petersburg, Florida campus where I completed my (b)(6) (b)(6) Afterwards, I enrolled in the (b)(6) completing the program in (b)(6) (b)(6) During my time at ITT Tech, I also served as (b)(6) The instructors and staff are always eager and committed to help in making sure each student reached their full potential and genuinely interested in making sure our needs were met. Shortly before graduation in (b)(6) I landed a job as (b)(6) a non-for-profit healthcare organization with nine centers.

While at ITT Tech I further enhanced my IT skills and greatly improved my confidence in working as an IT professional. The attention I received from my instructors, the administrators, and the career counselor; I feel has made me a better prepared IT professional.

As a graduate of ITT Technical Institute I'm proud to be a part of a distinct group of Alumni's who have made notable careers in the IT profession. The quality of education is a direct reflection of the integrity and commitment by the administration and staff, which has prepared me to take on the challenges that come with being (b)(6) (b)(6)

I would like to extend my sincerest gratitude to ITT Technical Institute for allowing me to share my experience.

Thank you,

Respectfully,

(b)(6)

Kendall M. Griggs Jr.

May 2, 2016

To Whom It May Concern:

I started attending the Networking Systems Administration program in Pensacola only to (b)(6) I was happy to realize that I could continue my degree at the Saint Petersburg campus that unfortunately closed its doors. But, I was still close enough to attend ITT Tampa campus where I complete my (b)(6) program in (b)(6)

Overall, I have a very good experience at ITT Tech, most instructors are very engaging and brings to the class real world knowledge that holds the attention of the class, and all instructors seemed to love what they do. One of the best aspects is all work has clear objectives so you always know what is due when even if you miss a class. And ALL instructors are always available if you have questions through email or phone call.

As an ITT graduate I was able to get a job as an IT Support Technician at one of the local employers where my skills that I learned open the door to a more successful career and has many avenues for progression. I believe the knowledge and skills that I learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs. As an ITT graduate I'm proud of the quality of the education I received. Thanks to the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of what the IT field has to offer.

For example, in the 3 months I have been working (b)(6) (b)(6) This is what I was attending ITT for, they provided the necessary skills I needed to excel in this ever growing field. Without the attention from my teachers, career counselors, this would not have been possible. I recommended the school to my brother while I was finishing my program, so he enrolled in the Networking Systems Administration program and (b)(6) out of the Montgomery Alabama campus.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Peter Woledge (b)(6)

(b)(6)

To whom it may concern,

My name is Mike Mattox I am currently working towards my (b)(6)
(b)(6) I started my journey with ITT at the (b)(6)
(b)(6) I decided to enroll at ITT to enhance my skill set as (b)(6)
(b)(6) felt this choice would allow me
the most direct route to obtaining my ultimate career goal as (b)(6)

As many students I was tremendously nervous as what to expect when returning to school. On my first day of school all the administration was patiently waiting on the new students in the foyer to help direct us to the correct classroom. Then we all had the pleasure of meeting Ms. Joyce Prauce. She had the ability to make us laugh and instructed us of what was expected of us. This presentation of staff really puts many of us at ease as it showed us the students they are really there to help. From that point forward things became a breeze for me, I knew the staff and instructors were there for us, I am not afraid to stay after class and ask for additional help from a MAJORITY of the instructors without feeling psychologically slow.

I feel that ITT has helped me by building a stepping stone towards my ultimate career goal as a (b)(6)
(b)(6) My experience from the entry level Associates Degree up to my senior year in the Bachelors program, is the programs cover many aspects of the IT career field. This method allows us as students to really pick-out what we are most interested in and run with it. I feel this is what makes ITT so unique. It does not push one method or branded name on its students; IE. (Windows vs. Linux). Much like St. Petersburg College does. The newer VLabs allow us to decide which best suits for ourselves. ITT employs an instructor who has real life IT experience not just those with degrees in education. I really love this method of teaching, it's like learning from a peer and not a book.

Many instructors are willing to break down a scenario to a past experience and show its standing in the IT world.

I love the open door policy with career services, Anna and Doug are great. They are very informative with Resume Building as well as networking. No offence to the career services team, but I feel they should really start pushing students to decide on which certs they will need on the outside. Potential employers care about schooling, but certifications are everything to a company. It's a fine balance between schooling, certifications and work experience. I do feel this is not being discussed strongly enough with students mainly students that are potentially preparing to enter the IT workforce.

The Librarian Mike is always my first point of contact I cannot acquire a straight answer. He is always willing to go out of his way to help myself or any other student in getting to the right person or answer. If mike does not know it, he will always find out and promptly notify you his results via E-mail or phone call. He has been a lifesaver.

Thanks,

Mike Mattox RcPHT

(b)(6)

To whom this may concern:

My journey at ITT Technical Institute has been an experience that I will never forget. There is so much knowledge given and so many skills to learn, that to a person for starting it is hard to choose a program. I, myself, chose (b)(6) and the classes, as well as the people, all have something different to offer. Whether it be homework, projects, tutoring, or networking with other students, there is something always here to do. Every class is not the same, even if the curriculum is, the atmosphere is different. Initially when I first came ITT, it was actually to help a friend sign up, but just being on the tours, that the representatives gave, it created a sense of purpose and opportunity for me to learn more than what I already knew about business and on (b)(6) I was official an ITT Student, which I have not regret.

I am glad that I made the decision to go back to school, because it has opened up so many different doors and opportunities. It has been said that "college is not for everyone," but I encourage those who have not gone to college or are thinking about it, to go. I appreciate everything that my instructors and admin staff have done for me. As of recently, I am get my (b)(6) and it is awesome.

Sincerely,

(b)(6)

Kristian Craig

To whom this may concern:

I began this journey at ITT Technical Institute at Baton Rouge in (b)(6) I enrolled at the suggestion of a friend when I brought him to pick up his books. I initially didn't plan on enrolling but after discussing with my friend as well as Mrs. Antonette "Tony" Sarmento, I decided that it would be most beneficial to go ahead and take that leap of faith. With the help of Mrs. Tony, I enrolled in the (b)(6) I thoroughly enjoyed my classes learning much more than I initially thought I would. The other great thing is that I made many new contacts through my classes and friends that I can call for help. After graduating from (b)(6) (b)(6) but was unable to do so because it was not being offered at that time. Upon further conversation with Mrs. Tony, my student Representative, and Mrs. Rhonda Heath, my Department Chair, I enrolled into the (b)(6) (b)(6) Again I enjoyed my classes and the friends I was able to continue to make. I also loved the faculty and staff as they were very supportive of their students and each other as well as the community.

I am very pleased with the support of Financial Aid as they have been very instrumental in ensuring that I am still able to attend school as well as be a member of the Federal Work Study Program here. Both Mrs. Rhonda Bailey and Capri Buckley have ensured that I am kept abreast of my financial situations.

Another group I would like to acknowledge is Career Services. They have worked with me to better hone my resume as well as interviewing skills. They have also helped to land me several job positions in my field. Another facet that Career Services helped to facilitate was me being a member of the Federal Work Study Program, so that I could help support the students and staff of ITT.

I have so enjoyed my experiences here at ITT that I have considered upon successful completion of my (b)(6) to seek a teaching position so that I may share my experiences and knowledge with the next generation.

I currently try to assist our Systems Support Technician, Justin Soirez, in any tasks that he may need to take care of in the evenings as he can't be here all the time. I also want to acknowledge our Library staff of Ms. Leslie Smith and Mr. Darrin Meyers as they have helped me on various papers and projects proofing them for errors as well as helping with general research.

I have thoroughly enjoyed my time and experiences at ITT and hope to be able to continue to do so.

Kindly,

(b)(6)

Bryan S. Hoyt

Amber Olivier
May 2, 2016

ITT Technical Institute
14141 Airline Hwy Suite 101
Baton Rouge, LA 70817

Dear ITT Technical Institute:

I began at ITT in Baton Rouge in (b)(6) to study (b)(6). I wanted a school that had small classrooms and a hands-on teaching method, along with a place that truly cared that I succeeded. The ITT Baton Rouge campus was the perfect choice for me because it offered all of that and more.

I am nearing graduation and I have learned a lot about the drafting programs that I will use in my professional career. The instructors here do not only teach by the curriculum, but also give advice and additional information regarding drafting and design based on their own professional experience. I feel that the extra attention given by the instructors here will aid me to succeed even more.

I cannot forget to mention Career Services. They have been sending me applications and helping me seek jobs so as to further me along my path to success since I began here at ITT.

I thank you ITT for teaching me and leading me to a more successful life.

Sincerely,

(b)(6)

Amber Olivier

I believe that ITT Tech has had a positive influence on me because of the opportunity it has given me. I like that I have the opportunity to learn about something I enjoy in a hands on environment and gain the knowledge and experience to excel in life and be successful. I have met great people and greatly appreciate by the Career Service department and the Financial Aid department for assisting me in being able to stay and attend the school and gain the experience necessary to succeed in life.

Wade Louque

(b)(6)

How ITT had the positive influence on me is that the teachers try their best to help us to get in the right direction we need to go in order to succeed in life. They also, try to understand the way we think and try their hardest to help us out if we have questions. The teachers and the resources are always available to us, we just got to ask the questions on how to get from the starting point to the point we want to be in life. ITT is a great institution on which has a good foundation on which is built on and the materials that are supplied to us, they are here to help us, and it's us that have to do the work and be strong-minded and determined to go where we need to be.

To Whom It may concern.

This is to inform The Corporate headquarters, staff and any other personnel that

My experience here at the ITT Baton Rouge Campus has been one of the most enlightening
Experience of my life. The staff and personnel here have made my life a rewarding
Future to look forward to.

From my first day here at ITT Baton Rouge I have had the privilege to have been engaged
Academically; with people that have worked in the field of my interest, and have put for such
above and beyond effort to ensuring that I understand exactly what I will be facing in the real-
world.

My instructors have worked very closely with me that I get a very good understanding of the
material that's being taught—and have made available to myself tutorial session that I have
benefit from.

Very good work and sincere thanks for making my career a safe and rewarding one here at ITT
Baton Rouge.

(b)(6)
Clyde Williams (b)(6)

May 2, 2016

To whom it may concern,

My experience at ITT Technical Institute of Baton Rouge, Louisiana was one of the best experiences, yet. The recruitment was accurate with finances, courses, instructors and even the activities. The first day entering this institute, I was greeted by everyone that I came into contact with. The staff are great and they are very helpful, not to mention, easy to work with. The career services department is one of the best at this institute. They are the most helpful group of specialist that I have ever met. The specialists of career services also helped me find a job in my field and I love it. Over all, I would consider coming back for my bachelors and I will recommend ITT Technical Institute of Baton Rouge, Louisiana to others in the future.

May 2, 2016

To whom it may concern

Status: Current student

I would like to point out how well the academic department has helped me through my academic tenure here. The teachers since my associate degree to my bachelors have been phenomenal. They will take time to explain the curriculum as well as explain the work task at hand. They are all professionals and expect professionalism from their students as well. I remember one time in class I was not grasping a networking issue. Mr. Randolph saw the frustration in my eyes and after class was dismissed he pulled me to the side and further explained. That further explanation made me pass the test as well as the class and it let me know he cared.

The IT chair, Yvonne Geter, is also professional and expects the same from her staff. She makes sure that all the students in the IT program are well taken care of, she leaves no stone unturned when it comes to making sure the IT students have all the equipment that is needed in the IT field. If there is a complaint or issue, the matter at hand is immediately remedied. The academic department is doing a great job!

Thank you!

To whom it may concern:

Current Status: ITT-Technical Institute; (b)(6)

In (b)(6) decided to pursue a college education with ITT-Tech. I actually request the most complicated course the school had to offer which was the Computer Electronic Engineer Technology. In the past (b)(6) years of this journey for higher learning there were several situations when I felt overwhelmed, confused even considered walking away. However, regardless of all the hard work I put in to pass my exams, midterms, homework and laboratory assignments. There was one individual among few supporters that consistently pushed me to my limits, and demanded I dedicate my all towards my education.

Jerome Trend has been a teacher, friend, tutor, scholar and a gentlemen from the first day I met him; Mr. Trent incredible ability to manipulate mathematical equations and creative methods of applying moderate to advanced levels circuitry opened new possibilities of a world of electronics for me. I remember working aside this brilliant scholar eight hours a day for weeks at a time reviewing course material, preparing for class projects, calculating countless formulas that are used in digital electronics and system design. Its rear that I encounter a man with this level of knowledge, prestige and dedication to personally invest a life time of wisdom towards my education. I can't thank Mr. Trent enough for all he has done for us students at ITT-Tech.

In my eyes Jerome Trent has earn Highest Honors of education and my total appreciation for introducing me to possibilities I never knew I could have in the electrical industry.

(b)(6)

May 2, 2016

To: Whom It May Concern/Dear Sirs /Madams

My name is Michelle Johnson, I am a current student at ITT-Atlanta Campus. My experience with the academic department has been a wonderful experience as of yet. I have had positive feedback and great classroom experience with all of my professors. The class that I most likely enjoy is Fundamentals of Supervision. The professor is very knowledgeable and the classroom discussions are a great help while keeping the class engaged. I have really enjoyed my experience with the other classes as well. I'm a returning college student and the academics department makes it easier for me to enjoy this time. I hope to gain more knowledge and skills as I continue to further my education.

Thank You,

(b)(6)

Michelle Johnson

May 2, 2016

To whom it may concern

Current student

Dear sir/madam

I have been a student (b)(6) I have many memorable experiences of receiving assistance during my time here, but three stuck out in my head. The first experience is getting help with putting software on my laptop. Mr. Trent from the LRC was very helpful in assisting. He was very knowledgeable and eager to assist. I was able to download the relevant software and my assignments done on time. The second experience was with Ms. Evans from the LRC assisted me in finding an article within the Virtual Library; even though I have been here a year I still get confused in maneuvering the Virtual Library. She made sure we found the article before I left. The third experience was the Dean, Mrs. Lewis, there was a brief moment when I thought about dropping out but after talking with her she made me realize that I didn't have far to go and how much more marketable I would be in the work force. She really showed me that she cared and that I was not just a number.

Thank you,

(b)(6)

Garnett Williams

Monday, May 2, 2016

To: Whom it may concern

From: current student/Ivan Bonner, (b)(6)

Dear Mr. Ms.:

I would like to extend my gratitude to ITT-Tech, for the outstanding job on educating students like myself, in (b)(6)

Students like myself of (b)(6) learns the necessary skills to use electronic test equipment to make measurements, understand electrical schematics and blueprints, analyze electronic circuits and understand fundamental design concepts, relate the principles of electrical circuits to hydraulic circuits and pneumatics. The graduates are ready to support manufacturing, design test equipment, produce and test products, and to assist in product development.

ITT-Tech has given me the opportunity to learn as much as possible in my field to the point where programming and PLC's are as common to me as is voltage, current and resistance. As a satisfied student of ITT, I would recommend furthering ones' education of advanced technology by doing so at ITT technical Institution.

I thank ITT-Tech for the opportunity and will continue my education in the bachelor's program.

Thank you Sincerely :

(b)(6)

Ivan L. Bonner Jr.

May 4, 2016

To Whom It May Concern:

I attended ITT Technical Institute in Chattanooga, Tennessee and graduated in (b)(6) I received an (b)(6)
(b)(6) I am employed with (b)(6)
(b)(6) and my job title is (b)(6)
(b)(6)

While at ITT Technical Institute, I was surprised to learn how much hands on equipment was available. The staff was always willing to help in any way possible and the teaching staff was very knowledgeable. I had already been to school for electronics and had many years in the field of computers and electronic technical jobs. I felt it was time to earn my degree and thanks to ITT Tech I was able to go to school with a flexible schedule and get it.

I appreciate the time you are taking to read this letter and want to thank everyone at ITT Tech for giving me an opportunity to get my degree. ITT is truly a viable and relevant source for educational pursuits in this ever changing world and they help me update my current knowledge to prepare me for my next set of challenges. I would fully recommend ITT Technical Institute to anyone looking to further their education and get a boost in today's job market.

Thank you for your time.

Charles D. Neal Jr.

5/4/16

To Whom It May Concern:

I attended ITT Technical Institute in Chattanooga, Tennessee and graduated in (b)(6)
(b)(6) I received an (b)(6)
(b)(6) I am currently the
(b)(6)

I learned a ton of information while attending ITT Tech. It was one of the best decisions of my life. When I first started, I thought I knew a few things about computer systems. By the time that I had graduated, I realized how little I actually knew before I started. The instructors that I had were passionate about what they taught, and could answer any questions I threw at them. And, if they didn't know the answer, or they wanted me to look for it, they knew where to point my search for the answer. Sometimes you just need to be pointed in the right direction to be able to learn something.

When I came back to start my Bachelors, I started with another class that had just finished their Associates degree. The school also had some new instructors, but it was the same inviting atmosphere from when I was here the first time. While the Bachelors I received I don't get to use it every day, it was worth getting, in that it prepared me for future careers. I am using everything that I learned in my Associates on a day to day basis, and gaining a deeper understanding of what I had learned. For the Bachelors, I am able add input during conversations about the security of the systems that we deploy. The Bachelors has made me more of a critical thinker on what was learned from the Associates. Like I said, I don't get to use it every day, but it does come up often, and has had a positive impact on my work.

I would definitely recommend a student to go to ITT Tech.

Thank you for your time.

Robert Lee

5/5/16

To Whom It May Concern:

I attended ITT Technical Institute in Chattanooga, Tennessee and graduated in (b)(6) I received an (b)(6) I am employed with (b)(6) (b)(6) and my job title is (b)(6)

While at ITT, I had no prior knowledge or experiences within the electrical field. I felt very lost on the subject matter and early on had to ask many questions. At the time, Frank Pool, the chair of electronics program was almost always there to help, guide and instruct on any problem whether big or small that I had. This was something that I didn't have when I attended larger campus schools and is a big part of the reason I pushed myself to finish the program. Throughout the program other instructors were available to me such as Chad Jaynes and Larry Ramsey who both were always helpful when I needed.

After graduation, I felt that I had made leaps and bounds in my skill sets. I felt well versed in programming, troubleshooting, and an overall understanding of electronics in general. With my determination and the tools available to me I graduated with the knowledge I needed to succeed and start a real career. Three months after graduation and after a handful of interviews, I found a job with a company that I could not have otherwise been qualified to work for. I have since gained myself real experience and know that my new employers are more than satisfied with my knowledge and abilities gain through ITT.

Overall, I'm very glad that I decided to attend ITT; I felt it was an environment that catered to my learning abilities and prepped me to apply my new skills in the real world. With the right frame of mind of where the school can take you, ITT can most certainly give you the skills you need to get there.

Thank you for your time.

To whom it may concern:

I attended ITT Technical Institute in Chattanooga, Tennessee and graduated in (b)(6) with honors. I received an (b)(6) I am employed with (b)(6) and my job title is (b)(6)

While at ITT Technical Institute, I learned a lot about the technical field, teamwork, professionalism, and more importantly about myself. I worked hard and had a great time learning with professional and knowledgeable instructors that work or have worked in their fields. They were always there to tutor me after and/or before class to help me with anything that I needed. Instructors like Kevin Janes, Lorna Wright, Larry Ramsey, Scott Boute are instructors that are really passionate about what their teaching and encouraging to their students.

Coming to ITT was the best thing I've done for myself my son and my entire family. I got the job that I wanted and have never been so happy working. I've learned not to settle for anything always strive for more. I do believe that my education was a quality education and did prepare me for the professional world. It would be a very long letter if I was to label everything that I've learn since school but its been a lot more advanced in electrical and mechanical . As for referring anyone to attend ITT? Yes I would but, I would warn them that instructors make mistakes too, to always keep a backup, expect late nights, long papers, hard work, and if you do it right a happy ending.

Thank You

To Whom It May Concern:

I attended ITT Technical Institute in Chattanooga, Tennessee and graduated in (b)(6). I received an (b)(6) and my job title is (b)(6). I am employed with (b)(6).

While at ITT Technical Institute, I was able to build on the skills and knowledge I had previously gained through my prior professional and military experience. I was able to confirm that the Information Technology field was my true professional passion. I worked (b)(6) which enabled me to apply my education experiences daily to my work as well as (b)(6).

I quickly became close to several of my instructors who were actively employed in the IT field and saw the potential for me to succeed. (b)(6) When my current Director asked if they had a recommendation they both within seconds of each other recommended me. This along with the thank you letters I had sent after a tour of their Data Center as part of a class activity, and the time I spent with my current team (b)(6) while working on my capstone project I was hired immediately following my interview. (b)(6)

I truly feel that due to the quality of my education and my drive to absorb the knowledge, which is a must for educational success as well as my developed relationship with my instructors that I was able to get my foot in the door at a reputable company. Because of that and my deep desire to succeed I feel that my education and professional relationships developed while at ITT Tech have greatly assisted me in my success thus far in the Information Technology Field.

I would definitely recommend ITT Tech to someone who is serious about receiving a technically driven, hands-on education with a desire to succeed.

Thank you for your time.

To Whom It May Concern:

I am writing to you to discuss my experience in attending the campus of ITT Technical Institute in South Bend, IN.

As a graduate of ITT Technical Institute, I'm proud of the quality of the education I received in South Bend. Thanks to the integrity and actual caring of the administration, faculty and staff at ITT Tech, I was better prepared to take on the challenges of being a (b)(6)

Without the attention from my amazing instructors, the campus administration, and scholarship support, I am not sure I would be where I am today. I am proud to say that I was recently hired as (b)(6). The opportunities afforded me through ITT Technical Institute South Bend, have helped me to see a brighter future for my family. I have recommended the South Bend Campus of ITT Technical Institute to my friends and colleagues. Unfortunately, in October of 2015, the South Bend Campus of ITT Technical Institute was advised through their Corporate Head Quarters, to not accept any new students. This is a real shame as I feel the location, staff and faculty, gave me the opportunity to achieve my goal in obtaining the required education through that education, I have become the nurse I always dreamed of being. (b)(6)

I am writing to you to discuss my experience in attending the ITT Technical Institute in South Bend.

As a graduate of ITT Technical Institute, I'm proud of the quality of the education I received. The administration, faculty and academic support systems at ITT Technical Institute South Bend, helped me better prepare to take on the challenges of being a (b)(6)

(b)(6) The staff at the South Bend campus always made sure they were available to help guide me along my way.

My experience at ITT Tech was a turning point for me. I finally was able to learn at my own pace and in a method that prepared me for my current career. I learned to take pride in my abilities along with acquiring the skills required to be a productive member of society. The staff and course material was wonderful. Without this experience I would not be where I am. I would recommend the school to anyone I know.

I believe the knowledge and skills that I learned during my education expresses the integrity of the instructors and the value of the staff at the South Bend campus.

Thank you for this opportunity to share my personal experience while attending ITT Technical Institute South Bend.

Sincerely,

(b)(6)

To Whom It May Concern:

This letter is to inform you about educational experience here at ITT-Tech in Mobile. Melissa Johnson was my rep when I started at ITT-Tech in Mobile, and was informative and kind. At the time, one of my co-workers told me about the school, and that lead me to visit and ultimately enroll. As I went through the school, I believe the classes were informative and I really enjoyed having the books versus online classes. I believe the hands-on courses in the beginning was very helpful. My later courses are more instructional, with step-by-step lab work.

While attending ITT, I've been able to work at (b)(6) I believe this education has opened some paths for me. My plans include working for the government, and later on opening my own business.

Sincerely,

(b)(6)

Melody Pickett

To Whom It May Concern:

I am glad I chose to come to ITT-Tech. It has helped me realize a childhood dream of being in the Electronic field. I remember seeing the commercials for ITT on the TV when I was a little kid. I used to say that when I got older I was going to attend ITT. (b)(6) I was going through a rough time in my life and the staff at ITT helped me through it. They gave me housing advice, tax advice, job leads and most importantly encouraging words to never give up. The staff here is compassionate, kind, down to earth and very concerned with the students making the best of their education.

I am now in (b)(6) and I believe that (b)(6) graduate I will be fully prepared to go out and get a good job. I believe that the staff has shown me how to be a great employee and how to make the most of the opportunities that are presented to me. The staff has helped me gain a sense of confidence about my abilities and my future. I would like to say thank you to everyone at 112 Mobile ITT-Technical Institute. I could have made it without them, but they showed me the best way to accomplish my goals.

Sincerely,

(b)(6)

Mobile Campus

How ITT Tech affected my life

Before I even thought about going to ITT Tech for a small tour of the campus, I had been (b)(6) I couldn't make up my mind on what I wanted to pursue a degree in. I saw an infomercial about an alumni's success story after getting a degree from ITT Tech. This honestly made me wonder if it was real and could I one day be that person on TV talking about my success. I built up the courage to call and talk to a representative. I couldn't ask for a nicer person to answer the phone and tell me about the High Point campus and what I would have in store for me when I came for a tour. Needless to say I was convinced on applying to ITT Tech. I first wanted to attend for a (b)(6) with the interest of going into video game design. During my tour I was able to actually talk with the electronics chair/instructor about why I was there. One great thing that stood out to me was the first question he asked me. "What is it that you like to do?" He wasn't focused on trying to change my mind about what degree I wanted. He wanted to know what was on my mind as far as what I wanted to accomplish. I then realized that where I really wanted to go in life started with a completion on an electronics degree. The first couple of quarters were a bit chaotic, with personnel changes in faculty. I had to adapt to being back in school again and learning new things about electronics. I didn't think I would actually be able to adjust to the fast pace of the classes and labs. Also working with other students in trying to understand what we were learning. With the help of a current mentor (b)(6) I was able to understand the material a lot easier and comprehend it way faster. I was that student who really loved to be involved in the school outside the classroom. Learning about how the school was changing and how it wanted to change to better accommodate the students. With me being outgoing and all around the school helping out anyway I could. (b)(6)

(b)(6) Of course, I took it. That opened a whole new world of ITT Tech. I was no (b)(6)

(b)(6) This place touched my heart in many ways. The faculty became a family to me. Anything I needed help with there was always someone there for me. Most of the help came from multiple faculty members at the same time. There were three main faculty members that I will never forget. Without them I wouldn't have received my degree at all. So to Dr. Kareem Hogan, Dean Misty Franklin, and my uplifting rep Dionne Caldwell, I say thank you for everything you have done for me. I wouldn't have made this far without you all. And I know you will continue to touch many hearts as you did mine. What a great experience it was to be a part of this ITT Tech family. If I had to do it all again, I would and I wouldn't change a thing. Thank You ITT Tech for my (b)(6)

Darvez Hall Jr.

(b)(6)

Recently I was asked to describe how ITT has positively affected my life and although defining the magnitude in which I have been affected may be impossible to put into words, I can say for a fact that I have grown in many ways. In order to describe how I have been affected I must start at the beginning with what I was before I started at ITT.

Before ITT I was withdrawn, I refused to talk to anyone, and (b)(6)

(b)(6)

(b)(6)

I knew I needed a change, so I decided to further my education. I chose ITT because of the small class sizes and my desire to go into a field that was in high demand. I didn't know what to expect when I first started, I didn't know the type of people I would meet, and I didn't even know if it was possible for me to succeed. I didn't notice myself change until this quarter, my last and final quarter in the

(b)(6)

I have grown more confident, more secure, and more outgoing. In the beginning it took everything I had to make a presentation to the rest of the class, (b)(6)

(b)(6)

(b)(6)

now I feel I can succeed at anything. I hold a 4.0 GPA and recently had my first job in the IT field. It was a short term contract job that was only supposed to last thirty days and lasted ninety days. It may not seem like much but it was a valuable stepping stone that would not have been possible had it not been for ITT. (b)(6)

I have made valuable friends at ITT that I know will have my back and I will have theirs. I have learned the value of working in a team again. The instructors at ITT played a huge part in me developing my self-confidence again. They pushed me out of my comfort zone and showed me what I could achieve. They helped me realize that my limits expanded

a lot further than I had ever thought possible. If there was something that I thought I could not figure out they showed me I was wrong. They guided me until I realized I was over-thinking and over-looking the answer. (b)(6)

(b)(6)

(b)(6)

I no longer back down from a challenge or shy away from something that is outside my comfort zone. Instead I face it head on with a whole new mind set. I can now tell myself "I got this". So to ask me how ITT has positively affected my life is about the same as asking how much longer until the sun becomes a supernova. It has done so much more than just affect me in a positive way. It is so much more than what words could possibly explain, but ITT has provided me lessons and memories that I will never forget.

School of Electronics

I have been attending ITT for the last two years as a student in the electronics program. During my time here at ITT I have learned more about the important types of technology that is used in everyday life such as: Integrated circuits, Solid state devices, PLCs, Binary code, C language, Different types of networking strategies and more. Before I started coming to ITT; there were things that were necessary for me to know in order to follow the career path that I have been dreaming of following.

I feel like I made the right choice by deciding to attend ITT. Of course it was not easy to learn all of the material that was taught, but that part came as no surprise to me, because if you want to become a successful engineer; it takes a lot of time and effort. However, from a student perspective; I feel like I have learned enough to take on a career that exceeds my dream job.

Sincerely,

(b)(6)

To whom this may concern:

The question has been ask of how ITT Technical Institute has changed my life. Before coming to ITT (b)(6) there I was taking prerequisite classes, but did not see myself moving forward, felt that classes were so long felt that it was getting harder and harder to join the Nursing Program there. Therefore, I decided to come to ITT after seeing their commercial on television.

ITT technical Institute has changed my life in many ways. First, it gave me the opportunity of a life time to enter into the Nursing Program. It may have taken me (b)(6) (b)(6) but I made it. Also, since I have started, ITT has shown me the ability to be positive at all times and to learn how to cope with my situations that are going around me. The reason, is that instructors and representatives here have received me with their arms open to teach me and give me their full support to help me achieve my goals. Finally, ITT is a school where I have learned to manage my time promptly, and to see life in different aspect. Time is so consuming, so you have to appreciate every second you have to spend with the family and to do assignments and/or study for exams. ITT says, if one individual can do it, than another individual can.

Sincerely,

Maria Alvarez

(b)(6)

Making the decision to attend ITT Technical Institute Breckinridge School of Nursing has been the best decision I have made for myself and my family. Once I graduate, I will be able to support my family and my husband will be able to rest. I love that my instructors are very knowledgeable about the subject at hand. I also appreciate the instructors' availability. I know if I email one of my instructors, I will get a response back rather quickly. Most of them have an open door policy, so if I am on campus and have a question, they are always willing to help find an answer. I would recommend ITT Technical Institute to anyone who is ready to grow in a new profession.

Sincerely,

(b)(6)

Shannon Bridges

During my time at ITT tech I have had the pleasure of working with professors who are active in their field, before coming here I did not put much stock in the term active in their field as I never understood how much of an impact this has on the level and quality of the education which they are able to offer. In my short (b)(6) quarter period here at ITT I have experienced and learned more than I did in my previous college in two full years. The teachers here are very courteous and kind, if I had to do it all over again I would have come straight here because of the amazing confidence and just pure teaching ability that the staff here has. ITT truly is setting the standard for higher learning for me and for many others.

Jonathan Bacon

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Madison, Alabama. As a student of ITT Technical Institute, I am proud of the quality of education I am receiving. Thanks to the integrity of the administration, faculty and academic support system at ITT Tech, I am much better prepared to take on the challenges of being a productive and career minded employee.

For example, ITT Tech provided me with the basis of accounting to which I applied to my current job in a tax office. As I progress in my degree in (b)(6) (b)(6) I am constantly learning skills I can use in my day to day tasks at work. The instructors have been more than helpful when I have come to them with questions and have been very responsive with emails as well. Without the help of the ITT Tech faculty and staff I am sure I would still be in an entry level retail position instead of starting the fruitful career path I am on now.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I am learning during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Ashley Wallace

(b)(6)

To Whom It May Concern,

(b)(6)

I would like to commend the staff of the wonderful educational atmosphere that has been provided to the students attending ITT Technical Institute in Madison, AL. It is an exceptionally great academic school with a personal touch of caring and supportive instructors and personnel. I have attended few other colleges in prior years but had never had the entire staff known me on a personal first name basis.

I have had many ups and downs academically as well as personal obstacles but at no time did I feel that I was not being supported by the personnel and classmates at ITT Tech. It is an accelerated program which was totally different to me than previous college experiences but at no time was it not achievable thus far.

This school is centered on education as well the integrity for oneself and the profession as a whole. I do believe that without everyone's assistance I would not have come as far as I have at this juncture. I have and would again recommend this school to anyone wanting to better themselves.

Sincerely,

(b)(6)

Alicia Turner

May 4, 2016

To whom it may concern,

ITT Technical Institute (b)(6) is a respected program among the students, facilities and community. The students and graduates of the program are able to demonstrate the capabilities required to perform their tasks and adapt to the every changing healthcare environment. I would gladly recommend interested parties to attend the Nursing program; as the facility, instructors and supportive staff are well educated, experienced, and helpful. Each instructor is knowledgeable in their areas of expertise and provides ample education on subject matter. Overall as a student within the Nursing program, I would with confident recommend the program and support it in the future.

(b)(6)

Rachel Boyd
ITT (b)(6) Student

To whom it may concern,

3

ITT Technical Institute [ITT] provides each student with challenging educational programs, which enable the student's opportunities to further themselves as career oriented professionals. Additionally, ITT utilizes a collaborative learning environment, where the students in a given class setting can benefit from each other's knowledge and experience.

Instructors conduct themselves in a professional manner, present course material utilizing a well-structured, organized approach, and are readily available to answer questions, whether in person, on phone calls, or via emails. Instructors hold students accountable for both their academic performance as well as their "in class" professionalism.

Course quizzes and examinations are challenging, assessing each student's knowledge at the rote, understanding, application, and correlation levels. Students are also simultaneously encouraged to be in a consistent state of studying for the NCLEX-RN Examination.

ITT's nursing program is such that if one is to be successful, each student must independently decide to study and cover the material, beyond that which is directly presented to them. This approach will serve ITT Nursing Program graduates well when they progress to their respective working environments; they will undoubtedly have to think and act creatively to meet the many demands, which will be placed upon them.

To Whom It May Concern:

I am writing this letter regarding ITT Technical Institute and my experience attending in Clive, Iowa.

I am a current student in the AS- Electrical Engineering program. Instructors are willing to help out with the course material and are suited for the positions. I feel that my education is going to help me get a career in my field of study. The material is relevant that is used and teaches fundamentals of what we will use in the real world.

Thank you for the opportunity to describe my personal experience at ITT Technical Institute.

Tanner VanDyke

(b)(6)

A rectangular box with a black border, containing the text "(b)(6)" in the top-left corner. The rest of the box is empty, indicating a redacted signature.

In my time here at ITT in Clive Iowa I have learned enough to get a wonderful dream job (b)(6)

(b)(6) My plan when I started looking for a school was to be able to work in this field. When I researched all the local schools in my area. I found that ITT had the best program for my needs. Even my short discussion with (b)(6) who I used to do a lot of volunteer work for, came up sadly unable to accommodate my schooling needs.

I have been in this school over a year and plan to graduate (b)(6)

The personnel have been extremely helpful in getting my learning needs met. (b)(6)

(b)(6) returning to school, ITT has made my transition from (b)(6) to working as an intern a smooth process. Once I graduate I hope to be hired full time. The work I have been able to accomplish for my company could not have done without the tech and knowledge I have learned here at ITT.

From a competitive note one of my coworkers is a graduate of the (b)(6) and is coming in on his own time, on weekends, to try to catch up to me. I am not bragging just stating the facts. The ITT program is the only one of its kind in the area. Without it I might have had to look into another profession. I can't thank ITT and their people for all this program has done for me.

(b)(6)

May 4, 2016

To Whom It May Concern:

I am writing this letter regarding ITT Technical Institute and my experience attending in Clive, Iowa.

I am a current student in (b)(6) My Name is Eugene Davis and I attend ITT-Tech in Clive IA. Being here has been amazing. I love my school and I love to learn three days that I am here every other week. It is a fun experience for me being here. I love what I'm studying here and I absolutely love the teachers here. They teach in a fun way that we could understand and it is very fun. Over all I just love ITT-Tech located here in Clive. I wouldn't want to go anywhere else. Thank you.

Thank you for the opportunity to describe my personal experience at ITT Technical Institute.

(b)(6)

May 2, 2016

To whom may concern,

I fully believe that the ITT Technical Institute, Columbus, Ohio, location has given me the tools to be successful in both my professional and personal endeavors. I graduated from ITT with (b)(6)

(b)(6)

(b)(6) The ITT staff including: recruitment, dean of academics, learning resource center (LRC), career services, and various instructors have facilitated an active learning environment.

The size of ITT compared to other colleges and universities has enabled me to maximize my potential and build quality professional relationships with all of the ITT staff. Additionally, all staff members go above and beyond their positions to ensure students are taken of. During the recruitment process, Dustin Epperly, was very helpful in providing me with the necessary resources and information toward the program of study that best fit my professional goals and interests. Lindsay Hrynda and Katherine Purman with the LRC exceeded my expectations with helping me through the ITT virtual library to gather necessary research and proof reading my academic writings. Dionne Ellefson, with career services has been exceptional in my professional development and projecting a positive image of myself to potential employers. With her help I have been able to obtain quality employment that has been within both of my degree programs. The various instructors that I've had throughout my education include: (b)(6)

(b)(6) These instructors have provided me with right amount of mentorship. I believe this is critical to my overall

learning process due to the fact that the instructors have current real world experience within my degree program that is able to transfer over to the classroom. Additionally, I give a lot of credit to the dean of academics, Michael Traina, for taking the time to help me with various issues. You won't see many educational settings where your dean knows you on a first name basis and has daily interaction with students. During my associates program, Dean Traina, helped facilitate class schedule issues that conflicted with my work schedule and also took time from his own schedule when my personal laptop crashed and was able to help recover my class work.

Overall, I am extremely pleased with the ITT Technical Institute, Columbus, Ohio, location with its professional and educational standards. All of the staff has met my expectations and gone above and beyond in their duties to help me. If given the opportunity I would come back to ITT as an instructor to help foster the same experiences I went through to other students.

Sincerely,

(b)(6)

Jason Jenkins

To whom it may concern:

My name is Jason Helsel and I am currently pursuing my bachelor's degree in (b)(6) the Columbus campus of ITT Technical Institute. Becoming a student (b)(6) was a scary undertaking. However, from the beginning ITT has been a great experience. The recruitment staff prepared me for what was to come and laid a path out that was easy to follow. The instructors were knowledgeable and always more than willing to help when I needed it. The career services staff took on the challenge of pointing me in the direction of many job leads, including my current position as (b)(6). The things I have learned here at ITT have helped me in my job. I was pleased with (b)(6)

(b)(6) All of the things combined helped me in my decision to pursue my (b)(6)

Thank you for the opportunity to share my experience at ITT,

(b)(6)

Jason Alexander Helsel

May 2, 2016

To whom it may concern:

My experience at ITT Technical Institute in Columbus, OH as helped me tremendously. I am

(b)(6)

(b)(6)

I am also currently working in my field as

(b)(6)

(b)(6)

which the experience from ITT has helped me with. The staff here at ITT has always been willing to answer any of my questions and help me along the way. A couple in particular stand out to me: my dean, my program chair, and my career services advisor. My dean – Mike Traina – is always available to help with any of my questions I may have as well as help in some of my courses. My program chair – Cliff Dowdell – was always there to help me or to just talk to when I needed someone to talk to. My career services advisor – Dionne Ellefson – is always around to talk to and to help me find a career, which she has recently done. Dionne sent me to a job fair for

(b)(6)

(b)(6)

ITT Technical Institute has been a huge stepping stone in my life and I plan on continuing my education here and obtaining my bachelor's degree in the near future.

Sincerely,

(b)(6)

Justin Graham

To: Whom it may concern

My name is Robert Galliher and I am a student at the ITT Technical College, Columbus Campus. I am a (b)(6) that decide to return to the academic world. I made an appointment to talk with the financial aid and Counselors to assist me with this decision. Gave me a tour of the facility and introduced me to the staff. This gave me feeling of this is where I belong. They were very helpful with all the information I needed to send me on my new career path.

Working towards my (b)(6) the Instructors are always there to listen to what I had to say and answered questions that were complexed. I appreciate the fact they have tutoring for those that are struggling a little. This is why I chose ITT for their one on one and open door policy. I also appreciate that the Dean has an open door policy and takes the time just to stop and say hello and how are things going.

The LRC is my life saver. Whenever I need assistance with proofreading, APA formatting or just general questions they are always eager to help "Thanks". Career counseling this group of individuals has assisted with resume preparation, job tips, and good advice.

With all this influential advice and friendship, I have worked very hard towards my goal to receive my (b)(6) I have a new job working in IT and still have a couple of quarters to go. If all goes well I see a Bachelor's Degree in my future.

I would recommend ITT anyone looking for a career in the IT Profession.

My name is Derrick Shaffer a NSA student that is (b)(6)

Upon arriving at this school I was working (b)(6)

(b)(6)

they deserve. Since coming to this school I have been embraced by the faculty, given opportunities to learn and given the opportunity to change my life for the better. My first encounter was with Dustin on the tour he was welcoming and friendly, and showed me the opportunities available to me. The instructors who worked in the field, who wanted to be there, knew how to build my way into my field these instructors made the difference. I have maintained a GPA of (b)(6) despite having

(b)(6) and working a full time job while still being dad, husband, son, and brother. The Administration from Amber Gantt to the dean has given me support whether school related or not. I have now entered the industry I came here to study, the career services has given me the tools, the opportunity and the support I needed to put myself out there and succeed.

Respectively yours,

Derrick Shaffer

Dear Dr.Iggy Mayboroda:

I wanted to personally thank you for your help last semester. Without that I doubt my transition between schools would have gone as smoothly. Also for the help getting the log in info to get INTO the school site itself when it did not work. I would also like to thank the entire staff along with you for all the help that came through the uses of books and phone calls to get my GPA figured out.

Sincerely,

(b)(6)

DR. Iggy Mayboroda

10220 North 25th Ave Ste 100

Phoenix, AZ 85021

Dear Dr. Iggy Mayboroda,

My time here at itt-tech has been challenging from time to time but for the most part very rewarding within my life. All my instructors have been very helpful. It's hard to pinpoint just one, let me see from Victoria helping build skills to work in groups, to Miss Shaffer breaking down math problems correctly so I can fully understand the math problems. And from my AutoCAD class, Brian who is a very good instructor and very helpful. To Patrick who I have now who teaches inventor and is very helpful as well. And Miss Hill who is teaching me how to present myself properly for the business world.

I would like to take time out my busy day and say thank you all for your knowledge and guidance to direct me and equip me with the tools I need to proceed my journey toward a better career.

Sincerely

Andrew Noriega

Dear Dr. Iggy:

I have enjoyed learning from Ms. Hill. She seems to care about her students, and explains everything clearly. She provides useful information that can help me now and in the future. I am inspired by her confidence and positivity and it helps me get out of my comfort zone.

I am also pleased with Cathy from finance. She is always helpful, positive and kind. She always has an answer to every question I ask.

I appreciate the pizza that the school has for students.

Thank you very much.

Sincerely,

(b)(6)

RE: My Positive Experience at ITT-Tech

To Whom It May Concern:

I am a student at ITT-Tech in Madison, Wisconsin. I'm in the (b)(6)

(b)(6) have completed 8 quarters. Thus far, my experience here at ITT-Tech has been wonderful. I have had numerous positive experiences here. The one particular good experience that I continue to have here at ITT-Tech is how all of my instructors have been very knowledgeable in the subject in what they are teaching as well as the amount of patience they have, as well as the willingness to take the time to help the students understand if they are not quite catching on to specific topic.

In my opinion the ITT-Tech campus here at Madison, Wisconsin is one of the elite learning institutions in our area to learning anything IT related. There has not been one thing that I have approached any instructor about so far that they have not been able to explain my question. I also feel that the material I am learning here at ITT-Tech gives me an edge above other candidates in the job market. The staff here at ITT-Tech not only are friendly and knowledgeable, but they also are make sure you are a candidate that companies would like to hire, they make sure that you interview well, and that the resume that you are going to submit is written well.

I would recommend to anyone that is looking to learn about IT to attend ITT-Tech campus in Madison, Wisconsin.

Sincerely

(b)(6)

Branden McCoy
ITT-Tech Student

(b)(6)

May 2, 2016

To whom it my concern,

I wanted to take the time to just let you know grateful I am for ITT Technical Institute in Madison, WI. I first want to say that when I moved back here to Madison I was happy to find out that there was a campus here, because I had started (b)(6) and I really was not looking forward to restarting the program all over again at other school here in town. When I first visited the campus the staff made me feel welcome and happy to be here, on the first night of class I felt good because the staff was here to help everyone find there class or help with any questions they have had.

The second thing I want to say about this campus is that I like how all the staff know each student by name and they make feel good about coming to class every night even when some us have worked all day and they only thing we want to do is go home. I have to say I have had some of the most wonderful teachers ever. I love that each teacher has their own style to teaching the class so that we stay engaged in class and talk about a number of things like adults should without yelling or getting upset with other classmates.

Last I want say that I have meet some the nicest people here, I have enjoyed having them in class and I feel good and proud that we all will be graduation together (b)(6) Having the same group of people in class with me each quarter has made me want to come to class every night because I know that no matter how am feeling they will cheer up and that the teachers will cheer up as well.

Best Regards

RE: Positive Experiences at ITT-Tech

To Whom It May Concern:

I am a student at ITT-Tech in Madison, Wisconsin. I started here in (b)(6) and

(b)(6) I'm writing this today to share my positive experiences at this school so far, which includes the teachers, the classes, and the school overall.

First, I will talk about the teachers. I have had some very smart teachers. They all have seemed to know exactly what they are talking about. The way the work is presented makes sense, and is well-organized. The classes can be hard at times but the teachers always offer help if needed. The virtual books are easy and efficient to use - especially with all the extra features.

In conclusion, the school curriculum is well-rounded, and the teachers and staff have their stuff together. I feel as if I will leave the school knowing and having the proper education I should. In the end, I would recommend ITT Technical Institution to anyone.

Sincerely,

Kynadee Spurrier

ITT-Tech Student

(b)(6)

May 2, 2016

RE: My Positive Experience at ITT-Tech

To Whom It May Concern:

I am a student at ITT-Tech in Madison, Wisconsin. I have finished (b)(6) quarters in the (b)(6) (b)(6) I have had a few positive experiences in my time here at ITT-Tech, but I can think of one that really stands out.

As a student who did not succeed well in online courses, I have had a great deal of improvement with the hands-on approach provided here. Being able to physically work with the components and equipment, which has interested me for so long, has provided me the motivation to push through a difficult schedule and maintain highest honors, something that I was unable to do through high school. I have also had the opportunity to learn some useful lessons that would have otherwise been unavailable to me had I not taken an on-campus class.

While my program is only half complete, I feel that enrolling in ITT-Tech has had a positive impact on me that I may not have found elsewhere. I look forward to the future and the lessons it holds.

Sincerely,

(b)(6)

Jacob Leonhard

ITT-Tech Student

May 2, 2016

RE: My Positive Experience at ITT-Tech

To Whom It May Concern,

I am a student at ITT-Tech in Madison, Wisconsin. I started (b)(6) and I am working on getting (b)(6). Since coming to ITT, I've met so many different people--mostly classmates and some instructors, and so far I've had nothing but a positive and fun time throughout my time here.

At the start of my career at ITT-Tech I came in unsure, nervous, and scared that I wouldn't be able to handle going back to school (b)(6). But all my fears, worries and doubts went right out the window after the first day thanks to the huge welcoming that we received from all the staff that work here at ITT. At each and every class in the beginning the instructors introduce themselves about who they are as a person and an instructor and what they will be teaching and afterwards they have we the students tell a little about ourselves and why we came to ITT-Tech. And in every class I got the same since of feeling from every instructor, the feeling that you should get from going to school, feeling that they really genuinely care about your success and growth in the field that you came to study in. Each instructor giving you the right tools you need to help get you through your classes and future career. I haven't just one positive memory but many and not one negative feedback for this institute, because I know that no matter what instructor I have I know they have all of our best interest in mind and they are willing to do what it takes to see us succeed. So I thank every single person at ITT-Tech for helping me feel as if I can truly conquer my doubts, my fears, worries and my life just by listening and learning from those that truly care about the future and dreams that I have.

Coming to ITT-Tech when I did was one of the best choices I have ever made and I'll never regret coming to this school and learning from my instructors about my career and what I can do to make a difference in the line of work I want to be in.

Sincerely,

Robert J. Noel

(b)(6)

May 3, 2016

To whom it may concern:

I would like to tell you of an experience that I had while I was at ITT Technical Institute in Madison, WI. It was when I was in my further quarter and I was going into my most dreaded class (b)(6) with and on the first day with my teacher "rick" he started to tell us what was on the agenda for the next 10 weeks and my stead started to spin and my stomach started to roll and I thought to myself that I was never going to be able to learn any of this since I (b)(6) I felt like I did back in high school.

After the class of sheer panic and every one had left I decided that I would tell my teacher my past story and the fear and anxiety that I felt and he told me that I could have him as my tutor and he would work with me on any day that I felt it would help me get through the class. Well I started to meet with him four times a week and we would go over the home work sometimes two three times until I could do the problems we had to figure out first a way to make my brain see the math in a way that made sense to me, this was a very big key to making me be not so afraid of failure and build my confidence.

At about the six week mark I had gotten a great deal of confidence in my ability to do the homework and I would still ask Rick to please look at my work and help me if anything was wrong. By this time he would just turn to me and say have you done everything you remember from my teachings and at first I would doubt myself but after a quick look at my work I felt confident that my work was right, and you know most of the time when tests came along I was not scared or nervous I was confident that I could do the work and that I could pass the class not by the skill on my teeth but with confidence and pride!

Sincerely,

(b)(6)

Michael B. Peterson

To who it may concern,

The best experience that I had here at the ITT-Tech Madison campus is the different back grounds that all the students are from. Because even though that all students come from different backgrounds they are willing to help out another fellow student to accomplish his or her goal. One example is I had issues with thinking about my kids while trying to write a paper and another student that was also a father but with adult children told me to relax and concentrate on writing my paper. The other student explained his personal experience of raising his kids and know there successful adults and He went on to say that I will have successful kids as will. This made me realize that I need to concentrate on the present to accomplish my long term goals of achieving my (b)(6) in starting with finishing the assignment of writing that paper. I have since then achieved my

(b)(6)

(b)(6)

(b)(6)

Chester La Dow

5/2/2016

To whom it may concern,

I am currently a student at ITT Technical Institute of Springfield Mo. The reason I chose ITT was the recruitment staff. From the beginning I had the feeling that the school was not just a business but a school that cared about my future. The recruitment staff was very friendly and more than able to help me with all the questions that my family and I had about the school.

The instructors here at ITT are some of the best instructors I have had at any school high school or college. The experience that they can bring to the class room and the ability to teach what they know has helped me out tremendously. I love the fact that the instructors I have been doing the job they are teaching for many years. I feel that this has solely helped me succeed in my career thus far.

Aside from just the school and staff aspect of the school I would like to discuss what this school has done for me outside of class. Since my start of the (b)(6) have learned how to present and function as a professional out in the world. This is important to me because the world is becoming more and more of a professional business every day and I am now equipped to handle myself out there. This school has given me many skill sets that I feel will help me forever. None of this would have been possible if it was not for the care that is given to the students. Any time a student is struggling there is more than enough support to help you succeed.

The ADDA has been great in aiding the mental preparation for the upcoming months of school. We have multiple guest speakers come in and talk about what they do. This is especially critical to me because right from the get go I knew what I was getting into. Also I Got to see (b)(6) (b)(6) which was probably the coolest thing that has happened while going to school here.

Today I am (b)(6) and I am employed in my field of study. I LOVE my career that ITT has helped me get into. In fact, ITT is the one that helped me find this job. The career services are superb. They sought me out when they had positions available, even when I ignored them they never gave up. It was not just me that they helped. Out of the students in my class only one is not in his field and he is very close to getting a job. He has been set up with many interviews. Also the preparation that was given to me was greatly appreciated. I had mock interviews, help with my resume and cover letter, and help to where to go to help me get interview ready clothing.

If it were not for this school, I would not be where I am today. Every time I felt like giving up I was lifted up by the whole school and I was able to stay on my feet. This school has given me the tools I need to succeed in my career. I would like to continue my education and go on to the next step if the school is still around. I would recommend to anyone to look into ITT before anywhere else. When I was looking into schools every other option turned me away with the attitude of the staff. ITT brought me in because they made me feel like I was family not just another paycheck.

Thank you,

(b)(6)

Rhader Daniel McCready

(b)(6)

My name is Jonathan Dearing. I am an active student at the Springfield, MO ITT-Tech campus studying (b)(6) I'm currently unemployed so that I can focus on my school work.

I've enjoyed my experience at ITT-Tech and have learned a lot from my instructors. There are courses I've had no experience with prior and my instructors have regularly been able to both teach and challenge us to continue learning. My first real software course was the first time I've actually written code and I managed to write eight hundred plus lines in basic256 language proficiently and in large part to my instructor who always knew when were needed to be challenged further.

Every instructor I've had so far has seemed genuinely invested into the education of their students and have been essential for many students success. The rest of the faculty members have been friendly and professional. This campus as offered a friendly environment and helpful staff that I believe I wouldn't be able to get from any other local campus.

My name is Trevor Cannefax I am a current student at the Springfield, MO Campus. I am a full time student and work (b)(6) I am currently enrolled in (b)(6) (b)(6) have found that in my time here that the professors at my campus have invested interests in students, and truly care about their success. I have found that these instructors have a unique way to explain any question about my courses that creates an understanding of the topic. I am proud to be a student at ITT-Tech because I truly believe that I am getting a better education than most technical schools. I hope to attend this campus for achieve my bachelor's degree if it does not close before then.

(b)(6)

(b)(6)

ITT Tech Student Experience

(b)(6)

My experience at ITT Technical Institute, has continued to be a challenging, but very complimentary to my scholarly fulfillment in academics and technical professional skills. ITT Tech has prepared me intellectually, technically, and with more proficient organization skills, though, I've had to some extent before my education, this school has served as the crucial stepping stone to my next professional career in the design industry following a (b)(6) The greatest focus in each of the classes is to fundamentally improve both my comprehension of needed drafting skills, my study habits, the latest in the design industrial tools on computer, and the acumen to think of the best ways to construct new structures that last a lifetime. Important resources for our studies are available in Learning Resource Center and the Virtual Library. Above all, my work here produced to exceptional level of my expectations for improving my AutoCAD, design skills, communication, sustainability aspects of design, and ultimately provided a successful path into a career I greatly appreciate. I would commend this school to other prospective students I encounter following my graduation from ITT Tech Institute, Springfield, Missouri.

The Greatest Successes,

(b)(6)

(Graduate) (b)(6)

May 2, 2016

To whom it may concern,

I Matthew Halaschak am a student at ITT Technical Institute in Springfield, Missouri. I am currently studying for my (b)(6) I really enjoy coming to the campus for classes, talking with the instructors, the administration staff are very friendly and helpful, and the teachers help us students when we ask them for assistance. Everyone here is very friendly at this location. Kate is very helpful with questions I have about the school and anything else. The admin staff is very knowledgeable, they always ask how we are doing in our academic work and careers. They are all very professional and it has been a pleasure attending the campus.

Sincerely,

(b)(6)

Matthew Halaschak

Rafael Rodríguez

(b)(6)

May 3, 2016

ITT Technical Institute
3216 S. National Ave.
Springfield, MO 65807

Dear ITT Technical Institute:

Thank you for the support and the attention to detail given to me during my attendance at this school. Your professors and staff have provided me with a great opportunity in life. I have not only learned what I am currently going to school for but I already have a great job in my field without finishing my degree. The help from the staff has greatly helped me find my place not only in school but in my personal life and in the community.

There are no complaints on any aspects of this institute. When I started this degree I only wanted to (b)(6) but what I realized after starting is that there was way more than just classes. All the professors care about their students and the staff goes above and beyond their duties to make sure that the students have what they need and more.

I have, would, and still recommend this institute to anybody that ask me. And there are a lot more people that would love to share the same experience I have. The only thing I wish is that this place is here for me to get a second degree and for my own kids.

Sincerely,

(b)(6)

Rafael Rodríguez

To Whom It May Concern –

I am a graduate of ITT Technical Institute completing my (b)(6)
(b)(6) Prior to completing this degree I also obtained (b)(6)
(b)(6) Since graduating from ITT I have been very
fortunate to obtain careers using both degrees.

I began my career in the drafting industry 2 months prior to graduating with my
associate's degree. I started with a civil engineering firm (b)(6)
(b)(6)
(b)(6) Plan reading was a major part of my position on the (b)(6)
where it was my job to ensure all aspects of construction were complete per the specifications
called for in the plans and specifications book. I worked on projects such as (b)(6)
(b)(6) I had prior
experience in the (b)(6) which was very beneficial for this career but without
the education I received at ITT this career would not have been possible.

Ten months prior to graduating with my bachelor's degree I began a career as a (b)(6)
(b)(6) Here I managed the fabrication and
delivery of architectural components used to construct high rise buildings. Classes such as
materials and processes and project scheduling were useful in this career. One of the major
projects I worked on was (b)(6)
(b)(6) I worked for a large general contractor in the Springfield, Missouri area as
(b)(6) This position required accuracy and attention to detail in reading plans.

Currently I am a (b)(6) in Springfield.
Along with my own style of teaching I use many techniques that I learned from my past
instructors at ITT. My education obtained from ITT has been very beneficial in my career over
the last 4 years. I have been very successful with my careers in the drafting and design industry
as well as my positions as (b)(6) Although my education has been very helpful
with my career the cost associated with it is often a burden.

Preston W. Stoll

(b)(6)

May 2, 2016

To Whom It May Concern:

As the valedictorian graduate (b)(6) cohort at ITT Technical Institute in Huntington, West Virginia, I can attest to the professionalism and high standard of quality education provided by the instructors and staff. With their assistance, I was able to obtain my (b)(6)

(b)(6) I am currently employed with (b)(6)

(b)(6)

After determining that I needed to return to college to complete and earn my degree, I started the process to figure out which higher education establishment would be the best fit for my work schedules and my family. Seeing the commercials on TV and discovering that there was a campus between my work and my home, I decided to see what ITT Tech had to offer me. Working with the staff to determine which course of study to pursue, my scheduling and financing was an experience that further proved that I had made the correct decision to attend ITT Tech.

Once classes began, my anxiety of returning to college at a later stage of my life was further eased by the instructors. The instructors made learning the material interesting by not just teaching the material, but discussing how it applied in the larger realm of the field. With the campus utilizing instructors that worked heavily in the field of study, they were able to broaden the course material to encompass the "real life" applications. With their expertise and guidance, we were able to strengthen their teachings with hands on applications in real and virtual environments. With the structuring of each class, it created an environment that didn't overwhelm the students that were not as familiar with the subject, but still challenged the students that were.

Since graduating, I have been able to utilize my knowledge and skills with my current job by applying it to troubleshooting of backbone networking issues along with individual user troubles. With my knowledge and skills that ITT Tech have helped me obtain, I have decided to pursue other job opportunities inside and out of my current employer. The career services department has been an extreme help in making this a reality by meeting with me to go through and update my resume, to picking out key details of job postings to applying steps and tips for the interview process.

My time at ITT Tech was more fulfilling and challenging than I had expected, but made me a better person and technician. I have become a more focused and goal-oriented person because of my experiences with ITT Tech and cannot thank everyone enough for the experiences.

Sincerely,

(b)(6)

Jerome A. White

2 May 2016

To whom it may concern,

My name is Matthew King and I am currently enrolled (b)(6) ITT
Technical Institute of Huntington, West Virginia. I am earning my (b)(6)
(b)(6)

I have chosen to (b)(6) at this institute because of the small class size
and hands on learning experience. I (b)(6) It took a
lot of hard work and long hours to (b)(6) and I wanted to get the most out of it when I
decided to use it. I was not let down at all by choosing ITT.

The classrooms are never overcrowded and there is always a hands-on portion of the
curriculum. I am one who learns best by doing, so this was exactly what I was looking for.
Classes started with the basics and advanced at a steady pace. I always have the help of an
instructor should I need it, sometimes even during non-school hours. I've learned everything
from basic AC/DC theory to programming in C and assembly language to program
microcontrollers. My end goal is to work on Programmable Logic Controllers at one of the local
industrial plants. ITT offers a class on PLCs using the industry standard controllers and I have
learned very much.

Before I enrolled at ITT I had (b)(6)
(b)(6) and had no direction with what I was going to do. I had (b)(6) but no idea on
how to even get started. With encouragement from my wife, I walked onto campus and talked to
one of their Representatives who showed me around campus and explained everything about the
different programs. I enrolled that same day and made a choice to change the direction my life
was going. With the help of my family and everyone at ITT, I (b)(6)
(b)(6)

I have enjoyed my time at ITT immensely and I have chosen to also enroll in their
(b)(6)
(b)(6) With the experience I've had I would recommend ITT to anyone.

Sincerely,

(b)(6)

Matthew King

May 2, 2016

To Whom It May Concern:

I am currently a student enrolled in ITT Technical Institute. I am presently in my (b)(6) (b)(6) at the Huntington, West Virginia campus. I actually began classes (b)(6) after completing my first quarter here in Huntington. I enrolled in the ITT campus (b)(6) but was not able to attend classes while working. When I came home to West Virginia I immediately re-enrolled in my Huntington campus for winter classes.

The staff at my school was so helpful to me when I left, besides helping me switch over schools (b)(6) they all went above expectations to make sure my transition was smooth. This made it simple to come back to the Huntington campus (b)(6) Besides being welcomed back, I was able to start classes without much trouble. Our Dean, Tim Adkins, remembered me by name, and made sure the new group of students I would start classes with knew me as well.

Since being back, I have become (b)(6) which has been a great way to get reacquainted with the student body and staff. (b)(6) (b)(6)

I am grateful for ITT Technical Institute. I have been nothing but encouraged by staff, instructors, and fellow students. It was rough during my (b)(6) and back, it could have been easier to not follow through with my education, I attribute a lot of my success and current drive to this campus. I believe it is through the staff and instructors guidance that I have been able to finally decide my career path and pursue it. After obtaining my (b)(6) (b)(6) here, I plan to apply continue my education in the Mortuary Science field, in the hopes of one day becoming an embalmer.

There is not a day that goes by that I do not struggle with balancing full-time school with (b)(6) but when I walk in through the double doors at my school, so much of the bad melts away. Our campus is positive and upbeat, I can hear not only students laughing but staff and instructors interacting with them. They know us by name, they know the classes we struggle with and the personal issues we endure. I truly believe I wouldn't be the person I have become, wouldn't have the personal drive I have developed, if it wasn't for staff members and instructors at my ITT Tech Huntington Campus.

Sincerely,

(b)(6)

Sabreena Lockhart

To whom it may concern,

May 2, 2012

My name is (b)(6) and I am a (b)(6) student at ITT Technical Institute in Huntington West Virginia. I am currently earning my (b)(6)
(b)(6)

I drive 45 minutes, one way, three times a week and pass many colleges on my way to this Learning Institute. My experience here has been phenomenal. After attending a Community College for a few semesters in my younger years, I was looking for something different this time around. I found what I was looking for here at ITT Technical Institute.

The classrooms are not overcrowded and the instructors are quick to help with any problem I might have. My experience has been very hands-on and I have learned many things in a very short period of time. For example, I have learned how to program PLC's and Microprocessors.

(b)(6)

(b)(6)

In conclusion, I have learned a lot about Electrical Engineering in a very short time. My experience here has been wonderful and I would recommend this learning institute to anyone wanting to further their knowledge in a growing and profitable field. Is ITT Technical Institute expensive to attend? Maybe, but in my opinion, you get what you pay for.

I would like to add that I am currently (b)(6) and I plan to continue my education to the Bachelors level, maybe even the Masters level. I would have never dreamed that I would consider a Masters level degree until attending ITT Tech. Thank you for reading my letter.

Sincerely,

(b)(6)

Barry Robinson Jr

May 2, 2016

To Whom It May Concern:

I am a current student at ITT Technical Institute in Huntington, West Virginia. I am enrolled in (b)(6)

(b)(6) West Virginia where I am (b)(6)

(b)(6)

It took my family two years to convince me to come up to ITT Tech. When I called, I got ahold of Dan Fisher. When I came to campus, I was nervous. Dan showed me around campus and explained the programs. During the tour of the campus, I was drawn to the (b)(6) I've always liked to tinker and create stuff. I decided to enroll and started the very next day.

Since then, my experience has been awesome. My representative, Dan, has been very supportive and checks in on me when he sees me on campus. The instructors and staff are friendly, knowledgeable, and they will help in any way that they can. Rob Adkins, the chair of the IT/ET department and Aaron Ward, my microprocessors instructor, have been particularly supportive and helped me out a lot. The electronics classes are really great because you have to learn how to read the schematics, design them, and then see how they work. It has changed my life for the better because I have more self-confidence. I didn't really have any when I started. This program has raised my esteem to the point where I believe I can do anything I want to do. The other students are very helpful and friendly. I've made a lot of good friends here that I plan to keep in contact with in the future.

I've received very good advice from career services regarding resumes and how to present myself in an interview. I feel more prepared now for when I graduate and am going out to start a career. I'm hoping to find employment in a position that will allow me to keep tinkering and designing and creating.

Overall, I'm glad that I decided to enroll at ITT Tech. It has changed my life for the better. I'm learning so much that I never thought I would be able to learn. Maintaining my GPA and being an honors student was something I never thought I would be able to do.

Sincerely,

(b)(6)

Andrea Bostick

James Mickles

May 5, 2016

To whom it may concern,

My name is James Mickles, I would like to let you know how my experience at ITT has been since I've been here. When I decided to start coming to school for my (b)(6)

After getting up the nerves to come and talk to the recruiting staff they made me feel welcome and explained everything in detail for me to understand. They set me up with my recruiter and she was very outgoing and happy person she was glad that I chose to come here for my degree, she even called me every week to check in with me and asked if I need anything so that I could be ready for classes when I started. When I went through my enrollment for the school I had to meet with the financial department and Sarah Crawford explained to me what was going to happen and took me step by step with it all. She went beyond her duty cause when it comes to money I let my wife deal with it. Sarah made sure I understood it before I signed anything and proceeding to the next step.

Since my first day walking through these doors I've had a lot of things going on in my life and between the staff and instructors here they have been beside me each step. I've had a great time here and because of the personal problems I've had they have gone out of their way to make sure if I needed time off that I would get it. (b)(6)

(b)(6)

(b)(6)

but like I told them I had to keep going on. They were there for me even when I wanted to give up and quit but with their support I've stuck it out and I'm making great progress and my grades are holding strong. I've even impressed them too, by

(b)(6)

him to decide to choose this school over the ones that he has options from
it makes me a very proud (b)(6)

So in closing I would like you to know this school has been not only a great
experience but also a blessing in disguise for me. I've made a lot of friends
and memories I will talk about for years to come. As for me no matter what
happens I'll stand tall and proud to call myself a ITT graduate, I'll be coming
back to help in any way I can and I'll let everyone know where this new
James Mickles was born at with pride.

Sincerely yours,

(b)(6)

James Mickles

May 4, 2016

I was asked to write this letter about my time have at ITT highlighting who has had an impact on my life at ITT.

I remember my first day at ITT as I walked into the classroom and realize that I was the only female in the entire class, this could be a good thing or a bad thing. I was determined to make it a good thing on my part. To show the guys that I belong here as much as they do. Then two guys walk into the classroom and one of the guys said what is wrong with you guys there is a beautiful gal seating up here by herself and you are seating all back there. The ice was broken. I made a lot of friends that day. And we have been best friends ever since. You meet a lot of new friends at ITT for life who care about you. Maybe even a fake school husband which can be fun at times if you have a sense of humor.

Who knew back in (b)(6) during my first quarter at ITT my first teacher would have so much impact on my life as a student. I only wish my first teacher would have continue teaching at ITT but instead he the Dean of the school. Eventually Ali Asghary Karahroudy transfer to campus and went to Oakland to took a job and as the Director and Dean of school.

My first teacher at ITT was Ali Asghary Karahroudy, he had the passion and was enthusiastic about being a great teacher. Ali knew exactly how to teach his students. How to get their focus and how to explain the subject so they could understand the topic? Ali also knew exactly what students in his class were having difficult understanding the topic as well. That is how good he was. Ali also knew every student's names by the third week of class. I only wish Ali knew that he has what it takes to become that great professor because he has the heart and passion to drive his students. Not a lot of professors have the passion to deliver it but Ali has it. I only wish he would return to teaching. I really miss his teaching.

The best mathematic teacher ITT I has is Krishna Prasad Lamichhane, Krishna knows his math. It is a shame that he isn't teaching all the math class at ITT. Krishna should be the only teacher teaching the MA1210 and MA1310. That way the students wouldn't be so confused when they got to Krishna class. Krishna took the time to explain the problems to the students when they were confused. I had a hard time with math and would always ask for help for Krishna if that meant staying late after class. Krishna was great with that to help students with their math problems and even ask myself in class if I understand it.

I had Mansorra Syeeda Shah Zaeem for two different classes. Mrs. Shah is a wonderful and sweet teacher. Mrs. Shah sometimes hangs out in the LRC working and interacting with other students and helping them. Mrs. Shah is passionate about teaching and really cares about her students and listens to us when need to talk to someone. Mrs. Shah is an excellent English teacher and I would highly recommend her. I always look forward to seeing Mrs. Shah, she has such a great personality.

What I learn from taking Albert Sidney Brown class even though I thought I couldn't do something I can. If it looks scary and maybe hard at first, you must challenge yourself and push yourself through the challenge to finish it. Life is difficult and nobody is going to make it easy. If life was it would be too boring, there would be no risk at all. Albert Sidney Brown had us work in groups in his class and we had to vote for who was going to be team captains. I never wanted to be team captain. Well that never stop Mr. Brown from elect me to be team captain. Once my name went on the board the class members got to vote to see if I would become captain. I was in a class of all guys. There ended up voting me team captain. I believe they thought I couldn't do the job, I thought I couldn't do the job. I proved myself wrong and I did an excellent job.

I spoke to Mr. Brown recently about him pushing to elect me to team captain and said "why did you do that". He said I believe in you and knew you could do it. I said, "thank you". I said I was scare to do it, but I am so glad you pushed me to do it. I enjoy doing it. Mr. Brown is excellent teacher in so many ways. Mr. Brown can see something in someone that many people can't see in their own eyes. If it wasn't for Mr. Brown, I would never have experience what is was like to be a team captain and take on that role. I was able to do that twice.

Kevin Kenny was Dean of school at ITT. Kevin Kenny was so good and passionate about his job that he wanted to be there for all the students and staff. If you went to the Dean about a problem your classes or future classes regarding Bachelor program and Kevin Kenny didn't know the answer he would work on that till he found a solution. Kevin would check in with you once a week to let you know what was going on. What made Kevin so good at his job was he would meet you one time and he knew your name. Kevin meets so many people and so many students and for him to keep track of you and your name that hard to do. You could also see Kevin Kenny walking the halls of ITT talking to students doing his best to get to know them, because he knows that is the best part of being a Dean is to get to know the students on campus.

Some people would probably think I am crazy to say this but... oh well its my letter. The Director on campus Keith L. Woodman has had an impact of my life during my years at ITT. There have been many different times where the Director has gone out of his way for students to show them they are appreciated. When he found out I was

(b)(6)

(b)(6)

How he found out I have no idea. It's not just about the treats. It's about the fact that the Director makes sure everything is doing alright. If you have a problem, you can go to him and he will help you. I like the fact the Director Keith Woodman is usually walking around the halls talking to the students. The Director Keith Woodman is a friend guy not a stuffy person. Director Keith Woodman enjoys doing his job.

My financial advisor had a big impact on my life at ITT and I miss her much too. Karla Calero-Henriquez doesn't work at ITT any longer. Karla was offered a better job with benefits at another college with better pay. I only wish ITT would have realized what they were losing when they lost Karla. Karla knew how to reach the students and

knew the student schedules. Karla cared about all the students she works with. Not only was she their financial advisor she also bonded with each one of them. Yes, you may think this is wrong but we are not children we are adults, going back to school, some of us to change our careers or some of us to update our careers to better our selves. Karla care about each one of us. If we ever need anything or just needed to talk to someone her door was always open. You could always see Karla walking the halls talking to the students getting to know you better. ITT missed a great opportunity by not promoting Karla Calero-Henriquez.

Over my years at ITT we have gone through many Library Assistants for some reason. Every day when I come to school earlier I know I can look forward to see James Il Camoza in the LRC. James has been a big impact on my life at ITT. When James is missing I am wondering what happen but then I find out he is using on break or some where else. Anyway James is great if you ever need help with your English papers he will be more than happy to proofread your assignment for you. If you are having problems searching a subject in the virtual library, he is the guy to help you out. Or anything really, you have a problem and just need to chat, James is really there for the students. I am glad ITT finally has someone great for the Library. James makes going into the Library fun and enjoyable to do your homework. James also tries to get students involved in games through out different quarter by doing different contests. I hope James stays at ITT for many years he has a great personality.

For the past year one of the students took over the System Support Technician job at ITT. After this student graduated with his Bachelor degree and was offer a better job somewhere else he turns down the job and stay at ITT because he wanted to make sure everything was up and running correctly before he left. This person cares about what happens to every student that walks through those doors. That shows commitment and dedication to what he believes in. And yes this person has had an impact on my life at ITT. This person will go out of his way to help each student no matter what and he actually takes the time too. David J. Mailander is the System Support Technician at ITT. It would be a shame if ITT didn't do whatever they could do to keep him around. I have gotten to know David as a student and also as a System Support Technician as well. David knows his stuff. I have a Mac and even though he doesn't know much about Mac he has always been able to fix whatever problems I have been experiencing. David cares about everyone and is a great personality. I look forward to seeing David every day I go to ITT. It's great talking with him.

Thank you,

(b)(6)

Kellie Dutcher

ITT Technical Institute

The Amazing ITT-Tech Experience

Timothy Wright

5/1/16

(b)(6)

First of all, I love ITT-Technical Institute! It all began when I was back in (b)(6)
(b)(6) I had already been back in (b)(6)
(b)(6)

I worked as a (b)(6)
(b)(6) and the IT personnel were part of my department and I was so thankful to
have them at my side in order to keep our highly detailed and secure missions moving. I
truly admired their knowledge and abilities and that is what inspired me to decide to (b)(6)
(b)(6)
(b)(6)
(b)(6) but today is a new day and based on (b)(6)
(b)(6) I
realize how important it is to be current with today's technologies as well as the ability to
learn and adapt to new technologies.

While in Michigan, I researched how best (b)(6)
(b)(6) including which degree, which school, and at what location. After 6 weeks of
research and comparisons with other schools, I decided that ITT-Technical Institute by
far offered the best of my vision.

I chose to move 2,500 miles away and come to the East Bay of California and
begin classes at ITT-Tech here in Concord, CA in March 2015. I purposely chose to
start off with (b)(6)
(b)(6)
(b)(6)

From day one I have and still enjoy my classes very much and I love the
interaction between the instructors and the students. The truth is that being a student at
ITT-Tech is no joke! It is a lot of hard work! There are a tremendous amount of reading
assignments, research projects, labs, papers to write, not to mention group study
projects as well as developmental projects. A student must be highly disciplined and
know how to manage his/her time to get the most out of their education and at the same
time, produce quality assignments, labs, and research projects. The overall goal of
completing a degree from ITT-Tech is to progress forward and acquire a job or a

(b)(6)

contract or even start one's own project or business using the skills and experience acquired through intensive study and hard work.

Based on my experience with (b)(6) I fit in perfectly with the ITT-Technical Institute learning environment. It is an honor to have (b)(6) as well as a mix of students from all walks of life and backgrounds. I am also very impressed with what the instructors bring to the table. I believe the combination of my work ethics and experience (b)(6) (b)(6) mixed with what my instructors and fellow students bring to the table, is what gives me the motivation and the determination needed to be an excellent student. I am very proud that I have completed (b)(6) (b)(6) and continuing with the same standards.

I would like to give special mention to two of my most favorite instructors, Mr. Franics Dean Ko and Mrs. Mansoor Shah Zaeem.

Mr. Ko was my class instructor in (b)(6) for Introduction to Computer Technology. The bottom line: Mr. Ko is the master of the kinesthetic learning approach. His knowledge and teaching style are brilliant! His style makes perfect sense and matches exactly the style of teaching I received (b)(6)

(b)(6) very high level of proficiency. I attacked Mr. Ko's class with the same approach I learned at (b)(6) which like I said, matched exactly Mr. Ko's teaching style. I learned and retained a tremendous amount of valuable technical information while being a student of Mr. Ko. He is truly the example for all instructors to follow.

I also must give special recognition to Mrs. Zaeem. She was my instructor for Problem Solving Theory, which is an amazing class; I loved it! She is the master of communications. Mrs. Zaeem brings a combination of (b)(6) as well as her years of experience of continuous study and teaching abilities in a very modern and strategic way. She is truly gifted with digging in and taking the time to read every single word of every single student's assignments and she truly engages in motivating everyone to put their gifts together to accomplish amazing results. I looked forward to

writing papers and completing projects because I knew that Mrs. Zaeem was 100% invested in the details of her students' works and at the same time, very demanding and strict when it comes to the grading details. I loved the challenges and motivating atmosphere in her classroom which pushed me to always go above and beyond the standards.

A very important aspect of ITT-Technical Institute is the combination of connections that ITT-Tech has with the community and local businesses and employers. This is critical since the point of gaining a new education is to put it to use and not only acquire valuable experience in your field, but to also give back to the community at the same time. Local businesses will always take on the best employees if they draw from the talent of ITT students. Finding a job these days can be extremely difficult. A student needs to be involved and do his research and take advantage of the networking resources available to him/her while being a student at ITT.

(b)(6) is very happy with the results and the career paths of ITT students and the top government agencies, including the Department of Defense, Department of State, and the National Security Administration, are always eager to acquire the talents of the professionals produced by the ITT-Technical Institute education system. I am very thankful that I made the decision to become a student at ITT and I have a clear vision of my new path in life and I know exactly where my education from ITT will take me. This all fits in perfectly with my background and experience as well as the opportunity to become part of the group of new Information Technology professionals that will transform and re-create our world. It is my goal to complete (b)(6)

(b)(6) I have the 100% confidence and assurance that I have made the correct choice and I am honored to be on this path.

In conclusion, I want it known that being a student at ITT-Technical Institute has also been highly instrumental in helping me (b)(6)

(b)(6)

(b)(6) People like me need to stay busy and have visions and goals to accomplish. There is no better way to do this than to take on new education and training. I am very blessed to have been given this opportunity. Thank you.

(b)(6)

April 29, 2016

To whom it may concern,

This letter is to share my experience at ITT Technical Institute in Concord, California.

I am currently a student and (b)(6)

(b)(6) and I am pleased with the caliber of education I am receiving at ITT Technical Institute. I appreciate many of the faculty members that have gone above and beyond my expectation. I am thankful for Mr. Ko, Dr. Kang, Ms. Shaw and Ms. Weisman for their persistence in the classroom and availability to help the students.

I have also had a positive experience with the Career Services Department at the Concord location. At least once a week, I have been notified about job openings here in the Bay Area. Though my

(b)(6)
(b)(6) I find myself not fearful of finding a job after graduation due to the constant updates from career services.

I am proud to say that I am a student at ITT Technical Institute. I have many faculty members and administrators to thank for preparing me with the skills and knowledge to get into the I.T. Industry.

I appreciate you taking the time to read this letter regarding my experience at ITT Technical Institute.

Sincerely,

A Future Graduate, Clinton Rarey

May 3, 2016

To whom it may concern,

Reflecting on a quote I read somewhere from one of my heroes (b)(6)

(b)(6)

This is the reverberating theme I have seen at this school. The ITT-technical Institute, Concord, CA campus augments the application of current knowledge from instructors that are or have been in professional environments. And that, is the whole point. There are countless fields of study a student may pursue, but learning from those that are or have been successful in those fields gives each student the edge they need to succeed in a competitive job market place.

I am a (b)(6) and have been most of my working life, the person on the ground, on-site, that gets things up and running for the public's day to day operations. These operations needed to maintain or improve the way we live. (b)(6) is the course of study I chose to pursue because of the wide range of employment opportunities in this field of study. My perceptions of the knowledge base required, soft skills needed and networking connections necessary were all enhanced by the courses tailored to create a leader in the industry. We learned the value of communication, collaborating in teams for completion of project deadlines, and the ethical use of information in security. In addition, the resources such as one on one tutoring offered by course instructors, hands on labs, and even the ITT Virtual Library all are available to students to complete assignments.

I'm (b)(6) years of age and still see the value of sharpening my skills to be competitive in today's job market. Technology is growing by leaps, so I intend to leap with it. My return to education was not an easy decision, but (b)(6)

What has ITT done for me? That is usually the question asked by so many today "what's in it for me? **Another layer of sophistication and confidence was added....**

I would like to thank faculty and instructors that boar with me and gave of themselves to be a part of my re-creation. Thanks to Professor Frank Ko, who opened my eyes to the way electronics works, to Professor Burros the transistor genius, to Professor Kalish the micro genius, to Dr, Krishna the mathematical genius, to Professor Van Veen (the soft spoken communicator), to Carla and Precious the finical director geniuses, to Blane who got me a new job, to the receptionists that welcomed me and lastly but not least to Robin who convinced me I wasn't too old to do it again. These people and many others, did their jobs so I could do my job better.

Now I have a deeper understanding of the industries that make our world a little more civilized and how to keep them running.

Thanks, Robert Williams Jr.

(b)(6)

5/3/16

To whom it may concern,

The Career Services department at ITT Technical Institute located in Concord is responsible for connecting me with my current employer. Within a few months of starting my degree here at ITT Tech, I was placed in a job in which I was able to apply my newly developed skills in my field of work. I can personally thank Blaine Sem for sitting down with me to get to know me and what jobs I would be interested in seeking out. He was quick with the right contacts which led to an interview and ultimately my current job I have right now.

The education I received here at ITT Tech has been challenging and rewarding at the same time. Learning something new is always my goal when it comes to school. The teachers have been more than knowledgeable and helpful when it comes to understanding my field of study. This is my first school I have attended where I can safely say I'm graduating with a degree I understand; that's very important to me.

ITT Tech prepared me for my job with (b)(6) without ITT Tech I would not have the skills to have been considered for my career. I started with (b)(6) Since then I have gained many skills in the field I work in, but none of this would have been possible without my start here at ITT Tech. Having the right contacts is part of the process to getting a career in which I can proudly say I enjoy my job. Thanks to ITT Tech and Blaine Sem I can verify this is a career I can see myself doing for a long time.

Thank you for taking the time to read my personal experience with ITT Technical Institute in Concord, CA. I will and have recommended this school to people I know whom would be interested in a similar field of study to mine.

Sincerely,

Tyler Miller

(b)(6)

To Whom It May Concern:

My time spent at ITT Technical institute was one of the most memorable and proudest moments in my life. ITT Tech offered many different majors to offer like Drafting and Design and of course Information Technology but I already had my heart set on (b)(6)

I'm a hands on person and have always been exposed to electronic devices and gadgets. ITT Tech gave me what I wanted and more once I started taking the core classes involving a much needed hands on experience. I enjoyed building projects every quarter just as much as building a solid network of like-minded individuals who shared my passion for (b)(6)

Whenever I was at a loss I could trust that my instructors would help me in every possible way they could to help me thrive in my academic goals. I spent four enriching years at ITT Tech and now have the great privilege of having a solid network of professionals with me along with (b)(6)

Because of my time at ITT Tech I was able to get employed through (b)(6)
(b)(6) I learned a lot while I was at the dialysis manufacturing facility and as I transition into new and exciting careers I cannot stop thinking that this achievement was partly due to commitment and partly due to the professionalism of my school.

My time at ITT Technical proved to be invaluable. The skills I obtained from this campus continue to help me grow as both a person and a professional. I can honestly say that I would not be the valued employee that I am were it not for my time at ITT Concord.

Sincerely,

(b)(6)

Michael Nicomedez

5/3/16

To Whom It May Concern:

My name is Brittany Vargas and I have been asked on behalf of my school to talk about my experiences at ITT Technical Institute, Concord. Even though I was asked to write this, this is both an honor and a privilege because I proudly enjoyed my time at ITT.

I came here because (b)(6) I have always had a fascination with robotics and specifically Mega-man. (b)(6)
(b)(6)

With my time as a student I have created several bonds with a lot of people. I am by nature, a shy person and I usually have difficulties making friends. What ITT Tech excelled at was giving me the ability to communicate efficiently with those around me.

Currently I am employed as a (b)(6) but eventually I intend to go into technology once I find the field I most excel at. That is not to say that I do use my schooling. I am an (b)(6) and recently I have incorporating robotics into (b)(6) It has been taxing to say the least, especially when going for realism, but I have the skills to make these
(b)(6)

While I was at ITT I fell in love with electronic communications. As a fan of robotics aside from programming, the ability to have machine commune with each other either through wireless means of hardwired means always fascinated me. I had a few teachers that I really clicked with. The main teacher was Mr. Francis Reyes who is an amazing instructor. He was there to witness our Diamagnetic Generator for our Capstone project.

I miss my time at ITT, I have a few really good friends that I went to school with. I had a good relationship with a lot of the instructors here and I would not trade that for anything. Looking back now, this has been one of the best decisions I have ever made.

Thank you for your time.

Sincerely,

(b)(6)

Brittany N. Vargas

May 4, 2016

To Whom It May Concern:

I am writing to you to express my gratitude towards ITT Technical Institute in Merrillville, IN.

As a student of ITT Technical Institute, I am proud to be a part such a great legacy and reputation that the school has in the professional world of Information Technology. My experience has been extraordinary in that people in the working world respond differently when I tell them I am an ITT graduate. They are confident in my skillset, knowing that nothing but the best come from ITT.

I think that I am here by Fate. I found ITT when I drove by one day and decided to stop in. I started attending classes the next week, and it drastically changed my life. Within one year, I went from working (b)(6) where I earned more than both the other jobs combined. I am so proud of my job title (b)(6) and I worked hard to learn in my classes at ITT Tech and I graduated with Honors. My instructors worked with me one on one. Before ITT, I knew nothing about computers, but how to turn them on. Now, I know just about everything that has to do with technical networking, and I appreciate the student/teacher interaction, the hands-on training in classes, internship opportunities, and networking with classmates who are now in the field. I have encountered several career opportunities based on the people I have met through ITT.

I am glad that I made the decision to attend ITT and I am now in the (b)(6) (b)(6) What makes me most proud is that my daughter has someone to look up to as her role model, and it is me.

Sincerely,

Anika Williams
ITT Technical Institute

(b)(6)

May 4, 2016

To Whom It May Concern:

I am writing to you to express my gratitude for the opportunity to learn with the passionate subject matter experts that I have encountered at ITT Technical Institute in Merrillville, IN.

As a stepdad to two young men, (b)(6) I have helped them see the importance of education. They have seen me go from working as (b)(6) with an erratic schedule while attending school, to a professional (b)(6) (b)(6) My work ethic and commitment to my education has influenced them to excel in school themselves.

I started studying (b)(6) at a competitor, but I was less than impressed with the education I was receiving there. One day, I happened to be in the neighborhood, and I stopped in. Two weeks later, I was in class and the ITT difference was noticeable right away. The instructors were so engaged and passionate about their subjects and it came across in the classes. The instructors were knowledgeable and can express the message in a way or format until every student has learned. I consider some of my instructors friends in that if I need information or help with something, I can reach out to them. And I have, and the instructor have made themselves available to me.

I am so glad that I will pursue (b)(6) because one day I plan to return to ITT as an instructor, and demonstrate the same passion toward the field and subject that I have experienced myself.

I am very proud that my boys' lives have been influenced by ITT Tech too, because they have seen the change in me since I have been at ITT, and now I am their role model.

Sincerely,

(b)(6)

Steven Noodwang
ITT Technical Institute

May 4, 2016

To who it may concern,

I am writing in regards to my experience at ITT Merrillville, as a former student (b)(6) I've gained the knowledge and experience I needed to become (b)(6) The environment and the teachers were so inviting and they would go above and beyond to make sure I had what I needed. My clinical experience was very helpful as well, It has helped mold me into the (b)(6) (b)(6) I use my clinical experience in my daily practices.

I've held many positions since graduation all due to being a part of ITT. My daughter has decided to take the same path and I would like for her to attend ITT Merrillville as well.

Nicole Griffin

(b)(6)

ITT Merrillville

May 4, 2016

To Whom It May Concern:

I am writing to you to help you see the effect of ITT Technical Institute Merrillville, IN on me as a student.

I started at ITT Tech because it was close to home and classes were held at night, so that I could have my fulltime job while going to school. I have always had an interest in computers, and I built two computers while I was still in high school. I also learned binary in high school, even though my high school did not offer any computer classes. When I started I was interested in both IT and Electronics, but ultimately (b)(6) because I knew that my future would be in

(b)(6)

I am now in the (b)(6) and I have had some experienced instructors who have helped me learn so much. What I really like about ITT is that the instructors have real world experience with current technologies that they bring to class. I had the opportunity to be an

(b)(6)

I still help out when the staff needs me. I am on Onsite Computer Technician for my company and I like the

I am glad I made the decision to come to ITT. I believe I will have opportunities in IT that I would not have had before earning my degree. I also want to teach here one day and help the students learn like I was able to do.

Sincerely,

(b)(6)

James Urschel
ITT Technical Institute

May 2, 2016

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Merrillville, IN.

As a student of ITT Technical Institute, I'm proud of being part of ITT. ITT has become more than a school to me, it is really like a family. I have made many friends for life at ITT. ITT has an atmosphere of a community of learners, and the students and faculty have become like family to me.

After (b)(6) I felt like I really needed to pursue a new career. Ironically, I saw an ITT commercial one day and decided to make that call. At the time, being a single mom with no job, my hope was that going to the school would better my life. I was always in computers and wanted to make it a career. I entered the (b)(6) with great ambition and learned so much along the way. I will (b)(6)

(b)(6)
(b)(6) As a proud student of ITT Technical Institute, I believe that once you make that decision to better yourself and come here, your opportunities are endless.

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Sincerely,

(b)(6)

To Whom It May Concern:

I am writing this to inform you the life-changing experience I have had here at ITT Technical Institute in Merrillville, IN.

What made me decide to come here was that I (b)(6) decided to work smarter and not harder, and find a real career. I chose (b)(6) because I have a passion for (b)(6) so it must run in the family. While I have been here at ITT, it has been so positive and the faculty and staff bring out the best in all of us. My instructors have been so encouraging and used positive-reinforcement. They always offered their assistance after hours, even via email and cell phone. I knew I could count on them to be just a phone call away.

ITT has helped me really be me. ITT has taught me how work in a professional/career setting. I applied to be a Federal Work Study and really got the staff and other students here. I was in charge of the ET and I stepped up to the responsibility and liked it. Everything I learned here has been true and can be applied at work. I know this because during my (b)(6)

Career Services helped me (b)(6) (b)(6) is very innovative and creative, and I am like a kid at Christmas at work because of all the lights, schematics, the circuits we build, and how the solar energy is produced.

I (b)(6) and now I can be like the Incredible Hulk and "smash" walls because when I came here I felt like there were walls all around, and my education and experience at ITT has helped me to tear down those walls.

Thank you for listening to my story.

Sincerely,

(b)(6)

To Whom It May Concern:

I am writing this to inform you of my excellent experience at ITT Technical Institute. When the Director asked me if I would be interested in telling my story, I couldn't turn down the opportunity.

I chose to come to ITT Technical Institute in Merrillville, IN because I felt that I needed to gain the necessary knowledge and resources to move forward in my life and have a career and not just a job. I believe that when you like what you do, it is not really a job. I wanted that. When I spoke with the Reps, I informed them that I was knowledgeable about computer systems and they guided me to IT where there are endless career paths. During my tenure here at ITT, I have been able to (b)(6) with the help of dedicated subject matter experts (the ITT instructors). All the instructors incorporate real life experiences in the classroom which can be used as application to what we will face in the workplace. (b)(6) (b)(6) to gain actual workplace experience in the field. Through my hard work and results, I was offered (b)(6) and prior to graduation.

I (b)(6) and plan to pursue a (b)(6) I want to make myself even more marketable in the IT world.

I appreciate you taking the time to read this letter and I hope to provide inspiration to prospective students looking to start their education at ITT Technical Institute in Merrillville, IN.

Sincerely,

(b)(6)

To Whom It May Concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Merrillville, IN.

As a student of ITT Technical Institute, I'm proud of being part of ITT. ITT has become more than a school to me, it is really like a family. I have made many friends for life at ITT.

I chose ITT because of the class setting being small, and that I could get the one-on-one help that I would need since I had been out of school for so long. I wanted to show my kids that education does not stop even you are grown, and that you can still learn every day. I have always wanted to work in computers, but being a single mother as long as I was, I found that I had to wait to get back to school. (b)(6) I decided it was time for me to step out on faith and do this for myself and for my family. Then I (b)(6) and ITT has been awesome with me in working with me (b)(6) The instructors give me my work and help me to complete my assignments so that (b)(6) (b)(6) I am so proud of myself for all I have accomplished as a student, (b)(6) (b)(6) I have been through so much and I am so proud that I (b)(6) I will (b)(6) and ultimately combine what I learned here with (b)(6)

As a proud student of ITT Technical Institute, I believe the knowledge and skills that I learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Sincerely,

I am writing to you to discuss my experience in attending the ITT Technical Institute in Merrillville, IN.

As a graduate of ITT Technical Institute, I'm proud of the quality of the education I received. Thanks to integrity of the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of being (b)(6)

(b)(6)

(b)(6) I wanted to be a nurse for as long as I remember. I took the entrance test at ITT and got in, and I was very excited. Once I started taking the nursing classes, I knew that I would love Nursing and learning new things all the time. I loved all my ITT Nursing instructors. They were demanding, and knew my potential and made me work for it. My favorite clinical was at (b)(6) and we actually experienced the application of what I was learning in class. I learned the most in clinicals, but all my instructors were very helpful and concerned along the way in my program. The instructors were there for me and took the time to do extra tutoring and studying with me.

Recently, I received (b)(6)

Attention ITT,

I just want to say I enjoyed going to ITT. I learned what I needed to get started in the IT field. I met a lot of great people with the same passion for IT. The teachers I had were knowledgeable on the material I was learning and welcomed and feedback and questions that I had. When I was ready to find a job/internship the career services helped me find a great place to intern. That internship turned into a full time job.

Andrew Anderson

(b)(6)

Dear Mr Ingram:

ITT Technical Institute has been a strongly enriching experience in my life. Between the calm, kind, and helpful learning environment, information gathering, and study techniques. These things will probably stick with me for the rest of my life, and help me in the future either in education, or the professional field.

I came to ITT not knowing about just how important proper scheduling, time managing, and even occasional self-teaching can be in general. I've also found ITT staff to be kind, efficient when dealing with problems, and quick to answer questions and concerns.

I am both honored and excited to work with ITT and their staff towards a better and brighter future.

Sincerely,

George Kloers

(b)(6)

Greetings ITT Tech,

My experience here at ITT Tech has overall been a great one. It has been mix of several experiences from many classes. Most of the classes are hands on teaching, mixture of lectures and practice put into you're learning whether it is on a computer or in a lab. The teachers are awesome and the staff that works behind the scenes is awesome. I have been a part of the staff as a work study at the school and I can tell from my own experience that the work put into the school is very well thought about and every person here cares about your time you input into the school. I encourage you to look into joining ITT Tech if you ever want a school that is hands on and cares about your education.

(b)(6)

ITT-TECH

I attend ITT-TECH currently and will be graduating (b)(6) I have been a student at this campus since (b)(6) The instruction that the faculty here have given me are the keys of success that they are handing me. The best part of coming here is the instruction and the willingness of the instructors to teach.

The way this institution has enhanced my life; giving me the tools that I need to be a more successful student. The career path that I have chosen is software development. The knowledge of the instructor have given me confidence in my new career path. I understand what to expect when I graduate and have the knowledge to ascertain my goals that I have set for myself and family. It has set me on a path that I can be great on now and in future endeavors. I see a change in myself and so does my family since I have been in this school. The school gives me the opportunity to show my children that anything can be achieved by hard work.

Thank you for the time to read this and I believe if other individuals were to come here it would change their outlook on life just as it has on mine.

Sincerely

(b)(6)

Dear Mr. B.

My experience at ITT has encompassed a variety of topics from educational to social. As students, we learned the workings of Trigonometry, the application of composition, the necessity for teamwork, and the ability to create by using our own resources. As human beings, we learned the value of friendship. We made new friends by working on projects together, meeting after school to discuss work, and studying together for upcoming exams.

However, the greatest reward came from learning how to become a (b)(6). After all, that's why we came here. It all began with Dr. Fahey. He taught the value of meditation, healthy nutrition, and what it takes to persevere and be a leader. Lifelong learning was a theme that began with Dr. Fahey and ended with Ms. Patane. We were taught the importance of keeping up with the technology, learning new skills and ways to better ourselves.

Best regards,

(b)(6)

Bart Yeager

To whom it may concern,

My experience with IIT Technical Institute has been just wonderful. From the moment that I came in to talk with a representative I had the best experience of my life. The representative made it very simple and did everything she could to make sure I was happy and continued well into the program. All of the teachers and staff has been just marvelous. Everyone was very helpful and took the time to make sure I understood the content in the class.

At first I was a little worried about going back to school after so many years had passed but as I got further into the program I seen myself changing. I was excelling and meeting all of the goals I had made for myself. IIT Tech truly was turning my life around and pointed me to the path that I needed to take. Near the end of the associate program the career services was amazing! They helped me with my resume and show me techniques to apply during interviews. Thinking I was just going to go and apply for jobs myself, I found many job references in my email from career services. When graduation came I learned that I was (b)(6)
(b)(6) I started a new job that I really enjoy. I would not have been able to make this happen if it wasn't for the help and patience from the staff. It has been a blessing for me. I am now returning for my Bachelors degree.

Thank you so very much,

(b)(6)

To Whom It May Concern,

My name is (b)(6) currently a student of ITT Technical Institute in Charlotte, NC (North Campus), set to graduate (b)(6)
(b)(6)

My experience at ITT has been fantastic, from the time I walked through the doors of the recruiting department, I was filled with excitement, energy and confidence that there is nothing I cannot achieve here at ITT. The recruiting staff made sure all my needs were met to be successful in business and in my educational career. While attending school, my confidence, marketing skills and communication skills have opened doors for me to (b)(6)

As a part of the student body, I began my journey as an online student, which I found the educational resources provided for me easy to follow, and the online staff was very helpful. Upon my return to campus life, (b)(6)

(b)(6)
The on campus staff are exceptionally knowledgeable, supportive and are here to see that you reach all your educational goals and be successful in the career of your choice.

We are family here at ITT Technical Institute, The best life changing choice I have ever made.

Best Regards,

(b)(6)

Thank you for the opportunity to share my experience from attending ITT Tech. In (b)(6)
(b)(5) I enrolled in the (b)(6)
and completed it in (b)(6) Through obtaining more qualifications for career
placement, I received and accepted an offer at (b)(6)
At this site, I am exposed to many industrial manufacturing technologies, such as - robotics,
PLCs, HMIs, vision recognition systems, lasers, and fiber optics. As an (b)(6) I
have easily doubled previous wages I earned working as (b)(6)
It's projected at my current rate to earn (b)(6) this year! Through this, I have become financially
stable enough to secure my family and plan for the future. I have learned that there is a way to
become more successful in life, and the path is through education. I am currently enrolled in ITT
Tech's (b)(6)

(b)(6)

Thanks again!

Sincerely, *ll*

Dr. Saleh

Electronic Chair

ITT Tech Charlotte N.C

My time here at ITT Tech has been the best.

The Instructor, staff the librarian all a goal on helping me succeed in my field of study. I have had a great experience dealing with the campus I met great people, great instructors new friends and, most importantly, the knowledge to build and design or program robotics. I came in with the goal of working for myself in the electronic business, and I have the knowledge now to move forward with some other plans. I have to thanks the instructor help me recognize my weak points and make them stronger and learn how to assess the problem, diagnose the problem and fix the problem on almost any Electronics. Even it's something they didn't teach they gave me the tools and the knowledge to do the research and go and find what I'm looking for help me gain more knowledge on what task or problem is at hand before I react or tackling the problem ITT s gives me a large window do not operate in. Outside of my mechanic world I am now equipped with the knowledge and tools and backup from the inspectors if I need to handle an assist any task at hand I love the school I love my staff and the instructors that help me put together a better plan and I goals go set for the future.

Sincerely best student

(b)(6)

May 2, 2016

Dear Dr. Saleh,

I just wanted to take this opportunity to express my sincere satisfaction with the way ITT Tech has prepared me for my chosen job field electrical engineering. The comprehensive curriculum and hands on learning has been crucial to the development of my on the job skill set. Being able to handle each of the basic components and working with both printed and non-printed circuit boards has definitely translated into real world applications.

ITT Tech has encouraged me to think outside the box, problem solve, and work efficiently within a group setting throughout the education process. Also, instructors have all been more than willing to offer advice and extra help pertaining to projects, homework, and even questions I have had about work. Career services have tirelessly helped me to find the right position that is the perfect fit for me. My experience at ITT Tech has been positive, productive, and fun.

Thanks,

(b)(6)
